Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	23 July 2024
Is this the analysis of the primary completion data?	Yes
Primary completion date	24 January 2024
Global end of trial reached?	Yes
Global end of trial date	24 January 2024
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Phase I objective: To establish a safe and tolerable dose of BNT113 [Arms 1A and 1B].

Phase II objectives: To assess if there is evidence of clinical effect (according to irRECIST 1.1 criteria) [Arm 1B] at 3 months after the last vaccination; to assess if there is evidence of clinical effect in terms of a significant increase of immune cells following BNT113 administration [Arm 1B].

Protection of trial subjects:

None

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	16 May 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 30
Worldwide total number of subjects	30
EEA total number of subjects	0

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	19
From 65 to 84 years	11
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Between 16 May 2017, and 17 Jan 2023, 30 patients were recruited (Arm 1A Cohort 1 n=6, Arm 1A Cohort 2 n=11, Arm 1B n=13) to receive treatment.

Pre-assignment

Screening details:

A total of 69 patients were screened, 10 were excluded due to non-HPV16+ cancer, 6 were excluded due to clinician's choice, and 23 were excluded due to other reasons.

Period 1

Period 1 title	Overall Trial (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Arm 1A

Arm description:

Arm 1A included patients with previously treated HPV16+ head and neck squamous cell carcinoma.

Arm type	Experimental
Investigational medicinal product name	BNT113
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Injection

Dosage and administration details:

q1w x 4 then q2w x 4 with inpatient dose escalation from 7.2 µg to 29 µg (Cohort 1, first 6 patients) or to 72.8µg (Cohort 2, last 11 patients)

Arm title	Arm 1B
------------------	--------

Arm description:

Arm 1B included patients with HPV16+ advanced disease.

Arm type	Experimental
Investigational medicinal product name	BNT113
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Injection

Dosage and administration details:

q1w x 4 then q2w x 4 with inpatient dose escalation from 7.2 µg to 72.8 µg

Number of subjects in period 1	Arm 1A	Arm 1B
Started	17	13
Completed	12	7
Not completed	5	6
Consent withdrawn by subject	-	1
Lost to follow-up	5	5

Baseline characteristics

Tonsil	7	0	7
Missing	0	1	1

End points

End points reporting groups

Reporting group title	Arm 1A
Reporting group description:	
Arm 1A included patients with previously treated HPV16+ head and neck squamous cell carcinoma.	
Reporting group title	Arm 1B
Reporting group description:	
Arm 1B included patients with HPV16+ advanced disease.	
Subject analysis set title	Safety population
Subject analysis set type	Safety analysis
Subject analysis set description:	
Participants received at least 1 dose or underwent DTH control reaction assessment.	
Subject analysis set title	Per protocol population
Subject analysis set type	Per protocol
Subject analysis set description:	
Participants received at least 1 maximum dose or their individual maximum tolerated dose.	

Primary: Dose limiting toxicities

End point title	Dose limiting toxicities ^[1]
End point description:	
End point type	Primary
End point timeframe:	
During or within one week after the vaccination cycle	
Notes:	
[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.	
Justification: Only descriptive statistics	

End point values	Arm 1A	Arm 1B		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	17	12		
Units: Subject

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
26 January 2017	Addition of 12 month continuation of treatment period for Arm 1B patients; Movement of secondary endpoints to tertiary endpoints, clarity and further information on the procedures of dose modification in the event of adverse drug reactions, clarity on the preventative management of adverse drug reactions, change to the information about the storage of the vaccine to fall in line with the changes in the IMPD
19 October 2017	Exclusion criteria has been updated to clarify the upper limits of patients with elevated Liver Function Tests; Consenting timeline for Arm 1A and 1B extended, as well as allowing routine treatment day bloods to be taken up to 1 working day prior to vaccination. Clarifications on continued treatment options and dose modifications also included.
11 July 2018	Clarification of blood requirements for standard pathology blood analysis, Change from C5a analysis to NHS complement function, HPV ISH changed to HPV typing, Cytokine blood withdrawal clarification, Clarification of tissue biopsy procedure, Removal of 7 day time-lag between dosing for both Arms, Clarification for vital sign monitoring, Change of name of IMP manufacturer, Clarification of reporting requirements.
19 December 2019	Removal of DTH and Complement function test; additional clarity regarding withdrawal of consent, storage temperatures for IMP updated, RNA (LIP) changed to RNA-LPX to harmonise with Investigator Brochure
24 February 2021	CI location and contact details updated; Updated drug name to BNT113. Change of manufacturing name to BioNTech Manufacturing GmbH. DTH analysis added back as tertiary endpoint to protocol
22 March 2022	Change in exclusion criteria, patients with history of anaphylactic reactions or severe allergies are no longer excluded from the trial. There are additional recommended actions for treatment of Adverse Drug Reactions (ADR) in appendix 2, and in preventative management of ADRs, such as adequate hydration and use of paracetamol pre and post vaccination. Footers in the schedule of observations have been updated to clarify when end of treatment and follow up visits should occur, there is also a new appendix 7 with a table of follow up visit schedule for patients who continue to maintenance treatment. The dose escalation diagram has been updated to clarify whether to dose escalate or reduce following a significant adverse drug reaction. Covid-19 vaccination status will now be collected as part of medical history.
19 December 2022	Study Title updated, ref to anti CD40 removed ; Arm 1B eligibility inclusion HPV16+ unknown primary; Window for weight, phys exam, ECOG - 3 days, New Stage 1 Consent added, Clarification scheduling of scans during maintenance treatment, Removed 24h overnight stays, Clinical Safety updates to wording (BNT)
02 August 2023	Change to Eligibility, cancer survivals free of disease for 1 year eligible, mandatory biopsies removed, definition of vaccine immunogenicity clarified, decrease in maintenance from 12 to 6 months.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
18 March 2020	COVID-19 lockdown	05 October 2020
12 January 2021	COVID-19 lockdown	01 February 2021
12 February 2021	Clinical Trial Unit resource issue (Arm 1B only)	01 July 2021
05 April 2022	Pause to recruitment until revised IMPD approved to enable QP release of IMP	27 April 2022
19 April 2023	Fungal contamination of the outer packaging of HARE-40 IMP Kit B	-

Notes:
