

Clinical trial results:

DOTAREM® Pharmacokinetics, Safety and Efficacy Study in Pediatric Subjects Aged <2 Years (Term Newborn Infants to Toddlers 23 Months of Age Inclusive)

Summary

EudraCT number	2013-003215-21
Trial protocol	FR HU AT
Global end of trial date	19 October 2015

Results information

Result version number	v1 (current)
This version publication date	16 July 2016
First version publication date	16 July 2016

Trial information

Trial identification

Sponsor protocol code	DGD-44-063
-----------------------	------------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02411201
WHO universal trial number (UTN)	-
Other trial identifiers	IND: 65.041

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	17 December 2015
Is this the analysis of the primary completion data?	Yes
Primary completion date	19 October 2015
Global end of trial reached?	Yes
Global end of trial date	19 October 2015
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate pharmacokinetics profile in plasma of DOTAREM following single intravenous injection in pediatric subjects aged up to 23 months (inclusive)

Protection of trial subjects:

A PK population approach with sparse blood sampling was used to minimize the clinical burden to children.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	03 March 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Poland: 32
Country: Number of subjects enrolled	Austria: 3
Country: Number of subjects enrolled	France: 5
Country: Number of subjects enrolled	Hungary: 11
Worldwide total number of subjects	51
EEA total number of subjects	51

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	5
Infants and toddlers (28 days-23 months)	46
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0

85 years and over	0
-------------------	---

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details: -

Pre-assignment period milestones

Number of subjects started	51
----------------------------	----

Number of subjects completed	45
------------------------------	----

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Adverse event, non-fatal: 2
----------------------------	-----------------------------

Reason: Number of subjects	Consent withdrawn by subject: 2
----------------------------	---------------------------------

Reason: Number of subjects	Age group completed: 2
----------------------------	------------------------

Period 1

Period 1 title	overall period
----------------	----------------

Is this the baseline period?	Yes
------------------------------	-----

Allocation method	Not applicable
-------------------	----------------

Blinding used	Not blinded
---------------	-------------

Arms

Arm title	DOTAREM
-----------	---------

Arm description: -

Arm type	Experimental
----------	--------------

Investigational medicinal product name	DOTAREM
--	---------

Investigational medicinal product code	
--	--

Other name	
------------	--

Pharmaceutical forms	Solution for injection
----------------------	------------------------

Routes of administration	Intravenous use
--------------------------	-----------------

Dosage and administration details:

0.1 mmol/kg BW (0.2 ml/kg BW) in a single intravenous injection at 1-2 ml/s

Number of subjects in period 1 ^[1]	DOTAREM
Started	45
Completed	45

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: 51 subjects were enrolled. Among them 45 subjects received IMP. 6 subjects did not reach the baseline period due to non-completion of the pre-assignment period; reasons are reported. Baseline period includes subjects who received IMP only.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

From informed consent signature until end of study (7+/- 1 days after IMP administration)

Adverse event reporting additional description:

Adverse events occurring after IMP administration are listed below.

Assessment type	Systematic

subjects affected / exposed occurrences (all)	1 / 45 (2.22%) 1		
Respiratory, thoracic and mediastinal disorders Cough subjects affected / exposed occurrences (all)	1 / 45 (2.22%) 1		
Skin and subcutaneous tissue disorders Rash subjects affected / exposed occurrences (all)	1 / 45 (2.22%) 1		
Infections and infestations Bronchitis subjects affected / exposed occurrences (all) Infection subjects affected / exposed occurrences (all) Nasopharyngitis subjects affected / exposed occurrences (all) Rhinitis subjects affected / exposed occurrences (all) Tonsillitis subjects affected / exposed occurrences (all) Urinary tract infection subjects affected / exposed occurrences (all)	1 / 45 (2.22%) 1 1 / 45 (2.22%) 1 1 / 45 (2.22%) 1 1 / 45 (2.22%) 1 1 / 45 (2.22%) 1 1 / 45 (2.22%) 1		

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
02 September 2014	Change the study phase from phase I to phase IV: the Investigational Medicinal Product (DOTAREM®) was used in the study in indications and population approved in the countries where the study was conducted. The reference document was the local Summary of Product Characteristics. Add clarification on the collection of blood for PK
24 March 2015	Removal of coordinating investigator due to the death of Pr Guy Sebag. Recruitment period extended to Q4 2015 and enlarged to 20 sites worldwide. Inclusion criterion related to the normal renal function was clarified. Non-inclusion criterion related to severe liver disease was clarified. Non-inclusion criterion related to the previous participation to a clinical study was reduced to 7 days. Non-inclusion criteria related to the concomitant participation to a clinical study was clarified. The group of age was collected instead of date of birth according to local regulations in some countries. The definition of overdose was added to follow an update in Good Vigilance Practice. Rules for rounding the dose administered were then removed. Adverse event definition, including overdose, was updated. The "safety follow-up phone call" at visit 4 was changed in a "safety follow-up contact" which allowed different ways to monitor the subject's safety at day 7 +/- 1. Clarifications were made on the use of local laboratory data to validate the normal renal function at inclusion time.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
