

## Clinical trial results:

### A Double-Blind, Placebo-Controlled, Parallel-Group, Multicenter Study of the Efficacy and Safety of Pregabalin as Adjunctive Therapy in Children 1 Month Through <4 Years of Age With Partial Onset Seizures

#### Summary

EudraCT number	2013-003420-37
Trial protocol	BE HU NL ES DE PL SK GR PT BG
Global end of trial date	13 March 2018

#### Results information

Result version number	v1 (current)
This version publication date	23 September 2018
First version publication date	23 September 2018

#### Trial information

##### Trial identification

Sponsor protocol code	A0081042
-----------------------	----------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02072824
WHO universal trial number (UTN)	-

Notes:

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	18 July 2018
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	13 March 2018
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To evaluate the efficacy of 2 dose levels of Pregabalin compared to placebo as an adjunctive treatment in reducing the frequency of POS in pediatric subjects 1 month to <4 years of age.

Protection of trial subjects:

The study was conducted in compliance with the ethical principles derived from the Declaration of Helsinki and in compliance with all International Council for Harmonization (ICH) Good Clinical Practice (GCP) Guidelines. All the local regulatory requirements pertinent to safety of trial subjects were followed.

Background therapy:

Subjects were on a stable dose of 1 to 3 antiepileptic drugs concomitant to double-blind study medication throughout the duration of the study.

Evidence for comparator: -

Actual start date of recruitment	16 September 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 1
Country: Number of subjects enrolled	Bulgaria: 3
Country: Number of subjects enrolled	China: 2
Country: Number of subjects enrolled	France: 1
Country: Number of subjects enrolled	Belarus: 4
Country: Number of subjects enrolled	Germany: 1
Country: Number of subjects enrolled	Greece: 1
Country: Number of subjects enrolled	Hungary: 15
Country: Number of subjects enrolled	Israel: 1
Country: Number of subjects enrolled	Korea, Republic of: 1
Country: Number of subjects enrolled	Lebanon: 6
Country: Number of subjects enrolled	Malaysia: 2
Country: Number of subjects enrolled	Philippines: 41
Country: Number of subjects enrolled	Romania: 2
Country: Number of subjects enrolled	Russian Federation: 16
Country: Number of subjects enrolled	Serbia: 4
Country: Number of subjects enrolled	Spain: 1
Country: Number of subjects enrolled	Taiwan: 4

Country: Number of subjects enrolled	Thailand: 2
Country: Number of subjects enrolled	Turkey: 4
Country: Number of subjects enrolled	Ukraine: 57
Country: Number of subjects enrolled	United States: 6
Worldwide total number of subjects	175
EEA total number of subjects	25

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	65
Children (2-11 years)	110
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

Subjects received treatment in double-blind treatment phase (total duration: 21 days) which included dose escalation (5 days), fixed-dose (9 days) and taper (7 days).

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Carer, Subject

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Pregabalin 7 mg/kg/day or 6 mg/kg/day

Arm description:

Subjects aged greater than (>) 3 months to less than (<) 4 years, received Pregabalin 3.5 milligrams per kilogram per day (mg/kg/day) (3.0 mg/kg/day for subjects 1 to 3 months of age), orally three times daily (TID) in equally divided doses for first 5 days; followed by 7 mg/kg/day (6 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for 9 days and 3.5 mg/kg/day (3.0 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 7 days.

Arm type	Experimental
Investigational medicinal product name	Pregabalin
Investigational medicinal product code	NO3AX16
Other name	
Pharmaceutical forms	Oral solution
Routes of administration	Oral use

Dosage and administration details:

Pregabalin was administered as oral solution, TID, up to 21 days.

<b>Arm title</b>	Pregabalin 14 mg/kg/day or 12 mg/kg/day
------------------	---

Arm description:

Subjects aged >3 months to <4 years, received Pregabalin 3.5 mg/kg/day (3.0 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for first 2 days and 7 mg/kg/day (6 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 3 days; followed by 14 mg/kg/day (12 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for 9 days; and 7 mg/kg/day (6 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 4 days and 3.5 mg/kg/day (3.0 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 3 days.

Arm type	Experimental
Investigational medicinal product name	Pregabalin
Investigational medicinal product code	NO3AX16
Other name	
Pharmaceutical forms	Oral solution
Routes of administration	Oral use

Dosage and administration details:

Pregabalin was administered as oral solution, TID, up to 21 days.

<b>Arm title</b>	Placebo
------------------	---------

Arm description:

Subjects aged >3 months to <4 years received placebo matched to Pregabalin, orally TID for 21 days.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Oral solution
Routes of administration	Oral use

Dosage and administration details:

Placebo matched to Pregabalin was administered as oral solution, TID, up to 21 days.

Number of subjects in period 1	Pregabalin 7 mg/kg/day or 6 mg/kg/day	Pregabalin 14 mg/kg/day or 12 mg/kg/day	Placebo
Started	71	34	70
Completed	69	33	67
Not completed	2	1	3
Medication error	-	1	-
No longer willing to participate	1	-	1
Adverse Events	-	-	1
Insufficient clinical response	1	-	1

## Baseline characteristics

### Reporting groups

Reporting group title	Pregabalin 7 mg/kg/day or 6 mg/kg/day
Reporting group description:	
Subjects aged greater than (>) 3 months to less than (<) 4 years, received Pregabalin 3.5 milligrams per kilogram per day (mg/kg/day) (3.0 mg/kg/day for subjects 1 to 3 months of age), orally three times daily (TID) in equally divided doses for first 5 days; followed by 7 mg/kg/day (6 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for 9 days and 3.5 mg/kg/day (3.0 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 7 days.	
Reporting group title	Pregabalin 14 mg/kg/day or 12 mg/kg/day
Reporting group description:	
Subjects aged >3 months to <4 years, received Pregabalin 3.5 mg/kg/day (3.0 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for first 2 days and 7 mg/kg/day (6 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 3 days; followed by 14 mg/kg/day (12 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for 9 days; and 7 mg/kg/day (6 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 4 days and 3.5 mg/kg/day (3.0 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 3 days.	
Reporting group title	Placebo
Reporting group description:	
Subjects aged >3 months to <4 years received placebo matched to Pregabalin, orally TID for 21 days.	

Reporting group values	Pregabalin 7 mg/kg/day or 6 mg/kg/day	Pregabalin 14 mg/kg/day or 12 mg/kg/day	Placebo
Number of subjects	71	34	70

## End points

### End points reporting groups

Reporting group title	Pregabalin 7 mg/kg/day or 6 mg/kg/day
Reporting group description: Subjects aged greater than (>) 3 months to less than (<) 4 years, received Pregabalin 3.5 milligrams per kilogram per day (mg/kg/day) (3.0 mg/kg/day for subjects 1 to 3 months of age), orally three times daily (TID) in equally divided doses for first 5 days; followed by 7 mg/kg/day (6 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for 9 days and 3.5 mg/kg/day (3.0 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 7 days.	
Reporting group title	Pregabalin 14 mg/kg/day or 12 mg/kg/day
Reporting group description: Subjects aged >3 months to <4 years, received Pregabalin 3.5 mg/kg/day (3.0 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for first 2 days and 7 mg/kg/day (6 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 3 days; followed by 14 mg/kg/day (12 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for 9 days; and 7 mg/kg/day (6 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 4 days and 3.5 mg/kg/day (3.0 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 3 days.	
Reporting group title	Placebo
Reporting group description: Subjects aged >3 months to <4 years received placebo matched to Pregabalin, orally TID for 21 days.	

### Primary: Log Transformed 24-Hour Seizure Rate for All Partial Onset Seizures During the Double-Blind Treatment Phase

End point title	Log Transformed 24-Hour Seizure Rate for All Partial Onset Seizures During the Double-Blind Treatment Phase
End point description: All partial onset seizures experienced during treatment phase were recorded by central reader during the 48 to 72 hour video-electroencephalogram (EEG). Double Blind 24 hour EEG seizure rate for all partial onset seizures = ([Number of seizures in double blind 48 to 72 hour EEG assessment] divided by [number of hours of video-EEG monitoring])*24. The EEG assessment was done at the end of the fixed dose treatment. For log-transformation, the quantity 1 was added to the double blind 24 hour EEG seizure rate for all subjects to account for any possible "0" seizure incidence. This resulted in final calculation as: log transformed (double-blind 24-hour EEG seizure rate + 1). Modified intent-to-treat (mITT) population included all randomized subjects who took at least one dose of study drug during the double-blind treatment phase, had a baseline with at least one partial onset seizure identified by video-EEG (at least 24 hours of evaluable monitoring) and a treatment phase video-EEG.	
End point type	Primary
End point timeframe: Day 1 up to Day 14	

End point values	Pregabalin 7 mg/kg/day or 6 mg/kg/day	Pregabalin 14 mg/kg/day or 12 mg/kg/day	Placebo	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	59	28	53	
Units: seizures per 24 hours				
least squares mean (standard error)	1.69 (± 0.115)	1.15 (± 0.163)	1.58 (± 0.129)	

## Statistical analyses

<b>Statistical analysis title</b>	Pregabalin 7 mg/kg/day or 6 mg/kg/day vs. Placebo
Statistical analysis description: Linear model with log transformed baseline seizure rate as continuous covariate and treatment, age stratum, and geographical region as fixed factor effects.	
Comparison groups	Pregabalin 7 mg/kg/day or 6 mg/kg/day v Placebo
Number of subjects included in analysis	112
Analysis specification	Pre-specified
Analysis type	
P-value	= 0.4606
Method	ANCOVA
Parameter estimate	Least Square Mean Difference
Point estimate	0.11
Confidence interval	
level	95 %

#### **Other pre-specified: Number of Subjects With Treatment-Emergent Adverse Events (AEs) and Serious Adverse Events (SAEs)**

End point title	Number of Subjects With Treatment-Emergent Adverse Events (AEs) and Serious Adverse Events (SAEs)
-----------------	---

End point description:

An AE was any untoward medical occurrence in a subject who received study drug without regard to possibility of causal relationship. An SAE was an AE resulting in any of the following outcomes or deemed significant for any other reason: death; initial or prolonged inpatient hospitalization; life-threatening experience (immediate risk of dying); persistent or significant disability/incapacity; congenital anomaly. Treatment-emergent AEs were events which occurred between first dose of study drug and up to end of study (up to Day 25) that were absent before treatment or that worsened relative to pre-treatment state. AEs included both serious and non-serious adverse events. Safety population included all randomized subjects who received at least 1 dose of study drug.

End point type	Other pre-specified
----------------	---------------------

End point timeframe:

Day 1 up to End of study (EOS) (maximum Day 25)

End point values	Pregabalin 7 mg/kg/day or 6 mg/kg/day	Pregabalin 14 mg/kg/day or 12 mg/kg/day	Placebo

## Statistical analyses

**Other pre-specified: Percentage of Subjects With Abnormal Neurological Examination Findings at Baseline and End of Study**

End point title	Percentage of Subjects With Abnormal Neurological Examination Findings at Baseline and End of Study
-----------------	---

## End point description:

Neurological examinations included: coordination; cranial nerve function (CNF); gait and station; level of consciousness (LOC); lower and upper extremity sensation; muscle strength (str.); muscle tone; nystagmus; reflexes and speech. Abnormalities in neurological examination were based on investigator's discretion and also, some components of the neurological examination were not done for certain subjects due to subject age or significant developmental impairment. Only those categories of neurological examination in which at least 10% of subjects had an abnormality in any treatment group at any time point were reported in this endpoint. Safety population included all randomized subjects who received at least 1 dose of study drug. Here, "n" signifies number of subjects who were evaluable for the specified category for each arm respectively.

End point type	Other pre-specified
----------------	---------------------

## Statistical analyses

No statistical analyses for this end point

## Other pre-specified: Number of Subjects With Electrocardiogram (ECG) Abnormalities

End point title	Number of Subjects With Electrocardiogram (ECG) Abnormalities
-----------------	---

End point description:

Criteria for abnormalities in ECG findings: 1) Time from ECG Q wave to the end of the S wave corresponding to ventricle depolarization (QRS complex):  $\geq 140$  milliseconds (msec); 2) The interval between the start of the P wave and the start of the QRS complex, corresponding to the time between the onset of the atrial depolarization and onset of ventricular depolarization (PR interval):  $\geq 200$  msec; 3) Time from ECG Q wave to the end of the T wave corresponding to electrical systole corrected for heart rate using Fridericia's formula (QTcf interval): absolute value 450 to  $< 480$  msec, 480 to  $< 500$  msec,  $\geq 500$  msec; 4) Maximum QT interval:  $\geq 500$  msec; 5) Maximum QTcB interval (Bazett's correction): 450 to  $< 480$  msec, 480 to  $< 500$  msec,  $\geq 500$  msec. Only those categories of ECG abnormalities in which subjects were found abnormal (maximum QTcB interval 450- $< 480$  msec), were reported in this endpoint. Safety population included all randomized subjects who received at least 1 dose of study drug.

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Day 1 up to End of Study (maximum Day 25)

Assessment type	Non-systematic
-----------------	----------------

### Dictionary used

Dictionary name	MedDRA
-----------------	--------

Dictionary version	v20.1
--------------------	-------

### Reporting groups

Reporting group title	Pregabalin 7 mg/kg/day or 6 mg/kg/day
-----------------------	---------------------------------------

Reporting group description:

Subjects aged > 3 months to < 4 years, received Pregabalin 3.5 mg/kg/day (3.0 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for first 5 days; followed by 7 mg/kg/day (6 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for 9 days and 3.5 mg/kg/day (3.0 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 7 days.

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

Subjects aged >3 months to <4 years received placebo matched to Pregabalin, orally TID for 21 days.

Reporting group title	Pregabalin 14 mg/kg/day or 12 mg/kg/day
-----------------------	---

Reporting group description:

Subjects aged >3 months to <4 years, received Pregabalin 3.5 mg/kg/day (3.0 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for first 2 days and 7 mg/kg/day (6 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 3 days; followed by 14 mg/kg/day (12 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for 9 days; and 7 mg/kg/day (6 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 4 days and 3.5 mg/kg/day (3.0 mg/kg/day for subjects 1 to 3 months of age), orally TID in equally divided doses for next 3 days.
