End point title	Change from baseline in Disease Activity Score-CRP (DAS28)
-----------------	--

End point description:

Changes in DAS28 (utilizing hsCRP) from baseline to over entire study duration up to Month 60. The DAS28 is a measure of disease activity in PsA based on Swollen and Tender Joint Counts (out of a total of 28), hsCRP and the Patient's Global Assessment of Disease Activity. A DAS28 score greater than 5.1 implies active disease, equal to or less than 3.2 low disease activity, and less than 2.6 remission. This measure represents change in scores - not the actual scores.
