

## Clinical trial results:

### A Phase 2b, Open-Label Study of 200 mg or 400 mg Sofosbuvir+RBV for 24 Weeks in Genotype 1 or 3 and Ledipasvir/Sofosbuvir (LDV/SOF) Fixed-Dose Combination (FDC) Tablet for 12 weeks in Genotype 1 or 4 HCV-Infected Subjects with Renal Insufficiency

#### Summary

EudraCT number	2013-002897-30
Trial protocol	DE AT NL
Global end of trial date	19 October 2017

#### Results information

Result version number	v1 (current)
This version publication date	23 August 2018
First version publication date	23 August 2018

#### Trial information

##### Trial identification

Sponsor protocol code	GS-US-334-0154
-----------------------	----------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01958281
WHO universal trial number (UTN)	-
Other trial identifiers	DRKS00006432: German Clinical Trials Register

Notes:

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	19 October 2017
Is this the analysis of the primary completion data?	Yes
Primary completion date	18 July 2017
Global end of trial reached?	Yes
Global end of trial date	19 October 2017
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objectives of this study were to evaluate the safety and efficacy of sofosbuvir (SOF) plus ribavirin (RBV) for 24 weeks and ledipasvir/sofosbuvir (LDV/SOF) for 12 weeks, and to evaluate the steady state pharmacokinetics (PK) of SOF and its metabolites and LDV in participants with genotype (GT) 1, 3, or 4 HCV infection who have chronic renal insufficiency (impaired kidney function).

Protection of trial subjects:

The protocol and consent/assent forms were submitted by each investigator to a duly constituted Independent Ethics Committee (IEC) or Institutional Review Board (IRB) for review and approval before study initiation. All revisions to the consent/assent forms (if applicable) after initial IEC/IRB approval were submitted by the investigator to the IEC/IRB for review and approval before implementation in accordance with regulatory requirements.

This study was conducted in accordance with recognized international scientific and ethical standards, including but not limited to the International Conference on Harmonization guideline for Good Clinical Practice (ICH GCP) and the original principles embodied in the Declaration of Helsinki.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	07 October 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	New Zealand: 14
Country: Number of subjects enrolled	United States: 24
Worldwide total number of subjects	38
EEA total number of subjects	0

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23	0

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	30
From 65 to 84 years	8
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Participants were enrolled at study sites in the United States and New Zealand. The first participant was screened on 07 October 2013. The last study visit occurred on 19 October 2017.

### Pre-assignment

Screening details:

32 participants were screened for Cohorts 1 and 2 and 33 participants were screened for Cohort 3.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	SOF 200 mg + RBV 200 mg (Cohort 1)

Arm description:

Participants with genotype 1 or 3 HCV infection received SOF 200 mg + RBV for 24 weeks.

Arm type	Experimental
Investigational medicinal product name	Sofosbuvir
Investigational medicinal product code	
Other name	Sovaldi®, SOF, GS-7977
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

200 mg tablet or 2 x 100 mg tablets administered once daily

Investigational medicinal product name	Ribavirin
Investigational medicinal product code	
Other name	RBV
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

200 mg administered once daily

<b>Arm title</b>	SOF 400 mg + RBV 200 mg (Cohort 2)
------------------	------------------------------------

Arm description:

Participants with genotype 1 or 3 HCV infection received SOF 400 mg + RBV for 24 weeks.

Arm type	Experimental
Investigational medicinal product name	Sofosbuvir
Investigational medicinal product code	
Other name	Sovaldi®, SOF, GS-7977
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

400 mg tablet or 4 x 100 mg tablets administered once daily

Investigational medicinal product name	Ribavirin
Investigational medicinal product code	
Other name	RBV
Pharmaceutical forms	Tablet

Routes of administration	Oral use
Dosage and administration details: 200 mg administered once daily	
<b>Arm title</b>	LDV/SOF (Cohort 3)
Arm description: Participants with genotype 1 HCV infection received LDV/SOF for 12 weeks.	
Arm type	Experimental
Investigational medicinal product name	Ledipasvir/sofosbuvir
Investigational medicinal product code	
Other name	Harvoni®, LDV/SOF, GS-5885/GS-7977
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details: 90/400 mg fixed-dose combination (FDC) tablet administered once daily	

<b>Number of subjects in period 1</b>	SOF 200 mg + RBV 200 mg (Cohort 1)	SOF 400 mg + RBV 200 mg (Cohort 2)	LDV/SOF (Cohort 3)
Started	10	10	18
Completed	4	6	18
Not completed	6	4	0
Withdrew Consent	1	-	-
Adverse event, non-fatal	-	2	-
Lack of efficacy	5	2	-

