

Clinical trial results:

A Phase I/IIa Study Assessing Single and Multiple Doses of IDX21437 in Healthy and HCV-Infected Subjects

Summary

EudraCT number	2013-004043-23
Trial protocol	BE
Global end of trial date	11 September 2015

Results information

Result version number	v1 (current)
This version publication date	26 August 2016
First version publication date	26 August 2016

Trial information

Trial identification

Sponsor protocol code	3682-001
-----------------------	----------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01974687
WHO universal trial number (UTN)	-

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	11 September 2015
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	11 September 2015
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

This is a multi-part study to evaluate the safety, tolerability, and pharmacokinetics (PK) of MK-3682 (IDX21437) in healthy participants and in participants infected with HCV genotype (GT)1-GT6. The effect of food on the PK of MK-3682 will be evaluated. The antiviral activity of MK-3682 will also be assessed in HCV-infected participants.

Protection of trial subjects:

This study was conducted in conformance with Good Clinical Practice standards and applicable country and/or local statuses and regulations regarding ethical committee review, informed consent, and the protection of human subjects participating in biomedical research.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	31 October 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 3
Country: Number of subjects enrolled	Canada: 95
Country: Number of subjects enrolled	Moldova, Republic of: 66
Country: Number of subjects enrolled	New Zealand: 14
Worldwide total number of subjects	178
EEA total number of subjects	3

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0

Adults (18-64 years)	177
From 65 to 84 years	1
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

This study enrolled healthy, adult participants (Group A), adult participants with chronic hepatitis C infection without cirrhosis (Groups B, C, D and F), and HCV-infected participants with mild hepatic impairment (Group E). Additional inclusion and exclusion criteria applied.

Period 1

Period 1 title	Overall Period (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Group A - Placebo (Cohort 1a -Cohort 5a - pooled) (capsule)

Arm description:

Participants were administered a single dose of MK-3682-matching placebo as oral capsules under fasted conditions (Cohorts 1a, 2a, 3a, 5a); Participants were administered single doses of MK-3682-matching placebo as oral capsules on Days 1 and 7 in a 2-period crossover design (fasted/fed) with a 6 day washout between dosing periods (Cohort 4a).

Arm type	Placebo
Investigational medicinal product name	MK-3682-matching placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

MK-3682-matching placebo oral capsule x 1 day

Arm title	Group A - MK-3682 10 mg (Cohort 1a) (capsule)
------------------	-----------------------------------------------

Arm description:

Participants were administered a single dose of MK-3682 10 mg as oral capsules under fasted conditions.

Arm type	Experimental
Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

MK-3682 10 mg oral capsule x 1 day

Arm title	Group A - MK-3682 25 mg (Cohort 2a) (capsule)
------------------	-----------------------------------------------

Arm description:

Participants were administered a single dose of MK-3682 25 mg as oral capsules under fasted conditions.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	MK-3682

Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details: MK-3682 300 mg oral capsule x 1 day	
Arm title	Group A - Placebo (Cohort 6a)
Arm description: Participants were administered single doses of MK-3682-matching placebo as oral capsules for 7 days under fasted conditions.	
Arm type	Placebo

Investigational medicinal product name	MK-3682-matching placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details:	
MK-3682-matching placebo oral capsule once daily (QD) x 7 days	
Arm title	Group A - MK-3682 300 mg (Cohort 6a)
Arm description:	
Participants were administered single doses of MK-3682 300 mg as oral capsules once daily for 7 days under fasted conditions.	
Arm type	Experimental
Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details:	
MK-3682 300 mg QD x 7 days	
Arm title	Group B - MK-3682 10 mg (Cohort 1b)
Arm description:	
Participants were administered a single dose of MK-3682 10 mg as oral capsules under fasted conditions.	
Arm type	Experimental
Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details:	
MK-3682 10 mg oral capsule x 1 day	
Arm title	Group B - MK-3682 25 mg (Cohort 2b)
Arm description:	
Participants were administered a single dose of MK-3682 25 mg as oral capsules under fasted conditions.	
Arm type	Experimental
Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details:	
MK-3682 25 mg oral capsule x 1 day	
Arm title	Group B - MK-3682 50 mg (Cohort 3b)
Arm description:	
Participants were administered a single dose of MK-3682 50 mg as oral capsules under fasted conditions.	
Arm type	Experimental

Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details: MK-3682 50 mg oral capsule x 1 day	
Arm title	Group B - MK-3682 150 mg (Cohort 4b)
Arm description: Participants were administered a single dose of MK-3682 150 mg as oral capsules under fasted conditions.	
Arm type	Experimental
Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details: MK-3682 150 mg oral capsule x 1 day	
Arm title	Group B - MK-3682 300 mg (Cohort 5b)
Arm description: Participants were administered a single dose of MK-3682 300 mg as oral capsules under fasted conditions.	
Arm type	Experimental
Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details: MK-3682 300 mg oral capsule x 1 day	
Arm title	Groups C and D - MK-3682 50 mg (capsule)
Arm description: Participants were administered single doses of MK-3682 50 mg as oral capsules once daily for 7 days under fasted conditions.	
Arm type	Experimental
Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details: MK-3682 50 mg oral capsule QD x 7 days	
Arm title	Groups C and D - MK-3682 150 mg (capsule)
Arm description: Participants were administered single doses of MK-3682 150 mg as oral capsules once daily for 7 days under fasted conditions.	
Arm type	Experimental

Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details: MK-3682 150 mg oral capsule QD x 7 days	
Arm title	Group C - MK-3682 250 mg (capsule)
Arm description: Participants were administered single doses of MK-3682 250 mg as oral capsules once daily for 7 days under fasted conditions.	
Arm type	Experimental
Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details: MK-3682 250 mg oral capsule QD x 7 days	
Arm title	Groups C and D - MK-3682 300 mg (capsule)
Arm description: Participants were administered single doses of MK-3682 300 mg as oral capsules once daily for 7 days under fasted conditions.	
Arm type	Experimental
Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details: MK-3682 300 mg oral capsule QD x 7 days	
Arm title	Group C - MK-3682 400 mg (capsule)
Arm description: Participants were administered single doses of MK-3682 400 mg as oral capsules once daily for 7 days under fasted conditions.	
Arm type	Experimental
Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details: MK-3682 400 mg oral capsule QD x 7 days	
Arm title	Group C - MK-3682 300 mg (tablet)
Arm description: Participants were administered single doses of MK-3682 300 mg as oral tablets once daily for 7 days under fasted conditions.	
Arm type	Experimental

Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details: MK-3682 300 mg oral tablet QD x 7 days	
Arm title	Group C - MK-3682 450 mg (tablet)
Arm description: Participants were administered single doses of MK-3682 450 mg as oral tablets once daily for 7 days under fasted conditions.	
Arm type	Experimental
Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details: MK-3682 450 mg oral tablet QD x 7 days	
Arm title	Groups C and D - Placebo (pooled) (capsule)
Arm description: Participants were administered single doses of MK-3682-matching placebo as oral capsules once daily for 7 days under fasted conditions.	
Arm type	Placebo
Investigational medicinal product name	MK-3682-matching placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule, Tablet
Routes of administration	Oral use
Dosage and administration details: MK-3682-matching placebo oral capsule or oral tablet QD x 7 days	
Arm title	Group E - MK-3682 150 mg (Cohort 1e) (capsule)
Arm description: Participants were administered a single dose of MK-3682 150 mg as oral capsules under fasted conditions.	
Arm type	Experimental
Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Capsule
Routes of administration	Oral use
Dosage and administration details: MK-3682 150 mg oral capsule x 1 day	
Arm title	Group E - MK-3682 300 mg (Cohort 2e) (capsule)
Arm description: Participants were administered single doses of MK-3682 300 mg as oral capsules once daily for 7 days under fasted conditions.	
Arm type	Experimental

Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

MK-3682 300 mg oral capsule QD x 7 days

Arm title	Group E - MK-3682 450 mg (Cohort 3e) (tablet)
------------------	-----------------------------------------------

Arm description:

Participants were administered single doses of MK-3682 450 mg as oral tablets once daily for 7 days under fasted conditions.

Arm type	Experimental
Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

MK-3682 450 mg oral tablet QD x 7 days

Arm title	Group F - MK-3682 300 mg (tablet)
------------------	-----------------------------------

Arm description:

Participants were administered single doses of MK-3682 300 mg as oral tablets once daily for 7 days under fasted conditions. Participants were also administered Itraconazole 200 mg as oral solution twice daily on Day -5 and 200 mg once daily from Day -4 to Day 11.

Arm type	Experimental
Investigational medicinal product name	MK-3682
Investigational medicinal product code	
Other name	IDX21437
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

MK-3682 300 mg oral tablet QD x 7 days

Investigational medicinal product name	itraconazole 200 mg
Investigational medicinal product code	
Other name	Sporanox®
Pharmaceutical forms	Oral solution
Routes of administration	Oral use

Dosage and administration details:

itraconazole 200 mg taken as either a 10 mg/mL oral solution or as 100 mg oral capsules QD x 11 days

Baseline characteristics

Reporting groups

Reporting group title	Group A - Placebo (Cohort 1a -Cohort 5a - pooled) (capsule)
Reporting group description: Participants were administered a single dose of MK-3682-matching placebo as oral capsules under fasted conditions (Cohorts 1a, 2a, 3a, 5a); Participants were administered single doses of MK-3682-matching placebo as oral capsules on Days 1 and 7 in a 2-period crossover design (fasted/fed) with a 6 day washout between dosing periods (Cohort 4a).	
Reporting group title	Group A - MK-3682 10 mg (Cohort 1a) (capsule)
Reporting group description: Participants were administered a single dose of MK-3682 10 mg as oral capsules under fasted conditions.	
Reporting group title	Group A - MK-3682 25 mg (Cohort 2a) (capsule)
Reporting group description: Participants were administered a single dose of MK-3682 25 mg as oral capsules under fasted conditions.	
Reporting group title	Group A - MK-3682 50 mg (Cohort 3a) (capsule)
Reporting group description: Participants were administered a single dose of MK-3682 50 mg as oral capsules under fasted conditions.	
Reporting group title	Group A - MK-3682 150 mg (Cohort 4a) (capsule)
Reporting group description: Participants were administered single doses of MK-3682 150 mg as oral capsules on Days 1 and 7 in a 2-period crossover design (fasted/fed) with a 6 day washout between dosing periods.	
Reporting group title	Group A - MK-3682 300 mg (Cohort 5a) (capsule)
Reporting group description: Participants were administered a single dose of MK-3682 300 mg as oral capsules under fasted conditions.	
Reporting group title	Group A - Placebo (Cohort 6a)
Reporting group description: Participants were administered single doses of MK-3682-matching placebo as oral capsules for 7 days under fasted conditions.	
Reporting group title	Group A - MK-3682 300 mg (Cohort 6a)
Reporting group description: Participants were administered single doses of MK-3682 300 mg as oral capsules once daily for 7 days under fasted conditions.	
Reporting group title	Group B - MK-3682 10 mg (Cohort 1b)
Reporting group description: Participants were administered a single dose of MK-3682 10 mg as oral capsules under fasted conditions.	
Reporting group title	Group B - MK-3682 25 mg (Cohort 2b)
Reporting group description: Participants were administered a single dose of MK-3682 25 mg as oral capsules under fasted conditions.	
Reporting group title	Group B - MK-3682 50 mg (Cohort 3b)
Reporting group description: Participants were administered a single dose of MK-3682 50 mg as oral capsules under fasted conditions.	
Reporting group title	Group B - MK-3682 150 mg (Cohort 4b)
Reporting group description: Participants were administered a single dose of MK-3682 150 mg as oral capsules under fasted conditions.	
Reporting group title	Group B - MK-3682 300 mg (Cohort 5b)

Reporting group description:

Participants were administered a single dose of MK-3682 300 mg as oral capsules under fasted conditions.

Reporting group title	Groups C and D - MK-3682 50 mg (capsule)
-----------------------	------------------------------------------

Reporting group description:

Participants were administered single doses of MK-3682 50 mg as oral capsules once daily for 7 days under fasted conditions.

Reporting group title	Groups C and D - MK-3682 150 mg (capsule)
-----------------------	-------------------------------------------

Reporting group description:

Participants were administered single doses of MK-3682 150 mg as oral capsules once daily for 7 days under fasted conditions.

Reporting group title	Group C - MK-3682 250 mg (capsule)
-----------------------	------------------------------------

Reporting group description:

Participants were administered single doses of MK-3682 250 mg as oral capsules once daily for 7 days under fasted conditions.

Subject analysis set type	Per protocol
Subject analysis set description: Participants administered single doses of MK-3682-matching placebo as oral capsules once daily for 7 days under fasted conditions.	
Subject analysis set title	Groups C and D - MK-3682 50 mg (capsule) - PP
Subject analysis set type	Per protocol
Subject analysis set description: Participants were administered single doses of MK-3682 50 mg as oral capsules once daily for 7 days under fasted conditions.	
Subject analysis set title	Groups C and D - MK-3682 150 mg (capsule) - PP
Subject analysis set type	Per protocol
Subject analysis set description: Participants were administered single doses of MK-3682 150 mg as oral capsules once daily for 7 days under fasted conditions.	
Subject analysis set title	Group C - MK-3682 250 mg (capsule) - PP
Subject analysis set type	Per protocol
Subject analysis set description: Participants were administered single doses of MK-3682 250 mg as oral capsules once daily for 7 days under fasted conditions.	
Subject analysis set title	Groups C and D - MK-3682 300 mg (capsule) - PP
Subject analysis set type	Per protocol
Subject analysis set description: Participants were administered single doses of MK-3682 300 mg as oral capsules once daily for 7 days under fasted conditions.	
Subject analysis set title	Group C - MK-3682 400 mg (capsule) - PP
Subject analysis set type	Per protocol
Subject analysis set description: Participants were administered single doses of MK-3682 400 mg as oral capsules once daily for 7 days under fasted conditions.	
Subject analysis set title	Group C - MK-3682 300 mg (capsule) - PP
Subject analysis set type	Per protocol
Subject analysis set description: Participants were administered single doses of MK-3682 300 mg as oral capsules once daily for 7 days under fasted conditions.	

Subject analysis set title	Group C - MK-3682 300 mg (tablet) - PP
Subject analysis set type	Per protocol
Subject analysis set description: Participants were administered MK-3682 300 mg as oral tablets once daily for 7 days under fasted conditions.	
Subject analysis set title	Group C - MK-3682 450 mg (tablet) - PP
Subject analysis set type	Per protocol
Subject analysis set description: Participants were administered single doses of MK-3682 450 mg as oral tablets once daily for 7 days under fasted conditions.	
Subject analysis set title	Group E - MK-3682 150 mg (Cohort 1e) - PP
Subject analysis set type	Per protocol
Subject analysis set description: Participants were administered a single dose of MK-3682 150 mg as oral capsules under fasted conditions.	
Subject analysis set title	Group E - MK-3682 300 mg (Cohort 2e) - PP
Subject analysis set type	Per protocol
Subject analysis set description: Participants were administered single doses of MK-3682 300 mg as oral capsules once daily for 7 days under fasted conditions.	
Subject analysis set title	Group E - MK-3682 450 mg (Cohort 3e) - PP
Subject analysis set type	Per protocol
Subject analysis set description: Participants were administered single doses of MK-3682 450 mg as oral tablets once daily for 7 days under fasted conditions.	

Primary: Percentage of Participants Who Experienced at Least One Treatment-Emergent Adverse Event (AE)

End point title	Percentage of Participants Who Experienced at Least One Treatment-Emergent Adverse Event (AE) ^[1]
End point description: An AE is defined as any untoward medical occurrence in a participant administered a pharmaceutical product that does not necessarily have a causal relationship with the study drug(s). An AE can therefore be any unfavorable and unintended sign (including an abnormal lab finding), symptom, or disease temporally associated with the use of study drug(s), whether or not related to study drugs(s). All Participants as Treated (APaT) Population: all participants who received at least one dose of the study drug. For Cohort 4a, only participants on the fasted regimen are included.	
End point type	Primary
End point timeframe: Up to 42 days	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Statistical analyses were neither planned nor performed for this endpoint.

Reporting groups

Reporting group title	Group A - MK-3682 25 mg (Cohort 2a)
-----------------------	-------------------------------------

Reporting group description:

Participants were administered a single dose of MK-3682 25 mg as oral capsules under fasted conditions.

Reporting group title	Group A - MK-3682 10 mg (Cohort 1a)
-----------------------	-------------------------------------

Reporting group description:

Participants were administered a single dose of MK-3682 10 mg as oral capsules under fasted conditions.

Reporting group title	Group A - Placebo (Cohort 1a -Cohort 5a - pooled)
-----------------------	---------------------------------------------------

Reporting group description:

Participants were administered a single dose of MK-3682-matching placebo as oral capsules under fasted conditions (Cohorts 1a, 2a, 3a, 5a); Participants were administered single doses of MK-3682-matching placebo as oral capsules on Days 1 and 7 in a 2-period crossover design (fasted/fed) with a 6 day washout between dosing periods (Cohort 4a).

Reporting group title	Group A - MK-3682 50 mg (Cohort 3a)
-----------------------	-------------------------------------

Reporting group description:

Participants were administered a single dose of MK-3682 50 mg as oral capsules under fasted conditions.

Reporting group title	Group A - MK-3682 150 mg (Cohort 4a)
-----------------------	--------------------------------------

Reporting group description:

Participants were administered single doses of MK-3682 150 mg as oral capsules on Days 1 and 7 in a 2-period crossover design (fasted/fed) with a 6 day washout between dosing periods.

Reporting group title	Group A - MK-3682 300 mg (Cohort 5a)
-----------------------	--------------------------------------

Reporting group description:

Participants were administered a single dose of MK-3682 300 mg as oral capsules under fasted conditions.

Reporting group title	Group A - Placebo (Cohort 6a)
-----------------------	-------------------------------

Reporting group description:

Participants were administered single doses of MK-3682-matching placebo as oral capsules for 7 days under fasted conditions.

Reporting group title	Group A - MK-3682 300 mg (Cohort 6a)
-----------------------	--------------------------------------

Reporting group description:

Participants were administered single doses of MK-3682 300 mg as oral capsules once daily for 7 days under fasted conditions.

Reporting group title	Group B - MK-3682 10 mg (Cohort 1b)

Renal and urinary disorders			
Dysuria			
subjects affected / exposed	0 / 8 (0.00%)		
occurrences (all)	0		
Pollakiuria			
subjects affected / exposed	0 / 8 (0.00%)		
occurrences (all)	0		
Musculoskeletal and connective tissue disorders			
Arthralgia			
subjects affected / exposed	1 / 8 (12.50%)		
occurrences (all)	1		
Back pain			
subjects affected / exposed	0 / 8 (0.00%)		
occurrences (all)	0		
Muscle tightness			
subjects affected / exposed	0 / 8 (0.00%)		
occurrences (all)	0		
Musculoskeletal pain			
subjects affected / exposed	0 / 8 (0.00%)		
occurrences (all)	0		
Musculoskeletal stiffness			
subjects affected / exposed	0 / 8 (0.00%)		
occurrences (all)	0		
Myalgia			

subjects affected / exposed occurrences (all)	0 / 8 (0.00%) 0		
Neck pain subjects affected / exposed occurrences (all)	0 / 8 (0.00%) 0		
Pain in extremity subjects affected / exposed occurrences (all)	0 / 8 (0.00%) 0		
Infections and infestations Nasopharyngitis subjects affected / exposed occurrences (all)	0 / 8 (0.00%) 0		
Upper respiratory tract infection subjects affected / exposed occurrences (all)	0 / 8 (0.00%) 0		
Vulvitis subjects affected / exposed occurrences (all)	0 / 8 (0.00%) 0		

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

MK-3682 50 mg (Group D) and MK-3682 150 mg (Group D) Grade 3 abnormalities (neutropenia) were due to a lab processing error. MK-3682 450 mg (Group C) Grade 4 abnormality (neutropenia) was due to a lab processing error.

Notes:
