

## Clinical trial results:

### A Phase 2 Study to Investigate the Safety, Tolerability and Efficacy of ABT-122 in Subjects with Active Psoriatic Arthritis Who Have an Inadequate Response to Methotrexate

#### Summary

EudraCT number	2014-003558-15
Trial protocol	DE LV HU CZ ES BG
Global end of trial date	04 July 2016

#### Results information

Result version number	v1 (current)
This version publication date	13 July 2017
First version publication date	13 July 2017

#### Trial information

##### Trial identification

Sponsor protocol code	M14-197
-----------------------	---------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02349451
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Abbvie Deutschland GmbH & Co.KG
Sponsor organisation address	AbbVie House, Vanwall Business Park, Vanwall Road, Maidenhead, Berkshire, United Kingdom, SL6-4UB

Scientific contact	Paul Peloso, MD, AbbVie, paul.peloso@abbvie.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

---

**Results analysis stage**

---

Analysis stage	Final
Date of interim/final analysis	04 July 2016
Is this the analysis of the primary completion data?	No

---

Global end of trial reached?	Yes
Global end of trial date	04 July 2016
Was the trial ended prematurely?	No

---

Notes:

---

**General information about the trial**

---

Main objective of the trial:

This study is a Phase 2 randomized, double-blind, double-dummy, active- and placebo-controlled, parallel-group study designed to assess the safety, tolerability, efficacy, pharmacokinetics and immunogenicity of multiple doses of ABT-122 in subjects with active psoriatic arthritis (PsA) who are inadequately responding to methotrexate (MTX) treatment.

Protection of trial subjects:

Participant and/or legal guardian read and understood the information provided about the study and gave written permission.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	28 April 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

---

Notes:

---

**Population of trial subjects**

---

**Subjects enrolled per country**

Country: Number of subjects enrolled	Australia: 2
Country: Number of subjects enrolled	Bulgaria: 38
Country: Number of subjects enrolled	Czech Republic: 6
Country: Number of subjects enrolled	Germany: 2
Country: Number of subjects enrolled	Hungary: 2
Country: Number of subjects enrolled	Latvia: 26
Country: Number of subjects enrolled	New Zealand: 5
Country: Number of subjects enrolled	Poland: 103
Country: Number of subjects enrolled	Romania: 4
Country: Number of subjects enrolled	Spain: 10
Country: Number of subjects enrolled	United States: 42
Worldwide total number of subjects	240
EEA total number of subjects	191

---

Notes:

---

**Subjects enrolled per age group**

---

In utero	0
----------	---

---

Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	207
From 65 to 84 years	33
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

This study included a 30-day screening period conducted within 30 days of the first dose of study drug.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer, Assessor

### Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

<b>Arm title</b>	Placebo EW
------------------	------------

Arm description:

Double-blind placebo administered every week (EW) for 12 weeks

Arm type	Placebo
Investigational medicinal product name	placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Placebo for ABT-122 lyophilized powder for solution for injection administered EW

<b>Arm title</b>	Adalimumab 40 mg EOW
------------------	----------------------

Arm description:

Double-blind adalimumab 40 mg administered every other week (EOW) for 12 weeks

Arm type	Active comparator
Investigational medicinal product name	adalimumab
Investigational medicinal product code	
Other name	Humira
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Adalimumab, solution for injection 50 mg/mL (0.8 mL) pre-filled syringe (PFS) 40 mg administered EOW

Investigational medicinal product name	placebo for adalimumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Placebo for adalimumab solution for injection, 0.8 mL pre-filled syringe EOW

<b>Arm title</b>	ABT-122 120 mg EW
------------------	-------------------

Arm description:

Double-blind ABT-122 120 mg administered EW for 12 weeks

Arm type	Experimental
----------	--------------

Investigational medicinal product name	ABT-122
Investigational medicinal product code	ABT-122
Other name	remtolumab
Pharmaceutical forms	Powder for solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

ABT-122 lyophilized powder for solution for injection, 100 mg, 1.0 mL, vial 120 mg administered EW

<b>Arm title</b>	ABT-122 240 mg EW
------------------	-------------------

Arm description:

Double-blind ABT-122 240 mg administered EW for 12 weeks

Arm type	Experimental
Investigational medicinal product name	ABT-122
Investigational medicinal product code	ABT-122
Other name	remtolumab
Pharmaceutical forms	Powder for solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

ABT-122 lyophilized powder for solution for injection, 100 mg, 1.0 mL, vial 240 mg administered EW

<b>Number of subjects in period 1</b>	Placebo EW	Adalimumab 40 mg EOW	ABT-122 120 mg EW
Started	24	72	71
Completed	24	71	69
Not completed	0	1	2
Consent withdrawn by subject	-	1	2

<b>Number of subjects in period 1</b>	ABT-122 240 mg EW
Started	73
Completed	72
Not completed	1
Consent withdrawn by subject	1

## Baseline characteristics

### Reporting groups

Reporting group title	Placebo EW
Reporting group description:	
Double-blind placebo administered every week (EW) for 12 weeks	
Reporting group title	Adalimumab 40 mg EOW
Reporting group description:	
Double-blind adalimumab 40 mg administered every other week (EOW) for 12 weeks	
Reporting group title	ABT-122 120 mg EW
Reporting group description:	
Double-blind ABT-122 120 mg administered EW for 12 weeks	
Reporting group title	ABT-122 240 mg EW
Reporting group description:	
Double-blind ABT-122 240 mg administered EW for 12 weeks	

Reporting group values	Placebo EW	Adalimumab 40 mg EOW	ABT-122 120 mg EW
Number of subjects	24	72	71
Age categorical Units: Subjects			

Age Continuous Units: years			
arithmetic mean	47.7	50.5	51
standard deviation	± 13.67	± 12.03	± 12.39
Gender categorical Units: Subjects			
Female	12	33	37
Male	12	39	34
Sex: Female, Male Units: Subjects			
Female	12	33	37
Male	12	39	34

Reporting group values	ABT-122 240 mg EW	Total	
Number of subjects	73	240	
Age categorical Units: Subjects			

Age Continuous Units: years			
arithmetic mean	47.4		
standard deviation	± 13.77	-	
Gender categorical Units: Subjects			
Female	37	119	
Male	36	121	

Sex: Female, Male			
Units: Subjects			
Female	37	119	
Male	36	121	

## End points

### End points reporting groups

Reporting group title	Placebo EW
Reporting group description:	
Double-blind placebo administered every week (EW) for 12 weeks	
Reporting group title	Adalimumab 40 mg EOW
Reporting group description:	
Double-blind adalimumab 40 mg administered every other week (EOW) for 12 weeks	
Reporting group title	ABT-122 120 mg EW
Reporting group description:	
Double-blind ABT-122 120 mg administered EW for 12 weeks	
Reporting group title	ABT-122 240 mg EW
Reporting group description:	
Double-blind ABT-122 240 mg administered EW for 12 weeks	

### Primary: American College of Rheumatology (ACR) 20 Response Rate at Week 12: ABT-122 Versus Placebo

End point title	American College of Rheumatology (ACR) 20 Response Rate at Week 12: ABT-122 Versus Placebo <sup>[1]</sup>
End point description:	
Percentage of participants with an ACR20 response, defined as at least 20% improvement (compared to baseline values) in tender and swollen joint counts and at least 20% improvement in 3 of the remaining 5 core set measures (subject global assessment of pain, subject global assessment of disease activity, physician global assessment of disease activity, subject assessment of physical function and acute phase reactant high sensitivity C-reactive protein [hsCRP]). Estimates of the 95% confidence interval of the response rates for each treatment group were calculated using the Agresti-Coull method.	
End point type	Primary
End point timeframe:	
Week 12	

#### Notes:

[1] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.  
Justification: The primary endpoint was a comparison between ABT-122 and placebo only.

End point values	Placebo EW	ABT-122 120 mg EW	ABT-122 240 mg EW	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	24	71	73	
Units: percentage of participants				
number (confidence interval 95%)	25 (11.7 to 45.2)	64.8 (53.2 to 74.9)	75.3 (64.3 to 83.9)	

### Statistical analyses

Statistical analysis title	Statistical Analysis 1
Comparison groups	Placebo EW v ABT-122 120 mg EW

Number of subjects included in analysis	95
Analysis specification	Pre-specified
Analysis type	superiority
P-value	< 0.001 <sup>[2]</sup>
Method	Fisher exact
Parameter estimate	response rate difference
Point estimate	39.8
Confidence interval	
level	95 %
sides	2-sided
lower limit	17.2
upper limit	57.7

Notes:

[2] - P-value is calculated by one-sided Fisher's exact test to test whether ABT-122 treatment group is superior to placebo group. The a priori statistical significance threshold is P = 0.025.

<b>Statistical analysis title</b>	Statistical Analysis 2
Comparison groups	Placebo EW v ABT-122 240 mg EW
Number of subjects included in analysis	97
Analysis specification	Pre-specified
Analysis type	superiority
P-value	< 0.001 <sup>[3]</sup>
Method	Fisher exact
Parameter estimate	response rate difference
Point estimate	50.3
Confidence interval	
level	95 %
sides	2-sided
lower limit	28.1
upper limit	67.4

Notes:

[3] - P-value is calculated by one-sided Fisher's exact test to test whether ABT-122 treatment group is superior to placebo group. The a priori statistical significance threshold is P = 0.025.

## Secondary: ACR20 Response Rate at Week 12: ABT-122 Versus Adalimumab

End point title	ACR20 Response Rate at Week 12: ABT-122 Versus Adalimumab <sup>[4]</sup>
-----------------	--

End point description:

Percentage of participants with an ACR20 response, defined as at least 20% improvement (compared to baseline values) in tender and swollen joint counts and at least 20% improvement in 3 of the remaining 5 core set measures (subject global assessment of pain, subject global assessment of disease activity, physician global assessment of disease activity, subject assessment of physical function and acute phase reactant hsCRP). Estimates of the 95% confidence interval of the response rates for each treatment group were calculated using the Agresti-Coull method.

End point type	Secondary
----------------	-----------

End point timeframe:

Week 12

Notes:

[4] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: This secondary endpoint was a comparison between ABT-122 and adalimumab only.

End point values	Adalimumab 40 mg EOW	ABT-122 120 mg EW	ABT-122 240 mg EW	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	72	71	73	
Units: percentage of participants				
number (confidence interval 95%)	68.1 (56.6 to 77.7)	64.8 (53.2 to 74.9)	75.3 (64.3 to 83.9)	

## Statistical analyses

Statistical analysis title	Statistical Analysis 1
Comparison groups	Adalimumab 40 mg EOW v ABT-122 120 mg EW
Number of subjects included in analysis	143
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.723 <sup>[5]</sup>

lower limit	2.3
upper limit	29.3

Notes:

[14] - P-value is calculated by one-sided Fisher's exact test to test whether ABT-122 treatment group is superior to adalimumab group.

## Secondary: ACRn at Week 12

End point title	ACRn at Week 12
End point description:	
ACR measures percentage improvements in tender and swollen joint counts, patient assessments of pain, global disease activity and physical function, physician global assessment of disease activity and acute phase reactant. ACRn is a continuous variable based on the ACR criteria. Improvement from baseline in a component of the ACR composite variable was computed as the difference between the baseline value and the value at a given post-baseline visit. A positive value for improvement from baseline for an individual component indicates lesser severity of disease. The 95% confidence interval for mean is constructed using T-statistic with significance level alpha=5%.	
End point type	Secondary
End point timeframe:	
At Week 12	

<b>End point values</b>	Placebo EW	Adalimumab 40 mg EOW	ABT-122 120 mg EW	ABT-122 240 mg EW

[22] - Two-sided p-value is calculated from ANCOVA model with treatment group as the fixed factor and baseline value as the covariate.

