

## Clinical trial results:

### A Phase II, Non-comparative, Open label, Multi-centre, International Study of MEDI4736, in Patients with Locally Advanced or Metastatic Non Small Cell Lung Cancer (Stage IIIB IV) Who Have Received at Least Two Prior Systemic Treatment Regimens Including One Platinum based Chemotherapy Regimen (ATLANTIC)

#### Summary

EudraCT number	2013-005427-16
Trial protocol	IT CZ DE GB HU BE AT ES PL
Global end of trial date	26 March 2025

#### Results information

Result version number	v1 (current)
This version publication date	24 October 2025
First version publication date	24 October 2025

#### Trial information

##### Trial identification

Sponsor protocol code	D4191C00003
-----------------------	-------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02087423
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	AstraZeneca
Sponsor organisation address	One MedImmune Way, Gaithersburg, United States, MD 20878
Public contact	Phillip Dennis, MD, PhD, AstraZeneca, ClinicalTrialTransparency@astrazeneca.com
Scientific contact	Phillip Dennis, MD, PhD, AstraZeneca, ClinicalTrialTransparency@astrazeneca.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	07 November 2017
Is this the analysis of the primary completion data?	Yes
Primary completion date	03 June 2016
Global end of trial reached?	Yes
Global end of trial date	26 March 2025
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To assess the efficacy of durvalumab (MEDI4736) treatment in terms of Objective Response Rate (ORR) in programmed cell death ligand-1 (PD-L1) positive patients with locally advanced or metastatic non-small cell lung cancer (NSCLC).

Protection of trial subjects:

This study was performed in accordance with the ethical principles that have their origin in the Declaration of Helsinki and that are consistent with International Council for Harmonisation/Good Clinical Practice, applicable regulatory requirements and the AstraZeneca policy on Bioethics and Human Biological Samples.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	25 February 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Italy: 70
Country: Number of subjects enrolled	France: 60
Country: Number of subjects enrolled	Belgium: 34
Country: Number of subjects enrolled	Spain: 33
Country: Number of subjects enrolled	Germany: 28
Country: Number of subjects enrolled	United Kingdom: 17
Country: Number of subjects enrolled	Poland: 3
Country: Number of subjects enrolled	Hungary: 1
Country: Number of subjects enrolled	Korea, Republic of: 55
Country: Number of subjects enrolled	Japan: 46
Country: Number of subjects enrolled	Singapore: 13
Country: Number of subjects enrolled	Taiwan: 11
Country: Number of subjects enrolled	Philippines: 4
Country: Number of subjects enrolled	United States: 49
Country: Number of subjects enrolled	Thailand: 4
Country: Number of subjects enrolled	Canada: 16
Worldwide total number of subjects	444
EEA total number of subjects	229

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	265
From 65 to 84 years	178
85 years and over	1

## Subject disposition

### Recruitment

Recruitment details:

First patient in: 25 Feb 2014; Last patient in: 28 Dec 2015. Primary Analysis data cut-off (DCO): 03 Jun 2016; Final Analysis DCO: 7 Nov 2017. Patients were treated with durvalumab (10 milligrams [mg] / kilogram [kg] every 2 weeks [Q2W] intravenously [iv]). 101 sites in 16 countries treated patients in this study.

### Pre-assignment

Screening details:

Patients were enrolled in 3 cohorts. Cohort enrolment was dependent upon epidermal growth factor receptor (EGFR) / anaplastic lymphoma kinase (ALK) status and PD-L1 expression level (percent of tumor cells [TC] with membrane staining).

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Cohort 1 (EGFR/ALK+)

Arm description:

Consisted of patients who were EGFR/ALK positive and retrospectively or prospectively determined to be PD-L1 high (TC  $\geq$  25%). In addition, the cohort included patients enrolled prior to Amendment 1 who were retrospectively determined to be PD-L1 low/neg (TC < 25%) or PD-L1 status unknown.

Arm type	Experimental
Investigational medicinal product name	Durvalumab
Investigational medicinal product code	
Other name	MEDI4736
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Patients received durvalumab 10 mg/kg Q2W iv.

<b>Arm title</b>	Cohort 2
------------------	----------

Arm description:

Consisted of patients who were EGFR/ALK wild type/unknown and retrospectively or prospectively determined to be PD-L1 high (TC  $\geq$  25%). In addition, the cohort included patients enrolled prior to Amendment 1 who were retrospectively determined to be PD-L1 low/neg (TC < 25%) or PD-L1 status unknown.

Arm type	Experimental
Investigational medicinal product name	Durvalumab
Investigational medicinal product code	
Other name	MEDI4736
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Patients received durvalumab 10 mg/kg Q2W iv.

<b>Arm title</b>	Cohort 3 (TC $\geq$ 90%)
------------------	--------------------------

Arm description:

Consisted of patients who were EGFR/ALK wild type/unknown and prospectively determined to be PD-L1 high (TC  $\geq$  90%).

Arm type	Experimental
Investigational medicinal product name	Durvalumab
Investigational medicinal product code	
Other name	MEDI4736
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Patients received durvalumab 10 mg/kg Q2W iv.

<b>Number of subjects in period 1</b>	Cohort 1 (EGFR/ALK+)	Cohort 2	Cohort 3 (TC >= 90%)
Started	111	265	68
Completed 12 months of treatment	18	60	26
Completed	0	0	0
Not completed	111	265	68
Terminated from study at final DCO	23	36	25
Consent withdrawn by subject	20	20	3
Death	68	207	40
Lost to follow-up	-	2	-

## Baseline characteristics

### Reporting groups

Reporting group title	Cohort 1 (EGFR/ALK+)
Reporting group description:	
Consisted of patients who were EGFR/ALK positive and retrospectively or prospectively determined to be PD-L1 high (TC $\geq 25\%$ ). In addition, the cohort included patients enrolled prior to Amendment 1 who were retrospectively determined to be PD-L1 low/neg (TC $< 25\%$ ) or PD-L1 status unknown.	
Reporting group title	Cohort 2
Reporting group description:	
Consisted of patients who were EGFR/ALK wild type/unknown and retrospectively or prospectively determined to be PD-L1 high (TC $\geq 25\%$ ). In addition, the cohort included patients enrolled prior to Amendment 1 who were retrospectively determined to be PD-L1 low/neg (TC $< 25\%$ ) or PD-L1 status unknown.	
Reporting group title	Cohort 3 (TC $\geq 90\%$ )
Reporting group description:	
Consisted of patients who were EGFR/ALK wild type/unknown and prospectively determined to be PD-L1 high (TC $\geq 90\%$ ).

## End points

### End points reporting groups

Reporting group title	Cohort 1 (EGFR/ALK+)
Reporting group description: Consisted of patients who were EGFR/ALK positive and retrospectively or prospectively determined to be PD-L1 high (TC $\geq$ 25%). In addition, the cohort included patients enrolled prior to Amendment 1 who were retrospectively determined to be PD-L1 low/neg (TC <25%) or PD-L1 status unknown.	
Reporting group title	Cohort 2
Reporting group description: Consisted of patients who were EGFR/ALK wild type/unknown and retrospectively or prospectively determined to be PD-L1 high (TC $\geq$ 25%). In addition, the cohort included patients enrolled prior to Amendment 1 who were retrospectively determined to be PD-L1 low/neg (TC <25%) or PD-L1 status unknown.	
Reporting group title	Cohort 3 (TC $\geq$ 90%)
Reporting group description: Consisted of patients who were EGFR/ALK wild type/unknown and prospectively determined to be PD-L1 high (TC $\geq$ 90%).	
Subject analysis set title	Cohort 1 (EGFR/ALK+) PD-L1+ ( $\geq$ 25%) (FAS - evaluable per ICR)
Subject analysis set type	Full analysis
Subject analysis set description: Consisted of patients who were EGFR/ALK mutation positive and retrospectively or prospectively determined to be PD-L1 high (TC $\geq$ 25%). Patients with PD-L1 TC $\geq$ 90% are included in this group.	
Analysis population: "Full analysis set (FAS) - evaluable for response per Independent Central Review (ICR)" set, which included all treated patients who had a baseline tumor assessment and had measurable disease at baseline according to the ICR.	
Subject analysis set title	Cohort 1 (EGFR/ALK+) PD-L1- (<25%) (FAS - evaluable per ICR)
Subject analysis set type	Full analysis
Subject analysis set description: Consisted of patients who were EGFR/ALK mutation positive and retrospectively or prospectively determined to be PD-L1 low/neg (TC <25%).	
Analysis population: "FAS – evaluable for response per ICR" set, which included all treated patients who had a baseline tumor assessment and had measurable disease at baseline according to the ICR.	
Subject analysis set title	Cohort 2 PD-L1+ ( $\geq$ 25%) (FAS - evaluable per ICR)
Subject analysis set type	Full analysis
Subject analysis set description: Consisted of patients who were EGFR/ALK wild type/unknown and retrospectively or prospectively determined to be PD-L1 high (TC $\geq$ 25%). Patients with PD-L1 TC $\geq$ 90% are included in this group.	
Analysis population: "FAS – evaluable for response per ICR" set, which included all treated patients who had a baseline tumor assessment and had measurable disease at baseline according to the ICR.	
Subject analysis set title	Cohort 2 PD-L1- (<25%) (FAS - evaluable per ICR)
Subject analysis set type	Full analysis
Subject analysis set description: Consisted of patients who were EGFR/ALK wild type/unknown and retrospectively or prospectively determined to be PD-L1 low/neg (TC <25%).	
Analysis population: "FAS – evaluable for response per ICR" set, which included all treated patients who had a baseline tumor assessment and had measurable disease at baseline according to the ICR.	
Subject analysis set title	Cohort 3 (TC $\geq$ 90%) (FAS - evaluable per ICR)

Consisted of patients who were EGFR/ALK wild type/unknown and prospectively determined to be PD-L1 high (TC  $\geq 90\%$ ).

Analysis population: FAS, which included all treated patients who had a baseline tumor assessment and had measurable disease at baseline according to the Investigator site assessment.

## Primary: Objective Response Rate (ORR)

End point title	Objective Response Rate (ORR) <sup>[1]</sup>
-----------------	--

End point description:

Patients commenced treatment with durvalumab on Day 1 and continued on a Q2W schedule for a maximum of 12 months. Tumor assessments using computed tomography / magnetic resonance imaging were performed every 8 weeks. Response Evaluation Criteria in Solid Tumors version 1.1 (RECIST 1.1) measurements as given by the Independent Central Review (ICR) were used to derive the primary variable of ORR.

End point type	Primary
----------------	---------

End point timeframe:

Responses recorded during initial 12 month treatment period (up to primary analysis DCO)

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive analysis was planned and performed for analysis of the primary end point

End point values	Cohort 1 (EGFR/ALK+) PD-L1+ (≥25%) (FAS - evaluable per ICR)	Cohort 1 (EGFR/ALK+) PD-L1- (<25%) (FAS - evaluable per ICR)	Cohort 2 PD- L1+ (≥25%) (FAS - evaluable per ICR)	Cohort 2 PD- L1- (<25%) (FAS - evaluable per ICR)
Subject group type	Subject analysis set	Subject analysis set	Subject analysis set	Subject analysis set
Number of subjects analysed	74	28	146	93
Units: % of patients evaluable for response				
number (confidence interval 95%)	12.2 (5.7 to 21.8)	3.6 (0.1 to 18.3)	16.4 (10.8 to 23.5)	7.5 (3.1 to 14.9)

End point values	Cohort 3 (TC≥90%) (FAS - evaluable per ICR)			
Subject group type	Subject analysis set			
Number of subjects analysed	68			
Units: % of patients evaluable for response				
number (confidence interval 95%)	30.9 (20.2 to 43.3)			

## Statistical analyses

No statistical analyses for this end point

## Secondary: Time to Response (TTR)

End point title	Time to Response (TTR)
End point description: TTR (per RECIST 1.1 as assessed by the ICR) is defined as the time from the date of first dose until the date of first documented response (which is subsequently confirmed). TTR was analyzed in patients with objective response in Cohort 2 only.	
End point type	Secondary
End point timeframe: Responses recorded during initial 12 month treatment period (up to primary analysis DCO)	

End point values	Cohort 2 PD- L1+ (≥25%) (FAS - evaluable per ICR)	Cohort 2 PD- L1- (<25%) (FAS - evaluable per ICR)		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	24	7		
Units: Months				
median (full range (min-max))	1.9 (1.6 to 16.7)	2.1 (1.7 to 13.8)		

## Statistical analyses

No statistical analyses for this end point

### Secondary: Duration of Response (DoR)

End point title	Duration of Response (DoR)
-----------------	----------------------------

End point description:

DoR (per RECIST 1.1 as assessed by the ICR) was defined as the time from the date of first documented response (which was subsequently confirmed) until the first date of documented progression or death in the absence of disease progression (ie, date of PFS event or censoring – date of first response + 1). DoR was analyzed in patients with objective response in Cohort 2 only. "99999" in the data table indicates that either the median DoR value and/or the inter-quartile range value was not reached.

End point type	Secondary
----------------	-----------

End point timeframe:

Time from response to progression, death, or last assessment (up to approximately 2 years 3 months for the primary analysis DCO)

End point values	Cohort 2 PD-L1+ ( $\geq 25\%$ ) (FAS - evaluable per ICR)	Cohort 2 PD-L1- ( $< 25\%$ ) (FAS - evaluable per ICR)		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	24	7		
Units: Months				
median (inter-quartile range (Q1-Q3))	12.3 (7.5 to 99999)	99999 (7.2 to 99999)		

## Statistical analyses

No statistical analyses for this end point

### Secondary: Overall survival (OS)

End point title	Overall survival (OS)
-----------------	-----------------------

End point description:

OS was defined as the time from the date of first dose until death due to any cause (ie, date of death or censoring – date of first dose + 1). Results are reported as median OS, calculated using the Kaplan-Meier methodology. "99999" in the data table indicates that the upper limit confidence interval was not reached.

End point type	Secondary
----------------	-----------

End point timeframe:

From date of first treatment until final DCO (up to approximately 3 years 8 months)

<b>End point values</b>	Cohort 1 (EGFR/ALK+) PD-L1+ (≥25%) (FAS)	Cohort 1 (EGFR/ALK+) PD-L1- (<25%) (FAS)	Cohort 2 PD- L1+ (≥25%) (FAS)	Cohort 2 PD- L1- (<25%) (FAS)

median (confidence interval 95%)	13.2 (5.9 to 99999)			

### Statistical analyses

No statistical analyses for this end point

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Treatment-emergent adverse events (TEAEs) observed up until 90 days following discontinuation of durvalumab or until the initiation of the first subsequent anticancer therapy following discontinuation of durvalumab (whichever occurred first).

Adverse event reporting additional description:

All-Cause Mortality is reported for the overall study period, up to the final DCO. Serious and Other (non-serious) TEAE data is reported for the initial treatment phase (maximum of 12 months of treatment).

Assessment type	Systematic

Total subjects affected by serious adverse events			
subjects affected / exposed	18 / 111 (16.22%)	24 / 68 (35.29%)	77 / 265 (29.06%)
number of deaths (all causes)	70	41	217
number of deaths resulting from adverse events			
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
Basal cell carcinoma			
subjects affected / exposed	0 / 111 (0.00%)	0 / 68 (0.00%)	1 / 265 (0.38%)
occurrences causally related to treatment / all	0 / 0	0 / 0	0 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Colon cancer			

