

Clinical trial results:

A Phase III Multicenter, Double-Blind, Randomized, Active Comparator-Controlled Clinical Trial to Evaluate the Safety and Efficacy of Reformulated Raltegravir 1200 mg Once Daily Versus Raltegravir 400 mg Twice Daily, Each in Combination With TRUVADA™, in Treatment- Naïve HIV-1 Infected Subjects

Summary

EudraCT number	2013-001939-47
Trial protocol	IT ES PT BE GB
Global end of trial date	19 December 2016

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	19 December 2016
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	19 December 2016
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The main objective was to evaluate the safety and efficacy of reformulated raltegravir (MK-0518) 1200 mg once daily in combination with TRUVADA™ versus raltegravir 400 mg twice daily in combination with TRUVADA™ in HIV-1 infected, treatment-naïve participants. The primary hypothesis being tested is that reformulated raltegravir 1200 mg once-daily is non-inferior to raltegravir 400 mg twice-daily, each in combination therapy with TRUVADA™, as assessed by the proportion of participants achieving HIV-1 ribonucleic acid (RNA) <40 copies/mL at Week 48.

Protection of trial subjects:

This study was conducted in conformance with Good Clinical Practice standards and applicable country and/or local statutes and regulations regarding ethical committee review, informed consent, and the protection of human subjects participating in biomedical research.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	23 May 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Argentina: 16
Country: Number of subjects enrolled	Australia: 30
Country: Number of subjects enrolled	Belgium: 18
Country: Number of subjects enrolled	Canada: 21
Country: Number of subjects enrolled	Chile: 25
Country: Number of subjects enrolled	Colombia: 19
Country: Number of subjects enrolled	France: 35
Country: Number of subjects enrolled	Germany: 54
Country: Number of subjects enrolled	Guatemala: 35
Country: Number of subjects enrolled	Israel: 22
Country: Number of subjects enrolled	Italy: 44
Country: Number of subjects enrolled	Malaysia: 26
Country: Number of subjects enrolled	Peru: 8
Country: Number of subjects enrolled	Philippines: 10
Country: Number of subjects enrolled	Portugal: 29
Country: Number of subjects enrolled	Russian Federation: 40
Country: Number of subjects enrolled	South Africa: 57

Country: Number of subjects enrolled	Spain: 37
Country: Number of subjects enrolled	Switzerland: 16
Country: Number of subjects enrolled	Taiwan: 14
Country: Number of subjects enrolled	Thailand: 52
Country: Number of subjects enrolled	United Kingdom: 19
Country: Number of subjects enrolled	United States: 175
Worldwide total number of subjects	802
EEA total number of subjects	236

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	795
From 65 to 84 years	7
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Males and females 18 years of age or older who were HIV-1 positive and naïve to antiretroviral therapy (ART) were enrolled in this trial.

Period 1

Period 1 title	Overall Study
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Reformulated Raltegravir

Arm description:

Reformulated raltegravir 1200 mg (2x 600 mg tablets) orally once daily plus placebo to raltegravir 1 tablet orally twice daily plus TRUVADA™ orally once daily for 96 weeks.

Arm type	Experimental
Investigational medicinal product name	Reformulated Raltegravir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1200 mg (2x 600 mg tablets) orally once daily

Investigational medicinal product name	TRUVADA™
Investigational medicinal product code	
Other name	Emtricitabine /tenofovir disoproxil fumarate
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

200/300 mg tablet administered once daily with food (open-label)

Arm title	Raltegravir
------------------	-------------

Arm description:

Raltegravir 400 mg tablet orally twice daily plus placebo to reformulated raltegravir 2 tablets orally once daily plus TRUVADA™ orally once daily for 96 weeks.

Arm type	Experimental
Investigational medicinal product name	Raltegravir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

400 mg tablet orally twice daily

Investigational medicinal product name	TRUVADA™
Investigational medicinal product code	
Other name	Emtricitabine /tenofovir disoproxil fumarate
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
200/300 mg tablet administered once daily with food (open-label)	
Investigational medicinal product name	Placebo to Reformulated Raltegravir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
Two tablets orally twice daily	

Number of subjects in period 1	Reformulated Raltegravir	Raltegravir
Started	533	269
Completed	531	266
Not completed	2	3
Not Treated	2	3

Period 2	
Period 2 title	Treated Participants
Is this the baseline period?	Yes ^[1]
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Assessor

Arms	
Are arms mutually exclusive?	Yes
Arm title	Reformulated Raltegravir

Arm description:

Reformulated raltegravir 1200 mg (2x 600 mg tablets) orally once daily plus placebo to raltegravir 1 tablet orally twice daily plus TRUVADA™ orally once daily for 96 weeks.

