Notes:		
Is trial part of an agreed paediatric investigation plan (PIP)	No	
Does article 45 of REGULATION (EC) No	No	
1901/2006 apply to this trial?		
Does article 46 of REGULATION (EC) No	No	
1901/2006 apply to this trial?		

Notes:

Analysis stage	Interim
Date of interim/final analysis	11 April 2016
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	19 August 2015
Was the trial ended prematurely?	No
Notoci	

Notes:

#### Main objective of the trial:

#### Observational objectives:

- To evaluate the antibody responses to the antigens (serogroups A, C, Y, and W) present in MenACYW conjugate vaccine and NIMENRIX® measured by serum bactericidal assay using baby rabbit complement (rSBA) and by serum bactericidal assay using human complement (hSBA)
- To evaluate the antibody responses against tetanus in subjects who received MenACYW conjugate vaccine or NIMENRIX vaccine
- To evaluate the safety profile of MenACYW conjugate vaccine and NIMENRIX®

#### Protection of trial subjects:

Only subjects that met all the study inclusion and none of the exclusion criteria were randomized and vaccinated in the study. Vaccinations were performed by qualified and trained study personnel. Subjects with allergy to any of the vaccine components were not vaccinated. After vaccination, subjects were also kept under clinical observation for 30 minutes to ensure their safety. Appropriate medical equipment was also available on site in case of any immediate allergic reactions.

#### Background therapy:

Not applicable

Evidence for comparator:

Not applicable

Actual start date of recruitment	31 March 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Country: Number of subjects enrolled	Finland: 188
Worldwide total number of subjects	188
EEA total number of subjects	188

Notes:

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23	188

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

#### Recruitment details:

Study subjects were enrolled from 31 March 2015 to 17 July 2015 at 8 clinic centers in Finland.

#### Screening details:

A total of 188 subjects who met all inclusion and none of the exclusion criteria were randomized and vaccinated in the study.

Period 1 title	Overall trial (overall period)	Overall trial (overall period)	
Is this the baseline period?	Yes		
Allocation method	Randomised - controlled		
Blinding used	Not blinded		

Blinding implementation details:

Not applicable

Are arms mutually exclusive?	Yes
	Group 1: MenACYW conjugate vaccine

#### Arm description:

Healthy, meningococcal-vaccine naive toddlers aged 12 to 23 months received a single dose of MenACYW conjugate vaccine.

Arm type	Experimental
Investigational medicinal product name	MenACYW conjugate vaccine: Meningococcal Polysaccharide (Serogroups A, C, Y, and W) Tetanus Toxoid Conjugate Vaccine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intramuscular use

#### Dosage and administration details:

0.5 mL, intramuscular, single dose

Group 2: NIMENRIX®	
--------------------	--

### Arm description:

Healthy, meningococcal-vaccine naive toddlers aged 12 to 23 months received a single dose of NIMENRIX® vaccine.

Arm type	Active comparator
Investigational medicinal product name	NIMENRIX®: Meningococcal group A, C, W-135 and Y conjugate vaccine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder and solvent for solution for injection
Routes of administration	Intramuscular use

Dosage and administration details:

0.5 ml, intramuscular, single dose

Percentage of Subjects Reporting Solicited Injection-Site or Systemic Reaction Following Vaccination with Either MenACYW

#### End point description:

End point title

**Solicited** ynjection site reactions: Tenderness, Erythema, and Swelling. Solicited systemic reactions: Fever, Vomiting, Crying abnormal, Drowsiness, Appetite lost, and Irritability.

Conjugate Vaccine or NIMENRIX®[1]

Grade 3 solicited injection site reactions: Tenderness, Cries when injected limb is moved or the movement of the injected limb is reduced; Erythema and Swelling,  $\geq 50$  mm. Grade 3 systemic reactions: Fever,  $> 39.5^{\circ}$ C; Vomiting,  $\geq 6$  episodes per 24 hours or requiring parenteral hydration; Crying abnormal, > 3 hours; Drowsiness, Sleeping most of the time or difficult to wake up; Appetite lost, Refuses  $\geq 3$  feeds or refuses most feeds; Irritability, Inconsolable.

**Primary** 

Any Abnormal Crying	33	39.4	
Grade 3 Abnormal Crying	1.1	0	
Any Drowsiness	34	27.7	
Grade 3 Drowsiness	0	0	
Any Loss of appetite	23.4	36.2	
Grade 3 Loss of appetite	1.1	1.1	
Any Irritability	52.1	56.4	
Grade 3 Irritability	0	2.1	

No statistical analyses for this end point

Timeframe for reporting adverse events	:	
Adverse event data were collected from Day 0 up to Day 30 post-vaccination.		
Assessment type	oe Non-systematic

Were there any global substantial amendments to the protocol? Yes

23 July 2015	Updated the coordinating investigator, provided trial center information, updated the planned trial period and planned trial calendar information, updated the Control Product information, clarified the vaccine injection sites and labeling and packaging for the investigational and control vaccines, and also updated the description of the rSBA method.

Notes:

Were there any global interruptions to the trial? No

None reported
