30th May 2022

The effect of oral vitamin D supplementation on endothelial function, vascular inflammation, oxidative stress, and insulin sensitivity in patients with impaired fasting glucose: A randomised, double-blinded, placebo-controlled trial (Vitamin-D trial)

EudraCT number: 2014-002766-73

Sponsor: Portsmouth Hospitals University NHS Trust

This trial was carried out as part of the Principal Investigator's MD programme. However, the PI withdrew from the MD in 2019 and therefore no final reports are available for this trial.
