

## Clinical trial results:

### A Phase II study of XL 184 (Cabozantinib) in treating patients with relapsed Osteosarcomas and Ewing Sarcomas.

#### Summary

EudraCT number	2014-004407-71
Trial protocol	FR
Global end of trial date	30 June 2019

#### Results information

Result version number	v1 (current)
This version publication date	03 January 2024
First version publication date	03 January 2024
Summary attachment (see zip file)	Italiano et al. 2020 (Italiano 2020.pdf)

#### Trial information

##### Trial identification

Sponsor protocol code	IB2014-03
-----------------------	-----------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02243605
WHO universal trial number (UTN)	-

Notes:

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

---

**Results analysis stage**

---

Analysis stage	Final
Date of interim/final analysis	09 November 2022
Is this the analysis of the primary completion data?	Yes
Primary completion date	30 June 2019
Global end of trial reached?	Yes
Global end of trial date	30 June 2019
Was the trial ended prematurely?	No

Notes:

---

**General information about the trial**

---

Main objective of the trial:

To evaluate the antitumor activity of cabozantinib in terms of :

- Osteosarcoma: 6-month non-progression (Complete response, partial response and stable disease) and 6-month objective response (Complete response, partial response) rates (composite endpoint) as per the Response Evaluation Criteria in Solid Tumors, Revised RECIST v1.1.
- Ewing sarcoma: 6-month objective response as per the revised RECIST v1.1.

Protection of trial subjects:

The study will be carried out in accordance with:

- The ethical principles of the current version of the "Declaration of Helsinki"
- Good Clinical Practice (GCP): I.C.H. version 4 of 1 May 1996 and decision dated 24 November 2006 (Official Bulletin of 30 November 2006, text 64).
- European Directive (2001/20/EC) on clinical trial procedures.
- Huriet's law (No. 88-1138) dated 20 December 1988, concerning the protection of persons taking part in Biomedical Research with the provisions of the Public Health law (No. 2004-806) of 9 August 2004 and implementing decree No. 2006-477 of 26 April 2006 relating to biomedical research.
- The French law on Data Protection and Civil Liberties, No. 78-17 of 6 January 1978 amended by law No. 2004-801, dated 6 August 2004, concerning the protection of persons with regards to the processing of personal data.
- The application of Circular DHOS/INCa/MOPRC/2006/475 of 7 November 2006: the Sponsor shall undertake to register the Trial and thus make it accessible to the general public, in the INCa (French Cancer Institute) register via the Internet site: [www.e-cancer.fr](http://www.e-cancer.fr). Each trial published in the INCa register will be sent to the NCI for registering on the following site: [www.clinicaltrials.gov](http://www.clinicaltrials.gov). The trial will be registered before the first patient is entered into the study. The Sponsor is responsible for updating the study data in order to guarantee the reliability of the information available on-line.
- Law no. 2004-800 dated 6 August 2004, concerning bioethics, amended by law No. 2012-387, dated 22 March 2012.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 January 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

---

**Population of trial subjects**

---

**Subjects enrolled per country**

Country: Number of subjects enrolled	France: 90
Worldwide total number of subjects	90
EEA total number of subjects	90

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	8
Adults (18-64 years)	74
From 65 to 84 years	8
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Osteosarcoma stratum : During 2 years and 10 months, in France 45 patients were included from 3th of April 2015 to 1st of February 2018.

Ewing stratum : During 3 years and 3 months, in France 45 patients were included from 16th of April 2015 to 12th of July 2018.

### Pre-assignment

Screening details:

Osteosarcoma stratum: 67 patients were screened and 45 were included.

Ewing stratum: 58 patients were screened and 45 were included.

### Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Blinding implementation details:

No blinding used.

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Cabozantinib - Stratum Osteosarcoma

Arm description:

Single arm treatment - stratum osteosarcoma :

Formulation: XL 184 (Cabozantinib) – Available in 20 mg and 60 mg tablet. Tablets are yellow film coated. The 20 mg tablets have a round shape and the 60 mg tablets have an oval shape, and they are packaged as 30 tablets per bottle.

Route of administration: Oral

Administered dose: to take without food , and not eat for at least 2 hours before and 1 hour after taking it:

- for patients  $\geq 16$  years: 60 mg

- For patients  $\geq 12$  years < 16 years: 40 mg/m<sup>2</sup> (Chuck et al., 2014)

Treatment schedule: Daily, day 1-28 during 4 weeks (ie. 1 cycle)

Arm type	Experimental
Investigational medicinal product name	XL184 (CABOZANTINIB) (NSC 761968)
Investigational medicinal product code	XL184 (CABOZANTINIB) (NSC 761968)
Other name	Cabozantinib, EXEL-7184, EXEL-02977184
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Cabozantinib is supplied by Exelixis and distributed by CSM (Clinical Supplies Management Europe GmbH) in Germany. Cabozantinib is available in 20 mg and 60 mg tablet. The tablets are yellow film coated containing cabozantinib malate equivalent to 20 mg and 60 mg of cabozantinib. The 20 mg tablets have a round shape and the 60 mg tablets have an oval shape, and they are packaged as 30 tablets per bottle.

<b>Arm title</b>	Cabozantinib - Stratum Ewing
------------------	------------------------------

Arm description:

Single arm treatment - stratum ewing :

Formulation: XL 184 (Cabozantinib) – Available in 20 mg and 60 mg tablet. Tablets are yellow film coated. The 20 mg tablets have a round shape and the 60 mg tablets have an oval shape, and they are packaged as 30 tablets per bottle.

Route of administration: Oral

### Primary: Non progression at 6 months

End point title	Non progression at 6 months <sup>[1]</sup>
End point description: Efficacy of Cabozantinib will be assessed in terms of 6-month non-progression and objective response within 6 months of treatment onset (dual endpoint design). More precisely, progression has to be assessed at 6 months and objective response has to be assessed within 6 months of treatment onset. - Non-progression is defined as complete response, partial response or stable disease (RECIST 1.1).	
End point type	Primary
End point timeframe: at 6 months	

#### Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical analysis planned.

Osteosarcoma : Primary based on the rate of objective response within 6 months of treatment onset will be reported based on an optimal two-stage Simon's design.

Ewing sarcoma : Secondary endpoint

End point values	Cabozantinib - Stratum Osteosarcoma	Cabozantinib - Stratum Ewing		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	42 <sup>[2]</sup>	39		
Units: subjects	17	10		

#### Notes:

[2] - 45 patients had been included  
o 42 were eligible and assessable for efficacy

**Statistical analyses**

No statistical analyses for this end point

**Primary: Objective response within 6 months of treatment onset rate**

End point title	Objective response within 6 months of treatment onset rate <sup>[3]</sup>
-----------------	---

End point description:

Efficacy of Cabozantinib will be assessed in terms objective response within 6 months of treatment onset. More precisely, objective response has to be assessed within 6 months of treatment onset.  
- Objective response is defined as complete response or partial response (RECIST 1.1).

End point type	Primary
----------------	---------

End point timeframe:

at 6 months

Notes:

[3] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical analysis planned.

Osteosarcoma : Secondary endpoint

Ewing sarcoma : Primary based on the rate of objective response within 6 months of treatment onset will be reported based on an optimal two-stage Simon's design.

End point values	Cabozantinib - Stratum Osteosarcoma	Cabozantinib - Stratum Ewing		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	42	39 <sup>[4]</sup>		
Units: Subjects	5	10		

Notes:

[4] - 45 patients had been included  
o 39 were eligible and assessable for efficacy

**Statistical analyses**

No statistical analyses for this end point

**Secondary: Best overall response: RECIST 1.1 with confirmation required**

End point title	Best overall response: RECIST 1.1 with confirmation required
-----------------	--

End point description:

Best overall response according to RECIST 1.1 with confirmation required include confirmation for complete response (CR), partial response (PR) and stable disease (SD).

End point type	Secondary
----------------	-----------

End point timeframe:

Best overall response is the best response recorded from the start of the treatment until disease progression/recurrence (taking as reference for progressive disease the smallest measurements recorded since the treatment started).

<b>End point values</b>	Cabozantinib - Stratum Osteosarcoma	Cabozantinib - Stratum Ewing		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	42	39

### Statistical analyses

No statistical analyses for this end point

### Secondary: Progression-free survival (PFS)

End point title	Progression-free survival (PFS)
End point description:	PFS will be assessed on the population eligible and assessable for efficacy. PFS will be analysed using the Kaplan-Meier method.
End point type	Secondary
End point timeframe:	Progression-free survival (PFS) is defined as the duration of time from start of treatment to time of progression or death, whichever occurs first.

<b>End point values</b>	Cabozantinib - Stratum Osteosarcoma	Cabozantinib - Stratum Ewing		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	42	39

No statistical analyses for this end point

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Safety profile will be continuously followed during treatment and up to 30 days after the last Cabozantinib dose or until the start of a new antitumor therapy, whichever occurs first.

Adverse event reporting additional description:

Adverse event (AE) are reported for all patients who received at least one administration of treatment. All AE and SAE (related and unrelated to treatment) are reported.

Assessment type	Systematic
