

Clinical trial results:

A randomised placebo-controlled pilot trial of omeprazole in idiopathic pulmonary fibrosis (IPF)

Summary

EudraCT number	2013-003301-26
Trial protocol	GB
Global end of trial date	27 September 2016

Results information

Result version number	v1 (current)
This version publication date	05 January 2019
First version publication date	05 January 2019

Scientific contact	Professor John Simpson, Newcastle University, 0191 2087770, j.simpson@newcastle.ac.uk

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	01 August 2017
Is this the analysis of the primary completion data?	Yes
Primary completion date	27 September 2016
Global end of trial reached?	Yes
Global end of trial date	27 September 2016
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The principal question is whether omeprazole reduces cough (quantified objectively) in patients with IPF, when compared with placebo.

Protection of trial subjects:

Omeprazole is a substituted benzimidazole, and belongs to the "proton pump inhibitor" (PPI) class of drugs. Omeprazole specifically inhibits the hydrogen-potassium-ATPase (H/K-ATPase) enzyme at the apical surface of gastric parietal cells. H/K-ATPase is responsible for delivering hydrogen ions to the lumen of the stomach, thus acidifying the contents. Omeprazole's dose-dependent and specific inhibition of the enzyme therefore neutralizes gastric acid contents. Omeprazole inhibits basal and induced gastric acid release.

Omeprazole has been used clinically for many years. It is licensed for use in gastro-oesophageal reflux, erosive oesophagitis, duodenal ulcer, gastric ulcer, eradication of *Helicobacter pylori* (in combination with antibiotics), and Zollinger-Ellison syndrome. It is also used for the prevention of gastric adverse events associated with use of non-steroidal anti-inflammatory drugs.

Patients will be advised by their doctor to report any unusual symptoms or reactions. Patients will be provided with a contact number on which they may contact a member of the study team to obtain advice and express any concerns, throughout the duration of the study. This information will be included in the patient information leaflet.

Background therapy:

Potential participants in the trial were asked to consent to a trial off PPI, if there was no return of symptoms, they were consented onto the full trial. If there was any return of symptoms and the trial off PPI was not tolerated, the patient went back onto their normal standard care.

Evidence for comparator:

N/A

Actual start date of recruitment	01 March 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 45
Worldwide total number of subjects	45
EEA total number of subjects	45

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	5
From 65 to 84 years	38
85 years and over	2

Subject disposition

Recruitment

Recruitment details:

Participants were identified by qualified research staff from current lists of potential patients attending local clinics, or identified and referred for participant in the trial from Participant Identification Centres (PICs) by their treating clinicians.

Pre-assignment

Screening details:

If the potential participant was currently taking antacids, prokinetics or raft alginates at the time of screening, they were eligible if they have been off these treatments for a period of two weeks. Participants consented to a trial off these treatments. If there was no return of symptoms, they could go onto the trial.

Pre-assignment period milestones

Number of subjects started	54 ^[1]
Number of subjects completed	45

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Return of Symptoms: 9
----------------------------	-----------------------

Notes:

[1] - The number of subjects reported to have started the pre-assignment period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: If patients taking omeprazole (or a related stomach treatment) wished to take part, patient consented to a trial period off treatment for 2 weeks. If symptoms returned during that 2- week period the patient went back on treatment and did not take part in the study. If patients managed well without the treatment for 2 weeks, they were asked to sign a second consent form before starting the trial.

Period 1

Period 1 title	Visit 1
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

Blinding implementation details:

Participants were randomised at period 3.

Arms

Arm title	Assessment
-----------	------------

Arm description:

Assessment and medical tests

Arm type	pre-randomisation
----------	-------------------

No investigational medicinal product assigned in this arm

Number of subjects in period 1	Assessment
Started	45
Completed	45

Period 2

Period 2 title	Visit 2
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

Blinding implementation details:

Randomisation took place at period 3.

Arms

Arm title	Assessment
------------------	------------

Arm description:

Assessment and medical tests

Arm type	pre-randomisation
----------	-------------------

No investigational medicinal product assigned in this arm

Number of subjects in period 2	Assessment
Started	45
Completed	45

Period 3

Period 3 title	Visit 3
Is this the baseline period?	Yes ^[2]
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor

Blinding implementation details:

Randomisation was conducted by the Newcastle Clinical Trials Unit (NCTU) secure password-protected web based system. Patients were randomised on a 1:1 ratio to either Omeprazole 20mg twice daily or Placebo twice daily. No unblinding was required during the study.

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Omeprazole
Arm description:	
Omeprazole	
Arm type	Experimental
Investigational medicinal product name	Omeprazole
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule, hard
Routes of administration	Oral use
Dosage and administration details:	
20 mg twice daily	
Arm title	Placebo
Arm description:	
Placebo	
Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule, hard
Routes of administration	Oral use
Dosage and administration details:	
One capsule, twice daily	
Notes:	
[2] - Period 1 is not the baseline period. It is expected that period 1 will be the baseline period.	
Justification: During period 1 and period 2 participants underwent tests and assessment, they were not randomised until period 3.	

Number of subjects in period 3	Omeprazole	Placebo
Started	23	22
Completed	23	22

Period 4	
Period 4 title	up to 90 days on Trial IMP
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor
Blinding implementation details:	
Randomisation was conducted by the Newcastle Clinical Trials Unit (NCTU) secure password-protected web based system. Patients were randomised on a 1:1 ratio to either Omeprazole 20mg twice daily or Placebo twice daily. No unblinding was required during the study.

Reporting groups

Reporting group title	Omeprazole
-----------------------	------------

Reporting group description: -

Reporting group title	Placebo
-----------------------	---------

Reporting group description: -

Serious adverse events	Omeprazole	Placebo	
Total subjects affected by serious adverse events			
subjects affected / exposed	4 / 23 (17.39%)	4 / 22 (18.18%)	
number of deaths (all causes)	2	0	
number of deaths resulting from adverse events	0	0	
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
Lung Neoplasm malignant	Additional description: New diagnosis – lung cancer.		
subjects affected / exposed	1 / 23 (4.35%)	0 / 22 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 1	0 / 0	
Vascular disorders			
Ischemia	Additional description: Hospital Admission – Right Ischaemic Leg		
subjects affected / exposed	0 / 23 (0.00%)	1 / 22 (4.55%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Gastrointestinal disorders			
Abdominal Pain			
subjects affected / exposed	1 / 23 (4.35%)	2 / 22 (9.09%)	
occurrences causally related to treatment / all	1 / 1	2 / 2	
deaths causally related to treatment / all	0 / 0	0 / 0	
Respiratory, thoracic and mediastinal disorders			
Pulmonary fibrosis			

subjects affected / exposed	1 / 23 (4.35%)	1 / 22 (4.55%)	
occurrences causally related to treatment / all	0 / 1	0 / 1	
deaths causally related to treatment / all	0 / 1	0 / 0	
Infections and infestations			
Cellulitis	Additional description: Hospital Admission cellulitis with possible chest infection		
subjects affected / exposed	1 / 23 (4.35%)	0 / 22 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Lower respiratory tract infection			
subjects affected / exposed	1 / 23 (4.35%)	1 / 22 (4.55%)	
occurrences causally related to treatment / all	0 / 1	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Sepsis			
	Additional description: Hospital admission with Sepsis, likely related to skin		
subjects affected / exposed	1 / 23 (4.35%)	0 / 22 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	

Frequency threshold for reporting non-serious adverse events: 0 %

Non-serious adverse events	Omeprazole	Placebo	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	12 / 23 (52.17%)	13 / 22 (59.09%)	
Injury, poisoning and procedural complications			
Back Injury			
subjects affected / exposed	1 / 23 (4.35%)	0 / 22 (0.00%)	
occurrences (all)	1	0	
Vascular disorders			
Hot flush			
subjects affected / exposed	0 / 23 (0.00%)	1 / 22 (4.55%)	
occurrences (all)	0	1	
Nervous system disorders			
Dizziness			
subjects affected / exposed	1 / 23 (4.35%)	0 / 22 (0.00%)	
occurrences (all)	3	0	
Headache			

subjects affected / exposed occurrences (all)	0 / 23 (0.00%) 0	4 / 22 (18.18%) 5	
General disorders and administration site conditions			
Chest Pain			
subjects affected / exposed	1 / 23 (4.35%)	0 / 22 (0.00%)	
occurrences (all)	1	0	
Fatigue			
subjects affected / exposed	0 / 23 (0.00%)	2 / 22 (9.09%)	
occurrences (all)	0	2	
Local swelling			
subjects affected / exposed	0 / 23 (0.00%)	1 / 22 (4.55%)	
occurrences (all)	0	1	
Oedema			
subjects affected / exposed	1 / 23 (4.35%)	0 / 22 (0.00%)	
occurrences (all)	1	0	
Gastrointestinal disorders			
Abdominal pain			
subjects affected / exposed	2 / 23 (8.70%)	1 / 22 (4.55%)	
occurrences (all)	2	1	
Acid reflux			
subjects affected / exposed	0 / 23 (0.00%)	1 / 22 (4.55%)	
occurrences (all)	0	4	
Diarrhoea			
subjects affected / exposed	1 / 23 (4.35%)	2 / 22 (9.09%)	
occurrences (all)	1	5	
Dyspepsia			
subjects affected / exposed	1 / 23 (4.35%)	3 / 22 (13.64%)	
occurrences (all)	1	9	
Gastric ulcer			
subjects affected / exposed	0 / 23 (0.00%)	1 / 22 (4.55%)	
occurrences (all)	0	1	
Salivary gland calculus			
subjects affected / exposed	0 / 23 (0.00%)	1 / 22 (4.55%)	
occurrences (all)	0	1	
Vomiting			

subjects affected / exposed occurrences (all)	2 / 23 (8.70%) 3	4 / 22 (18.18%) 10	
Constipation subjects affected / exposed occurrences (all)	0 / 23 (0.00%) 0	1 / 22 (4.55%) 1	
Respiratory, thoracic and mediastinal disorders Cough subjects affected / exposed occurrences (all)	3 / 23 (13.04%) 3	1 / 22 (4.55%) 1	
Cough Syncope subjects affected / exposed occurrences (all)	1 / 23 (4.35%) 1	0 / 22 (0.00%) 0	
Dyspnoea subjects affected / exposed occurrences (all)	0 / 23 (0.00%) 0	2 / 22 (9.09%) 5	
Oropharyngeal pain subjects affected / exposed occurrences (all)	0 / 23 (0.00%) 0	1 / 22 (4.55%) 1	
sore throat subjects affected / exposed occurrences (all)	0 / 23 (0.00%) 0	1 / 22 (4.55%) 1	
Psychiatric disorders Depression subjects affected / exposed occurrences (all)	1 / 23 (4.35%) 1	0 / 22 (0.00%) 0	
Musculoskeletal and connective tissue disorders Back pain subjects affected / exposed occurrences (all)	0 / 23 (0.00%) 0	1 / 22 (4.55%) 1	
Muscle spasms subjects affected / exposed occurrences (all)	0 / 23 (0.00%) 0	1 / 22 (4.55%) 1	
Pain in extremity subjects affected / exposed occurrences (all)	1 / 23 (4.35%) 1	0 / 22 (0.00%) 0	
Infections and infestations			

Influenza			
subjects affected / exposed	1 / 23 (4.35%)	1 / 22 (4.55%)	
occurrences (all)	1	1	
Lower respiratory tract infection			
subjects affected / exposed	5 / 23 (21.74%)	2 / 22 (9.09%)	
occurrences (all)	5	2	
Urinary tract infection			
subjects affected / exposed	2 / 23 (8.70%)	0 / 22 (0.00%)	
occurrences (all)	2	0	
Viral upper respiratory tract infection			
subjects affected / exposed	1 / 23 (4.35%)	1 / 22 (4.55%)	
occurrences (all)	1	1	
Metabolism and nutrition disorders			
Gout			
subjects affected / exposed	1 / 23 (4.35%)	0 / 22 (0.00%)	
occurrences (all)	1	0	
Hyperglycaemia			
subjects affected / exposed	1 / 23 (4.35%)	0 / 22 (0.00%)	
occurrences (all)	1	0	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
15 January 2014	<p>Substantial Amendment 3 (Substantial Amendments 1 and 2 were submitted prior to MHRA and REC approval for the trial). The following documents were updated: Protocol updated to v3.0 20/11/2013 Study documents updated: GP/Information sheets v1.1 20/11/2013, Informed Consent Form v1.1, 20/11/2013, Patient Diary Card v1.0 06/12/2013, Patient Information Sheet v1.1 20/11/2013, Participant Consent Form: Discontinuation of medication v1.1 20/11/2013.</p> <p>This amendment was to clarify certain sections in the protocol in greater detail, such as: patient recruitment, statistical analysis, pharmacovigilance, reporting of adverse events during the study period. This amendment was given favourable REC opinion on: 10/01/2014 This was granted MHRA approval on: 15/01/2014</p> <p>This amendment was to clarify certain sections in the protocol in greater detail, such as: patient recruitment, statistical analysis, pharmacovigilance, reporting of adverse events during the study period. This was submitted to REC on: 16/12/2013 and granted approval on: 10/01/2014 This was submitted to the MHRA on: 16/12/2013 and granted approval on: 15/01/2014</p>
02 September 2014	<p>Substantial Amendment 4 The following documents were updated: Participant consent form 2.0 03/07/2014, Participant consent form: discontinuation of medication v2.0 03/07/2014, Participant Information Sheet v2.0 03/07/2014. Production specification 2013-5 Revision B</p> <p>This amendment was to update documents in line with the Data Monitoring Committee recommendations.</p> <p>This amendment was given favourable REC opinion on: 26/08/2014 This was granted MHRA approval on: 02/09/2014</p>
18 August 2016	<p>Substantial Amendment 5 The following documents were updated: Participant consent form v3.1 05/08/2016, Participant consent form v3.1 05/08/2016, Participant Information Sheet v3.1 07/03/2016. SmPC v07 15/12/2015.</p> <p>This amendment was to update the Reference Safety Information for the trial, update the study end date and update documents in line with staff changes on the Trial.
