

Clinical trial results:

A phase III randomized, multicenter, double-blind, active controlled study to compare the efficacy and safety of two different anagrelide formulations in patients with Essential Thrombocythemia (TEAM-ET 2.0)

Summary

EudraCT number	2013-003410-41
Trial protocol	AT LT BG PL
Global end of trial date	14 April 2015

Results information

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	04 May 2016
Is this the analysis of the primary completion data?	Yes
Primary completion date	01 April 2015
Global end of trial reached?	Yes
Global end of trial date	14 April 2015
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective is to determine whether Anagrelide Retard is non-inferior to Thromboreductin® in terms of mean platelet count measured by a central laboratory/centralized method at three time points during the maintenance period.

Protection of trial subjects:

An IDMC was established, responsible for safeguarding the interests of trial participants, assessing the safety of the interventions during the trial. The DMC met quarterly from the time of first patient randomization until last patient's study finalization.

Protection with regards to reducing individual health risks:

Any prophylactic medications to reduce the risk of thrombotic events other than alternative cyto-reductive treatments or any medication to control or treat disease related symptoms/adverse events are permitted throughout the study (e.g. paracetamol, Aspirin®). No drugs with an effect to reduce platelet counts are permitted during the whole study.

In case of palpitations, a low dose beta-blocker should be used, if clinically indicated. Paracetamol is the preferred drug to treat anagrelide related headache. Standard locally available therapy is to be used in case of diarrhoea (for example loperamide).

Background therapy:

At the discretion of the investigator, any therapy reducing the risk of thrombotic events was allowed, except for cyto-reductive drugs.

Evidence for comparator:

According to the EMA 'Points to consider on the clinical requirements of modified release products submitted as a line extension of an existing marketing authorization' (CPMP/EWP/1875/03/Final), demonstration of non-inferiority of a modified-release formulation is considered sufficient, unless efficacy and safety of a drug are closely related, or the effect of the product is bi-directional. Therefore, Thromboreductin® was chosen as the comparator.

Actual start date of recruitment	26 March 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Poland: 27
Country: Number of subjects enrolled	Austria: 15
Country: Number of subjects enrolled	Bulgaria: 25
Country: Number of subjects enrolled	Lithuania: 8
Country: Number of subjects enrolled	Russian Federation: 37
Worldwide total number of subjects	112
EEA total number of subjects	75

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	72
From 65 to 84 years	40
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

A total of 112 subjects were screened at 18 centers in Austria (3), Bulgaria (2), Lithuania (2), Poland (5) and Russia (6). 6 of these subjects were screening failures. One subject was randomized but did not receive treatment and was classified as screening failure. 107 subjects were randomized and 106 subjects were included in the Safety Set.

Pre-assignment

Screening details:

Patients with confirmed diagnosis of ET at high risk (age ≥ 60 years, platelet counts ≥ 1000 G/L, increase of platelet count ≥ 300 G/L within 3 months, severe thrombohemorrhagic/ ischemic symptoms) of experiencing ET-related events, being currently treated or (ET treatment or Anagrelide) naïve.

Period 1

Period 1 title	Screening
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Anagrelide Retard

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Anagrelide Retard 2mg
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Prolonged-release tablet
Routes of administration	Oral use

Dosage and administration details:

Optimal dosing (increase to achieve the target platelet level, decrease in case of toxicity following the SmPC specifications of dosing rules for Thromboreductin were applied to each patient to reduce (for ANA-naïve subjects) or maintain platelets (for anagrelide pre-treated subjects) (tbc) the platelet count ≤ 400 G/L or, in cases in which further dose up-titration was not possible due to poor tolerability, at least below 600 G/L.

Arm title	Thromboreductin
Arm description: -	
Arm type	Active comparator
Investigational medicinal product name	Thromboreductin® 0.5 mg
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule, hard
Routes of administration	Oral use

Dosage and administration details:

Optimal dosing (increase to achieve the target platelet level, decrease in case of toxicity following the SmPC specifications of Thromboreductin® were applied to each patient to reduce (for ANA-naïve subjects) or maintain (tbc) platelets (for anagrelide pre-treated subjects) the platelet count ≤ 400 G/L or, in cases in which further dose up-titration was not possible due to poor tolerability, at least below 600 G/L.

Number of subjects in period 1 ^[1]	Anagrelide Retard	Thromboreductin
Started	52	54
Completed	52	54

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: 6 of the 112 subjects were screening failures and were subsequently not included.

Period 2

Period 2 title	Overall trial
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Anagrelide Retard
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	Anagrelide Retard 2mg
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Prolonged-release tablet
Routes of administration	Oral use

Dosage and administration details:

Titration Phase: The dose was adjusted weekly up to 12 weeks in order to achieve a "stable platelet count" on two consecutive measurements (main criterion: between 150 and 400 G/L, but further criteria also applied using fluctuation criteria).

ANA-naïve patients started with dose level 2 (i.e. 2 mg Anagrelide Retard per day). ANA-treated patients were switched to the dose level which was closest to the pre-study anagrelide dose at study start, followed by weekly adjustments if required (platelet response, toxicity). Weekly titration was done in 1 mg with Anagrelide Retard steps with a maximum daily dose of 10 mg.

Maintenance Phase: Patients reaching the desired response stable platelet count, were switched to a 4-week maintenance phase at the dose determined. Depending on dose level, IMPs were to be taken once (morning) or twice daily (every 12 hours) after meal intake. From dose level 2 onwards, total daily dose was split in two as near as possible equivalent doses.

Arm title	Thromboreductin
Arm description: -	
Arm type	Active comparator
Investigational medicinal product name	Thromboreductin® 0.5 mg
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule, hard
Routes of administration	Oral use

Dosage and administration details:

Titration Phase: The dose was adjusted weekly up to 12 weeks in order to achieve a "stable platelet count" (main criterion defined as between 150 and 400 G/L, but further criteria were also applied using fluctuation criteria) on two consecutive measurements.

ANA-naïve patients started with dose level 2 (i.e. 2 mg Anagrelide Retard per day). ANA-treated patients were switched to the dose level which was closest to the pre-study anagrelide dose at study start, followed by weekly adjustments if required, according to the platelet response and toxicity. Weekly titration was done in 0.5 mg with Thromboreductin steps. The maximum daily dose was 5 mg

Thromboreductin.
Maintenance Phase: see Anagrelide retard

Statistical analyses

Statistical analysis title	Primary analysis of the main endpoint based on PPS
Statistical analysis description: The primary efficacy endpoint was analysed by means of a repeated measurement analysis using a mixed model (MMRM).	
Comparison groups	Anagrelide Retard v Thromboreductin
Number of subjects included in analysis	85
Analysis specification	Pre-specified
Analysis type	non-inferiority ^[1]
P-value	< 0.0001
Method	Mixed models analysis
Parameter estimate	Ratio of means
Point estimate	0.9205
Confidence interval	
level	Other: 97.5 %
sides	1-sided
upper limit	1.037

Notes:

[1] - The mixed model included the factors treatment group, time, cross factor time*treatment group, stratification variable treatment status before titration phase and covariates age and cardiovascular medical history. Non-inferiority was concluded if the upper limit of the one-sided 97.5% confidence interval of the treatment difference between Anagrelide and Thromboreductin® did not exceed 1.3 in the ratio of mean platelet count of three measurements of the maintenance phase.

Statistical analysis title	Supportive analysis using the FAS population
Statistical analysis description: The supportive analysis used the same model as applied for the primary analysis (repeated measurement analysis using a mixed model (MMRM)).	
Comparison groups	Thromboreductin v Anagrelide Retard
Number of subjects included in analysis	85
Analysis specification	Pre-specified
Analysis type	non-inferiority ^[2]
P-value	< 0.0001
Method	Mixed models analysis
Parameter estimate	Ratio of means
Point estimate	0.8956
Confidence interval	
level	95 %
sides	1-sided
upper limit	1.008

Statistical analyses

Statistical analysis title	Secondary endpoint analysis based on FAS T2
----------------------------	---

Statistical analysis description:

The change from baseline in platelet counts at each visit during titration was analyzed using an ANCOVA model of the original log-transformed data of absolute platelet count with the same covariates as used for the analysis of the primary efficacy parameter including the log-transformed baseline platelet value in addition and excluding the factor visit. ANCOVAs were run for each visit.

Method	ANCOVA
Parameter estimate	Mean difference (final values)
Point estimate	1.0337
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.9275
upper limit	1.152

Notes:

[6] - Least square estimates of each treatment group and the difference thereof and corresponding standard deviations, two-sided 95% CIs and corresponding p-values for the treatment difference and covariates were derived. Data from local laboratory were taken for this kind of analysis.

Statistical analysis title	Secondary endpoint analysis based on FAS T3
-----------------------------------	---

Statistical analysis description:

The change from baseline in platelet counts at each visit during titration was analyzed using an ANCOVA model of the original log-transformed data of absolute platelet count with the same covariates as used for the analysis of the primary efficacy parameter including the log-transformed baseline platelet value in addition and excluding the factor visit. ANCOVAs were run for each visit.

