

Clinical trial results:

Everolimus and temozolomide as first-line treatment in advanced gastrointestinal neuroendocrine carcinoma (G3) with a Ki67 of 20-55%

Summary

EudraCT number	2013-002524-16
Trial protocol	SE DK
Global end of trial date	01 December 2019

Results information

Result version number	v1 (current)
This version publication date	08 May 2021
First version publication date	08 May 2021

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	21 April 2021
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	01 December 2019
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

- To study the efficacy of everolimus combined with temozolomide as first-line treatment in advanced gastrointestinal neuroendocrine carcinoma with a Ki67 of 20-55%, measured as disease control rate (non-progressive disease) at 6 months.

Protection of trial subjects:

Dose reduction plan if side effects

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	15 November 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Sweden: 6
Country: Number of subjects enrolled	Denmark: 24
Country: Number of subjects enrolled	Norway: 8
Worldwide total number of subjects	38
EEA total number of subjects	38

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	23
From 65 to 84 years	15
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Recruitment started 14NOV14 and stopped 20DEC17. 39 cases recruited. 1 case wrongly included and deleted.

Pre-assignment

Screening details:

1 patient excluded as reclassified as adenocarcinoma and not neuroendocrine carcinoma

Period 1

Period 1 title	Baseline period (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	Temozolomide and everolimus
------------------	-----------------------------

Arm description: -

Arm type	experimental
Investigational medicinal product name	everolimus
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

10 mg daily

Investigational medicinal product name	temozolomide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

150 mg daily

Number of subjects in period 1	Temozolomide and everolimus
Started	38
Completed	38

Baseline characteristics

Reporting groups
