Clinical trial results:
A Phase 3 Multicenter, Double-Blind, Randomized, Active Comparator-Controlled Clinical Trial to Evaluate the Safety and Efficacy of Doravirine (MK-1439) 100 mg Once Daily Versus Darunavir 800 mg Once Daily plus Ritonavir 100 mg Once Daily, Each in Combination with TRUVADA™ or EPZICOM™/KIVEXA™, in Treatment-Naïve HIV-1 Infected Subjects

Summary

EudraCT number	2014-001127-69

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	06 March 2023
Is this the analysis of the primary completion data?	Yes
Primary completion date	17 September 2015
Global end of trial reached?	Yes
Global end of trial date	06 March 2023
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To establish a new treatment option for treatment-naïve participants with HIV-1, the efficacy and safety of doravirine will be determined relative to a protease inhibitor (PI). Participants will receive double-blind treatment during 96-week Base Study. Eligible participants in Base Study will continue to receive doravirine-containing regimen open-label for additional 96 weeks in Study Ext 1. Eligible participants deriving benefit will continue in Study Extensions 2 and 3 to receive doravirine-containing regimen open-label until doravirine becomes locally available or for additional 96 weeks, whichever comes first. The Primary hypothesis is that doravirine 100 mg once a day (q.d.) is non-inferior to darunavir/ritonavir (800 mg/100 mg) q.d., each in combination with TRUVADA™ or EPZICOM™/KIVEXA™, as assessed by proportion of participants with HIV-1 ribonucleic acid (RNA) <50 copies/mL at Week 48.

Protection of trial subjects:

This study was conducted in conformance with Good Clinical Practice standards and applicable country and/or local statutes and regulations regarding ethical committee review, informed consent, and the protection of human subjects participating in biomedical research.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 December 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Argentina: 16
Country: Number of subjects enrolled	Australia: 15
Country: Number of subjects enrolled	Austria: 24
Country: Number of subjects enrolled	Canada: 20
Country: Number of subjects enrolled	Chile: 55
Country: Number of subjects enrolled	Denmark: 7
Country: Number of subjects enrolled	France: 21
Country: Number of subjects enrolled	Germany: 67
Country: Number of subjects enrolled	Italy: 6
Country: Number of subjects enrolled	Romania: 29
Country: Number of subjects enrolled	Russian Federation: 95
Country: Number of subjects enrolled	South Africa: 45
Country: Number of subjects enrolled	Spain: 76
Country: Number of subjects enrolled	United Kingdom: 26
Country: Number of subjects enrolled	United States: 267

Worldwide total number of subjects	769
EEA total number of subjects	230

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	762
From 65 to 84 years	7
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

A total of 1027 participants were screened and 769 were randomized.

Period 1

Period 1 title	Base Study: 96 weeks
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Doravirine 100 mg

Arm description:

Double-blind Doravirine 100 mg administered orally (p.o.) once daily (q.d.) + investigator-selected TRUVADA™ or EPZICOM™/KIVEXA™ administered p.o. q.d. for 96 weeks in the Base Study. Eligible participants continued in Study Extension 1 with open-label Doravirine 100 mg administered p.o. q.d. + investigator-selected TRUVADA™ or EPZICOM™/ KIVEXA™ administered p.o. q.d. for an additional 96 weeks. Eligible participants continued to receive the Doravirine regimen in Study Extension 2 for an additional 96 weeks, and in Study Extension 3 for an additional 96 weeks.

Arm type	Experimental
Investigational medicinal product name	Doravirine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Doravirine 100 mg tablet administered p.o. q.d.

Investigational medicinal product name	TRUVADA™ or EPZICOM™/KIVEXA™
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

The investigator selects either TRUVADA™, a tablet containing 200 mg emtricitabine and 300 mg tenofovir disoproxil fumarate p.o. q.d. or EPZICOM™/KIVEXA™, a tablet containing 600 mg abacavir sulfate and 300 mg lamivudine, p.o. q.d.

Arm title	Daurunavir 800 mg + Ritonavir 100 mg Doravirine 100 mg

Arm description:

Double-blind Darunavir 800 mg and Ritonavir 100 mg administered p.o. q.d. + investigator-selected TRUVADA™ or EPZICOM™/ KIVEXA™ administered p.o. q.d. for 96 weeks in the Base Study. Eligible participants continued in Study Extension 1 with open-label Doravirine 100 mg administered p.o. q.d. + investigator-selected TRUVADA™ or EPZICOM™/ KIVEXA™ administered p.o. q.d. for an additional 96 weeks. Eligible participants continued to receive the Doravirine regimen in Study Extension 2 for an additional 96 weeks, and in Study Extension 3 for an additional 96 weeks.

Arm type	Active comparator

Investigational medicinal product name	Darunavir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Darunavir 800 mg tablet administered p.o. q.d.

Investigational medicinal product name	Ritonavir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Ritonavir 100 mg tablet administered p.o. q.d.

Investigational medicinal product name	TRUVADA™ or EPZICOM™/KIVEXA™
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

The investigator selects either TRUVADA™, a tablet containing 200 mg emtricitabine and 300 mg tenofovir disoproxil fumarate p.o. q.d. or EPZICOM™/KIVEXA™, a tablet containing 600 mg abacavir sulfate and 300 mg lamivudine, p.o. q.d.

Number of subjects in period 1	Doravirine 100 mg	Daurunavir 800 mg + Ritonavir 100 mg Doravirine 100 mg
Started	385	384
Treated	383	383
Completed	292	273
Not completed	93	111
Adverse event, serious fatal	3	1
Consent withdrawn by subject	19	22
Physician decision	2	4
Randomized not treated	2	1
Adverse event, non-fatal	6	14
Pregnancy	2	1
Noncompliance with drug	9	6
Lost to follow-up	28	24

Subject analysis set title	Daurunavir 800 mg + Ritonavir 100 mg
Subject analysis set type	Intention-to-treat

Subject analysis set description:

Double-blind Darunavir 800 mg and Ritonavir 100 mg administered p.o. q.d. + investigator-selected TRUVADA™ or EPZICOM™/ KIVEXA™ administered p.o. q.d. for 96 weeks in the Base Study.

Primary: Percentage of Participants Achieving Plasma HIV-1 RNA <50 Copies/mL at Week 48

End point title	Percentage of Participants Achieving Plasma HIV-1 RNA <50 Copies/mL at Week 48

End point description:

The percentage of participants in each arm achieving HIV-1 RNA levels <50 copies/mL at Week 48 was determined. Plasma HIV-1 RNA levels were quantified with the Abbott RealTime HIV-1 Assay. Data were handled according to the US Food and Drug Administration (FDA) "snapshot" approach and all missing data were considered treatment failures, regardless of the reason. The analysis population for this endpoint included all randomized participants who received at least 1 dose of study drug.

End point type	Primary

End point timeframe:

Week 48

End point values	Doravirine 100 mg	Daurunavir 800 mg + Ritonavir 100 mg		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	383	383		
Units: Percentage of participants				
number (not applicable)	83.8	79.9		

Statistical analyses

Statistical analysis title	% Achieving PL HIV-1 RNA <50 Copies/mL at Week 96
Comparison groups	Doravirine 100 mg v Daurunavir 800 mg + Ritonavir 100 mg
Number of subjects included in analysis	766
Analysis specification	Pre-specified
Analysis type	non-inferiority[1]
Parameter estimate	Treatment Difference
Point estimate	3.913

Confidence interval	
level	95 %
sides	2-sided
lower limit	-1.59
upper limit	9.415

Notes:

[1] - Doravirine is concluded to be non-inferior to darunavir + ritonavir if the lower bound of the 95% CI for the difference in percent response is above -10 percentage points.

Secondary: Percentage of Participants Achieving Plasma HIV-1 RNA <50 Copies/mL at Week 96

End point title	Percentage of Participants Achieving Plasma HIV-1 RNA <50 Copies/mL at Week 96

End point description:

The percentage of participants in each arm achieving HIV-1 RNA levels <50 copies/mL at Week 96 was determined. Plasma HIV-1 RNA levels were quantified with the Abbott RealTime HIV-1 Assay. Data were handled according to the US Food and Drug Administration (FDA) "snapshot" approach and all missing data were considered treatment failures, regardless of the reason. The analysis population for this endpoint included all randomized participants who received at least 1 dose of study drug and had data for the outcome measure. Participants with missing HIV-1 RNA due to an Abbott RealTime manufacturing agent recall were excluded from the analysis.

Comparison groups	Doravirine 100 mg v Daurunavir 800 mg + Ritonavir 100 mg
Number of subjects included in analysis	755
Analysis specification	Pre-specified
Analysis type	non-inferiority[2]
Parameter estimate	Treatment Difference
Point estimate	7.082
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.508
upper limit	13.656

Notes:

[2] - Doravirine is concluded to be non-inferior to darunavir + ritonavir if the lower bound of the 95% CI for the difference in percent response is above -10 percentage points.