## End points

### End points reporting groups

Reporting group title	SOF 200 mg + RBV 200 mg (Cohort 1)
Reporting group description: Participants with genotype 1 or 3 HCV infection received SOF 200 mg + RBV for 24 weeks.	
Reporting group title	SOF 400 mg + RBV 200 mg (Cohort 2)
Reporting group description: Participants with genotype 1 or 3 HCV infection received SOF 400 mg + RBV for 24 weeks.	
Reporting group title	LDV/SOF (Cohort 3)
Reporting group description: Participants with genotype 1 HCV infection received LDV/SOF for 12 weeks.	

### Primary: Percentage of Participants With Sustained Virologic Response (SVR) 12 Weeks After Discontinuation of Therapy (SVR12)

End point title	Percentage of Participants With Sustained Virologic Response (SVR) 12 Weeks After Discontinuation of Therapy (SVR12) <sup>[1]</sup>
End point description: SVR12 was defined as HCV RNA < the lower limit of quantitation (LLOQ; ie, 15 IU/mL) at 12 weeks after stopping study treatment. Participants in the Full Analysis Set (participants who were enrolled and took at least 1 dose of study drug) were analyzed.	
End point type	Primary
End point timeframe: Posttreatment Week 12	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical comparison was planned or performed.

End point values	SOF 200 mg + RBV 200 mg (Cohort 1)	SOF 400 mg + RBV 200 mg (Cohort 2)	LDV/SOF (Cohort 3)

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
05 September 2013	<ul style="list-style-type: none"><li>• The study design was changed from a randomized study to reflect a 2-part step-wise design to allow a full review of safety, efficacy, and PK data through posttreatment Week 4 of both doses of SOF (200 mg or 400 mg) + RBV in subjects with creatinine clearance &lt; 30 mL/min before proceeding to the cohort of subjects on dialysis.</li><li>• The assay to assess the HCV RNA levels was changed to the COBAS® AmpliPrep/COBAS® TaqMan® HCV Quantitative Test, v2.0.</li><li>• Additional echocardiogram assessments and cardiac parameters were added to the study procedures, inclusion/exclusion criteria, treatment discontinuation criteria, medical history requirements, safety procedures, and stopping rules for toxicity.</li><li>• Inclusion Criterion 5h was updated to clarify the creatinine clearance laboratory parameter values allowed for inclusion in the study.</li><li>• Hematologic stimulating agents were added to the concomitant medications list as prohibited medications.</li></ul>
20 February 2014	<ul style="list-style-type: none"><li>• Exclusion criteria for electrocardiograms (ECG) were updated to reflect the QTcF interval</li><li>• The RBV dosage and administration was modified to allow the investigator to modify the dose of RBV if he/she felt it was medically necessary</li><li>• An external Data Monitoring Committee (DMC) was added to this protocol to review the progress of the study and evaluate the safety, efficacy, and PK data</li><li>• Exclusion Criterion 8d was updated to include clarification on cardiac exclusion criteria: subjects with significant cardiac disease resulting in pulmonary hypertension within 1 year of screening were excluded from the study</li><li>• Clarification of when echocardiograms in Part B will be performed</li><li>• Updated safety language for the reporting of adverse events (AEs) and serious adverse events (SAEs).</li></ul>
23 February 2015	<ul style="list-style-type: none"><li>• Removed Part 2 dose group scheduled to receive SOF+RBV for 24 weeks in HCV-infected subjects on dialysis. Added Cohort 3 to include subjects with genotype 1 or 4 HCV infection with severe renal impairment (estimated glomerular filtration rate [eGFR] calculated using the Cockcroft-Gault equation &lt; 30 mL/min) to receive LDV/SOF (90/400 mg) for 12 weeks.</li><li>• Updated the approximate number of planned subjects from 40 to 30</li></ul>
23 April 2015	<ul style="list-style-type: none"><li>• Amiodarone was moved to the "Agents Disallowed" list based on risk of symptomatic bradycardia with coadministration of amiodarone with LDV/SOF. Postmarketing cases of symptomatic bradycardia have been reported in patients receiving amiodarone who were coadministered Harvoni (LDV/SOF).</li><li>• For Cohort 3, increased the number of enrolled subjects to 15 subjects to obtain 10 evaluable subjects.</li><li>• Updated the approximate number of planned subjects to approximately 35 from 30</li><li>• The grading scale for severity of AEs and laboratory abnormalities was updated.</li></ul>

Notes:

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
