

## Clinical trial results:

### A Randomised Controlled Trial Investigating the Pharmacodynamic Effect of Ticagrelor Monotherapy on Platelet Reactivity in Patients with Coronary Artery Disease: The TEMPLATE Study

#### Summary

EudraCT number	2013-002734-20
Trial protocol	GB
Global end of trial date	21 October 2020

#### Results information

Result version number	v1 (current)
This version publication date	18 February 2021
First version publication date	18 February 2021

#### Trial information

##### Trial identification

Sponsor protocol code	CS/2014/4525
-----------------------	--------------

##### Additional study identifiers

ISRCTN number	ISRCTN84335288
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

---

**Results analysis stage**

---

Analysis stage	Final
Date of interim/final analysis	22 February 2018
Is this the analysis of the primary completion data?	Yes
Primary completion date	22 February 2018
Global end of trial reached?	Yes
Global end of trial date	21 October 2020
Was the trial ended prematurely?	No

Notes:

---

**General information about the trial**

---

Main objective of the trial:

The overall study aim is to determine whether aspirin is required to achieve full platelet inhibition in patients with coronary artery disease who are also receiving ticagrelor. We will investigate this by comparing the pharmacodynamic effects of aspirin + ticagrelor (ASP + TIC) and ticagrelor alone (TIC) on platelets from patients allocated at random to the intervention.

---

Protection of trial subjects:

Trial participants were closely followed up to identify any adverse reactions.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	15 August 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

---

**Population of trial subjects**

---

**Subjects enrolled per country**

Country: Number of subjects enrolled	United Kingdom: 110
Worldwide total number of subjects	110
EEA total number of subjects	0

Notes:

---

**Subjects enrolled per age group**

---

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	45
From 65 to 84 years	60

85 years and over	5
-------------------	---

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details: -

### Pre-assignment period milestones

Number of subjects started	110
Number of subjects completed	

### Period 1

Period 1 title	Overall trial period (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	ASP + TIC

Arm description:

Loading dose of 180mg ticagrelor followed by aspirin 75mg/day AND ticagrelor 90 mg b.d. for 4 weeks unless the patient is already on ASP+TIC

Arm type	Active comparator
Investigational medicinal product name	Aspirin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

aspirin 75mg/day for 4 weeks unless the patient is already on ASP+TIC

Investigational medicinal product name	Ticagrelor
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Loading dose of 180mg ticagrelor followed by ticagrelor 90 mg b.d. for 4 weeks unless the patient is already on ASP+TIC

<b>Arm title</b>	TIC alone
------------------	-----------

Arm description:

Loading dose of 180mg ticagrelor followed by ticagrelor 90 mg b.d. for 4 weeks unless the patient is already on ASP+TIC

Arm type	Experimental
Investigational medicinal product name	Ticagrelor
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

---

**Dosage and administration details:**

Loading dose of 180mg ticagrelor followed by ticagrelor 90 mg b.d. for 4 weeks unless the patient is already on ASP+TIC

<b>Number of subjects in period 1</b>	ASP + TIC	TIC alone
Started	55	55
Completed	49	53
Not completed	6	2
Not possible to schedule visit 2	1	-
Ineligible	-	1
Patient unhappy with side effects	1	-
Can no longer attend visit schedule	-	1
Patient died	1	-
GP	1	-
Patient no longer wanted to take part	2	-

## Baseline characteristics

### Reporting groups

Reporting group title	ASP + TIC
Reporting group description:	
Loading dose of 180mg ticagrelor followed by aspirin 75mg/day AND ticagrelor 90 mg b.d. for 4 weeks unless the patient is already on ASP+TIC

### Primary: MA of the LTA response of PRP to TRAP-6

End point title	MA of the LTA response of PRP to TRAP-6
End point description:	
The primary outcome is defined as the maximum amplitude of the light transmission aggregation response of platelet rich plasma (PRP) to TRAP-6 expressed as a % of the absolute difference in light transmission between PRP and platelet poor plasma. This assay measures the ability of platelets to aggregate when exposed to the aggregation promoting agent TRAP-6.	
End point type	Primary
End point timeframe:	
Data collected at baseline, visit 1 and visit 2. primary analysis is comparing the treatment groups at visit 2.
