

## Clinical trial results:

### A Phase 4, Randomized, Double-Blind Study with a Safety Extension Period to Evaluate the Effect of Aspirin on Flushing Events in Subjects with Relapsing-Remitting Multiple Sclerosis Treated with Tecfidera™ (Dimethyl Fumarate) Delayed-Release Capsules

#### Summary

EudraCT number	2013-001895-40
Trial protocol	IE
Global end of trial date	11 November 2015

#### Results information

Result version number	v1 (current)
This version publication date	17 November 2016
First version publication date	17 November 2016

#### Trial information

##### Trial identification

Sponsor protocol code	109MS406
-----------------------	----------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02090413
WHO universal trial number (UTN)	-

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

---

**Results analysis stage**

---

Analysis stage	Final
Date of interim/final analysis	11 November 2015
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	11 November 2015
Was the trial ended prematurely?	No

Notes:

---

**General information about the trial**

---

Main objective of the trial:

The primary objective of the study is to evaluate whether 150 mg enteric-coated aspirin (acetylsalicylic acid [ASA]) taken twice a day (BID) with dimethyl fumarate (DMF) administration or 75 mg enteric-coated ASA taken once daily in the morning (QAM) with DMF administration reduces the incidence and/or severity of flushing events in subjects with relapsing-remitting multiple sclerosis (RRMS) compared with ASA-placebo administered with DMF in the clinical practice setting.

Secondary objectives of this study are to evaluate the safety and tolerability of DMF administered with and without enteric-coated ASA in the clinical practice setting; and to evaluate the impact of DMF administration on quality of life as measured by the Short Form 36 (SF-36®) and European Quality of Life – 5 Dimensions – 5 Levels (EQ-5D-5L) questionnaires.

Protection of trial subjects:

Written informed consent was obtained from each subject prior to evaluations being performed for eligibility. Subjects were given adequate time to review the information in the informed consent and were allowed to ask, and have answered, questions concerning all portions of the conduct of the study. Through the informed consent process each subject was made aware of the purpose of the study, the procedures, the benefits and risks of the study, the discomforts and the precautions taken. Any side effects or other health issues occurring during the study were followed up by the study doctor. Subjects were able to stop taking part in the study at any time without giving any reason.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	30 May 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

---

**Population of trial subjects**

---

**Subjects enrolled per country**

Country: Number of subjects enrolled	Ireland: 31
Country: Number of subjects enrolled	United Kingdom: 210
Worldwide total number of subjects	241
EEA total number of subjects	241

Notes:

---

**Subjects enrolled per age group**

---

In utero	0
Preterm newborn - gestational age < 37 wk	0

Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	240
From 65 to 84 years	1
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

A total of 241 subjects with RRMS were enrolled at 18 study sites across the UK and Ireland.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Blinding implementation details:

All study staff were blinded to the subject treatment assignments throughout the Double-Blind Period of the study. To maintain the study blind, subject treatment assignments were not shared with the subjects, their families, or any member of the study team, either at the study site or at Biogen.

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	DMF + ASA-Placebo BID

Arm description:

DMF 120 mg taken twice daily (BID) for the first 7 days and 240 mg BID from Week 2 through Week 48. ASA-Placebo taken BID from Day 1 through Week 4. (Between Weeks 5 and 8, ASA was prohibited; between Weeks 9 and 48, ASA was allowed as needed.)

Arm type	Experimental
Investigational medicinal product name	Tecfidera
Investigational medicinal product code	BG00012
Other name	dimethyl fumarate, DMF
Pharmaceutical forms	Gastro-resistant capsule, hard
Routes of administration	Oral use

Dosage and administration details:

DMF was taken according to the prevailing product label; however, dose modifications were not allowed during the Double-Blind Period. During the Safety Extension Period, modification of the DMF dose was allowed at the discretion of the Investigator according to the prevailing product label.

Investigational medicinal product name	ASA-Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Subjects had to take blinded ASA/ASA-placebo with each dose of DMF for the first 28 days of the study, regardless of when the Week 4 Visit was performed. Missed doses were not made up.

<b>Arm title</b>	DMF + ASA 75 mg QAM
------------------	---------------------

Arm description:

DMF 120 mg BID for the first 7 days and 240 mg BID from Week 2 through Week 48. ASA 75 mg QAM and ASA-Placebo in the evening from Day 1 through Week 4. (Between Weeks 5 and 8, ASA was prohibited; between Weeks 9 and 48, ASA was allowed as needed.)

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Tecfidera
Investigational medicinal product code	BG00012
Other name	dimethyl fumarate, DMF
Pharmaceutical forms	Gastro-resistant capsule, hard
Routes of administration	Oral use

Dosage and administration details:

DMF was taken according to the prevailing product label; however, dose modifications were not allowed during the Double-Blind Period. During the Safety Extension Period, modification of the DMF dose was allowed at the discretion of the Investigator according to the prevailing product label.

Investigational medicinal product name	ASA-Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Subjects had to take blinded ASA/ASA-placebo with each dose of DMF for the first 28 days of the study, regardless of when the Week 4 Visit was performed. Missed doses were not made up.

Investigational medicinal product name	Enteric-coated ASA
Investigational medicinal product code	
Other name	aspirin
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Subjects had to take blinded ASA/ASA placebo with each dose of DMF for the first 28 days of the study, regardless of when the Week 4 Visit was performed. Missed doses were not made up.

<b>Arm title</b>	DMF + ASA 150 mg BID
------------------	----------------------

Arm description:

DMF 120 mg BID for the first 7 days and 240 mg BID from Week 2 through Week 48. ASA 150 mg BID from Day 1 through Week 4. (Between Weeks 5 and 8, ASA was prohibited; between Weeks 9 and 48, ASA was allowed as needed.)

Arm type	Experimental
Investigational medicinal product name	Tecfidera
Investigational medicinal product code	BG00012
Other name	dimethyl fumarate, DMF
Pharmaceutical forms	Gastro-resistant capsule, hard
Routes of administration	Oral use

Dosage and administration details:

DMF was taken according to the prevailing product label; however, dose modifications were not allowed during the Double-Blind Period. During the Safety Extension Period, modification of the DMF dose was allowed at the discretion of the Investigator according to the prevailing product label.

Investigational medicinal product name	Enteric-coated ASA
Investigational medicinal product code	
Other name	aspirin
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Subjects had to take blinded ASA/ASA-placebo with each dose of DMF for the first 28 days of the study, regardless of when the Week 4 Visit was performed. Missed doses were not made up.

<b>Number of subjects in period 1</b>	<b>DMF + ASA-Placebo BID</b>	<b>DMF + ASA 75 mg QAM</b>	<b>DMF + ASA 150 mg BID</b>

## Baseline characteristics

### Reporting groups

Reporting group title	DMF + ASA-Placebo BID
Reporting group description: DMF 120 mg taken twice daily (BID) for the first 7 days and 240 mg BID from Week 2 through Week 48. ASA-Placebo taken BID from Day 1 through Week 4. (Between Weeks 5 and 8, ASA was prohibited; between Weeks 9 and 48, ASA was allowed as needed.)	
Reporting group title	DMF + ASA 75 mg QAM
Reporting group description: DMF 120 mg BID for the first 7 days and 240 mg BID from Week 2 through Week 48. ASA 75 mg QAM and ASA-Placebo in the evening from Day 1 through Week 4. (Between Weeks 5 and 8, ASA was prohibited; between Weeks 9 and 48, ASA was allowed as needed.)	
Reporting group title	DMF + ASA 150 mg BID
Reporting group description: DMF 120 mg BID for the first 7 days and 240 mg BID from Week 2 through Week 48. ASA 150 mg BID from Day 1 through Week 4. (Between Weeks 5 and 8, ASA was prohibited; between Weeks 9 and 48, ASA was allowed as needed.)	

Reporting group values	DMF + ASA-Placebo BID	DMF + ASA 75 mg QAM	DMF + ASA 150 mg BID
Number of subjects	81	80	80
Age categorical Units: Subjects			

Age Continuous Units: years			
arithmetic mean	40.17	39.48	40.16
standard deviation	± 10.63	± 8.48	± 8.23
Gender, Male/Female Units: participants			
Female	59	62	60
Male	22	18	20

Reporting group values	Total		
Number of subjects	241		
Age categorical Units: Subjects			

Age Continuous Units: years			
arithmetic mean			
standard deviation	-		
Gender, Male/Female Units: participants			
Female	181		
Male	60		

## End points

### End points reporting groups

Reporting group title	DMF + ASA-Placebo BID
Reporting group description: DMF 120 mg taken twice daily (BID) for the first 7 days and 240 mg BID from Week 2 through Week 48. ASA-Placebo taken BID from Day 1 through Week 4. (Between Weeks 5 and 8, ASA was prohibited; between Weeks 9 and 48, ASA was allowed as needed.)	
Reporting group title	DMF + ASA 75 mg QAM
Reporting group description: DMF 120 mg BID for the first 7 days and 240 mg BID from Week 2 through Week 48. ASA 75 mg QAM and ASA-Placebo in the evening from Day 1 through Week 4. (Between Weeks 5 and 8, ASA was prohibited; between Weeks 9 and 48, ASA was allowed as needed.)	
Reporting group title	DMF + ASA 150 mg BID
Reporting group description: DMF 120 mg BID for the first 7 days and 240 mg BID from Week 2 through Week 48. ASA 150 mg BID from Day 1 through Week 4. (Between Weeks 5 and 8, ASA was prohibited; between Weeks 9 and 48, ASA was allowed as needed.)	

### Primary: Percentage of Subjects Reporting Overall Flushing Events During the First 4 Weeks of Treatment, as Assessed by the Modified Global Flushing Severity Scale (MGFSS)

End point title	Percentage of Subjects Reporting Overall Flushing Events During the First 4 Weeks of Treatment, as Assessed by the Modified Global Flushing Severity Scale (MGFSS) <sup>[1]</sup>
End point description: Subject-reported flushing events during the first 4 weeks of treatment, recorded on the hand-held subject reporting device (eDiary) as assessed by MGFSS. The MGFSS measures the side effects related to flushing during the past 24 hours. Flushing means redness, warmth, tingling or itching of the skin. Each question is rated on a scale from 0 (no flushing side effects) to 10 (extreme flushing side effects). Day 1 data are not included in the analysis because MGFSS question refers to last 24 hours flushing score.	
End point type	Primary
End point timeframe: Day 2 to Week 4	
Notes: [1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point. Justification: Descriptive statistics are presented for this end point, per protocol.

### Secondary: Worst Severity Scores of Overall Flushing During Weeks 5-8 and Weeks 9-12 of the Study, as Assessed by MFSS

End point title	Worst Severity Scores of Overall Flushing During Weeks 5-8 and Weeks 9-12 of the Study, as Assessed by MFSS
End point description:	
Worst severity of subject-reported flushing events during Weeks 5-8 and Weeks 9-12 of the study recorded on the eDiary as assessed by MFSS. MFSS questionnaire measures the side effects related to flushing following drug administration. Flushing means redness, warmth, tingling or itching of the skin. This questionnaire relates only to the period of time since the investigational drug was administered and was to be completed within 10 hours of taking the study drug (2 times/day). Each question is rated on a scale from 0 (no flushing side effects) to 10 (extreme flushing side effects).

## Secondary: Change from Baseline at Weeks 24 and 48 in Quality of Life Measurements as Assessed by Short Form-36 (SF-36) Questionnaire: Physical Component Summary (PCS)

End point title	Change from Baseline at Weeks 24 and 48 in Quality of Life Measurements as Assessed by Short Form-36 (SF-36) Questionnaire: Physical Component Summary (PCS)
-----------------	--

End point description:

SF-36 is a self-administered, generic health status questionnaire consisting of 36 questions that measure 8 health concepts: physical functioning, role limitations due to physical problems, bodily pain, general health perception, vitality, social functioning, role limitations due to emotional problems and mental health. The score for a domain is an average of the individual question scores, which are scaled 0 (worst health-related quality of life) to 100 (best health-related quality of life). Score from physical function, role physical, bodily pain, and general health domains were averaged to calculate PCS. Total score range for PCS was 0 (lowest level of physical functioning) to 100 (highest level of physical functioning).

Change at Week 24; n=66, 63, 60	-2.318 (± 12.579)	-0.587 (± 17.24)	-2.95 (± 16.326)	
Change at Week 48/ET; n=66, 64, 63	-3.061 (± 18.053)	-0.438 (± 17.834)	-1.476 (± 13.201)	

### Statistical analyses

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Screening through Week 48

Assessment type	Systematic
-----------------	------------

### Dictionary used

Dictionary name	MedDRA
-----------------	--------

Dictionary version	18.0
--------------------	------

### Reporting groups

Reporting group title	DMF + ASA-Placebo BID
-----------------------	-----------------------

Reporting group description:

DMF 120 mg taken BID for the first 7 days and 240 mg BID from Week 2 through Week 48. ASA-Placebo taken BID from Day 1 through Week 4. (Between Weeks 5 and 8, ASA was prohibited; between Weeks 9 and 48, ASA was allowed as needed.)

Reporting group title	DMF + ASA 75 mg QAM
-----------------------	---------------------

Reporting group description:

DMF 120 mg BID for the first 7 days and 240 mg BID from Week 2 through Week 48. ASA 75 mg QAM and ASA-Placebo in the evening from Day 1 through Week 4. (Between Weeks 5 and 8, ASA was prohibited; between Weeks 9 and 48, ASA was allowed as needed.)

Reporting group title	DMF + ASA 150 mg BID
-----------------------	----------------------

Reporting group description:

DMF 120 mg BID for the first 7 days and 240 mg BID from Week 2 through Week 48. ASA 150 mg BID from Day 1 through Week 4. (Between Weeks 5 and 8, ASA was prohibited; between Weeks 9 and 48, ASA was allowed as needed.)

Serious adverse events	DMF + ASA-Placebo BID	DMF + ASA 75 mg QAM	DMF + ASA 150 mg BID
Total subjects affected by serious adverse events			
subjects affected / exposed	4 / 81 (4.94%)	8 / 80 (10.00%)	5 / 80 (6.25%)
number of deaths (all causes)	0	0	0
number of deaths resulting from adverse events			
Neoplasms benign, malignant and unspecified (incl cysts and polyps)

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
17 April 2014	The primary reasons for amending the protocol were to specify that the storage temperature for aspirin should not exceed 25°C (77°F), and to clarify contraception requirements.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
