

# **Clinical trial results:**

# A Randomized, Double-Blind, Placebo- and Active-Controlled Study of DS-5565 in Subjects with Pain Associated with Fibromyalgia

Summary

	<del> </del>
EudraCT number	2013-005161-40
Trial protocol	SE DE DK CZ FI NL
Global end of trial date	14 July 2016
Results information	
Result version number	v2 (current)
This version publication date	04 November 2017
First version publication date	25 August 2017
Version creation reason	Correction of full data set     The date the last subject completed this trial was actually on 14-Jul-2016, so the global end of trial date is adjusted accordingly.
Trial information	
Trial identification	
Sponsor protocol code	DS5565-A-E309
Additional study identifiers	
ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02146430
WHO universal trial number (UTN)	-
Notes:  Sponsors	
Sponsor organisation name	Daiichi Sankyo, Inc.

Notes:	
Paediatric regulatory details	
Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage	
Analysis stage	Final
Date of interim/final analysis	02 June 2017
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	14 July 2016
Was the trial ended prematurely?	No
Nahaa.	

Notes:

## General information about the trial

## Main objective of the trial:

To compare change in weekly average daily pain score (ADPS) from baseline to Week 13 in subjects receiving either dose of DS-5565 versus placebo.

Weekly ADPS is based on daily pain scores reported by the subject that best describes his or her worst pain over the previous 24 hours.

## Protection of trial subjects:

This trial was conducted under ICH E6 Good Clinical Practices which has its foundation in the Declaration of Helsinki.

Background	therapy:	-
------------	----------	---

Patients take one each of placebo tablet	and capsule, twice daily (BID)			
Reporting group title	Pregabalin			
Reporting group description:				
Patients take one pregabalin capsule and	d one placebo tablet BID			
Reporting group title DS-5565 QD				
Reporting group description:				
Patients take one each of placebo tablet and capsule in the morning and one DS-5565 tablet once daily (QD) with a placebo capsule in the evening				
Reporting group title DS-5565 BID				
Reporting group description:				
Patients take one DS-5565 tablet and one placebo capsule BID				

Primary: Average daily pain score (ADPS) for either dose of DS-5565 versus placebo			
	Average daily pain score (ADPS) for either dose of DS-5565 versus placebo <sup>[1][2]</sup>		

## End point description:

Average of daily pain scores reported by the patient that best describes his or her worst pain over the previous 24 hours. A daily pain score has a scale of 0 = no pain to 10 = worst possible pain.

End point type	Primary
End point timeframe:	
Baseline, Week 13	

## Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical analyses were performed to arrive at the aggregate summary data.

[2] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: Pregabalin was reported separately

End point values	Placebo	DS-5565 QD	DS-5565 BID	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	317	318	318	
Units: scores on a scale				
arithmetic mean (standard deviation)				
Baseline (n=317,318,318)	7.19 (± 1.3)	7.13 (± 1.358)	7.19 (± 1.295)	
Week 13 (MI, n=317,319,318)	5.47 (± 0.132)	5.16 (± 0.134)	5.19 (± 0.136)	

## Statistical analyses

No statistical analyses for this end point

Secondary: Number of patients who answered "much improved or better" in PGIC at Week 13 receiving either dose of DS-5565 versus placebo

Number of patients who answered "much improved or better" in PGIC at Week 13 receiving either dose of DS-5565 versus
placebo <sup>[3]</sup>

#### End point description:

Patients rated global impression of change (PGIC) on a categorical scale from 1 = very much improved to 7 = very much worse

End point type Secondary

End point timeframe:

Baseline, Week 13

#### Notes:

[3] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: Pregabalin was not included in this outcome measure

End point values	Placebo	DS-5565 QD	DS-5565 BID	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	318	319	319	
Units: Patients	78	94	71	

## Statistical analyses

No statistical analyses for this end point

Secondary: Average score on the fibromyalgia index questionnaire (FIQ) in patients receiving either dose of DS-5565 or placebo

End point title	Average score on the fibromyalgia index questionnaire (FIQ) in
	patients receiving either dose of DS-5565 or placebo <sup>[4]</sup>

### End point description:

The FIQ is composed of 10 items. The first item contains 11 questions related to physical functioning - each question is rated on a 4-point Likert-type scale. Items 2 and 3 ask the patient to mark the number of days that they feel well and the number of days they were unable to work (including housework) because of fibromyalgia (FM) symptoms. Items 4 through 10 are horizontal linear scales marked in 10 increments on which the patient rates work difficulty, pain, fatigue, morning tiredness, stiffness, anxiety, and depression. A higher score indicates a greater impact of the syndrome on the patient. Scores were collected from patients who completed the assessment at the given time point.

End point type	Secondary	
End point timeframe:		
Baseline Week 13		

#### Notes:

[4] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: Pregabalin was not included in this outcome measure

End point values	Placebo	DS-5565 QD	DS-5565 BID	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	318	319	319	
Units: scores on a scale				
arithmetic mean (standard deviation)				
Baseline (n=316,316,318)	65.2 (± 13.629)	64.51 (± 13.92)	64.21 (± 13.175)	

Week 13 (n=255,240,224)	49.81 (±	47.65 (± 19.4)	48.87 (±	
	20.149)		18.928)	

## Statistical analyses

No statistical analyses for this end point

Secondary: Number of patients receiving either dose of DS-5565 or placebo classified as responders at Week 13

End point title

Number of patients receiving either dose of DS-5565 or placebo classified as responders at Week 13<sup>[5]</sup>

#### End point description:

Patients classified as responders are those with a substantial reduction in ADPS in Week 13 compared to baseline.

End point type Secondary

End point timeframe:

Baseline, Week 13

#### Notes:

[5] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: Pregabalin was not included in this outcome measure

End point values	Placebo	DS-5565 QD	DS-5565 BID	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	318	319	319	
Units: Patients				
30% responders	101	106	100	
50% responders	57	71	57	

## Statistical analyses

No statistical analyses for this end point

Secondary: Average daily pain score (ADPS) for pregabalin

End point title Average daily pain score (ADPS) for pregabalin<sup>[6]</sup>

#### End point description:

Average of daily pain scores reported by the patient that best describes his or her worst pain over the previous 24 hours. A daily pain score has a scale of 0 = no pain to 10 = worst possible pain.

End point type Secondary

End point timeframe:

Baseline, Week 13

#### Notes:

[6] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: Pregabalin was reported separately

End point values	Pregabalin

## Adverse events information

Reporting group description:

Timeframe for reporting adverse events:

Events that emerge or get worse on or after the first dosing of double blind study medication and during study treatment up to 4 weeks after the last dose of double blind study medication

Adverse event reporting additional description:

In the system organ class and preferred term summarization, a patient was counted only once when one or more events were reported, so the occurrences mirror the number of patients.

or more events were reported, so the occurrences mirror the number of patients.

EU-CTR publication date: 04 November 2017

More information

# Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
21 July 2014	Clarify study objectives, endpoints, pain assessment and study procedures
29 January 2015	Update and clarify screening procedures and duration. Update and provide further direction on how to deal with borderline pregnancy results.
07 April 2016	Modify and clarify discontinuation criteria

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