## Secondary: Change From Baseline in Psoriatic Arthritis Disease Activity Score (PASDAS) at Week 12

End point title	Change From Baseline in Psoriatic Arthritis Disease Activity Score (PASDAS) at Week 12
-----------------	--

End point description:

PASDAS is a continuous compound disease activity state score determined by the combined values of tender or swollen joint counts, subject-reported outcome and hsCRP lab test. Smaller values on PASDAS indicate a better condition; a negative change from baseline indicates improvement.

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline, Week 12

## Secondary: Change From Baseline in Psoriasis Target Lesion Score at Week 12

End point title	Change From Baseline in Psoriasis Target Lesion Score at Week 12
End point description:	
Target lesion score for psoriasis in participants with psoriatic arthritis is calculated by adding the scores of plaque erythema, scaling and thickness. Scores range from 0 (no erythema or evidence of plaque thickness) to 10 (severe erythema and evidence of plaque thickness).	
End point type	Secondary

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Treatment-emergent adverse events (TEAEs) were collected from first dose of study drug until 70 days after the last dose of study drug (up to 21 weeks); serious adverse events (AEs) were collected from the time informed consent was obtained (25.5 weeks).

Adverse event reporting additional description:

A TEAE is defined as any AE with onset or worsening reported by a participant from the time that the first dose of adalimumab or ABT-122 is administered until 5 half-lives (70 days) have elapsed following discontinuation of adalimumab or ABT-122 administration. TEAEs were collected whether elicited or spontaneously reported by the participant.

Assessment type	Systematic

occurrences (all)	0		

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
16 February 2015	The substantive change in this amendment was updating Exclusion Criterion 8 and 23 and adding Exclusion Criterion 17 and 22 to ensure the appropriate subject population was enrolled.
23 July 2015	<p>Substantive changes in this amendment were as follows:</p> <ul style="list-style-type: none"><li>• Revising total number of sites to approximately 110 globally.</li><li>• Clarifying rescreening and laboratory retesting requirements to make clear timing of rescreening and the requirements for retesting.</li><li>• Adding interim analysis to review the cumulative safety and dose response relationship during the trial.</li><li>• Identifying additional personnel who can be unblinded for analysis purposes during the trial.</li><li>• Updating female and male reproductive language in Inclusion Criterion 8 and 9 to ensure that only highly effective contraceptive measures were allowed, consistent with the recommendations related to contraception and pregnancy testing in clinical trials by the Clinical Trial Facilitation Group (CTFG) of the Heads of Medicinal Agencies (HMA).</li><li>• Updating Exclusion Criterion 1 to facilitate enrollment such that patients exposed to prior TNF inhibitors were allowed to enroll so long as the prior TNF inhibitor excludes prior adalimumab and also if the reason for discontinuation of the prior TNF inhibitor was not related to a lack of efficacy or safety.</li><li>• Clarifying chest x-ray (CXR) language to allow the Principal Investigator (PI) or physician delegate to complete the assessment of CXR.</li><li>• Removing 24-hour methylhistamine laboratory test and urine drug screen as they were no longer required.</li><li>• Updating injection site reaction language to allow sites to further assess and investigate injection site reactions as deemed by the PI.</li><li>• Adding Complaint and Product Complaint definition as well as the reporting requirements for Product Complaints to implement a standard process for the collection of Product Quality Complaints in clinical trials.</li><li>• Adding Electronic Patient Reported Outcomes (ePRO) language to include information on the use of the ePRO device as a source for collecting data.</li></ul>

Notes:

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