Secondary: Change from Baseline in Mean CD4+ T-cell Count at Week 48

End point title	Change from Baseline in Mean CD4+ T-cell Count at Week 48

End point description:

CD4+ T-cell counts were quantified by a central laboratory using a commercially available assay. The analysis population for this endpoint included all randomized participants who received at least 1 dose of study drug and had data for the outcome measure. Baseline values were carried forward for participants who discontinued therapy due to lack of efficacy.

Secondary: Percentage of Participants with Any Adverse Event

End point title	Percentage of Participants with Any Adverse Event

End point description:

An adverse event (AE) is defined as any untoward medical occurrence in a study participant and which does not necessarily have to have a causal relationship to treatment. An adverse event can therefore be any unfavourable and unintended sign, symptom, or disease temporally associated with the study treatment or protocol-specified procedure, whether or not considered related to study treatment or protocol-specified procedure. Any worsening of a preexisting condition that is temporally associated with the study treatment is also an AE. The percentage of participants with any AE was assessed. The analysis population for this endpoint included all randomized participants who received at least 1 dose of study drug.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
09 February 2015	Amendment 01: The primary reasons for this protocol amendment were revisions to the Objectives and Hypotheses, Efficacy Endpoints, Statistical Analysis Plan, Subject Inclusion Criteria, Subject Withdrawal/Discontinuation Criteria, and Timing of Dose Administration.
12 February 2015	Amendment 02: The primary reasons for this protocol amendment were revisions to the Objectives and Hypotheses, Efficacy Endpoints, Statistical Analysis Plan, Subject Inclusion Criteria, Subject Withdrawal/Discontinuation Criteria, and Timing of Dose.
23 July 2015	Amendment 03: The primary reasons for this protocol amendment were revisions to the Objectives and Hypotheses, Efficacy Endpoints, Statistical Analysis Plan, Subject Inclusion Criteria, Subject Exclusion Criteria, Subject Withdrawal/Discontinuation Criteria, Timing of Dose Administration, and Concomitant Medications/Vaccinations (Allowed & Prohibited).
02 December 2016	Amendment 05: The primary reasons for this protocol amendment were revisions to the Trial Summary, Trial Design, Trial Diagram, Exploratory Objectives, Rationale for Endpoints, Rationale for Study Extension, Subject Inclusion Criteria, Trial Treatments, Dose Modification/Interruption/Discontinuation, Timing of Dose Administration, Trial Blinding/Masking, Concomitant Medications, Subject Withdrawal/Discontinuation Criteria, Trial Flow Chart, Inclusion/Exclusion Criteria, Adverse Events, Laboratory Procedures/Assessments, Blinding/Unblinding, Treatment Visits in Base Study (Visit 2 to Visit 13), Treatment Visits in Study Extension (Visit 14 to Visit 20), Post-Trial, Statistical Analysis Plan, Responsibility for Analyses/In-House Blinding, Statistical Methods, Compliance (Medication Adherence), and Approximate Blood/Tissue Volumes Drawn/Collected by Trial Visit and by Sample Types.
12 December 2016	Amendment 04 : The primary reasons for this protocol amendment were revisions to reflect an amended trial design, which added an open-label extension in which patients received active MK-1439 in combination with NRTI, after completion of the 96-week, double-blind period (base study).
09 March 2017	Amendment 06: The primary reasons for this protocol amendment were revisions to the Trial Summary, Trial Design, Trial Diagram, Exploratory Objectives, Rationale for Endpoints, Rationale for Study Extension, Subject Inclusion Criteria, Trial Treatments, Dose Modification/Interruption/Discontinuation, Timing of Dose Administration, Trial Blinding/Masking, Concomitant Medications, Subject Withdrawal/Discontinuation Criteria, Trial Flow Chart, Inclusion/Exclusion Criteria, Adverse Events, Laboratory Procedures/Assessments, Blinding/Unblinding, Treatment Visits in Base Study (Visit 2 to Visit 13), Treatment Visits in Study Extension (Visit 14 to Visit 20), Post-Trial, Statistical Analysis Plan, Responsibility for Analyses/In-House Blinding, Statistical Methods, Compliance (Medication Adherence), Approximate Blood/Tissue Volumes, Drawn/Collected by Trial Visit and by Sample Types, Rationale for the Trial and Selected Subject Population, and Subject Inclusion Criteria.