subjects affected / exposed	0 / 111 (0.00%)	0 / 68 (0.00%)	1 / 265 (0.38%)
occurrences causally related to treatment / all	0 / 0	0 / 0	0 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Metastases to central nervous system			
subjects affected / exposed	2 / 111 (1.80%)	0 / 68 (0.00%)	0 / 265 (0.00%)
occurrences causally related to treatment / all	0 / 2	0 / 0	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Tumour haemorrhage			
subjects affected / exposed	1 / 111 (0.90%)	0 / 68 (0.00%)	0 / 265 (0.00%)
occurrences causally related to treatment / all	1 / 1	0 / 0	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Vascular disorders			
Vena cava thrombosis			
subjects affected / exposed	1 / 111 (0.90%)	0 / 68 (0.00%)	0 / 265 (0.00%)
occurrences causally related to treatment / all	0 / 1	0 / 0	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Superior vena cava syndrome			
subjects affected / exposed	0 / 111 (0.00%)	0 / 68 (0.00%)	1 / 265 (0.38%)
occurrences causally related to treatment / all	0 / 0	0 / 0	0 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Hypovolaemic shock			
subjects affected / exposed	0 / 111 (0.00%)	0 / 68 (0.00%)	1 / 265 (0.38%)
occurrences causally related to treatment / all	0 / 0	0 / 0	1 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Hypertensive crisis			
subjects affected / exposed	0 / 111 (0.00%)	1 / 68 (1.47%)	0 / 265 (0.00%)
occurrences causally related to treatment / all	0 / 0	0 / 1	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
General disorders and administration site conditions			
Pain			
subjects affected / exposed	0 / 111 (0.00%)	1 / 68 (1.47%)	1 / 265 (0.38%)
occurrences causally related to treatment / all	0 / 0	0 / 1	0 / 3
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0

Sudden death			
subjects affected / exposed	0 / 111 (0.00%)	0 / 68 (0.00%)	1 / 265 (0.38%)
occurrences causally related to treatment / all	0 / 0	0 / 0	0 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 1
Asthenia			
subjects affected / exposed	0 / 111 (0.00%)	0 / 68 (0.00%)	1 / 265 (0.38%)
occurrences causally related to treatment / all	0 / 0	0 / 0	1 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Fatigue			
subjects affected / exposed	0 / 111 (0.00%)	1 / 68 (1.47%)	3 / 265 (1.13%)
occurrences causally related to treatment / all	0 / 0	1 / 1	2 / 3
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
General physical health deterioration			
subjects affected / exposed	0 / 111 (0.00%)	0 / 68 (0.00%)	2 / 265 (0.75%)
occurrences causally related to treatment / all	0 / 0	0 / 0	0 / 2
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 1
Malaise			
subjects affected / exposed	0 / 111 (0.00%)	0 / 68 (0.00%)	1 / 265 (0.38%)
occurrences causally related to treatment / all	0 / 0	0 / 0	1 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Non-cardiac chest pain			
subjects affected / exposed	0 / 111 (0.00%)	1 / 68 (1.47%)	0 / 265 (0.00%)
occurrences causally related to treatment / all	0 / 0	0 / 1	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Pyrexia			
subjects affected / exposed	0 / 111 (0.00%)	2 / 68 (2.94%)	1 / 265 (0.38%)
occurrences causally related to treatment / all	0 / 0	0 / 2	0 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Respiratory, thoracic and mediastinal disorders			
Pulmonary embolism			
subjects affected / exposed	1 / 111 (0.90%)	2 / 68 (2.94%)	2 / 265 (0.75%)
occurrences causally related to treatment / all	0 / 1	0 / 2	0 / 2
deaths causally related to treatment / all	0 / 0	0 / 1	0 / 0

Dyspnoea			
subjects affected / exposed	3 / 111 (2.70%)	0 / 68 (0.00%)	7 / 265 (2.64%)
occurrences causally related to treatment / all	0 / 3	0 / 0	0 / 7
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Chronic obstructive pulmonary disease			
subjects affected / exposed	0 / 111 (0.00%)	0 / 68 (0.00%)	1 / 265 (0.38%)
occurrences causally related to treatment / all	0 / 0	0 / 0	0 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Respiratory failure			
subjects affected / exposed	0 / 111 (0.00%)	0 / 68 (0.00%)	2 / 265 (0.75%)
occurrences causally related to treatment / all	0 / 0	0 / 0	0 / 2
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Pulmonary haemorrhage			
subjects affected / exposed	1 / 111 (0.90%)	0 / 68 (0.00%)	0 / 265 (0.00%)

