

## Clinical trial results:

### An Open-label, Multicenter, Phase 2 Study of Oral IXAZOMIB (MLN9708) in Adult Patients With Relapsed and/or Refractory Follicular Lymphoma Summary

EudraCT number	2013-002302-32
Trial protocol	BE GB IT ES
Global end of trial date	23 March 2017

#### Results information

Result version number	v3 (current)
This version publication date	26 January 2020
First version publication date	05 April 2018
Version creation reason	• New data added to full data set Updating information.

#### Trial information

##### Trial identification

Sponsor protocol code	C16017
-----------------------	--------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01939899
WHO universal trial number (UTN)	U1111-1164-7551

Notes:

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	23 March 2017
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	23 March 2017
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The main objective of this study is to evaluate the anti-tumor activity of oral Ixazomib as measured by overall response rate (ORR) in adult subjects with relapsed and/or refractory follicular lymphoma (FL).

Protection of trial subjects:

All study subjects were required to read and sign an Informed Consent Form.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	31 October 2013
Long term follow-up planned	Yes
Long term follow-up rationale	Safety, Efficacy
Long term follow-up duration	1 Months
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 9
Country: Number of subjects enrolled	Canada: 3
Country: Number of subjects enrolled	United Kingdom: 6
Country: Number of subjects enrolled	Italy: 5
Country: Number of subjects enrolled	United States: 6
Worldwide total number of subjects	29
EEA total number of subjects	20

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0

Adults (18-64 years)	11
From 65 to 84 years	18
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Subjects took part in the study at 11 investigative sites in the United States, Belgium, Canada, United Kingdom and Italy from 31 October 2013 to 23 March 2017.

### Pre-assignment

Screening details:

Subjects with follicular lymphoma (FL) prior to treatment were enrolled in this 2 phase study: Lead in dose finding phase in which maximum tolerated dose (MTD) and recommended phase 2 dose (RP2D) of ixazomib was evaluated and Phase 2 proteasome subunit beta type-1 (PSMB1) was done to evaluate the safety, efficacy, tolerability of ixazomib.

### Period 1

Period 1 title	Baseline Period
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Lead-in Dose Finding Phase: Ixazomib 4 mg

Arm description:

Ixazomib 4 milligram (mg), solution, orally, once on Day 1, 8, and 15 followed by 13 days of rest in a 28-days treatment cycle for a maximum of 29 cycles, or progressive disease (PD) or the start of alternate therapies during lead-in dose finding in non-hodgkin lymphoma (NHL) subjects.

Arm type	Experimental
Investigational medicinal product name	Ixazomib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for oral solution
Routes of administration	Oral use

Dosage and administration details:

Ixazomib 4 milligram (mg), solution, orally, once on Day 1, 8, and 15 followed by 13 days of rest in a 28-days treatment cycle for a maximum of 29 cycles, or progressive disease (PD) or the start of alternate therapies during lead-in dose finding in NHL subjects.

<b>Arm title</b>	Lead-in Dose Finding Phase: Ixazomib 5.3 mg
------------------	---

Arm description:

Ixazomib 5.3 mg, solution, orally, once on Day 1, 8, and 15 followed by 13 days of rest in a 28-days treatment cycle for a maximum of 29 cycles, or PD or the start of alternate therapies during lead-in dose finding in NHL subjects.

Arm type	Experimental
Investigational medicinal product name	Ixazomib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for oral solution
Routes of administration	Oral use

Dosage and administration details:

Ixazomib 5.3 mg, solution, orally, once on Day 1, 8, and 15 followed by 13 days of rest in a 28-days treatment cycle for a maximum of 29 cycles, or PD or the start of alternate therapies during lead-in dose finding in NHL subjects.

<b>Arm title</b>	Lead-in Dose Finding Phase: Ixazomib 7.0 mg
------------------	---

Arm description:

Ixazomib 7 mg, solution, orally, once on Day 1, 8, and 15 followed by 13 days of rest in a 28-days

treatment cycle for a maximum of 29 cycles, or PD or the start of alternate therapies during lead-in dose finding in NHL subjects.

Arm type	Experimental
Investigational medicinal product name	Ixazomib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for oral solution
Routes of administration	Oral use

Dosage and administration details:

Ixazomib 7 mg, solution, orally, once on Day 1, 8, and 15 followed by 13 days of rest in a 28-days treatment cycle for a maximum of 29 cycles, or PD or the start of alternate therapies during lead-in dose finding in NHL subjects.

<b>Arm title</b>	Phase 2: PSMB1 Positive
------------------	-------------------------

Arm description:

Ixazomib RP2D mg, solution, orally, once weekly on Day 1, 8, and 15 followed by 13 days of rest in a 28-days treatment cycle for a maximum of 29 cycles, or PD or the start of alternate therapies during phase 2 finding in relapsed Or refractory follicular lymphoma (RRFL) subjects.

Arm type	Experimental
Investigational medicinal product name	Ixazomib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for oral solution
Routes of administration	Oral use

Dosage and administration details:

Ixazomib RP2D mg, solution, orally, once weekly on Day 1, 8, and 15 followed by 13 days of rest in a 28-days treatment cycle for a maximum of 29 cycles, or PD or the start of alternate therapies during phase 2 finding in RRFL subjects.