30 August 2018	Amendment 08: The primary reasons for this protocol amendment were revisions to the Trial Design, Trial Diagram, Study Extension, Efficacy Endpoints, Safety Endpoints, Rationale for Study Extensions, Trial Treatments, Dose Modification/Interruption/Discontinuation, Concomitant Medications, Subject Withdrawal/Discontinuation Criteria, Trial Flow Chart, Inclusion/Exclusion Criteria, Trial Compliance (Medication/Diet/Activity/Other), Adverse Events, Serum/Urine Pregnancy Test Laboratory Safety Evaluations (Hematology, Chemistry and Urinalysis), Virology Test, Viral Resistance Testing, CD4 Cell Counts, Blinding/Unblinding, Treatment Visits in Base Study, Treatment Visits in Study Extension 1, Post-Trial, Assessing and Recording Adverse Events, Data Monitoring Committee, Statistical Analysis Plan, Responsibility for Analyses/In-House Blinding, Analysis Endpoints, Statistical Methods, Statistical Methods for Efficacy Analysis, Compliance (Medication Adherence), Packaging and Labeling Information, and Week 100 Through Post-Study 14-Day Follow-up (Study Extension 1).
14 January 2019	Amendment 10: The primary reasons for this protocol amendment were revisions to the Trial Summary, Duration of Participation, Trial Design, Trial Flowchart, Subject Withdrawal/Discontinuation Criteria, Treatment Visits in Study Extension, and Approximate Blood/Tissue Volumes Drawn/Collected by Trial Visit and by Sample Types in Study Extension.
14 February 2019	Amendment 07: The primary reasons for this protocol amendment were revisions to the Trial Summary, Trial Design, Trial Diagram, Study Extension, Efficacy Endpoints, Safety Endpoints, Rationale for Study Extensions, Subject Inclusion Criteria, Trial Treatments, Dose Modification/Interruption/Discontinuation, Concomitant Medications, Subject Withdrawal/Discontinuation Criteria, Trial Flow Chart, Inclusion/Exclusion Criteria, Trial Compliance, Adverse Events, Serum/Urine Pregnancy Test, Laboratory Safety Evaluations, Virology Test, Viral Resistance Testing, CD4 Cell Counts, Blinding/Unblinding, Treatment Visits in Base Study, Treatment Visits in Study Extension 1, Post-Trial, Assessing and Recording Adverse Events, Data Monitoring Committee, Statistical Analysis Plan, Responsibility for Analyses/In-House Blinding, Analysis Endpoints, Statistical Methods, Statistical Methods for Efficacy Analysis, Compliance (Medication Adherence), Packaging and Labeling Information, Week 100 Through Post-Study 14-Day Follow-up (Study Extension 1).
21 March 2019	Amendment 09: The primary reasons for this protocol amendment were revisions to the Trial Summary, Trial Design, Trial Diagram, Study Extension, Efficacy Endpoints, Safety Endpoints, Rationale for Study Extensions, Subject Inclusion Criteria, Trial Treatments, Dose Modification/Interruption/Discontinuation, Concomitant Medications, Subject Withdrawal/Discontinuation Criteria, Trial Flow Chart, Inclusion/Exclusion Criteria, Trial Compliance, Medication/Diet/Activity/Other), Adverse Events, Serum/Urine Pregnancy Test, Laboratory Safety Evaluations, Virology Test, Viral Resistance Testing, CD4 Cell Counts, Blinding/Unblinding, Treatment Visits in Base Study, Treatment Visits in Study Extension 1, Post-Trial, Assessing and Recording Adverse Events, Data Monitoring Committee, Statistical Analysis Plan, Responsibility for Analyses/In-House Blinding, Analysis Endpoints, Statistical Methods, Statistical Methods for Efficacy Analysis, Compliance (Medication Adherence), Packaging and Labeling Information, and Week 100 Through Post-Study 14-Day Follow-up (Study Extension 1).
15 December 2020	Amendment 11: The primary reasons for this protocol amendment were revisions to the Trial Summary, Trial Design, Trial Diagram, Safety Endpoints, Rationale for Study Extensions, Subject Withdrawal/Discontinuation Criteria, Trial Flow Chart, Inclusion/Exclusion Criteria, Trial Compliance (Medication/Diet/Activity/Other), Withdrawal/Discontinuation, Visit Requirements, Assessing and Recording Adverse Events, Statistical Analysis Plan, Responsibility for Analyses/In-House Blinding, and Statistical Methods.
16 January 2023	Amendment 12: The primary reasons for this protocol amendment were to update the Sponsor name and address.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
