

Clinical trial results:

A multicenter, randomized, double-blind, placebo-controlled, dose-response study to investigate the biological activity, safety, tolerability, and pharmacokinetics of ACT-334441 in subjects with systemic lupus erythematosus.

Summary

EudraCT number	2014-002984-14

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	12 January 2018
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	28 February 2017
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To assess the pharmacodynamics of ACT-334441, its safety and tolerability profile in adult systemic lupus erythematosus (SLE) subjects.

Protection of trial subjects:

Prior to the start of the study, each study site consulted an Independent Ethics Committee (IEC) or Institutional Review Board (IRB), i.e., a review panel that was responsible for ensuring the protection of the rights, safety, and well being of human subjects involved in a clinical investigation. The sponsor and the investigators ensured that the study was conducted in full compliance with International Council for Harmonisation (ICH)-Good Clinical Practice (GCP) Guidelines, the principles of the "Declaration of Helsinki" and with the laws and regulations of the countries in which the research was conducted.

Background therapy:

Standard of care therapies for SLE were allowed

Evidence for comparator: -

Actual start date of recruitment	01 June 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Bulgaria: 19
Country: Number of subjects enrolled	Belarus: 7
Country: Number of subjects enrolled	Georgia: 6
Country: Number of subjects enrolled	Russian Federation: 22
Country: Number of subjects enrolled	Ukraine: 9
Country: Number of subjects enrolled	United States: 4
Worldwide total number of subjects	67
EEA total number of subjects	19

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	67
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Study was conducted at 18 sites in 6 countries (BLR, BGR, GEO, RUS, UKR, and USA) from 1 Jun 2015 to 28 Feb 2017 (First subject, first visit to last subject, last visit)

Pre-assignment

Screening details:

The screening period started at the time the ICF was signed (up to 30 days before Randomization), and ended with subject randomization. The period included Visit 1 (Screening) and the pre-randomization (pre-dose) assessments at Visit 2 (Day 1).

Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Monitor, Data analyst, Subject

Arms

Are arms mutually exclusive?	Yes
Arm title	ACT-334441 - 0.5 mg
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	ACT-334441
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

One capsule of cenerimod was taken orally o.d. irrespective of food intake. The capsule was to be swallowed whole. It was preferable that the capsule was taken each day at approximately the same time (preferably each morning).

Arm title	ACT-334441 - 1.0 mg
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	ACT-334441
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

One capsule of cenerimod was taken orally o.d. irrespective of food intake. The capsule was to be swallowed whole. It was preferable that the capsule was taken each day at approximately the same time (preferably each morning).

Arm title	ACT-334441 - 2.0 mg
Arm description: -	
Arm type	Experimental

Investigational medicinal product name	ACT-334441
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

One capsule of cenerimod was taken orally o.d. irrespective of food intake. The capsule was to be swallowed whole. It was preferable that the capsule was taken each day at approximately the same time (preferably each morning).

Arm title	ACT-334441 - 4.0 mg
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	ACT-334441
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

One capsule of cenerimod was taken orally o.d. irrespective of food intake. The capsule was to be swallowed whole. It was preferable that the capsule was taken each day at approximately the same time (preferably each morning).

Arm title	Placebo
Arm description: -	
Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

One capsule of placebo was taken orally o.d. irrespective of food intake. The capsule was to be swallowed whole. It was preferable that the capsule was taken each day at approximately the same time (preferably each morning).

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
25 March 2015	<p>Summary of most relevant changes:</p> <ul style="list-style-type: none">• Study-specific stopping rules per FDA recommendations were introduced,• ECG discharge criteria from hospital on Day 1 and on the first day of re-initiation following treatment interruption were clarified,• Respiratory system criteria for interruption / premature discontinuation of study treatment per FDA recommendations were revised,• The safety endpoint/variable Occurrence of treatment-emergent decrease of FEV1 or FVC was modified,• Analysis of pulmonary safety events was to include treatment-emergent decrease of FEV1 or FVC to < 85% of baseline values instead of < 80% of baseline values,• Since at Visit 3 and re-initiation visits, study drug was not to be allocated by the IRT system, the compliance could not be calculated automatically in the eCRF. During these visits, a compliance review based on study drug accountability was to be performed by the investigator (or delegate) and recorded in the eCRF,• In case of no medical justification available for study treatment interruption, compliance < 80% was to be reported as a protocol deviation,• Clarifications were added in the laboratory sections,• In order to shorten the time window between assessments during the follow-up period (at 6 and 16 weeks after last dose of study treatment intake), a follow-up assessment via telephone was added at 11 weeks after last dose of study treatment intake to collect SAEs and pregnancy test results,• Informed Consent Form was amended to reflect the changes introduced by the amendment.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
