

Clinical trial results:

A RANDOMIZED, DOUBLE-BLIND, PARALLEL-GROUP STUDY TO EVALUATE THE SAFETY AND EFFICACY OF SWITCHING FROM INNOVATOR INFLIXIMAB

TO BIOSIMILAR INFLIXIMAB COMPARED WITH CONTINUED TREATMENT WITH INNOVATOR INFLIXIMAB IN PATIENTS WITH RHEUMATOID ARTHRITIS, SPONDYLOARTHRITIS, PSORIATIC ARTHRITIS, ULCERATIVE COLITIS, CROHN'S DISEASE AND CHRONIC PLAQUE PSORIASIS

THE NOR-SWITCH STUDY

Summary

EudraCT number	2014-002056-40
Trial protocol	NO
Global end of trial date	16 June 2016
Results information	
Result version number	v1 (current)
This version publication date	08 September 2018
First version publication date	08 September 2018
Summary attachment (see zip file)	NOR-SWITCH synopsis (NOR-SWITCH synopsis.docx)

Notes:

Paediatric regulatory details	
Is trial part of an agreed paediatric investigation plan (PIP)	No

Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage		
Analysis stage	Final	
Date of interim/final analysis	12 July 2016	
Is this the analysis of the primary completion data?	Yes	
Primary completion date	16 June 2016	
Global end of trial reached?	Yes	
Global end of trial date	16 June 2016	
Was the trial ended prematurely?	No	

Notes:

General information about the trial

Main objective of the trial:

To assess if biosimilar infliximab (CT-P13) is non-inferior to innovator infliximab (INX) with regard to disease worsening in patients who have been on stable INX treatment for at least 6 months

Protection of trial subjects:

None

Background therapy: -

Evidence for comparator: -

Evidence for comparator.	
Actual start date of recruitment	06 October 2014
Long term follow-up planned	Yes
Long term follow-up rationale	Safety, Efficacy, Scientific research
Long term follow-up duration	6 Months
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Norway: 498
Worldwide total number of subjects	498
EEA total number of subjects	498

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0

Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	425
From 65 to 84 years	73
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Each hospital department was considered a study centre, and 19 gastroenterology departments, 16 rheumatology departments, and five dermatology departments from 25 Norwegian hospitals recruited patients to the study.

Pre-assignment

Screening details:

Adult patients with a diagnosis of Crohn's disease, ulcerative colitis, spondyloarthritis, rheumatoid arthritis, psoriatic arthritis, or chronic plaque psoriasis on stable treatment with infliximab originator for at least 6 months were eligible for participation.

Reason: Number of subjects	Consent withdrawn by subject: 1
Reason: Number of subjects	Other reasons: 5

Period 1

Period 1 title	Baseline
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	CT-P13

Arm description:

Biosimilar infliximab

Arm type	Experimental
Investigational medicinal product name	Infliximab CT-P13
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Infusion
Routes of administration	Intravenous use

Dosage and administration details:

The dose and infusion intervals of patients' infliximab treatment regimens were kept unchanged from those before randomisation.

Arm title	Originator infliximab
Arm description:	
Originator infliximab	
Arm type	Active comparator
·	-

Investigational medicinal product name	Infliximab Remicade
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Infusion
Routes of administration	Intravenous use

Dosage and administration details:

The dose and infusion intervals of patients' infliximab treatment regimens were kept unchanged from those before randomisation.

Number of subjects in period	CT-P13	Originator infliximab
Started	241	241
Completed	241	241

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: There was some included patients who were not randomized, resulting in a difference in the numbers.

Period 2

Period 2 title	Intervention
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Monitor, Subject, Data analyst, Carer, Assessor

Blinding implementation details:

Eligible patients with informed consent were randomised in a 1:1 ratio to either continued infliximab originator or switch to CT-P13 treatment, with a computer block randomisation procedure stratified by diagnosis and a fixed block size of six.

The computer-generated randomised allocation sequence was imported into the electronic case report form (eCRF) system (Viedoc; version 3.20) and made available exclusively to the study nurse authorised by the local principal investigator to prepare infus

Primary: Disease worsening

End point title	Disease worsening

End point description:

The primary endpoint was disease worsening during follow-up according to worsening in disease-specific composite measures or a consensus about disease worsening between investigator and patient leading to major change in treatment. Disease worsening according to disease-specific composite measures was defined as change from baseline in Harvey-Bradshaw Index of 4 points or more and a score of 7 points or greater points for Crohn's disease, change from baseline in Partial Mayo Score of more than 3 and a score of 5 or greater for ulcerative colitis, change from baseline in Ankylosing Spondylitis Disease Activity Score of 1·1 or more attaining a minimum score of 2·1 for spondyloarthritis, change from baseline in Disease Activity Score in 28 joints of 1·2 or more with a minimum score of 3·2 for rheumatoid arthritis and psoriatic arthritis, and change in Psoriasis Area and Severity Index of 3 or more and a score of 5 or greater for chronic plaque psoriasis (appendix p 4).

Statistical analyses

Statistical analysis title	Primary analysis
----------------------------	------------------

Statistical analysis description:

We analysed the primary outcome and secondary dichotomous endpoints using logistic regression with treatment as fixed effect, adjusted for diagnosis and the treatment duration of infliximab originator at baseline providing estimates (by the delta method) of adjusted risk difference and adjusted relative risk for the treatment difference.

Comparison groups	CT-P13 v Originator infliximab
Number of subjects included in analysis	408
Analysis specification	Pre-specified
Analysis type	non-inferiority
Method	Regression, Logistic
Parameter estimate	Risk difference (RD)
Point estimate	-4.4
Confidence interval	
level	95 %
sides	2-sided
lower limit	-12.7
upper limit	3.9

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
	This amendment added exclusion criteria 6: "For patients with UC and CD: Functional colostomy or ileostomy. Extensive colonic resection with less than 25 cm of the colon left in situ." In addition, the protocol was amended to enable further recording of background demographic information for each patient.
21 July 2015	This amendment added details of a 26-week open-label extension with CT-P13 to the study.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
