

Clinical trial results:

A Phase III, Open Label, Randomised, Controlled, Multi-centre Study to assess the efficacy and safety of Olaparib Monotherapy versus Physician's Choice Single Agent Chemotherapy in the Treatment of Platinum Sensitive Relapsed Ovarian Cancer in Patients carrying germline BRCA1/2 Mutations

Summary

EudraCT number	2014-003438-20
Trial protocol	HU BE CZ ES IT
Global end of trial date	19 July 2022

Results information

Result version number	v1 (current)
This version publication date	21 September 2022
First version publication date	21 September 2022

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	16 April 2021
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	19 July 2022
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To determine the efficacy of olaparib vs. physician's choice single agent chemotherapy by assessment of Objective Response Rate (ORR) using blinded independent central review (BICR).

Protection of trial subjects:

The study used an external IDMC to perform interim reviews of accumulating study safety data.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	24 February 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Italy: 49
Country: Number of subjects enrolled	United States: 41
Country: Number of subjects enrolled	Korea, Republic of: 33
Country: Number of subjects enrolled	Poland: 32
Country: Number of subjects enrolled	Czechia: 21
Country: Number of subjects enrolled	Mexico: 21
Country: Number of subjects enrolled	Brazil: 19
Country: Number of subjects enrolled	Spain: 14
Country: Number of subjects enrolled	Israel: 13
Country: Number of subjects enrolled	Canada: 8
Country: Number of subjects enrolled	Hungary: 8
Country: Number of subjects enrolled	Belgium: 4
Country: Number of subjects enrolled	Argentina: 3
Worldwide total number of subjects	266
EEA total number of subjects	128

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37	0

wk	
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	186
From 65 to 84 years	79
85 years and over	1

Subject disposition

Recruitment

Recruitment details:

A total of 678 patients were screened (gave informed consent) at 94 centres in 13 countries. Of the 678 patients screened, 266 patients were randomised from 78 sites in 13 countries worldwide.

A wash-out period of up to 5 weeks was required for participants who have previously taken potent inhibitors or CYP3A4/5 inducers.

Pre-assignment

Screening details:

Participants were randomized in a 2:1 ratio between olaparib and single agent chemotherapy. Of the 266 patients randomised, 178 patients were in the olaparib arm and 88 in the chemotherapy arm.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Olaparib 300mg BID

Arm description:

Participants received olaparib twice daily as a 300 mg tablet.

Arm type	Experimental
Investigational medicinal product name	Olaparib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

300 mg tablet taken twice daily.

Arm title	Single Agent Chemotherapy
------------------	---------------------------

Arm description:

Participants received physician's choice of chemotherapy, out of weekly paclitaxel, topotecan, pegylated liposomal doxorubicin, or gemcitabine.

Arm type	Active comparator
Investigational medicinal product name	Physicians choice of paclitaxel, topotecan, pegylated liposomal doxorubicin, or gemcitabine.
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Administered dose and schedule as required for physicians choice of chemotherapy.

Number of subjects in period 1	Olaparib 300mg BID	Single Agent Chemotherapy
Started	178	88
Received Treatment	178	76
Completed	19	0
Not completed	159	88
Severe Non-compliance to Protocol	1	-
Consent withdrawn by subject	7	10
Objective Disease Progression	128	30
Adverse event, non-fatal	18	15
Developed Discontinuation Criteria	-	2
Miscellaneous	5	19
Withdrew Consent Prior to Dosing	-	12

Primary: Objective Response Rate (ORR)

End point title	Objective Response Rate (ORR)
End point description: To determine the efficacy of olaparib vs. physician's choice single agent chemotherapy by assessment of Objective Response Rate (ORR) using blinded independent central review (BICR) Response Evaluation Criteria In Solid Tumors (RECIST) 1.1 criteria was used by a Blinded Independent Central Review (BICR) to assess participant response to treatment ORR is the number of participants with Complete Response (CR) or Partial Response (PR) in the Measurable Disease Analysis Set (MDAS). MDAS includes all participants in the FAS with measurable disease at baseline (as per RECIST 1.1), determined using BICR. Complete response is declared when all lesions have disappeared or all lesions have disappeared and all nodal disease is < 10 mm each. Partial response is declared when there is a decrease in sum of diameters of target lesions \geq 30%.	
End point type	Primary
End point timeframe: RECIST follow-up assessments performed every 8 weeks (\pm 1 week), up to 48 weeks, then every 12 weeks (\pm 1 week) from randomisation, assessed from date of first patient randomised to data cut off: 10Oct2018 (approx. 3 years 8 months)	

End point values	Olaparib 300mg BID	Single Agent Chemotherapy

lower limit	1.4
upper limit	4.58

Secondary: Progression Free Survival (PFS)

End point title	Progression Free Survival (PFS)
End point description:	
To determine the efficacy of single agent olaparib vs. physician's choice single agent chemotherapy by progression free survival (PFS) using BICR assessment according to RECIST 1.1 criteria	
PFS is defined as the time from randomization until the date of objective radiological disease progression according to RECIST 1.1 or death (by any cause in the absence of disease progression) regardless of whether the participant withdrew from randomized therapy or received another anti-cancer therapy prior to disease progression (i.e., date of RECIST progression/death or censoring – date of randomization +1).	
End point type	Secondary
End point timeframe:	
RECIST follow-up assessments performed every 8 weeks (± 1 week), up to 48 weeks, then every 12 weeks (± 1 week) from randomisation, assessed from date of first patient randomised to data cut off: 10Oct2018 (approx. 3 years 8 months)	

End point values	Olaparib 300mg BID	Single Agent Chemotherapy

level	95 %
sides	2-sided
lower limit	0.43
upper limit	0.91

Notes:

[1] - Determined using a log-rank test with a factor for time to disease progression after the end of last platinum based chemotherapy (6-12 months vs > 12 months).

Secondary: Time from Randomisation to Second Progression (PFS2)

End point title	Time from Randomisation to Second Progression (PFS2)
-----------------	--

End point description:

To determine the efficacy of single agent olaparib vs. physician's choice single agent chemotherapy by second progression (PFS2).

Time from randomization to PFS2 is defined as the time from the date of randomization to the earliest of the progression events subsequent to first progression or death. The date of second progression was recorded by the investigator and defined according to local standard clinical practice, and could involve objective radiological, clinical, cancer antigen-125 (CA-125) progression or death. CA-125 progression was assessed per Gynecological Cancer Intergroup (GCIG) criteria.

End point type	Secondary
----------------	-----------

End point timeframe:

Visits to occur every 12 weeks from the date of first progression, assessed from date of first patient randomised to data cut off: 16Apr2021 (approx. 6 years 2 months)

Statistical analysis title	Improvement in TOI, adjusted logistic regression
Comparison groups	Single Agent Chemotherapy v Olaparib 300mg BID
Number of subjects included in analysis	237
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.092 ^[8]
Method	Regression, Logistic
Parameter estimate	Odds ratio (OR)
Point estimate	2.24
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.88
upper limit	6.86

Notes:

[8] - Estimated from an unadjusted logistic regression model

Secondary: Objective Response Rate (ORR) in Breast Cancer Susceptibility (BRCA) Gene Population by Blinded Independent Central Review (BICR)

End point title	Objective Response Rate (ORR) in Breast Cancer Susceptibility (BRCA) Gene Population by Blinded Independent Central Review (BICR)
-----------------	---

End point description:

BRCA gene population includes participants identified as having a deleterious or suspected deleterious variant in either of the BRCA genes using variants identified with current and future BRCA mutation assays (eg, gene sequencing and large rearrangement analysis).

The number of participants with complete or partial response per Response Evaluation Criteria In Solid

Tumors (RECIST) 1.1 criteria. Partial response is declared when there is a decrease in sum of target disease $\geq 30\%$. Complete response is declared when all lesions have disappeared or all lesions have disappeared and all nodal disease is < 10 mm each.

End point type	Secondary
----------------	-----------

End point timeframe:

RECIST follow-up assessments performed every 8 weeks (± 1 week), up to 48 weeks, then every 12 weeks (± 1 week) from randomisation, assessed from date of first patient randomised to data cut off: 10Oct2018 (approx. 3 years 8 months)

End point values	Olaparib 300mg BID	Single Agent Chemotherapy		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	144	70		
Units: Count of Participants	103	36

Point estimate	2.4
Confidence interval	
level	95 %
sides	2-sided
lower limit	1.32
upper limit	4.39

Notes:

[9] - Determined using a log-rank test with a factor for time to disease progression after the end of last platinum based chemotherapy (6-12 months vs > 12 months).

Secondary: Number of Participants who Experienced Disease Progression or Death in BRCA Gene Population by Blinded Independent Central Review (BICR)

End point title	Number of Participants who Experienced Disease Progression or Death in BRCA Gene Population by Blinded Independent Central Review (BICR)
-----------------	--

End point description:

BRCA gene population includes participants identified as having a deleterious or suspected deleterious variant in either of the BRCA genes using variants identified with current and future BRCA mutation assays (eg, gene sequencing and large rearrangement analysis).

Progressive disease was defined as at least 20% increase in the sum of diameters of target lesions, taking as reference the smallest sum of study. In addition to the relative increase of 20%, the sum must also demonstrate an absolute increase of at least 5 mm.

End point type	Secondary
----------------	-----------

End point timeframe:

RECIST follow-up assessments performed every 8 weeks (± 1 week), up to 48 weeks, then every 12

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
29 September 2017	Primary objective and endpoint changed from PFS to ORR and recruitment changed to close once a minimum of 250 patients were randomized instead of 411 as initially planned.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
