

## Clinical trial results:

### **A Multicenter, Open, Long-term Follow-up Study to Evaluate the Safety and Efficacy of L059 (Levetiracetam) at Individual Optimal Dose Ranging From 500 to 3000 mg/Day in Twice Daily Administration in Subjects From 16 to 65 Years With Epilepsy Suffering From Partial Onset Seizures Whether or Not Secondarily Generalized Who Completed in a Previous Study**

#### **Summary**

EudraCT number	2014-004334-26
Trial protocol	Outside EU/EEA
Global end of trial date	28 December 2010

#### **Results information**

Result version number	v1 (current)
This version publication date	30 June 2016
First version publication date	17 April 2015

#### **Trial information**

##### **Trial identification**

Sponsor protocol code	N01222
-----------------------	--------

##### **Additional study identifiers**

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT00367432
WHO universal trial number (UTN)	-

Notes:

Notes:

##### **Paediatric regulatory details**

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	03 June 2011
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	28 December 2010
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objective was to continuously evaluate the safety of long-term administration at the dose range from LEV 500 mg/day to LEV 3000 mg/day in subjects who completed N01221 or N01020.

Protection of trial subjects:

Not applicable

Background therapy:

Not applicable

Evidence for comparator:

Not applicable

Actual start date of recruitment	12 July 2006
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Japan: 398
Worldwide total number of subjects	398
EEA total number of subjects	0

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	19
Adults (18-64 years)	379
From 65 to 84 years	0

85 years and over	0
-------------------	---

## Subject disposition

### Recruitment

Recruitment details:

The Full Analysis Set (FAS) includes all subjects to whom the investigational products are assigned after registration, excluding those with serious Good Clinical Practice violations , subjects not administered the investigational products and subjects for whom no data is available after assignment of the investigational products.

### Pre-assignment

Screening details:

Eligible subjects from preceding study N01221 [NCT00280696] entered the First Period of this study and those subjects from N01221 [NCT00280696] who completed the First Period and subjects from the study N01020 [NCT00160615] entered the Second Period.  
Participant Flow refers to the FAS.

### Period 1

Period 1 title	Overall study (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

### Arms

Arm title	Levetiracetam
-----------	---------------

Arm description:

Levetiracetam 500 mg/day to 3000 mg/day , tablets twice daily (morning and evening orally) during the study period (until the time of approval granted).

Arm type	Experimental
Investigational medicinal product name	Levetiracetam
Investigational medicinal product code	ucb L059
Other name	Keppra
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Levetiracetam 500 mg/day to 3000 mg/day , tablets twice daily (morning and evening orally) during the study period (until the time of approval granted).

Number of subjects in period 1	Levetiracetam
Started	398
Completed	257
Not completed	141
AE, serious fatal	3
Consent withdrawn by subject	19
Other Reason	10
AE, non-serious non-fatal	14
Lost to follow-up	1
SAE, non-fatal	6
Lack of efficacy	88

## Baseline characteristics

### Reporting groups

Reporting group title	Levetiracetam
-----------------------	---------------

Reporting group description:

Levetiracetam 500 mg/day to 3000 mg/day , tablets twice daily (morning and evening orally) during the study period (until the time of approval granted).

Reporting group values	Levetiracetam	Total	
Number of subjects	398	398	
Age Categorical			
Units: Subjects			
In utero	0	0	
Preterm newborn infants (gestational age < 37 wks)	0	0	
Newborns (0-27 days)	0	0	
Infants and toddlers (28 days-23 months)	0	0	
Children (2-11 years)	0	0	
Adolescents (12-17 years)	19	19	
Adults (18-64 years)	379	379	
From 65-84 years	0	0	
85 years and over	0	0	
Age Continuous			
Units: years			
arithmetic mean	33.68		
standard deviation	± 11.18	-	
Gender Categorical

Female	196	196	
Male	202	202	
Race/Ethnicity, Customized			
Units: Subjects			
Japanese	396	396	
Asian (other than Japanese)	2	2	
Region of Enrollment			
Units: Subjects			
Japan	398	398	
Weight			
Units: Kilogram (kg)			
arithmetic mean	60.39		
standard deviation	± 13.64	-	

## End points

### End points reporting groups

Reporting group title	Levetiracetam
Reporting group description: Levetiracetam 500 mg/day to 3000 mg/day , tablets twice daily (morning and evening orally) during the study period (until the time of approval granted).	

### Primary: Occurrence of treatment-emergent adverse events during the study period (until the time of approval granted)

End point title	Occurrence of treatment-emergent adverse events during the study period (until the time of approval granted) <sup>[1]</sup>
-----------------	---

End point description:

An Adverse Event (AE) is any untoward medical occurrence in a clinical investigation subject administered a pharmaceutical product which does not necessarily have a causal relationship with the pharmaceutical product.

Occurrence of treatment-emergent AEs is reported by the number of subjects with at least one treatment-emergent AE.

End point type	Primary
----------------	---------

End point timeframe:

During the study period from Visit 1 (Week 0) to the Follow-up Visit (up to Month 60) until the time of approval granted

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: There was no statistical analysis for this endpoint in this open-label study.

<b>End point values</b>	Levetiracetam			
Subject group type	Reporting group			
Number of subjects analysed	398			
Units: participants				
number	381			

### Statistical analyses

No statistical analyses for this end point

### Secondary: Change from Baseline in N01221 [NCT00280696] in partial (type 1) seizure frequency per week during the first 16-week period in this study

End point title	Change from Baseline in N01221 [NCT00280696] in partial (type 1) seizure frequency per week during the first 16-week period in this study
-----------------	---

End point description:

The change in partial (type 1) seizure frequency from Baseline is given as a percent reduction computed as:

$$\frac{[\text{Weekly partial seizure frequency (Baseline)} - \text{Weekly partial seizure frequency (Evaluation Period)}]}{[\text{Weekly partial seizure frequency (Baseline)}]} \times 100.$$

Positive values in percent reduction means that the value has decreased from Baseline during the first 16-week Period.

Partial (Type I) seizures can be classified into one of the following three groups: Simple partial seizures, Complex partial seizures, Partial seizures evolving to secondarily generalized seizures.

End point type	Secondary
End point timeframe:	
Baseline in N01221 [NCT00280696], the First 16-week Evaluation Period from Visit 1 (Week 0) to Visit 5 (Week 16) in this study	

<b>End point values</b>	Levetiracetam			
Subject group type	Reporting group			
Number of subjects analysed	313			
Units: Percent Reduction				
median (inter-quartile range (Q1-Q3))				
median (inter-quartile-range)	22 (-11 to 46.71)			

### Statistical analyses

No statistical analyses for this end point

### Secondary: Seizure frequency per week in partial seizures during the first 16-week period in this study

End point title	Seizure frequency per week in partial seizures during the first 16-week period in this study
End point description:	
Partial (Type I) seizures can be classified into one of the following three groups: Simple partial seizures, Complex partial seizures, Partial seizures evolving to secondarily generalized seizures.	
End point type	Secondary
End point timeframe:	
First 16-week Evaluation Period from Visit 1 (Week 0) to Visit 5 ( Week 16)	

<b>End point values</b>	Levetiracetam			
Subject group type	Reporting group			
Number of subjects analysed	313			
Units: Seizures Per Week				
median (inter-quartile range (Q1-Q3))				
median (inter-quartile-range)	2.13 (1.06 to 5.23)			

### Statistical analyses

No statistical analyses for this end point

### Secondary: Response status (patients with a percent reduction in partial seizure frequency of at least 50% During the First 16-week Period in This Study From

## Baseline in N01221)

End point title	Response status (patients with a percent reduction in partial seizure frequency of at least 50% During the First 16-week Period in This Study From Baseline in N01221)
-----------------	--

### End point description:

The percent reduction from Baseline was computed as:

$$[ \text{Weekly seizure frequency (Baseline)} - \text{Weekly seizure frequency (Evaluation Period)} ] / [ \text{Weekly seizure frequency (Baseline)} ] \times 100.$$

Responders are those patients with a percent reduction in partial seizure frequency of at least 50% from Baseline to first Evaluation Period in partial seizure frequency per week.

Partial (Type I) seizures can be classified into one of the following three groups: Simple partial seizures, Complex partial seizures, Partial seizures evolving to secondarily generalized seizures.

End point type	Secondary
----------------	-----------

### End point timeframe:

Baseline in N01221 [NCT00280696], the First 16-week Evaluation Period from Visit 1 (Week 0) to Visit 5 (Week 16) in this study

<b>End point values</b>	Levetiracetam			
Subject group type	Reporting group			
Number of subjects analysed	313			
Units: Participants				
Responders	74			
Non-responders	239			

## Statistical analyses

No statistical analyses for this end point

## Secondary: Change from Baseline in N01221 [NCT00280696] in simple partial seizure frequency per week during the first 16-week period in this study

End point title	Change from Baseline in N01221 [NCT00280696] in simple partial seizure frequency per week during the first 16-week period in this study
-----------------	---

### End point description:

Change in simple partial seizure frequency is given as a percent reduction computed as:

$$[ \text{Weekly simple partial seizure frequency (Baseline)} - \text{Weekly simple partial seizure frequency (Evaluation Period)} ] / [ \text{Weekly simple partial seizure frequency (Baseline)} ] \times 100.$$

Positive values in percent reduction means that the value has decreased from Baseline during the first 16-week Period.

Partial (Type I) seizures can be classified into one of the following three groups: Simple partial seizures, Complex partial seizures, Partial seizures evolving to secondarily generalized seizures.

End point type	Secondary
----------------	-----------

### End point timeframe:

Baseline in N01221 [NCT00280696], the First 16-week Evaluation Period from Visit 1 (Week 0) to Visit 5 (Week 16) in this study

End point values	Levetiracetam			
Subject group type	Reporting group			
Number of subjects analysed	173			
Units: Percent Reduction				
median (inter-quartile range (Q1-Q3))				
median (inter-quartile-range)	39.84 (-17.19 to 94.96)			

## Statistical analyses

No statistical analyses for this end point

## Secondary: Change from Baseline in N01221 [NCT00280696] in complex partial seizure frequency per week during the first 16-week period in this study

End point title	Change from Baseline in N01221 [NCT00280696] in complex partial seizure frequency per week during the first 16-week period in this study
-----------------	--

End point description:

Change in complex partial seizure frequency is given as a percent reduction computed as:  

$$\frac{[\text{Weekly complex partial seizure frequency (Baseline)} - \text{Weekly complex partial seizure frequency (Evaluation Period)}]}{[\text{Weekly complex partial seizure frequency (Baseline)}]} \times 100.$$
Positive values in percent reduction means that the value has decreased from Baseline during the first 16-week Period.  
Partial (Type I) seizures can be classified into one of the following three groups: Simple partial seizures, Complex partial seizures, Partial seizures evolving to secondarily generalized seizures.

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline in N01221 [NCT00280696], the First 16-week Evaluation Period from Visit 1 (Week 0) to Visit 5 (Week 16) in this study

End point values	Levetiracetam			
Subject group type	Reporting group			
Number of subjects analysed	285			
Units: Percent Reduction				
median (inter-quartile range (Q1-Q3))				
median (inter-quartile-range)	20.59 (-15.24 to 52.94)			

## Statistical analyses

No statistical analyses for this end point

## Secondary: Change from Baseline in N01221 [NCT00280696] in secondary generalized seizure frequency per week during the first 16-week period in this study

End point title	Change from Baseline in N01221 [NCT00280696] in secondary generalized seizure frequency per week during the first 16-
-----------------	---

## End point description:

Change in secondary generalized seizure frequency is given as a percent reduction computed as:  

$$\frac{[\text{Weekly sec. generalized seizure frequency (Baseline)} - \text{Weekly sec. generalized seizure frequency (Evaluation Period)}]}{[\text{Weekly sec. generalized seizure frequency (Baseline)}]} \times 100.$$
 Positive values in reduction means the value decreased from Baseline during the first 16-week Period.  
 Secondary generalized seizures belong to one of the 3 groups:  
 - Simple partial sz evolving to gen sz  
 - Complex partial sz evolving to gen sz  
 - Simple partial sz evolving to Complex partial sz evolving to gen sz

End point type	Secondary
----------------	-----------

## End point timeframe:

Baseline in N01221 [NCT00280696], the First 16-week Evaluation Period from Visit 1 (Week 0) to Visit 5 (Week 16) in this study

End point values	Levetiracetam			
Subject group type	Reporting group			
Number of subjects analysed	87			
Units: Percent Reduction				
median (inter-quartile range (Q1-Q3))				
median (inter-quartile-range)	76.56 (23.11 to 100)			

## Statistical analyses

No statistical analyses for this end point

**Secondary: Change from Baseline in N01221 [NCT00280696] in simple and complex partial seizure frequency per week during the first 16-week period in this study**

End point title	Change from Baseline in N01221 [NCT00280696] in simple and complex partial seizure frequency per week during the first 16-week period in this study
-----------------	---

## End point description:

Change in simple and complex partial seizure frequency is given as a percent reduction computed as (simple and complex partial seizure frequency := A):  

$$\frac{[\text{Weekly A (Baseline)} - \text{Weekly A (Evaluation Period)}]}{[\text{Weekly A (Baseline)}]} \times 100.$$
 Positive values in percent reduction means that the value has decreased from Baseline during the first 16-week Period.  
 Partial (Type I) seizures can be classified into one of the following three groups: Simple partial seizures, Complex partial seizures, Partial seizures evolving to secondarily generalized seizures.

End point type	Secondary
----------------	-----------

## End point timeframe:

Baseline in N01221 [NCT00280696], the First 16-week Evaluation Period from Visit 1 (Week 0) to Visit 5 (Week 16) in this study

<b>End point values</b>	Levetiracetam			
Subject group type	Reporting group			
Number of subjects analysed	308			
Units: Percent Reduction				
median (inter-quartile range (Q1-Q3))				
median (inter-quartile-range)	20.71 (-13.17 to 47.42)			

## Statistical analyses

No statistical analyses for this end point

## Secondary: Change from Baseline in N01221 [NCT00280696] in other types of seizure frequency per week during the first 16-week period in this study

End point title	Change from Baseline in N01221 [NCT00280696] in other types of seizure frequency per week during the first 16-week period in this study
-----------------	---

End point description:

Change in other types of seizure frequency is given as a percent reduction computed as (other types of seizure frequency:= B):

[ Weekly B (Baseline)- Weekly B (Evaluation Period)]/ [Weekly B (Baseline)] x 100.

Positive values in percent reduction means that the value has decreased from Baseline during the first 16-week Period.

Other types of Seizures are all seizures except Partial Seizures (Type 1).

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline in N01221 [NCT00280696], the First 16-week Evaluation Period from Visit 1 (Week 0) to Visit 5 (Week 16) in this study

<b>End point values</b>	Levetiracetam			
Subject group type	Reporting group			
Number of subjects analysed	5			
Units: Percent Reduction				
median (inter-quartile range (Q1-Q3))				
median (inter-quartile-range)	66.47 (7.48 to 100)			

## Statistical analyses

No statistical analyses for this end point

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse Events (AEs) were collected up to 60 months from Visit 1 (Week 0) over the First and Second Period until Down-titration and Follow up.

Adverse event reporting additional description:

Adverse Events refer to the Safety Set (SS). SS includes all subjects from studies N01221 [NCT00280696] and N01020 [NCT00160615] administered the investigational products at least once.

Assessment type	Non-systematic
