

Clinical trial results:

AN OPEN-LABEL, RANDOMIZED, MULTI-CENTER, PARALLEL-GROUP CLINICAL TRIAL COMPARING THE EFFICACY AND SAFETY OF MYLAN'S INSULIN GLARGINE WITH LANTUS® IN TYPE 1 DIABETES MELLITUS PATIENTS

Summary

EudraCT number	2014-000747-32
Trial protocol	SK CZ DE GB EE HU LV
Global end of trial date	07 July 2016

Results information

Result version number	v1
This version publication date	21 July 2017
First version publication date	21 July 2017

Trial information

Trial identification

Sponsor protocol code	MYL-GAI-3001
-----------------------	--------------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02227862
WHO universal trial number (UTN)	-
Other trial identifiers	IND number: 105279

Notes:

Sponsors

Sponsor organisation name	Mylan GMBH
Sponsor organisation address	Thurgauerstrasse 40 , Zurich , Switzerland, 8050
Public contact	Keri Vaughan, Director Global Clinical Operations, General Medicine, Mylan, Inc, keri.vaughan@mylan.com
Scientific contact	Keri Vaughan, Director Global Clinical Operations, General Medicine, Mylan, Inc, keri.vaughan@mylan.com

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	13 February 2017
Is this the analysis of the primary completion data?	Yes
Primary completion date	07 July 2016
Global end of trial reached?	Yes
Global end of trial date	07 July 2016
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To test whether Mylan's insulin glargine once daily is non-inferior to Lantus® once daily (based on change in HbA1c from baseline to 24 weeks) when administered in combination with mealtime insulin lispro.

Protection of trial subjects:

All study participants signed an Informed Consent Form prior to study participation.

Background therapy:

Humalog

Evidence for comparator: -

Actual start date of recruitment	16 June 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Canada: 25
Country: Number of subjects enrolled	South Africa: 16
Country: Number of subjects enrolled	United States: 227
Country: Number of subjects enrolled	Romania: 35
Country: Number of subjects enrolled	Slovakia: 66
Country: Number of subjects enrolled	United Kingdom: 4
Country: Number of subjects enrolled	Czech Republic: 42
Country: Number of subjects enrolled	Estonia: 14
Country: Number of subjects enrolled	Germany: 45
Country: Number of subjects enrolled	Hungary: 48
Country: Number of subjects enrolled	Latvia: 36
Worldwide total number of subjects	558
EEA total number of subjects	290

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37	0

wk	
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	547
From 65 to 84 years	11
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

- Gender: male or female;
- Age: 18-65 years, inclusive;
- Body mass index (BMI): 18.5-35.0 kg/m2, inclusive.

Pre-assignment

Screening details:

Eight hundred eighty-three (883) patients were screened to participate in the study, six hundred and nine (609) patients entered the run-in period, and Five Hundred fifty eight (558) patients were randomized to study treatment.

Pre-assignment period milestones

Number of subjects started	609 ^[1]
Number of subjects completed	558

Pre-assignment subject non-completion reasons

Reason: Number of subjects	The Study Prematurely Terminated By Investigator: 1
Reason: Number of subjects	Lost to follow-up: 5
Reason: Number of subjects	Other: 2
Reason: Number of subjects	Protocol deviation: 5
Reason: Number of subjects	Failed To Meet Inclusion Or Exclusion Criteria: 13
Reason: Number of subjects	Consent withdrawn by subject: 19
Reason: Number of subjects	Reason not collected: 6

Notes:

[1] - The number of subjects reported to have started the pre-assignment period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same. Justification: The number of subjects per country, from which the worldwide number enrolled in the trial is calculated, represent the subjects in the treatment period, which were randomized to study medication (see also Screening Details).

Period 1

Period 1 title	Active Treatment Phase (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	MYL IG

Arm description:

Mylan's insulin Glargine

Arm type	Experimental
Investigational medicinal product name	Insulin Glargine - New Formulation
Investigational medicinal product code	MYL-1501D
Other name	
Pharmaceutical forms	Solution for injection in pre-filled pen
Routes of administration	Subcutaneous use

Dosage and administration details:

100 IU/mL once daily

Arm title	Lantus
Arm description:	
Lantus	
Arm type	Active comparator
Investigational medicinal product name	Insulin Glargine
Investigational medicinal product code	Lantus®
Other name	
Pharmaceutical forms	Solution for injection in pre-filled pen
Routes of administration	Subcutaneous use
Dosage and administration details:	
100 IU/mL once daily	

Number of subjects in period 1	MYL IG	Lantus
Started	280	278
Week24	269	263
Completed	261	256
Not completed	19	22
Consent withdrawn by subject	7	6
Adverse event, non-fatal	4	3
Other	-	2
Lost to follow-up	1	2
Protocol deviation	7	9

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
16 April 2014	<p>Retinal photography added</p> <p>Clarification regarding recording device-related safety</p> <p>Immunogenicity sampling added at visit 10 and visit 12</p> <p>Titration committee added</p> <p>Measurement and analysis of crossreacting antibody added</p> <p>Treatment compliance criteria modified</p> <p>Clarifications and minor editorial corrections</p>

22 July 2015	<p>Key statistical analyses added to the synopsis, to make the synopsis more comprehensive (synopsis).</p> <p>Clarification made to inclusion criterion #1 that patient signature for authorization to use protected health information is part of the ICF; and will not be collected on a separate form</p> <p>Clarification made in inclusion criterion #10 to indicate that oral contraception alone is also acceptable; and that only women of childbearing potential need to perform pregnancy test</p> <p>Clarification made in exclusion criterion #9 that patients will be excluded for ECG or laboratory abnormalities only if they are considered by the investigator to be clinically significant enough to make the patient ineligible</p> <p>Clarification made to exclude glucocorticoids by all routes which have systemic effects; not only oral, inhaled and intravenous</p> <p>Clarification made that dose titration of insulin glargine/Lantus® should be kept to a minimum from 0 to 24 weeks. In the previous version, the period between 0 and 12 weeks was not covered; though implied</p> <p>"Serum"/"plasma" glucose corrected to "capillary" glucose where appropriate</p> <p>Clarification made that serious or severe hypoglycemia will be reported as an SAE (as per reporting guidelines), and recorded on the AE CRF page; while other types of hypoglycemia will be captured only on the hypoglycemia CRF page, and not on the AE page</p> <p>The use of basal insulin more than once daily, or at more than the prescribed dose (though this is rare) - for specified periods - have been added as non-compliance criteria</p> <p>Patients with glucose levels between 270 and 271 mg/dL were inadvertently not covered in the insulin dose titration guidance tables; this has been corrected; and "human insulin regular" has been removed from the table; as it is not permitted in the trial (Appendix II)</p> <p>The definition of per-protocol population has been modified</p>
--------------	---

04 May 2016	<p>In the section Contact Details For Reporting Serious Adverse Events, the sentence "Any SAE occurring in a subject from consent until 28 days after the last dose of the study drug must be reported" has been replaced with "Any SAE occurring in a subject from consent until his/her last study visit/phone visit (scheduled or unscheduled) must be reported".</p> <ul style="list-style-type: none"> • The Synopsis and section 2.1, Secondary objectives, Immunogenicity, the sentence "change from baseline in titer, incidence of ADA, anti-HCP and neutralizing antibodies" has been replaced with "incidence and change from baseline in the relative levels of ADA, incidence and change from baseline the relative levels of anti-HCP antibodies". <p>The Synopsis, Schedule of Activities, Section 3.1, Section 6.3 and Section 6.6 have been modified to clarify that the required number of patients who qualify for the MYL-1501D-3003 study will not go through the Follow-Up Visit of MYLGAI-3001, but will continue in MYL-1501D-3003 after the completion of 52 week visit (EOT).</p> <ul style="list-style-type: none"> • Synopsis, Schedule of Activities, Section 3.1 and Section 6.3. The following statement has been added in the Schedule of Activities: Patients who qualify for the MYL-1501D-3003 study will be requested to sign a new ICF (for MYL-1501D-3003) prior to enrollment or any study activity. • In the Synopsis and Section 6.6, the withdrawal criteria have been modified to remove text on use of prohibited medications and non-compliance. • Section 3.5, figure 1, was updated to include the opportunity to enroll into the MYL-1501D-3003 study. • Section 7.2.1 has been rewritten to reflect methodological changes. • In Section 7.2.2, the following sentences have been removed: "All designated samples will undergo a screening assay that allows for a 5% false positive rate, to identify the presence of anti-HCP. Samples identified as positive in the screening assay will then be tested in a confirmatory assay that employs either
-------------	--

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

None

Notes:
