

Biotest AG Clinical Study 989

Figure 14.2.2.4

Swimmer Plot of Duration of Stable Disease (DSD) by RECIST

ITT Population

Phase I

Note: DSD is defined as the number of weeks between date of first BT062 treatment and the earliest date of disease progression by RECIST v1.1 or death due to any cause other than progressive disease, whichever is earlier.

Note: Six patients were transferred from Phase I to Phase IIa and therefore are counted in both phases

Data Source: Listing 16.2.6.2.4

Figure Generation: 10NOV2017 05:15
