Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	13 July 2017
Is this the analysis of the primary completion data?	Yes
Primary completion date	10 August 2015
Global end of trial reached?	Yes
Global end of trial date	08 November 2016
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Primary objective: To evaluate the long-term safety of BI 695500 in adult patients with moderate to severe active Rheumatoid Arthritis [RA] who have successfully completed treatment in Trial 1301.1. Secondary objective: To assess the long-term efficacy of BI 695500 in patients with moderately to severely active RA. These analyses will be displayed by the groups the patients were randomized in Trial 1301.1 as well as overall.

Protection of trial subjects:

Only subjects that met all the study inclusion and none of the exclusion criteria were to be entered in the study. All subjects were free to withdraw from the clinical trial at any time for any reason given. Close monitoring of all subjects was adhered to throughout the trial conduct. Rescue medication was allowed for all patients as required.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	02 October 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 1
Country: Number of subjects enrolled	Bulgaria: 2
Country: Number of subjects enrolled	Canada: 1
Country: Number of subjects enrolled	Chile: 1
Country: Number of subjects enrolled	Germany: 1
Country: Number of subjects enrolled	Greece: 1
Country: Number of subjects enrolled	Hungary: 2
Country: Number of subjects enrolled	Mexico: 9
Country: Number of subjects enrolled	Netherlands: 1
Country: Number of subjects enrolled	Poland: 9
Country: Number of subjects enrolled	Portugal: 3
Country: Number of subjects enrolled	Spain: 3
Country: Number of subjects enrolled	United States: 63
Worldwide total number of subjects	97
EEA total number of subjects	23

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	75
From 65 to 84 years	22
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

97 subjects were screened for eligibility to participate in this extension trial. 91 subjects met all inclusion and exclusion criteria and were assigned to receive treatment.

Pre-assignment

Screening details:

All subjects were screened for eligibility to participate in the trial. Subjects attended specialist sites which would then ensure that they [the subjects] met all strictly implemented inclusion/exclusion criteria. Subjects were not to be randomised to trial treatment if any one of the specific entry criteria were violated.

Period 1

Period 1 title	Period 1
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	BI 695500

Arm description:

The subjects were administered BI 695500, concentrate for solution for infusion, 10 mg/mL by Intravenous Infusion [IV]. Two 1000 mg infusions were separated by 2 weeks. Each patient was treated with BI 695500 on Days 1 and 15, with a possible further two infusions at Weeks 24 and 26 for eligible responders.

Arm type	Experimental
Investigational medicinal product name	BI 695500
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

The subjects were administered BI 695500, concentrate for solution for infusion, 10 mg/mL by IV infusion. Two 1000 mg infusions were separated by 2 weeks. Each patient was treated with BI 695500 on Days 1 and 15, with a possible further two infusions at Weeks 24 and 26 for eligible responders.

Arm title	Rituxan from 1301.1
------------------	---------------------

Arm description:

The Rituxan from 1301.1 [ClinicalTrials.gov identifier: NCT01682512] recommended dose for use in patients with Rheumatoid Arthritis is 1000 mg by IV infusion followed by a second 1000 mg IV infusion 2 weeks later.

Arm type	Experimental
Investigational medicinal product name	Rituxan from 1301.1
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

The Rituxan from 1301.1 [ClinicalTrials.gov identifier: NCT01682512] recommended dose for use in patients with Rheumatoid Arthritis is 1000 mg by IV infusion followed by a second 1000 mg IV infusion 2 weeks later.

Arm title	MabThera from 1301.1
------------------	----------------------

Arm description:

The MabThera from 1301.1 recommended dose for use in patients with Rheumatoid Arthritis is 1000 mg by IV infusion followed by a second 1000 mg IV infusion 2 weeks later.

Arm type	Experimental
Investigational medicinal product name	MabThera from 1301.1
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

The MabThera from 1301.1 recommended dose for use in patients with Rheumatoid Arthritis is 1000 mg by IV infusion followed by a second 1000 mg IV infusion 2 weeks later.

Number of subjects in period 1	BI 695500	Rituxan from 1301.1	MabThera from 1301.1
Started	33	29	29
Completed	32	29	29
Not completed	1	0	0
Lost to follow-up	1	-	-

Period 2

Period 2 title	Period 2
Is this the baseline period?	Yes ^[1]
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	BI 695500

Arm description:

The subjects were administered BI 695500, concentrate for solution for infusion, 10 mg/mL by Intravenous Infusion [IV]. Two 1000 mg infusions were separated by 2 weeks. Each patient was treated with BI 695500 on Days 1 and 15, with a possible further two infusions at Weeks 24 and 26 for eligible responders.

Arm type	Experimental
Investigational medicinal product name	BI 695500
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

The subjects were administered BI 695500, concentrate for solution for infusion, 10 mg/mL by IV infusion. Two 1000 mg infusions were separated by 2 weeks. Each patient was treated with BI 695500 on Days 1 and 15, with a possible further two infusions at Weeks 24 and 26 for eligible responders.

Arm title	Rituxan from 1301.1
------------------	---------------------

Arm description:

The Rituxan from 1301.1 [ClinicalTrials.gov identifier: NCT01682512] recommended dose for use in

patients with Rheumatoid Arthritis is 1000 mg by IV infusion followed by a second 1000 mg IV infusion 2 weeks later.

Arm type	Experimental
Investigational medicinal product name	Rituxan from 1301.1
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

The Rituxan from 1301.1 [ClinicalTrials.gov identifier: NCT01682512] recommended dose for use in patients with Rheumatoid Arthritis is 1000 mg by IV infusion followed by a second 1000 mg IV infusion 2 weeks later.

Arm title	MabThera from 1301.1
------------------	----------------------

Arm description:

The MabThera from 1301.1 recommended dose for use in patients with Rheumatoid Arthritis is 1000 mg by IV infusion followed by a second 1000 mg IV infusion 2 weeks later.

Arm type	Experimental
Investigational medicinal product name	MabThera from 1301.1
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

The MabThera from 1301.1 recommended dose for use in patients with Rheumatoid Arthritis is 1000 mg by IV infusion followed by a second 1000 mg IV infusion 2 weeks later.

Notes:

[1] - Period 1 is not the baseline period. It is expected that period 1 will be the baseline period.

Justification: The results presented in the outcome measures are based on period 2. Thus, period 2 is selected as the baseline period.

Number of subjects in period 2^[2][3]	BI 695500	Rituxan from 1301.1	MabThera from 1301.1
Started	30	29	29
Completed	18	10	8
Not completed	12	19	21
Consent withdrawn by subject	1	3	2
Other not defined above	-	2	2
Physician decision	-	-	1
Adverse event, non-fatal	1	-	-
Study terminated by sponsor	8	14	15
Lost to follow-up	2	-	1

Notes:

[2] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Baseline characteristics are based on patients who were randomised after successfully completing the screening period and received at least one of the trial medications.

[3] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: 2 subjects from 1301.1 safety run-in who also received treatment in 1301.4. Thus, the number of subjects in period 2 is 88.

Baseline characteristics

Reporting groups

Reporting group title	Period 2
-----------------------	----------

Reporting group description: -

Reporting group values	Period 2	Total	
Number of subjects	88	88

Primary: The percentage of patients with drug related adverse events during the treatment phase

End point title	The percentage of patients with drug related adverse events during the treatment phase ^[1]
End point description: This outcome measure presents percentage of patients with drug related adverse events during the treatment phase. Treatment Emergent Adverse Events [TEAEs] were defined as AEs that started or worsened in severity on or after the first dose of trial medication in this extension study [1301.4] and prior to the last date of trial medication + 180 days [inclusive]. Drug-related events were those considered by the investigator to have a causal relationship to trial medication.	
End point type	Primary
End point timeframe: Week 48	
Notes: [1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point. Justification: Statistical analysis evaluating this endpoint was purely for exploratory purposes.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Further development of BI 695500 has been stopped and the program was therefore prematurely discontinued on 3SEP2015. The decision was made by the Sponsor based on a strategic review of company's product portfolio and not due to any safety concern.
--

Notes:
