

Clinical trial results:

A multicenter, open-label, randomized, 2-arm, phase II trial of pharmacodynamics, pharmacokinetics and safety of two dose regimens of DEB025/alisporivir in combination with ribavirin therapy in chronic hepatitis C genotype 2 and 3 patients who have previously failed interferon therapy or are intolerant or unable to take interferon.

Summary

EudraCT number	2013-003751-38
Trial protocol	FR
Global end of trial date	21 April 2015

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	21 April 2015
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	21 April 2015
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

To evaluate pharmacodynamics, pharmacokinetic between 2 treatment groups receiving different doses of DEB025 in combination with RBV

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) Guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial .

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	20 March 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	France: 25
Country: Number of subjects enrolled	United States: 27
Worldwide total number of subjects	52
EEA total number of subjects	25

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	49
From 65 to 84 years	3
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Informed consent was obtained from each patient in writing at screening visit 1. The study was described to the patient by a study nurse, the investigator or a study coordinator, who answered any questions, and written information was also provided.

Period 1

Period 1 title	Treatment period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	DEB300 + RBV

Arm description:

1 capsule of 200 mg and 1 capsule of 100 mg or 3 capsules (100 mg) BID for 12 or 24 weeks depending on the response at Week 2 , and Ribavirin: 1000 mg/day or 1200 mg/day orally (depending on weight) in two divided doses for 12 or 24 weeks depending on the responses at Week 2, respectively.

Arm type	Experimental
Investigational medicinal product name	DEB025300
Investigational medicinal product code	
Other name	Alisporivir
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use

Dosage and administration details:

DEB025 (300 mg BID): 1 capsule of 200 mg and 1 capsule of 100 mg or 3 capsules (100 mg) BID for 12 or 24 weeks depending on the response at Week 2

Investigational medicinal product name	Ribavirin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Ribavirin 1000 mg/day or 1200 mg/day orally (depending on weight)

Arm title	DEB400 + RBV
------------------	--------------

Arm description:

DEB025 (400 mg BID): 2 capsules (200 mg) BID for 12 or 24 weeks depending on the response at Week 2, and Ribavirin: 1000 mg/day or 1200 mg/day orally (depending on weight) in two divided doses for 12 or 24 weeks depending on the response at Week 2, respectively.

Arm type	Experimental
Investigational medicinal product name	Ribavirin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Ribavirin 1000 mg/day or 1200 mg/day orally (depending on weight)

Investigational medicinal product name	DEB025400
Investigational medicinal product code	
Other name	Alisporivir
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use

Dosage and administration details:

DEB025 (400 mg BID): 2 capsules (200 mg) BID for 12 or 24 weeks depending on the response at Week 2

Number of subjects in period 1	DEB300 + RBV	DEB400 + RBV
Started	26	26
Completed	11	9
Not completed	15	17
Physician decision	1	-
Adverse event, non-fatal	3	6
Patient/guardian decision	1	2
Lack of efficacy	10	8
Protocol deviation	-	1

Period 2

Period 2 title	Post-treatment follow-up
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Not blinded

Statistical analyses

No statistical analyses for this end point

Secondary: Confirmed viral breakthrough, relapse, or normalized ALT

End point title	Confirmed viral breakthrough, relapse, or normalized ALT
-----------------	--

End point description:

Confirmed viral breakthrough is defined as two consecutive episodes of: increase of HCV RNA by ≥ 1 log₁₀ above nadir (where nadir is the lowest HCV RNA level during treatment) and HCV RNA ≥ 100 IU / mL (2 log₁₀) while still on treatment), or HCV RNA ≥ 100 IU / mL (2 log₁₀) after previously being undetectable while still on treatment.

Relapse is defined as patients with non-missing and positive follow-up HCV RNA results after imputation are considered as relapsers, if they fully completed assigned treatments and were ETR responders.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
16 February 2015	Novartis decided to no longer focus on development of compounds for treating Hepatitis-C Virus (HCV). The compound DEB025 had been returned to the company from which it was licensed. This decision was not in any way affected or influenced by new safety data for DEB025.	-
