

## Clinical trial results:

### A phase II trial of ibrutinib, lenalidomide and rituximab for patients with relapsed/refractory mantle cell lymphoma.

#### Summary

EudraCT number	2013-005541-36
Trial protocol	SE FI DK
Global end of trial date	31 December 2019

#### Results information

Result version number	v1 (current)
This version publication date	29 October 2020
First version publication date	29 October 2020

#### Trial information

##### Trial identification

Sponsor protocol code	NLG-MCL6
-----------------------	----------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02460276
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Nordic Lymphoma Group represented by Skåne University Hospital
Sponsor organisation address	Gettingevägen, Lund, Sweden,
Public contact	Jan Sundberg, Lund University Hospital, +46 4617 70 34, jan.sundberg@skane.se
Scientific contact	Jan Sundberg, Lund University Hospital, +46 4617 70 34, jan.sundberg@skane.se

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	29 January 2018
Is this the analysis of the primary completion data?	Yes
Primary completion date	29 January 2018
Global end of trial reached?	Yes
Global end of trial date	31 December 2019
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

Evaluation of overall response rate, based on PET and CT, with lenalidomide, ibrutinib and rituximab in relapsed/refractory mantle cell lymphoma patients.

Protection of trial subjects:

The study was conducted according to the guidelines for Good Clinical Practice, issued by The International Conference on Harmonisation of Technical Requirements for Registration of Pharmaceuticals for Human Use (ICH). The protocol was approved by the local, regional or national Ethical Review Boards according to the existing national and local regulatory requirements. The study was conducted in agreement with the declaration of Helsinki, Tokyo, Venice and Hong Kong amendments and the laws and the regulations of the respective countries.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	30 April 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Norway: 13
Country: Number of subjects enrolled	Sweden: 16
Country: Number of subjects enrolled	Denmark: 18
Country: Number of subjects enrolled	Finland: 3
Worldwide total number of subjects	50
EEA total number of subjects	50

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0

Adults (18-64 years)	13
From 65 to 84 years	36
85 years and over	1

## Subject disposition

### Recruitment

Recruitment details:

The trial was activated at a common start meeting held on 13th April 2015 for PIs and study nurses from the 10 participating sites. The first patient was included shortly after, on 30th April 2015. The last patient was included on 1st June 2016. Overall 50 patients were included in the trial over a period of 13 months.

### Pre-assignment

Screening details:

Patients are screened for the complete list of inclusion and exclusion criteria according to the protocol.

### Period 1

Period 1 title	Experimental (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

### Arms

Arm title	Experimental
-----------	--------------

Arm description:

Induction therapy consisted of 12 cycles of 28 days:

- Lenalidomide: 15 mg p o daily days 1-21, every 28 days, cycles 1-12
- Ibrutinib: 560 mg daily p o days 1-28, cycles 1-12
- Rituximab 375 mg/m<sup>2</sup> iv Day 1 in cycle 1
- Rituximab 1400 mg s c (or 375 mg/m<sup>2</sup> iv) days 8, 15 and 22 in cycle 1. Then given day 1 in cycles 3, 5, 7, 9 and 11

Maintenance therapy consisted of 12 cycles of 56 days:

- Ibrutinib: 560 mg daily p o days 1-56, cycles 1-12
- Rituximab 1400 mg s c (or 375 mg/m<sup>2</sup> iv) day 1, cycles 1-12

Arm type	Experimental
Investigational medicinal product name	Ibrutinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

560 mg p o daily

Investigational medicinal product name	Lenalidomide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

15 mg p o daily on days 1-21 of 28 days, 12 cycles

Investigational medicinal product name	Rituximab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for infusion
Routes of administration	Intravenous use

---

**Dosage and administration details:****Induction therapy:**

375 mg/m<sup>2</sup> iv days 1, 8, 15, 22 in cycle 1; thereafter 375 mg/m<sup>2</sup> on day 1 of cycle 3,5,7,9,11

Alternatively, 1400 mg sc on days 8,15,22 in cycle 1 and day 1 of cycles 3,5,7,9,11

**Maintenance therapy:**

1400 mg sc (or 375 mg/m<sup>2</sup> iv) day 1 of each cycle

<b>Number of subjects in period 1</b>	Experimental
Started	50
Completed	11
Not completed	39
Adverse event, serious fatal	2
Consent withdrawn by subject	3
Physician's Decision	1
Adverse event, non-fatal	8
Patient's Decision	1
Allogeneic Stem Cell Transplantation	4
Lack of efficacy	20

## Baseline characteristics

### Reporting groups

Reporting group title	Experimental

## End points

### End points reporting groups

Reporting group title	Experimental
-----------------------	--------------

Reporting group description:

Induction therapy consisted of 12 cycles of 28 days:

- Lenalidomide: 15 mg p o daily days 1-21, every 28 days, cycles 1-12
- Ibrutinib: 560 mg daily p o days 1-28, cycles 1-12
- Rituximab 375 mg/m<sup>2</sup> iv Day 1 in cycle 1
- Rituximab 1400 mg s c (or 375 mg/m<sup>2</sup> iv) days 8, 15 and 22 in cycle 1. Then given day 1 in cycles 3, 5, 7, 9 and 11

Maintenance therapy consisted of 12 cycles of 56 days:

- Ibrutinib: 560 mg daily p o days 1-56, cycles 1-12
- Rituximab 1400 mg s c (or 375 mg/m<sup>2</sup> iv) day 1, cycles 1-12

### Primary: Overall Response Rate

End point title	Overall Response Rate <sup>[1]</sup>
-----------------	--------------------------------------

End point description:

End point type	Primary
----------------	---------

End point timeframe:

Overall response rate at the end of induction therapy

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: The analysis is described in the publication of the study in Lancet Haematology 2018; 5: e109-116

End point values	Experimental			
Subject group type	Reporting group			
Number of subjects analysed	44			
Units: subjects				
CR	28			
PR	10			

### Statistical analyses

No statistical analyses for this end point

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse events was recorded from the time the subject signed the informed consent to 28 days after the last dose of study drug.

Adverse event reporting additional description:

Non-serious adverse events were evaluated and reported per patient.

Assessment type	Systematic