Comparison groups	Anagrelide Retard v Thromboreductin
Number of subjects included in analysis	106
Analysis specification	Pre-specified
Analysis type	other ^[7]
P-value	= 0.4854
Method	ANCOVA
Parameter estimate	Mean difference (final values)
Point estimate	0.9307
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.7592
upper limit	1.1409

Notes:

[7] - Least square estimates of each treatment group and the difference thereof and corresponding standard deviations, two-sided 95% CIs and corresponding p-values for the treatment difference and covariates were derived. Data from local laboratory were taken for this kind of analysis.

Statistical analysis title	Secondary endpoint analysis based on FAS T4
-----------------------------------	---

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Screening Period: V 1, d -7 to -1

Titration Period: V 2, d 1

V 3, d 8

V 4, d 15

V 5, d 22

V 6, d 29

V 7 up to V 13, d 36 up to 78

Maintenance Period: V 14, d 85

V 15, d 92

V 16, d 99

V 17, d 106

V 18, d 113

V 19, 28d after V 18

Assessment type	Systematic

Reporting groups

Reporting group title	Anagrelide Retard
Reporting group description: -	
Reporting group title	Thromboreductin
Reporting group description: -	

Serious adverse events	Anagrelide Retard	Thromboreductin	
Total subjects affected by serious adverse events			
subjects affected / exposed	11 / 52 (21.15%)	1 / 54 (1.85%)	
number of deaths (all causes)	1	0	
number of deaths resulting from adverse events	0	0	
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
Gastrointestinal Stromal Tumour			
subjects affected / exposed	0 / 52 (0.00%)	1 / 54 (1.85%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Injury, poisoning and procedural complications			
Head injury			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Ligament rupture			

subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Road traffic accident			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Vascular disorders			
Aortic thrombosis			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 0	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Nervous system disorders			
Ischaemic stroke			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Blood and lymphatic system disorders			
Haemorrhagic anaemia			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Splenic infarction			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Ear and labyrinth disorders			
Deafness unilateral			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Sudden hearing loss			

subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Gastrointestinal disorders			
Pancreatitis acute			
subjects affected / exposed	2 / 52 (3.85%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	1 / 2	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Gastric ulcer haemorrhage			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Mesenteric artery thrombosis			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Respiratory, thoracic and mediastinal disorders			
Pleural effusion			
subjects affected / exposed	1 / 52 (1.92%)	1 / 54 (1.85%)	
occurrences causally related to treatment / all	0 / 1	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Hepatobiliary disorders			
Cholecystitis acute			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Renal and urinary disorders			
Cystitis haemorrhagic			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Infections and infestations			
Lobar pneumonia			

subjects affected / exposed	2 / 52 (3.85%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 2	0 / 0	
deaths causally related to treatment / all	0 / 1	0 / 0	
Gastroenteritis rotavirus			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Respiratory tract infection			
subjects affected / exposed	0 / 52 (0.00%)	1 / 54 (1.85%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	

Frequency threshold for reporting non-serious adverse events: 5 %

Non-serious adverse events	Anagrelide Retard	Thromboreductin	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	42 / 52 (80.77%)	42 / 54 (77.78%)	
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
Fibroma			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences (all)	1	0	
Vascular disorders			
Hypertension			
subjects affected / exposed	5 / 52 (9.62%)	4 / 54 (7.41%)	
occurrences (all)	6	6	
Hypotension			
subjects affected / exposed	3 / 52 (5.77%)	1 / 54 (1.85%)	
occurrences (all)	6	1	
Haematoma			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences (all)	1	0	
Phlebitis			
subjects affected / exposed	0 / 52 (0.00%)	1 / 54 (1.85%)	
occurrences (all)	0	1	
Surgical and medical procedures			

Dental implantation subjects affected / exposed occurrences (all)	0 / 52 (0.00%) 0	1 / 54 (1.85%) 1	
General disorders and administration site conditions			
Chest pain subjects affected / exposed occurrences (all)	3 / 52 (5.77%) 4	3 / 54 (5.56%) 3	
Peripheral swelling subjects affected / exposed occurrences (all)	4 / 52 (7.69%) 4	1 / 54 (1.85%) 1	
Fatigue subjects affected / exposed occurrences (all)	2 / 52 (3.85%) 3	2 / 54 (3.70%) 2	
Pyrexia subjects affected / exposed occurrences (all)	3 / 52 (5.77%) 3	1 / 54 (1.85%) 1	
Asthenia subjects affected / exposed occurrences (all)	2 / 52 (3.85%) 2	1 / 54 (1.85%) 1	
Adverse drug reaction subjects affected / exposed occurrences (all)	0 / 52 (0.00%) 0	1 / 54 (1.85%) 1	
Chills subjects affected / exposed occurrences (all)	0 / 52 (0.00%) 0	1 / 54 (1.85%) 1	
Condition aggravated subjects affected / exposed occurrences (all)	0 / 52 (0.00%) 0	1 / 54 (1.85%) 1	
Malaise subjects affected / exposed occurrences (all)	1 / 52 (1.92%) 1	0 / 54 (0.00%) 0	
Oedema peripheral subjects affected / exposed occurrences (all)	1 / 52 (1.92%) 4	0 / 54 (0.00%) 0	
Pain			

subjects affected / exposed occurrences (all)	1 / 52 (1.92%) 1	0 / 54 (0.00%) 0	
Reproductive system and breast disorders			
Breast cyst			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences (all)	1	0	
Erectile dysfunction			
subjects affected / exposed	0 / 52 (0.00%)	1 / 54 (1.85%)	
occurrences (all)	0	1	
Respiratory, thoracic and mediastinal disorders			
Dyspnoea			
subjects affected / exposed	1 / 52 (1.92%)	2 / 54 (3.70%)

Depression			

subjects affected / exposed occurrences (all)	0 / 52 (0.00%) 0	1 / 54 (1.85%) 1	
Investigations			
Platelet count decreased			
subjects affected / exposed	2 / 52 (3.85%)	1 / 54 (1.85%)	
occurrences (all)	3	1	
Blood creatine increased			
subjects affected / exposed	0 / 52 (0.00%)	2 / 54 (3.70%)	
occurrences (all)	0	2	
C-reactive protein increased			
subjects affected / exposed	1 / 52 (1.92%)	1 / 54 (1.85%)	
occurrences (all)	1	1	
Gamma-glutamyltransferase increased			
subjects affected / exposed	1 / 52 (1.92%)	1 / 54 (1.85%)	
occurrences (all)	1	3	
Aspartate aminotransferase increased			
subjects affected / exposed	0 / 52 (0.00%)	1 / 54 (1.85%)	
occurrences (all)	0	1	
Blood alkaline phosphatase increased			
subjects affected / exposed	0 / 52 (0.00%)	1 / 54 (1.85%)	
occurrences (all)	0	1	
Blood glucose increased			
subjects affected / exposed	0 / 52 (0.00%)	1 / 54 (1.85%)	
occurrences (all)	0	1	
Blood iron decreased			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences (all)	1	0	
Blood pressure increased			
subjects affected / exposed	1 / 52 (1.92%)	0 / 54 (0.00%)	
occurrences (all)	1	0	
Blood urea increased			
subjects affected / exposed	0 / 52 (0.00%)	1 / 54 (1.85%)	
occurrences (all)	0	2	
Brain natriuretic peptide increased			

subjects affected / exposed occurrences (all)	0 / 52 (0.00%) 0	1 / 54 (1.85%) 1	
Eosinophil count increased subjects affected / exposed occurrences (all)	1 / 52 (1.92%) 1	0 / 54 (0.00%) 0	
Haemoglobin decreased subjects affected / exposed occurrences (all)	0 / 52 (0.00%) 0	1 / 54 (1.85%) 1	
N-terminal prohormone brain natriuretic peptide increased subjects affected / exposed occurrences (all)	1 / 52 (1.92%) 1	0 / 54 (0.00%) 0	
Injury, poisoning and procedural complications			
Animal bite subjects affected / exposed occurrences (all)	0 / 52 (0.00%) 0	1 / 54 (1.85%) 1	
Joint injury subjects affected / exposed occurrences (all)	0 / 52 (0.00%) 0	1 / 54 (1.85%) 1	
Overdose subjects affected / exposed occurrences (all)	0 / 52 (0.00%) 0	1 / 54 (1.85%) 3	
Cardiac disorders

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
04 June 2014	<ul style="list-style-type: none">- an exclusion criterion was updated to add electrolyte imbalance- subjects were to be monitored for evidence of cardiovascular effects during treatment.- subjects who benefited from the study treatment could be further treated with an anagrelide formulation instead as previously stated Thromboreductin after the end of the study.- changes to the protocol-specified analyses<ul style="list-style-type: none">• statistical model and main hypothesis• definition of response rates• change to baseline of platelet count• extent of exposure• adverse events

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
