

Clinical trial results:

A randomized pre-surgical pharmacodynamics study to assess the biological activity of LEE011 plus letrozole versus single agent letrozole in primary breast cancer (MONALEESA-1)

Due to the EudraCT – Results system being out of service between 31 July 2015 and 12 January 2016, these results have been published in compliance with revised timelines.

Summary

EudraCT number	2013-002588-24

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	10 September 2014
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	10 September 2014
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

To estimate the difference in anti-proliferative activity of ribociclib 600 mg once daily and ribociclib 400 mg once daily in combination with letrozole 2.5 mg once daily vs. single agent letrozole 2.5 mg once daily as measured by changes in levels of the proliferative marker Ki67 from Baseline to time of surgery (Day 15).

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	10 October 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 6
Country: Number of subjects enrolled	United States: 8
Worldwide total number of subjects	14
EEA total number of subjects	6

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	7
From 65 to 84 years	7

85 years and over	0
-------------------	---

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

20 patients were screened, of those 14 patients completed the Screening phase and were randomized. 6 patients discontinued during the Screening phase; 3 patients were considered screen failure and 3 patients discontinued due to patient's decision.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Letrozole

Arm description:

Letrozole 2.5 mg alone once daily

Arm type	Active comparator
Investigational medicinal product name	Letrozole
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Letrozole was supplied in 2.5mg tablets for oral use

Arm title	LEE011 400mg + letrozole
------------------	--------------------------

Arm description:

Letrozole 2.5 mg once daily and ribociclib 400 mg (2 capsules of 200 mg each) once daily.

Arm type	Experimental
Investigational medicinal product name	Letrozole
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Letrozole was supplied in 2.5mg tablets for oral use

Investigational medicinal product name	Ribociclib
Investigational medicinal product code	LEE011
Other name	
Pharmaceutical forms	Capsule, hard
Routes of administration	Oral use

Dosage and administration details:

Ribociclib was supplied in 200 mg hard gelatin capsules for oral use.

Arm title	LEE011 600mg + letrozole
------------------	--------------------------

Arm description:

Letrozole 2.5 mg once daily and ribociclib 600 mg (3 capsules of 200 mg each) once daily.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Ribociclib
Investigational medicinal product code	LEE011
Other name	
Pharmaceutical forms	Capsule, hard
Routes of administration	Oral use

Dosage and administration details:

Ribociclib was supplied in 200 mg hard gelatin capsules for oral use.

Investigational medicinal product name	Letrozole
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
06 March 2014	The purpose of amendment 1 was to clarify some of the study assessments required in the protocol and to take into consideration differences in local practice at the study centers, based on consultation with the study steering committee and feedback received from participating centers' IRBs/IECs and Health Authorities. The amendment also included an update of nonclinical and clinical data for ribociclib alone and in combination with letrozole.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
