Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	18 December 2015
Is this the analysis of the primary completion data?	Yes
Primary completion date	09 March 2015
Global end of trial reached?	Yes
Global end of trial date	09 March 2015
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate 3 doses of samidorphan co-administered with olanzapine (ALKS 3831) in subjects with schizophrenia to:

(1) evaluate ALKS 3831 as a treatment of schizophrenia; (2) assess the safety and tolerability of ALKS 3831; (3) characterize the impact of samidorphan component of ALKS 3831 on weight and other metabolic factors.

Protection of trial subjects:

All eligible subjects were initiated on open-label olanzapine for 1 week. Subjects returned on Day 8 for a 2-night inpatient stay and the start of the 12-week double-blind olanzapine-controlled treatment period. Subjects were discharged from the inpatient unit on Day 10. Subjects who were taking antipsychotic medications were tapered off of their prior antipsychotic medication within 2 weeks after initiation. This cross-taper from prior antipsychotic treatment to olanzapine was conducted under the care and discretion of the investigator and was consistent with current clinical practice.

This study used an independent Data Safety Monitoring Board to monitor for tolerability of study drug. The DSMB reviewed safety data 1 week after about 40, 96, and 150 subjects had been randomized.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	28 June 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Bulgaria: 50
Country: Number of subjects enrolled	Czech Republic: 1
Country: Number of subjects enrolled	United States: 258
Worldwide total number of subjects	309
EEA total number of subjects	51

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	309
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Subjects were enrolled in study sites located in 3 countries: United States, Bulgaria, and the Czech Republic. Subjects completed a 7-day lead-in period before being randomized into the 12-week double-blind treatment period. Baseline data includes subjects who completed the lead-in period and were randomized to include study treatment.

Pre-assignment

Screening details:

This study included subjects who had a diagnosis of schizophrenia who had not been exposed to olanzapine, clozapine, mesoridazine, chlorpromazine, or thioridazine at any time in the 3 months prior to screening.

Period 1

Period 1 title	Study Part A
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Monitor, Data analyst, Subject, Carer, Assessor

Blinding implementation details:

All clinical trial personnel were blinded to treatment assignment until Part A of the study was completed. Randomization was performed centrally through an Interactive Web Response System (IWRS).

Arms

Are arms mutually exclusive?	Yes
Arm title	Olanzapine plus Placebo

Arm description:

Olanzapine dose (as determined by Investigator) + placebo

Arm type	Active comparator
Investigational medicinal product name	ALKS 3831 Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Olanzapine (as determined by Investigator) + placebo

Arm title	ALKS 3831 5 mg
------------------	----------------

Arm description:

olanzapine + 5 mg samidorphan

Arm type	Experimental
Investigational medicinal product name	ALKS 3831
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Daily dose

Olanzapine (as determined by Investigator) + 5 mg samidorphan

Arm title	ALKS 3831 10 mg
------------------	-----------------

Arm description:

olanzapine + 10 mg samidorphan

Arm type	Experimental
Investigational medicinal product name	ALKS 3831
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Daily dose

Olanzapine (as determined by Investigator) + 10 mg samidorphan

Arm title	ALKS 3831 20 mg
------------------	-----------------

Arm description:

Olanzapine + 20 mg samidorphan

Arm type	Experimental
Investigational medicinal product name	ALKS 3831
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Daily dose

Olanzapine (as determined by Investigator) + 20 mg samidorphan

Period 2

Period 2 title	Study Part B
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Assessor

Blinding implementation details:

In Part B all participating subjects received active treatment with samidorphan and olanzapine. The dose level of samidorphan during Part B remained blinded to subjects and study personnel. The sponsor's representatives were unblinded to the samidorphan dose level in Part B but only after Part A data was unblinded.

Arms

Are arms mutually exclusive?	Yes
Arm title	Olz+Pbo/ALKS 3831 20 mg

Arm description:

Part A = olanzapine (as determined by Investigator) + placebo

Part B = olanzapine (as determined by Investigator) + 20 mg samidorphan

Arm type	Experimental

Lack of efficacy	-

Notes:

[1] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: 3 subjects discontinued the study after completing Part A, and did not participate in Part B.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
05 June 2013	Included CRO Medical Monitor information; clarified study design and instructions for assessments; Modified primary and secondary endpoints, subject inclusion and exclusion criteria, schedule of assessments, timing of assessments with respect to dosing, ICF description, and description of samidorphan drug structure and study drug tablets.
19 November 2013	Czech Republic only - included information on contraception requirements, breaking of study blind by investigators, and data handling and record keeping procedures.
10 December 2013	Bulgaria only - modified the eligibility criteria and consent procedures.
17 December 2013	Czech Republic only - included clarification of unblinding procedures.
26 February 2014	US and Bulgaria only - modified eligibility criteria, consent procedures, contraception requirements, objectives, endpoints, and statistical methods, sample size and visit windows; clarified end-of-treatment versus early termination procedures and benzodiazepine use; addition of a partial list of Cytochrome P450 3A4 inhibitors, removal of restrictions on "nonessential" medications; and addition of procedures for capturing adverse events of special interest and determining the relationship between adverse events and study drug.
13 June 2014	Czech Republic only - included updated Medical Monitor information, clarification of procedures for breaking study blind in an emergency, modification of informant/caregiver criteria under study eligibility criteria, and contraception requirements.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
