Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	26 May 2016
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	11 November 2015
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

The primary objectives are to evaluate the safety and efficacy of 2 fixed doses of EVP-6124 HCl (2 or 3 mg daily) compared to placebo for 26 weeks in subjects with mild to moderate dementia due to AD currently receiving stable treatment or previously treated with an AChEI (donepezil, rivastigmine, or galantamine). The primary efficacy response will be an assessment of the change from baseline in cognitive, (ADAS-Cog-13) and functional/global (CDR-SB) endpoints.

Protection of trial subjects:

There were no invasive or potentially pain-inducing procedures in this study except blood sampling. If patients experience pain, analgesic treatment was allowed per the physician discretion.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	23 October 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Australia: 11
Country: Number of subjects enrolled	Argentina: 2
Country: Number of subjects enrolled	Canada: 8
Country: Number of subjects enrolled	Japan: 27
Country: Number of subjects enrolled	Mexico: 5
Country: Number of subjects enrolled	South Africa: 25
Country: Number of subjects enrolled	Korea, Republic of: 26
Country: Number of subjects enrolled	United States: 184
Country: Number of subjects enrolled	Netherlands: 17
Country: Number of subjects enrolled	Spain: 11
Country: Number of subjects enrolled	United Kingdom: 19
Country: Number of subjects enrolled	Czech Republic: 40
Country: Number of subjects enrolled	France: 11
Country: Number of subjects enrolled	Germany: 11
Country: Number of subjects enrolled	Italy: 6
Worldwide total number of subjects	403
EEA total number of subjects	115

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	75
From 65 to 84 years	316
85 years and over	12

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

On Day -14, eligible subjects will enter a single-blind run-in period to assess compliance with placebo study drug. To qualify for randomization at baseline, subjects must return unused study drug, be $\geq 75\%$ compliant with study drug, considered capable of completing the study assessments, and meet all eligibility requirements.

Pre-assignment period milestones

Number of subjects started	661 ^[1]
Intermediate milestone: Number of subjects	Run-in: 445
Number of subjects completed	403

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Other: 258
----------------------------	------------

Notes:

[1] - The number of subjects reported to have started the pre-assignment period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: The number of randomized subjects (403) per country is indicated in the Trial information section. The number of screened subjects (661) is reported in the pre-assignment period.

Period 1

Period 1 title	Double-blind period (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Eligible subjects will be randomized to 1 of 3 groups, 2 or 3 mg EVP-6124 or placebo, for 26 weeks.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects will be instructed to take 1 tablet once daily at the same time each day, preferably between 8 and 10 AM, with or without food, and with an adequate amount of water.

Arm title	EVP-6124, 2 mg
------------------	----------------

Arm description:

Eligible subjects will be randomized to 1 of 3 groups, 2 or 3 mg EVP-6124 or placebo, for 26 weeks.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Encenicline
Investigational medicinal product code	EVP-6124
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects will be instructed to take 1 tablet once daily at the same time each day, preferably between 8 and 10 AM, with or without food, and with an adequate amount of water.

Arm title	EVP-6124, 3 mg
------------------	----------------

End point timeframe:

On Day -14 (run-in), baseline (predose on Day 1) and Days 84, 140, and 182 or early termination.

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Due to the premature termination of the studies, a full statistical analysis could not be performed. An analysis of the available data at the time of halting the trial was conducted to determine if there was any indication of a clinical response. However, these exploratory analyses were negative.

End point timeframe:

Standard 12-lead ECG tracings will be obtained at screening, predose and within 3 hours postdose on Day 1, and Days 28, 56, 84, 112, 140, and 182 or early termination.

Notes:

[44] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Due to the premature termination of the studies, a full statistical analysis could not be performed.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
30 June 2014	Protocol Amendment 1, Version 2.0 (dated 30 June 2014)

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
11 November 2015	The Phase 3 Alzheimer's disease studies (EVP-6124-024, EVP-6124-025 and EVP-6124-026) were placed on complete clinical hold by the FDA due to potential gastrointestinal safety concern(s) around September 1st, 2015. Subsequent to this time, they were terminated to analyze the available data around January 1st, 2016.	-

Notes:
