

Clinical trial results:

Randomised Phase II Study comparing, as first-line chemotherapy, single-agent Oral Vinorelbine administered with two different schedules (metronomic and weekly schedules) in patients with Advanced Breast Cancer.

Summary

EudraCT number	2014-003860-19
Trial protocol	PT ES AT HU RO CZ DE

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	07 November 2019
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	28 September 2020
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate the Disease Control Rate (CR + PR + SD) in both arms (metronomic and weekly schedules) assessed during study treatments.

Protection of trial subjects:

This study was conducted in accordance with the ethical principles that have their origin in the current Declaration of Helsinki and was consistent with International Conference on Harmonisation Good Clinical practice (ICH GCP) and applicable regulatory requirements. The study was conducted in compliance with the protocol. The protocol, amendments, the subject information leaflet and the subject informed consent were approved by the appropriate independent Ethics Committee(s) in the involved countries prior to implementation.

Background therapy:

Preventive medication with an oral 5-HT3 antagonist was recommended before each oral vinorelbine administration. The primary prophylactic use of Colony Stimulating Factor (CSF) was allowed during the treatment period. Granulocyte stimulating growth factors were permitted for patients experiencing febrile neutropenia, Grade 4 asymptomatic neutropenia or neutropenic infection, according to institutional rules. Pre-menopausal patients were allowed to receive LHRH analogues in order to block ovarian functions. Patients received full supportive care throughout the study, including treatment when required with antibiotics, anti-diarrhoeals, analgesics, antiemetics, and transfusion of blood products, according to local guidelines and the investigator's opinion. Treatment with a bisphosphonate was allowed during the study period.

Evidence for comparator:

This study evaluated two schedules of administration of oral vinorelbine: the metronomic and the weekly schedules. The currently registered and approved regimen of Oral Vinorelbine delivered in a weekly schedule was used as reference arm.

Actual start date of recruitment	03 August 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Italy: 21
Country: Number of subjects enrolled	Poland: 29
Country: Number of subjects enrolled	Portugal: 16
Country: Number of subjects enrolled	Romania: 4
Country: Number of subjects enrolled	Spain: 49
Country: Number of subjects enrolled	Austria: 5
Country: Number of subjects enrolled	Czechia: 5
Country: Number of subjects enrolled	France: 22
Country: Number of subjects enrolled	Germany: 3

Country: Number of subjects enrolled	Hungary: 9
Worldwide total number of subjects	163
EEA total number of subjects	163

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	76
From 65 to 84 years	83
85 years and over	4

Subject disposition

Recruitment

Recruitment details:

A total of 43 centres in 10 countries screened 218 hormone-receptor-positive (HRc) and HER2 negative patients with advanced breast cancer between the 22 of December 2015 and the 13 of December 2017. Of these 218 patients, 164 patients were randomised and 163 patients received at least one dose of study drug.

Pre-assignment

Screening details:

A 28-day screening period was planned before randomisation and screened HRc-positive and HER2 negative patients with advanced breast cancer. Once the screening period was successfully completed, patients who fulfilled the eligibility criteria were randomised in a 1:1 ratio in the 2 arms.

Period 1

Period 1 title	Treatment period (overall trial) (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Arm A: metronomic schedule

Arm description:

Patients received Oral Vinorelbine at metronomic schedules, i.e. three times weekly.

Arm type	Experimental
Investigational medicinal product name	Oral vinorelbine
Investigational medicinal product code	
Other name	Navelbine
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Patients received a fixed dose of 50 mg of Oral Vinorelbine (one capsule of 20mg plus one of 30mg) three times weekly (on Mondays, Wednesdays and Fridays or Tuesdays, Thursdays and Saturdays) continuously until disease progression, unacceptable toxicity, patient's refusal or investigator's decision. Each 3 weeks of treatment was considered as a separate cycle, therefore in Treatment Arm A, a cycle consisted of 9 fixed doses of 50 mg at days 1, 3, 5, 8, 10, 12, 15, 17 and 19.

Arm title	Arm B: weekly schedule
------------------	------------------------

Arm description:

Patients received Oral Vinorelbine at weekly schedules, i.e. once a week.

Arm type	Active comparator
Investigational medicinal product name	Oral vinorelbine
Investigational medicinal product code	
Other name	Navelbine
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Patients received Oral Vinorelbine at the dose of 60 mg/m² on day 1, day 8 and day 15 of the first cycle. At the second and following cycles, the day 1, day 8 and day 15 were increased to 80 mg/m², according to haematological tolerance. The dosage was calculated according to BSA, using the Dubois and Dubois formula. Treatment was administered until disease progression, unacceptable toxicity, patient's refusal or investigator's decision. Each 3 weeks of treatment was considered a cycle, therefore in Treatment Arm B a cycle consisted of 3 doses at days 1, 8 and 15.

End points

End points reporting groups

Reporting group title	Arm A: metronomic schedule
Reporting group description:	
Patients received Oral Vinorelbine at metronomic schedules, i.e. three times weekly.	
Reporting group title	Arm B: weekly schedule
Reporting group description:	
Patients received Oral Vinorelbine at weekly schedules, i.e. once a week.	

Primary: Disease control rate (DCR)

End point title	Disease control rate (DCR) ^[1]
End point description:	
DCR, defined as the sum of CR, PR and SD rates was observed in 52/82 patients (63.4% [95% CI: 52.0, 73.8]) in Arm A and 59/81 patients (72.8% [95% CI: 61.8, 82.1]) in Arm B.	
End point type	Primary
End point timeframe:	
DCR according to investigator was calculated among the BOCR responders in the ITT analysis set on the treatment period (from the date of randomisation until the documentation of progression or death due to any cause.	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: The study was designed to evaluate the disease control rate in each arm of oral vinorelbine but not to compare the two schedules (metronomic / weekly). No statistical analysis was performed on the primary efficacy endpoint

End point values	Arm A: metronomic schedule	Arm B: weekly schedule		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	82	81		
Units: percentage				
number (confidence interval 95%)	63.4 (52.0 to 73.8)	72.8 (61.8 to 82.1)		

Statistical analyses

No statistical analyses for this end point

Secondary: Duration of disease control

End point title	Duration of disease control
End point description:	
Overall, for patients who achieved PR or SD (no CR was observed in any arm), 43 (82.7%) patients in Arm A and 44 (74.6%) patients in Arm B experienced disease progression or death. The median time to disease progression or death was 6.9 months (95% CI: 4.2, 8.6) in Arm A and 7.9 months (95% CI: 5.7, 10.0) in Arm B. The distribution of DCR was described by treatment arm using Kaplan-Meier methods, reporting estimated median (in months) with 95% CI, 25th and 75th percentiles and Kaplan-Meier estimated probabilities with corresponding 95% CIs at several time points.	
End point type	Secondary

End point timeframe:

Duration of disease control was defined as the period from the date of randomisation until date of PD or death from any cause, whichever occurred first. Only responders (patients with BOCR of CR or PR) and stable patients were included in the analysis.

End point values	Arm A: metronomic schedule	Arm B: weekly schedule		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	52	59		
Units: months				
median (confidence interval 95%)	6.9 (4.2 to 8.6)	7.9 (5.7 to 10.0)

Adverse events information

Timeframe for reporting adverse events:

Any AE that first occurred during the treatment period (i.e. from first study treatment administration date up to last administration date + 30 days) was recorded in the CRF and included in the analysis of AEs (on-study AE).

Adverse event reporting additional description:

At the cut-off date (07-NOV-2019), 2 patients were still on treatment. Death was reported for 88 patients, while 60 patients were still being followed for survival. Four patients were lost to follow-up. All patients in the safety analysis set received at least one cycle with a median number of cycle of 4.0 (1-41) in Arm A and 7.0 (1-45) in Arm B.

Assessment type	Systematic
-----------------	------------

Dictionary used

Dictionary name	MedDRA
Dictionary version	22.0

Reporting groups

Reporting group title	Arm A: metronomic schedule (Safety analysis set)
-----------------------	--

Reporting group description:

All patients who received at least one dose of study drug and with at least one post-baseline safety data were included in the safety analysis set. A total of 82 patients were included in the safety analysis set.

Reporting group title	Arm B: weekly schedule (Safety analysis set)
-----------------------	--

Reporting group description:

All patients who received at least one dose of study drug and with at least one post-baseline safety data were included in the safety analysis set. A total of 80 patients were included in the safety analysis set.

Serious adverse events	Arm A: metronomic schedule (Safety analysis set)	Arm B: weekly schedule (Safety analysis set)	
Total subjects affected by serious adverse events			
subjects affected / exposed	22 / 82 (26.83%)	13 / 80 (16.25%)	
number of deaths (all causes)	50	42	
number of deaths resulting from adverse events	2	4	
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
Malignant neoplasm progression			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 1	0 / 0	
Vascular disorders			
Jugular vein thrombosis			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Subclavian vein thrombosis			

subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
General disorders and administration site conditions			
Asthenia			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Fatigue			
subjects affected / exposed	1 / 82 (1.22%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 1	1 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
General physical health deterioration			
subjects affected / exposed	0 / 82 (0.00%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 0	1 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Sudden death			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 1	0 / 0	
Respiratory, thoracic and mediastinal disorders			
Asthmatic crisis			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Dyspnoea			
subjects affected / exposed	2 / 82 (2.44%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 2	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Hydrothorax			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	

Pleural effusion			
subjects affected / exposed	1 / 82 (1.22%)	2 / 80 (2.50%)	
occurrences causally related to treatment / all	0 / 2	0 / 2	
deaths causally related to treatment / all	0 / 0	0 / 1	
Pulmonary embolism			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Pulmonary oedema			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Psychiatric disorders			
Anxiety			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Injury, poisoning and procedural complications			
Femur fracture			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Hip fracture			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Spinal compression fracture			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Cardiac disorders			
Atrioventricular block complete			

subjects affected / exposed	0 / 82 (0.00%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 0	1 / 1	
deaths causally related to treatment / all	0 / 0	1 / 1	
Nervous system disorders			
Neuroglycopenia			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Somnolence			
subjects affected / exposed	0 / 82 (0.00%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Blood and lymphatic system disorders			
Anaemia			
subjects affected / exposed	0 / 82 (0.00%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 0	1 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Febrile neutropenia			
subjects affected / exposed	0 / 82 (0.00%)	2 / 80 (2.50%)	
occurrences causally related to treatment / all	0 / 0	2 / 2	
deaths causally related to treatment / all	0 / 0	0 / 0	
Neutropenia			
subjects affected / exposed	2 / 82 (2.44%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	2 / 2	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Gastrointestinal disorders			
Ascites			
subjects affected / exposed	2 / 82 (2.44%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 2	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Enterocolitis			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	1 / 1	0 / 0	
deaths causally related to treatment / all	1 / 1	0 / 0	

Intestinal obstruction			
subjects affected / exposed	2 / 82 (2.44%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 2	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Nausea			
subjects affected / exposed	0 / 82 (0.00%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 0	1 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Neutropenic colitis			
subjects affected / exposed	0 / 82 (0.00%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 0	1 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Vomiting			
subjects affected / exposed	0 / 82 (0.00%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 0	1 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Hepatobiliary disorders			
Cholangitis acute			
subjects affected / exposed	0 / 82 (0.00%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Hepatic failure			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 1	0 / 0	
Hyperbilirubinaemia			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 1	0 / 0	
Skin and subcutaneous tissue disorders			
Decubitus ulcer			
subjects affected / exposed	0 / 82 (0.00%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	

Musculoskeletal and connective tissue disorders			
Bone pain			
subjects affected / exposed	0 / 82 (0.00%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Infections and infestations			
Mastitis			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Neutropenic sepsis			
subjects affected / exposed	0 / 82 (0.00%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 0	1 / 1	
deaths causally related to treatment / all	0 / 0	1 / 1	
Pneumonia			
subjects affected / exposed	0 / 82 (0.00%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Respiratory tract infection			
subjects affected / exposed	3 / 82 (3.66%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 3	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Sepsis			
subjects affected / exposed	1 / 82 (1.22%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	1 / 1	0 / 1	
deaths causally related to treatment / all	1 / 1	0 / 1	
Urinary tract infection			
subjects affected / exposed	1 / 82 (1.22%)	0 / 80 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Urosepsis			
subjects affected / exposed	0 / 82 (0.00%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	

Metabolism and nutrition disorders			
Hypokalaemia			
subjects affected / exposed	0 / 82 (0.00%)	1 / 80 (1.25%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	

Frequency threshold for reporting non-serious adverse events: 5 %

Non-serious adverse events	Arm A: metronomic schedule (Safety analysis set)	Arm B: weekly schedule (Safety analysis set)	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	79 / 82 (96.34%)	78 / 80 (97.50%)	
Investigations			
Alanine aminotransferase increased			
subjects affected / exposed	1 / 82 (1.22%)	4 / 80 (5.00%)	
occurrences (all)	1	5	
Weight decreased			
subjects affected / exposed	28 / 82 (34.15%)	35 / 80 (43.75%)	
occurrences (all)	37	57	
Weight increased			
subjects affected / exposed	3 / 82 (3.66%)	5 / 80 (6.25%)	
occurrences (all)	3	5	
Vascular disorders			
Hypertension			
subjects affected / exposed	5 / 82 (6.10%)	4 / 80 (5.00%)	
occurrences (all)	6	4	
Nervous system disorders			
Dysgeusia			
subjects affected / exposed	1 / 82 (1.22%)	5 / 80 (6.25%)	
occurrences (all)	1	6	
Headache			
subjects affected / exposed	3 / 82 (3.66%)	9 / 80 (11.25%)	
occurrences (all)	3	9	
Blood and lymphatic system disorders			
Anaemia			
subjects affected / exposed	5 / 82 (6.10%)	4 / 80 (5.00%)	
occurrences (all)	5	14	

Neutropenia subjects affected / exposed occurrences (all)	28 / 82 (34.15%) 64	57 / 80 (71.25%) 175	
Thrombocytopenia subjects affected / exposed occurrences (all)	1 / 82 (1.22%) 2	4 / 80 (5.00%) 7	
General disorders and administration site conditions			
Asthenia subjects affected / exposed occurrences (all)	16 / 82 (19.51%) 38	26 / 80 (32.50%) 57	
Fatigue subjects affected / exposed occurrences (all)	13 / 82 (15.85%) 17	11 / 80 (13.75%) 15	
Mucosal inflammation subjects affected / exposed occurrences (all)	2 / 82 (2.44%) 2	6 / 80 (7.50%) 8	
Pyrexia subjects affected / exposed occurrences (all)	6 / 82 (7.32%) 7	9 / 80 (11.25%) 11	
Gastrointestinal disorders			
Abdominal pain subjects affected / exposed occurrences (all)	8 / 82 (9.76%) 10	8 / 80 (10.00%) 14	
Abdominal pain upper subjects affected / exposed occurrences (all)	7 / 82 (8.54%) 9	9 / 80 (11.25%) 11	
Constipation subjects affected / exposed occurrences (all)	14 / 82 (17.07%) 16	14 / 80 (17.50%) 17	
Diarrhoea subjects affected / exposed occurrences (all)	23 / 82 (28.05%) 30	30 / 80 (37.50%) 91	
Dyspepsia subjects affected / exposed occurrences (all)	5 / 82 (6.10%) 7	3 / 80 (3.75%) 3

Upper respiratory tract infection subjects affected / exposed occurrences (all)	1 / 82 (1.22%) 1	6 / 80 (7.50%) 7	
Metabolism and nutrition disorders Decreased appetite subjects affected / exposed occurrences (all)	9 / 82 (10.98%) 12	16 / 80 (20.00%) 19	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
05 November 2019	<p>Considering all data collected during the time period of the study, the sponsor decided to anticipate the end of study and to proceed with the final statistical analysis earlier.</p> <p>This decision was based on the following considerations observed on September 10th, 2019:</p> <ul style="list-style-type: none">• After 45 months of study duration, among the 165 randomised patients (164 treated), 152 events (progression or death) were observed. For 12 randomised patients, neither disease progression nor death were recorded (1 patient never received the study drug, 3 patients did not yet progress, 4 drop out patients and 4 patients with only non-radiological progression), and 1 patient was removed from clinical database (no local data privacy form available).• The maturity of PFS data could thus be considered as being reached.• 85 deaths were observed, and it was estimated that maturity of OS data (i.e. at least 80% of events) would not be reached by the end-of-study (with the current definition in the protocol). The study was not designed to get mature OS data, however the median OS was reached.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