<b>Arm title</b>	Phase 2: PSMB1 Negative
------------------	-------------------------

Arm description:

Ixazomib RP2D mg, solution, orally, once weekly on Day 1, 8, and 15 followed by 13 days of rest in a 28-days treatment cycle for a maximum of 29 cycles, or PD or the start of alternate therapies during phase 2 finding in RRFL subjects.

Arm type	Experimental
Investigational medicinal product name	Ixazomib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for oral solution
Routes of administration	Oral use

Dosage and administration details:

Ixazomib RP2D mg, solution, orally, once weekly on Day 1, 8, and 15 followed by 13 days of rest in a 28-days treatment cycle for a maximum of 29 cycles, or PD or the start of alternate therapies during phase 2 finding in RRFL subjects.

<b>Number of subjects in period 1</b>	Lead-in Dose Finding Phase: Ixazomib 4 mg	Lead-in Dose Finding Phase: Ixazomib 5.3 mg	Lead-in Dose Finding Phase: Ixazomib 7.0 mg

## Primary: Number of Subjects with Overall Response Rate (ORR)

End point title	Number of Subjects with Overall Response Rate (ORR) <sup>[1]</sup>
-----------------	--

End point description:

ORR is defined as the percentage of subjects with complete response (CR) or partial response (PR) as assessed by the investigator using the international Working Group criteria for subjects CR: disappearance of all target lesions, non-target lesions, no new lesions, and normalization of tumor marker level. PR: At least a 30 percent (%) decrease in the sum of diameters of target lesions, no progression in non-target lesion, and no new lesions. The response-evaluable population included all subjects who received at least 1 dose of ixazomib, had measurable disease at baseline, and had at least 1 post baseline disease assessment.

End point type	Primary
----------------	---------

End point timeframe:

Baseline up to Day 15 Cycle 29 (approximately up to Day 802) or until PD or the start of alternate therapies

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive data was planned to be analyzed for this endpoint.

### Secondary: Progression Free Survival (PFS)

End point title	Progression Free Survival (PFS)
-----------------	---------------------------------

End point description:

PFS is defined as the time from the date of the first dose of study treatment to the date of first documented PD or death. Subjects without documentation of PD will be censored at the date of last response assessment that is SD or better. Subjects without response assessment will be censored at the date of the first dose. The modified intent-to-treat (mITT) population included all subjects who received at least 1 dose of ixazomib in the phase 2 portion of the study or who received at least 1 dose of ixazomib and are treated at the RP2D in the lead-in dose finding phase of the study. Here, 99999 in the confidence interval signifies not estimable since only 1 subject was analyzed.

End point type	Secondary
----------------	-----------

End point timeframe:

Time from the date of first dose of study treatment to the date of first documented PD or death (approximately up to Day 802)

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Treatment-emergent adverse events are adverse events that started after the first dose of study drug and no more than 30 days after the last dose of study drug (up to Cycle 29)

Adverse event reporting additional description:

At each visit the investigator had to document any occurrence of adverse events and abnormal laboratory findings. Any event spontaneously reported by the subject or observed by the investigator was recorded, irrespective of the relation to study treatment.

Assessment type	Systematic
-----------------	------------

### Dictionary used

Dictionary name	MedDRA

--------------------	------

### Reporting groups

Reporting group title	Lead-in Dose Finding Phase: Ixazomib 4 mg
-----------------------	---

Reporting group description:

Ixazomib 4 milligram (mg), solution, orally, once on Day 1, 8, and 15 followed by 13 days of rest in a 28-days treatment cycle for a maximum of 29 cycles, or progressive disease (PD) or the start of alternate therapies during lead-in dose finding in NHL subjects.

Reporting group title	Lead-in Dose Finding Phase: Ixazomib 5.3 mg
-----------------------	---

Reporting group description:

Ixazomib 5.3 mg, solution, orally, once on Day 1, 8, and 15 followed by 13 days of rest in a 28-days treatment cycle for a maximum of 29 cycles, or PD or the start of alternate therapies during lead-in dose finding in NHL subjects.

Reporting group title	Lead-in Dose Finding Phase: Ixazomib 7.0 mg
-----------------------	---

Reporting group description:

Ixazomib 7 mg, solution, orally, once on Day 1, 8, and 15 followed by 13 days of rest in a 28-days treatment cycle for a maximum of 29 cycles, or PD or the start of alternate therapies during lead-in dose finding in NHL subjects.

Reporting group title	Phase 2: PSMB1 Positive
-----------------------	-------------------------

Reporting group description:

Ixazomib RP2D mg, solution, orally, once weekly on Day 1, 8, and 15 followed by 13 days of rest in a 28-days treatment cycle for a maximum of 29 cycles, or PD or the start of alternate therapies during phase 2 finding in RRFL subjects.

Reporting group title	Phase 2: PSMB1 Negative
-----------------------	-------------------------

Reporting group description:

Ixazomib RP2D mg, solution, orally, once weekly on Day 1, 8, and 15 followed by 13 days of rest in a 28-days treatment cycle for a maximum of 29 cycles, or PD or the start of alternate therapies during phase 2 finding in RRFL subjects.