Arm type	Experimental
Investigational medicinal product name	Reformulated Raltegravir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1200 mg (2x 600 mg tablets) orally once daily

Investigational medicinal product name	TRUVADA™
Investigational medicinal product code	
Other name	Emtricitabine /tenofovir disoproxil fumarate
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

200/300 mg tablet administered once daily with food (open-label)

Arm title	Raltegravir
------------------	-------------

Arm description:

Raltegravir 400 mg tablet orally twice daily plus placebo to reformulated raltegravir 2 tablets orally once daily plus TRUVADA™ orally once daily for 96 weeks.

Arm type	Experimental
Investigational medicinal product name	Raltegravir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

400 mg tablet orally twice daily

Investigational medicinal product name	TRUVADA™
Investigational medicinal product code	
Other name	Emtricitabine /tenofovir disoproxil fumarate
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

200/300 mg tablet administered once daily with food (open-label)

Investigational medicinal product name	Placebo to Reformulated Raltegravir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Two tablets orally twice daily

Notes:

[1] - Period 1 is not the baseline period. It is expected that period 1 will be the baseline period.

Justification: Period 1, enrolled participants, was not the baseline period. Instead Period 2, treated participants, was assigned as the baseline period.

Number of subjects in period 2^[2]	Reformulated Raltegravir	Raltegravir
Started	531	266
Completed	467	227
Not completed	64	39
Adverse event, serious fatal	-	1
Physician decision	7	-
Consent withdrawn by subject	18	11
Adverse event, non-fatal	7	6
Non-Compliance With Study Drug	8	5
Pregnancy	4	-

Lost to follow-up	14	13
Lack of efficacy	6	3

Notes:

[2] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: The worldwide number of enrolled participants, was not the baseline period. Instead treated participants, was assigned as the baseline period.

number (confidence interval 95%)	88.9 (85.9 to 91.4)	88.3 (83.9 to 91.9)		

Statistical analyses

Statistical analysis title	Reformulated Raltegravir minus Raltegravir
----------------------------	--

Statistical analysis description:

The 95% Confidence Interval (CI) for the treatment differences in percent response were calculated using stratum-adjusted Mantel-Haenszel method with the difference weighted by the harmonic mean of sample size per arm for each stratum (screening HIV-1 RNA $\leq 100,000$ copies/mL or HIV-1 RNA $> 100,000$ copies/mL).

Comparison groups	Reformulated Raltegravir v Raltegravir
Number of subjects included in analysis	797
Analysis specification	Pre-specified
Analysis type	non-inferiority ^[1]
Parameter estimate	Estimated Difference
Point estimate	0.51
Confidence interval	
level	95 %
sides	2-sided
lower limit	-4.204
upper limit	5.223

Notes:

[1] - Reformulated Raltegravir is concluded non-inferior to Raltegravir if the lower bound of the 95% CI for the difference in percent response is above -10 percentage points.

End point title	Percentage of Participants with a Serious and Drug-Related AE after 96 weeks of Treatment
-----------------	---

End point description:

A SAE is any AE occurring at any dose or during any use of Sponsor's product that does the following: results in death; is life threatening; results in persistent or significant disability/incapacity; results in or prolongs an existing inpatient hospitalization; is a congenital anomaly/birth defect; is a cancer; is associated with an overdose; is another important medical event. An investigator who is a qualified physician evaluated whether or not a SAE is drug-related. The population analyzed was all randomized participants who received at least one dose of study treatment.

End point type	Secondary
----------------	-----------

End point timeframe:

Up to Week 98 (96 weeks of treatment + 2 weeks of follow up)

End point values	Reformulated Raltegravir	Raltegravir		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	531	266		
Units: Percentage of participants				
number (not applicable)	0.2	0.8		

Statistical analyses

No statistical analyses for this end point

Secondary: Percentage of Participants Who Discontinued from Drug Therapy Due to an AE at Week 48

End point title	Percentage of Participants Who Discontinued from Drug Therapy Due to an AE at Week 48
End point description:	
An AE is defined as any untoward medical occurrence in a participant administered a pharmaceutical product and which does not necessarily have to have a causal relationship with this treatment. An AE can therefore be any unfavourable and unintended sign (including an abnormal laboratory finding), symptom, or disease temporally associated with the use of a medicinal product or protocol specified procedure, whether or not considered related to the medicinal product or protocol-specified procedure. Any worsening (i.e., any clinically significant adverse change in frequency and/or intensity) of a preexisting condition that is temporally associated with the use of the Sponsor's product, is also an AE. The population analyzed was all randomized participants who received at least one dose of study treatment.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Up to Week 98 (96 weeks of treatment + 2 weeks of follow up)

Adverse event reporting additional description:

All randomized participants who received at least one dose of study treatment.

Assessment type	Systematic

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
22 October 2014	Amendment 1 was to extend the screening period time as well as to modify the inclusion criteria regarding birth control to allow local regulations to be followed. In addition there was additional text added to define antiretroviral therapy to be used during the trial; define complete physical examination; define type of meal consumed before or after dose of study medication; update to emergency call center information; update regarding unblinded trial statistician; additional details for local discard requirements.
08 September 2015	Amendment 2 was completed to switch from electronic to paper study diaries.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
