Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	19 September 2016
Is this the analysis of the primary completion data?	Yes
Primary completion date	03 June 2015
Global end of trial reached?	Yes
Global end of trial date	20 April 2016
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

This is a safety and efficacy study of onabotulinumtoxinA in subjects with upper facial rhytides (forehead lines, glabellar lines, lateral canthal lines [crow's feet lines]).

Protection of trial subjects:

All study participants were required to read and sign an Informed Consent Form.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	27 October 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 70
Country: Number of subjects enrolled	Denmark: 217
Country: Number of subjects enrolled	United Kingdom: 96
Country: Number of subjects enrolled	United States: 404
Worldwide total number of subjects	787
EEA total number of subjects	383

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	749
From 65 to 84 years	38
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Subjects were randomized to placebo, onabotulinumtoxinA Dose A, or onabotulinumtoxinA Dose B in Period 1. Subjects randomized to receive placebo or Dose B in Period 1, who subsequently continued to Period 2, received onabotulinumtoxinA Dose A in Period 2.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo (normal saline) followed by OnabotulinumtoxinA Dose A

Arm description:

Placebo (normal saline) injected into the protocol-specified areas on Day 1. If the subject meets the re-treatment criteria, the subject will receive up to 2 treatments with onabotulinumtoxinA Dose A into the protocol-specified areas.

Arm type	Placebo followed by experimental
Investigational medicinal product name	OnabotulinumtoxinA
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

Placebo (normal saline) injected into the protocol-specified areas on Day 1. If the subject meets the re-treatment criteria, the subject will receive up to 2 treatments with onabotulinumtoxinA Dose A into the protocol-specified areas.

Arm title	OnabotulinumtoxinA Dose B
------------------	---------------------------

Arm description:

OnabotulinumtoxinA Dose B injected into the protocol-specified areas on Day 1. Subjects will receive at least 1 and up to 3 treatments.

Arm type	Experimental
Investigational medicinal product name	OnabotulinumtoxinA
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

OnabotulinumtoxinA Dose B injected into the protocol-specified areas on Day 1. Subjects will receive at least 1 and up to 3 treatments.

Arm title	OnabotulinumtoxinA Dose A
------------------	---------------------------

Arm description:

OnabotulinumtoxinA Dose A injected into the protocol-specified areas on Day 1. Subjects will receive at least 1 and up to 3 treatments.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse events were recorded from signing the informed consent to the end of study.

Adverse event reporting additional description:

The Safety Population includes all subjects who received at least 1 study treatment injection and was used to assess AEs and SAEs. Subjects randomized to receive placebo in Period 1 who subsequently received open-label onabotulinumtoxinA Dose A in Period 2 are included in the onabotulinumtoxinA Dose A group for the Safety analysis.

Frequency threshold for reporting non-serious adverse events: 5 %

Non-serious adverse events	Placebo (normal saline) followed by OnabotulinumtoxinA Dose A	OnabotulinumtoxinA Dose A	OnabotulinumtoxinA Dose B
Total subjects affected by non-serious adverse events			
subjects affected / exposed	21 / 156 (13.46%)	198 / 746 (26.54%)	90 / 318 (28.30%)
Nervous system disorders			
Headache			
alternative assessment type: Non-systematic			
subjects affected / exposed	8 / 156 (5.13%)	69 / 746 (9.25%)	30 / 318 (9.43%)
occurrences (all)	10	89	35
General disorders and administration site conditions			
Injection site bruising			
alternative assessment type: Non-systematic			
subjects affected / exposed	5 / 156 (3.21%)	47 / 746 (6.30%)	26 / 318 (8.18%)
occurrences (all)	5	53	27
Injection site haematoma			
alternative assessment type: Non-systematic			
subjects affected / exposed	3 / 156 (1.92%)	34 / 746 (4.56%)	16 / 318 (5.03%)
occurrences (all)	3	39	20
Infections and infestations			

Nasopharyngitis			
alternative assessment type: Non-systematic			
subjects affected / exposed	5 / 156 (3.21%)	48 / 746 (6.43%)	18 / 318 (5.66%)
occurrences (all)	5	58	21

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
03 August 2015	A) Topical anesthetics were excluded; B) added requirement for subjects to be observed for adverse events for at least 30 minutes following study treatment; C) added analysis method of MI and added sensitivity analyses for primary variables/analyses; D) defined clinical benefit and clarified that responders for FLSQ Impact Domain score only included subjects who had baseline scores ≥ 20 points for secondary efficacy variables/analyses; and E) added FWS ratings of FHL severity at maximum eyebrow elevation based on independent physician reviewers' assessment of photographs for other efficacy variables/analyses.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
