Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	01 October 2015
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	01 October 2015
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

This study is a Phase 2 randomized, double-blind, double-dummy, parallel-group study designed to assess the safety, tolerability, efficacy, pharmacokinetics and immunogenicity of multiple doses of ABT 122 in subjects with active rheumatoid arthritis (RA) who are inadequately responding to methotrexate (MTX) treatment.

Protection of trial subjects:

Subject read and understood the information provided about the study and gave written permission.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	14 July 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Bulgaria: 17
Country: Number of subjects enrolled	Czech Republic: 17
Country: Number of subjects enrolled	Germany: 1
Country: Number of subjects enrolled	Hungary: 11
Country: Number of subjects enrolled	New Zealand: 9
Country: Number of subjects enrolled	Poland: 112
Country: Number of subjects enrolled	Romania: 6
Country: Number of subjects enrolled	United States: 49
Worldwide total number of subjects	222
EEA total number of subjects	164

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0

Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	169
From 65 to 84 years	53
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

The study included a 30-day screening period.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Assessor

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Adalimumab 40 mg EOW
------------------	----------------------

Arm description:

Adalimumab 40 mg every other week (EOW) for 11 weeks.

Arm type	Active comparator
Investigational medicinal product name	adalimumab
Investigational medicinal product code	
Other name	Humira
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

adalimumab administered as subcutaneous injection every other week (EOW)

Arm title	ABT-122 60 mg EOW
------------------	-------------------

Arm description:

ABT-122 60 mg every other week (EOW) for 11 weeks.

Arm type	Experimental
Investigational medicinal product name	ABT-122
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

ABT-122 administered as subcutaneous injection every other week (EOW)

Arm title	ABT-122 120 mg EOW
------------------	--------------------

Arm description:

ABT-122 120 mg every other week (EOW) for 11 weeks.

Arm type	Experimental
Investigational medicinal product name	ABT-122
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

ABT-122 administered as subcutaneous injection every other week (EOW)

Arm title	ABT-122 120 mg EW
Arm description: ABT-122 120 mg every week (EW) for 11 weeks.	
Arm type	Experimental
Investigational medicinal product name	ABT-122
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

ABT-122 administered as subcutaneous injection every other week (EOW)

Secondary: Change in Disease Activity Score 28 With High Sensitivity C-Reactive Protein (DAS28 [hsCRP])

End point title	Change in Disease Activity Score 28 With High Sensitivity C-Reactive Protein (DAS28 [hsCRP])
-----------------	--

End point description:

The DAS28 (hsCRP) is a validated index of rheumatoid arthritis disease activity. Twenty-eight tender joint counts, 28 swollen joint counts, hsCRP, and general health are included in the DAS28 (hsCRP) score. Scores range from 0 to 10: a score >5.1 indicates high disease activity, a score <3.2 indicates low disease activity, and a score <2.6 indicates clinical remission. A negative change from baseline represents improvement. n=the number of participants with evaluable data at each time point. LOCF was used (only post-baseline values were carried forward).

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Treatment-emergent adverse events (TEAEs) were collected from first dose of study drug until 70 days after the last dose of study drug (up to 21 weeks); serious adverse events (SAEs) were collected from the time informed consent was obtained (25 weeks).

Adverse event reporting additional description:

A TEAE is defined as any AE with onset or worsening reported by a subject from the time that the first dose of study drug is administered until 70 days have elapsed following discontinuation of study drug administration. TEAEs were collected whether elicited or spontaneously reported by the subject.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
14 April 2014	The purpose of this amendment was to remove Part 2 Open-label Extension (OLE) Period to separate the randomized control trial and the OLE trial into 2 protocols; remove pharmacokinetics sub-study and revise pharmacokinetics analyses; clarify that re-screening was permitted only once per subject; and revise inclusion (remove body mass index) and exclusion criteria (clarify HCV testing and chest x-ray requirements).
13 February 2015	The purpose of this amendment was to clarify lab retesting requirements and window visits; revise study site numbers to at least 85 sites globally; update female and male reproductive language; and update inclusion (high sensitivity C-reactive protein [hsCRP] criteria or positive rheumatoid factor [RF] and anticyclic citrullinated peptide [anti-CCP] antibody levels) and exclusion criteria (live vaccinations); remove 24-hour methylhistamine laboratory test; clarify chest x-ray assessment; add injection site reaction language; and revise unblinding for interim analysis;
29 July 2015	The purpose of this amendment was to increase the number of randomized subjects from approximately 160 to approximately 225; add new standard medical and non-medical complaint language; and clarify who could be unblinded for analyses during the trial.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
