

## Clinical trial results:

### A multi center, single arm, interventional Phase 4 study to evaluate a Treat and Extend regimen of intravitreal aflibercept for treatment of macular edema secondary to central retinal vein occlusion

#### Summary

EudraCT number	2014-003193-17
Trial protocol	DE GB DK FR IT
Global end of trial date	31 July 2019

#### Results information

Result version number	v2 (current)
This version publication date	18 September 2020
First version publication date	05 July 2020
Version creation reason	<ul style="list-style-type: none"><li>• Correction of full data set</li></ul> Update of results

#### Trial information

##### Trial identification

Sponsor protocol code	BAY86-5321/17514
-----------------------	------------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02800642
WHO universal trial number (UTN)	-

Notes:

##### Sponsors

Sponsor organisation name	Bayer AG
Sponsor organisation address	Kaiser Wilhelm Allee, Leverkusen, Germany, D-51368
Public contact	Therapeutic Area Head, Bayer AG, clinical-trials-contact@bayer.com
Scientific contact	Therapeutic Area Head, Bayer AG, clinical-trials-contact@bayer.com

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	31 July 2019
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	31 July 2019
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To determine the efficacy and durability (treatment interval) of 2 mg intravitreal (IVT) aflibercept in a Treat and Extend (T&E) regimen over a treatment period of 76 weeks using protocol defined visual and anatomic criteria in subjects with macular edema secondary to CRVO

Protection of trial subjects:

The conduct of this clinical study met all local legal and regulatory requirements. The study was conducted in accordance with ethical principles that have their origin in the Declaration of Helsinki and the International Council for Harmonization guideline E6: Good Clinical Practice. Before entering the study, the informed consent was read by and explained to all the subjects. Participating subjects signed informed consent form and could withdraw from the study at any time without any disadvantage and without having to provide a reason for this decision. Only investigators qualified by training and experience were selected as appropriate experts to investigate the study drug

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	10 June 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Australia: 9
Country: Number of subjects enrolled	Canada: 27
Country: Number of subjects enrolled	Italy: 23
Country: Number of subjects enrolled	Spain: 23
Country: Number of subjects enrolled	United Kingdom: 18
Country: Number of subjects enrolled	Denmark: 8
Country: Number of subjects enrolled	France: 5
Country: Number of subjects enrolled	Germany: 49
Worldwide total number of subjects	162
EEA total number of subjects	126

Notes:

### Subjects enrolled per age group

In utero	0
----------	---

Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	62
From 65 to 84 years	89
85 years and over	11

## Subject disposition

### Recruitment

Recruitment details:

A total of 244 subjects were screened in 42 study centers in 8 countries, the first subject first visit was on 10/Jun/2016 and last subject last visit was on 31/Jun/2019

### Pre-assignment

Screening details:

Of the 244 screened subjects, 162 subjects completed screening and entered the treatment period

### Period 1

Period 1 title	Overall study (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

### Arms

<b>Arm title</b>	IVT aflibercept
------------------	-----------------

Arm description:

Subjects with macular edema secondary to CRVO were treated with 2 mg study drug intravitreal aflibercept over a treatment period of 76 weeks

Arm type	Experimental
Investigational medicinal product name	Aflibercept
Investigational medicinal product code	BAY86-5321
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intravitreal use

Dosage and administration details:

The recommended dose for intravitreal aflibercept is 2 mg equivalent to 50 microliter. Study treatment will be administered at baseline and at monthly intervals until stabilization of disease. When stability is achieved, the treatment interval can be extended based on visual and anatomic outcomes as judged by the treating investigator

<b>Number of subjects in period 1</b>	IVT aflibercept
Started	162
Completed	137
Not completed	25
Consent withdrawn by subject	3
Physician decision	2
Death	3
Other	10
Adverse event	6
Lost to follow-up	1

## Baseline characteristics

### Reporting groups

Reporting group title	IVT aflibercept
-----------------------	-----------------

Reporting group description:

Subjects with macular edema secondary to CRVO were treated with 2 mg study drug intravitreal aflibercept over a treatment period of 76 weeks

Reporting group values	IVT aflibercept	Total	
Number of subjects	162	162	
Age categorical			
Units: Subjects			
18-64 years	62	62	
65-84 years	89	89	
>= 85 years	11	11	
Age continuous			
Units: years

## End points

### End points reporting groups

Reporting group title	IVT aflibercept
-----------------------	-----------------

Reporting group description:

Subjects with macular edema secondary to CRVO were treated with 2 mg study drug intravitreal aflibercept over a treatment period of 76 weeks

Subject analysis set title	Safety analysis set
----------------------------	---------------------

Subject analysis set type	Safety analysis
---------------------------	-----------------

Subject analysis set description:

The SAF included all subjects who received any study drug

Subject analysis set title	Full analysis set
----------------------------	-------------------

Subject analysis set type	Full analysis
---------------------------	---------------

Subject analysis set description:

The FAS included all enrolled subjects who received any study drug, had a baseline BCVA assessment, and had at least one post-baseline BCVA assessment. With regard to the efficacy evaluation of this study, the FAS was considered the primary analysis

### Primary: The percentage of subjects who gain $\geq 15$ letters in best corrected visual acuity (BCVA) on the early treatment diabetic retinopathy score (ETDRS) chart compared to baseline

End point title	The percentage of subjects who gain $\geq 15$ letters in best corrected visual acuity (BCVA) on the early treatment diabetic retinopathy score (ETDRS) chart compared to baseline <sup>[1]</sup>
-----------------	--

End point description:

Subjects who completed the study with a gain of  $\geq 15$  letters or dropped the study after Week 24 and having a permanent resolution of macular edema and a gain of  $\geq 15$  letters from baseline with regard to the latest BCVA assessment. The ETDRS chart includes 70 letters in total, more letters read correctly represents a better visual acuity

End point type	Primary
----------------	---------

End point timeframe:

Baseline and Week 76

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: The statistical analysis was provided in the Attachment

End point values	IVT aflibercept			
Subject group type	Reporting group			
Number of subjects analysed	160			
Units: percent				
number (confidence interval 95%)	65.6 (57.7 to 72.9)			

<b>Attachments (see zip file)</b>	Statistical analysis/17514_Statistical Analysis_Primary_BCVA
-----------------------------------	--

### Statistical analyses

No statistical analyses for this end point

**Primary: The percentage of subjects with a mean treatment interval between injections of  $\geq$  8 weeks**

End point title	The percentage of subjects with a mean treatment interval between injections of $\geq$ 8 weeks <sup>[2]</sup>
-----------------	---

End point description:

Subjects who completed the study with a mean treatment interval between injections of  $\geq$  8 weeks or dropped out of the study after Week 24 and having a permanent resolution of macular edema

End point type	Primary
----------------	---------

End point timeframe:

From the last actual visit of the initiation phase to Week 76

Notes:

[2] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: The statistical analysis was provided in the Attachment

<b>End point values</b>	IVT aflibercept			
Subject group type	Reporting group			
Number of subjects analysed	160			
Units: percent				
number (confidence interval 95%)	45.0 (37.1 to 53.1)			

<b>Attachments (see zip file)</b>	Statistical analysis/17514_Statistical Analysis_Primary_mean
-----------------------------------	--

**Statistical analyses**

No statistical analyses for this end point

**Secondary: The change in best corrected visual acuity (BCVA) as measured by the early treatment diabetic retinopathy (ETDR) letter score from baseline**

End point title	The change in best corrected visual acuity (BCVA) as measured by the early treatment diabetic retinopathy (ETDR) letter score from baseline
-----------------	---

End point description:

The ETDRS chart includes 70 letters in total and the letter score ranges from 0 to 100. More letters read correctly results in a higher letter score, which represents better visual acuity

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline and Week 24, 52, and 76

<b>End point values</b>	IVT aflibercept			
Subject group type	Reporting group			
Number of subjects analysed	160			
Units: scores				
arithmetic mean (standard deviation)				
Absolute BCVA letter score at baseline	51.9 ( $\pm$ 16.8)			
Absolute BCVA letter score at Week 24	72.4 ( $\pm$ 16.6)			
Absolute BCVA letter score at Week 52	71.8 ( $\pm$ 18.1)			

Absolute BCVA letter score at Week 76	72.3 ( $\pm$ 18.5)			
Change from baseline at Week 24	20.4 ( $\pm$ 17.0)			
Change from baseline at Week 52	19.9 ( $\pm$ 19.1)			
Change from baseline at Week 76	20.3 ( $\pm$ 19.5)			

### Statistical analyses

No statistical analyses for this end point

### Secondary: The change in central retinal thickness (CRT) from baseline

End point title	The change in central retinal thickness (CRT) from baseline
-----------------	---

End point description:

CRT was measured in the study eye by spectral domain optical coherence tomography (SD-OCT)

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline and Week 24, 52 and 76

End point values	IVT aflibercept			
Subject group type	Reporting group			
Number of subjects analysed	158			
Units: micrometer				
arithmetic mean (standard deviation)				
Absolute CRT at baseline	759.9 ( $\pm$ 246.0)			
Absolute CRT at Week 24	271.2 ( $\pm$ 53.1)			
Absolute CRT at Week 52	279.8 ( $\pm$ 106.8)			
Absolute CRT at Week 76	265.4 ( $\pm$ 57.9)			
Change from baseline at Week 24	-488.9 ( $\pm$ 254.6)			
Change from baseline at Week 52	-481.3 ( $\pm$ 266.5)			
Change from baseline at Week 76	-496.1 ( $\pm$ 252.4)

Frequency threshold for reporting non-serious adverse events: 5 %

<b>Non-serious adverse events</b>	IVT aflibercept		
Total subjects affected by non-serious adverse events subjects affected / exposed	81 / 162 (50.00%)		
Investigations Intraocular pressure increased subjects affected / exposed occurrences (all)	20 / 162 (12.35%) 40		
Vascular disorders Hypertension subjects affected / exposed occurrences (all)	19 / 162 (11.73%) 25		
Eye disorders Macular oedema subjects affected / exposed occurrences (all)  Conjunctival haemorrhage subjects affected / exposed occurrences (all)  Vitreous detachment subjects affected / exposed occurrences (all)  Retinal haemorrhage subjects affected / exposed occurrences (all)  Retinal ischaemia subjects affected / exposed occurrences (all)  Visual acuity reduced subjects affected / exposed occurrences (all)  Foreign body sensation in eyes subjects affected / exposed occurrences (all)	12 / 162 (7.41%) 13  18 / 162 (11.11%) 23  9 / 162 (5.56%) 11  14 / 162 (8.64%) 14  13 / 162 (8.02%) 16  26 / 162 (16.05%) 37  9 / 162 (5.56%) 13		
Infections and infestations Nasopharyngitis subjects affected / exposed occurrences (all)	26 / 162 (16.05%) 40		

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
20 April 2016	Clarification that the secondary and exploratory variables of retinal perfusion status included data from screening/baseline combined visit; Clarification on time point for follow up and the final study visit; Eligibility criteria did not need to be repeated at the baseline visit; Definition of types of age related macular degeneration (Exclusion criterion 22); Clarification on time period for stability criteria; Clarification that PRP rescue may be used per investigator discretion; Pregnancy testing was mandatory for women of childbearing potential at every treatment visit prior to injection and at end of study visit if required by local regulations.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