Decreased appetite			
subjects affected / exposed	15 / 111 (13.51%)	12 / 68 (17.65%)	71 / 265 (26.79%)
occurrences (all)	15	12	77
Hyponatraemia			
subjects affected / exposed	2 / 111 (1.80%)	4 / 68 (5.88%)	14 / 265 (5.28%)
occurrences (all)	2	5	20

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
13 May 2014	<ul style="list-style-type: none"><li>• To increase the number of patients (and also the number of sites) expected to undergo a pre-screening assessment in order to recruit the required number of patients fulfilling the new selection criterion of a PD-L1 high tumor.</li><li>• To remove patient reported outcomes as variables in the study.</li></ul>
28 November 2014	<ul style="list-style-type: none"><li>• Study design was changed to include a third cohort of patients with PD-L1 TC <math>\geq 90\%</math>.</li><li>• Extension of recruitment period due to addition of a third patient cohort. The new Cohort 3 (TC <math>\geq 90\%</math>) was not to start enrolling patients until Cohort 2 was fully enrolled.</li><li>• Addition of the exploratory analysis of ORR, OS, and Progression Free Survival in patients with PD-L1 low/neg tumors.</li></ul>
10 April 2015	<ul style="list-style-type: none"><li>• To define the primary objective by cohort.</li><li>• To add key secondary objectives by cohort on the evaluation of the clinical benefit of durvalumab in non-squamous PD-L1 high patients and non-squamous PD-L1 unselected patients. To add other secondary objectives to include the PD-L1 low/neg patients, non-squamous PD-L1 low/neg patients, and PD-L1 unselected patients. To add a footnote to define when objective tumor response should be confirmed because ORR is now included in the secondary objectives section for certain patient populations.</li><li>• To amend the exploratory objective describing the assessment of efficacy in PD-L1 low/neg patients in Cohort 1 (EGFR/ALK+).</li><li>• To remove the endpoint of "deep sustained response."</li><li>• To add time to response as an endpoint.</li></ul>
19 November 2015	<ul style="list-style-type: none"><li>• To add a secondary objective to assess efficacy in a combined population of Cohorts 2 and 3 who were PD-L1 (TC <math>\geq 90\%</math>) and to modify the subgroups in Cohort 2 for the secondary efficacy objectives.</li><li>• To define specific eligibility criteria for patients who were treated through progression or who achieved disease control and restarted treatment upon evidence of progression of disease.</li><li>• To update the description of the statistical analyses based on the changes to the objectives and to clarify the timing of the final analysis of OS.</li><li>• To add amylase and lipase laboratory assessments and to revise the frequency of collections for circulating soluble factors and miRNA/mRNA (ie, microRNA/messenger RNA) assessments.</li></ul>
11 August 2017	<ul style="list-style-type: none"><li>• To clarify the timing of scans following the final OS DCO, to reflect the revised duration of re-treatment and to clarify re-treatment eligibility.</li><li>• To clarify end-of-study procedures for patients who continue in follow-up or re-treatment following the final OS DCO.</li><li>• To update toxicity management guidelines.</li><li>• To clarify the conduct of scans and other assessments for patients continuing treatment or re starting durvalumab treatment following the final OS DCO, and to clarify the revised duration of re-treatment.</li><li>• To clarify that Interactive Voice/Web Response Systems will not be available following final OS DCO.</li><li>• To clarify IP accountability, safety monitoring and reporting, data collection and patient assessments following final OS DCO.</li><li>• To clarify that patients in survival follow-up will be withdrawn at the time of final OS DCO.</li><li>• To provide guidance for Investigators.</li><li>• To clarify the circumstances under which the study will end.</li></ul>
10 January 2018	<ul style="list-style-type: none"><li>• To update toxicity management guidelines.</li><li>• To amend section regarding adverse events of special interest to align with updated safety information as found in the current durvalumab Investigator's Brochure.</li></ul>

Notes:

### Interruptions (globally)

Were there any global interruptions to the trial? No

## Limitations and caveats

None reported
