

Clinical trial results:

A Randomized, Double-blind, Placebo-controlled Study of the Safety and Efficacy of Amatuximab in Combination with Pemetrexed and Cisplatin in Subjects with Unresectable Malignant Pleural Mesothelioma

Summary

EudraCT number	2014-004489-85
Trial protocol	DE IT
Global end of trial date	30 November 2018

Results information

Result version number	v1 (current)
This version publication date	03 April 2020
First version publication date	03 April 2020

Trial information

Trial identification

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	30 November 2018
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	30 November 2018
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

The primary objective of this study was to provide ongoing amatuximab treatment access consistent with the original MORAb-009-201 treatment schedule to those subjects randomized to the amatuximab arm who, at the discretion of their investigator, may obtain ongoing clinical benefit.

Protection of trial subjects:

This study was conducted in accordance with standard operating procedures (SOPs) of the sponsor (or designee), which are designed to ensure adherence to Good Clinical Practice (GCP) guidelines as required by the following: - Principles of the World Medical Association Declaration of Helsinki (World Medical Association, 2008) - International Council on Harmonisation (ICH) E6 Guideline for GCP (CPMP/ICH/135/95) of the European Agency for the Evaluation of Medicinal Products, Committee for Proprietary Medicinal Products, International Council for Harmonisation of Technical Requirements for Registration of Pharmaceuticals for Human Use -Title 21 of the United States (US) Code of Federal Regulations (US 21 CFR) regarding clinical studies, including Part 50 and Part 56 concerning informed subject consent and Institutional Review Board (IRB) regulations and applicable sections of US 21 CFR Part 312 - European Good Clinical Practice Directive 2005/28/EC and Clinical Trial Directive 2001/20/EC for studies conducted within any European Union (EU) country. All suspected unexpected serious adverse reactions were reported, as required, to the Competent Authorities of all involved EU member states. -Article 14, Paragraph 3, and Article 80-2 of the Pharmaceutical Affairs Law (Law No. 145, 1960) for studies conducted in Japan, in addition to Japan's GCP Subject Information and Informed Consent.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	03 November 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 7
Country: Number of subjects enrolled	Australia: 3
Country: Number of subjects enrolled	United Kingdom: 19
Country: Number of subjects enrolled	France: 20
Country: Number of subjects enrolled	Germany: 14
Country: Number of subjects enrolled	Italy: 43
Worldwide total number of subjects	106
EEA total number of subjects	96

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	33
From 65 to 84 years	72
85 years and over	1

Subject disposition

Recruitment

Recruitment details:

Subjects took part in the study at 36 investigative sites in the United States, France, Germany, Italy, the United Kingdom, and Australia from 03 November 2015 to 30 November 2018.

Pre-assignment

Screening details:

A total of 124 subjects were enrolled (signed informed consent form), of which, 16 were screen failures, 108 were randomized, and 106 were treated. Deaths that were primary cause of treatment discontinuation are reported in subject flow excluding those that occurred after treatment discontinuation.

Period 1

Period 1 title	Combination Treatment Phase
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Amatuximab + Pemetrexed + Cisplatin

Arm description:

During combination treatment phase, subjects received amatuximab 5 milligram per kilogram (mg/kg), infusion, intravenously, once weekly in 21-day cycles and pemetrexed 500 milligram per square meter (mg/m²) and cisplatin 75 mg/m², infusion, intravenously, on Day 1 of each 21-day cycle for 6 cycles. Following completion of the Combination Treatment Phase, subjects who had not progressed entered the Maintenance Phase and continued to receive amatuximab 5 mg/kg, infusion, intravenously, once weekly until disease progression.

Arm type	Experimental
Investigational medicinal product name	Amatuximab
Investigational medicinal product code	MORAb-009
Other name	MORAb-009
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

During Combination Treatment Phase, subjects received amatuximab 5 mg/kg, infusion, intravenously, once weekly in 21-day cycles. Following completion of the Combination Treatment Phase, subjects who had not progressed entered the Maintenance Phase and continued to receive amatuximab 5 mg/kg, infusion, intravenously, once weekly until disease progression.

Investigational medicinal product name	Pemetrexed
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

During Combination Treatment Phase, subjects received pemetrexed 500 mg/m², infusion, intravenously, on Day 1 of each 21-day cycle for 6 cycles.

Investigational medicinal product name	Cisplatin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

During Combination Treatment Phase, subjects received cisplatin 75 mg/m², infusion, intravenously, on Day 1 of each 21-day cycle for 6 cycles.

Arm title	Placebo + Pemetrexed + Cisplatin
------------------	----------------------------------

Arm description:

During combination treatment phase, subjects received placebo matched to amatuximab infusion, intravenously, once weekly in 21-day cycles and pemetrexed 500 mg/m² and cisplatin 75 mg/m², infusion, intravenously, on Day 1 of each 21-day cycle for 6 cycles. Following completion of the Combination Treatment Phase, subjects who had not progressed entered the Maintenance Phase and received placebo matched to amatuximab infusion, intravenously, once weekly until disease progression.

Arm type	Placebo and experimental
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

During Combination Treatment Phase, subjects received placebo matched to amatuximab infusion, intravenously, once weekly in 21-day cycles. Following completion of the Combination Treatment Phase, subjects who had not progressed entered the Maintenance Phase and continued to receive placebo matched to amatuximab infusion, infusion, intravenously, once weekly until disease progression.

Investigational medicinal product name	Pemetrexed
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

During Combination Treatment Phase, subjects received pemetrexed 500 mg/m², infusion, intravenously, on Day 1 of each 21-day cycle for 6 cycles.

Investigational medicinal product name	Cisplatin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

During Combination Treatment Phase, subjects received cisplatin 75 mg/m², infusion, intravenously, on Day 1 of each 21-day cycle for 6 cycles.

Number of subjects in period 1	Amatuximab + Pemetrexed + Cisplatin	Placebo + Pemetrexed + Cisplatin
Started	52	54
Completed	26	29
Not completed	26	25

Primary: Number of Subjects With Adverse Events (AEs) and Serious Adverse Events (SAEs)

End point title	Number of Subjects With Adverse Events (AEs) and Serious Adverse Events (SAEs) ^[1]
-----------------	---

End point description:

AEs includes both non-SAEs and SAEs and the same subject can have both SAEs and as well non-SAEs. The safety analysis set was defined as all randomized subjects who received at least 1 dose of study drug.

End point type	Primary
----------------	---------

End point timeframe:

Baseline up to 3 years

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive data was planned to be analyzed for this endpoint.

End point values	Combination Treatment Phase: Amatumab + Pemetrexed + Cisplatin	Combination Treatment Phase: Placebo + Pemetrexed + Cisplatin	Maintenance Treatment Phase: Amatumab	Maintenance Treatment Phase: Placebo

Statistical analyses

No statistical analyses for this end point

Adverse events

Adverse events information

Timeframe for reporting adverse events:

From the first dose of study drug up to 30 days after the last dose of study drug or until date of death (approximately up to 3 years)

Adverse event reporting additional description:

Deaths that happened anytime during the study (including those during the treatment and after treatment discontinuation) are reported in this section.

Assessment type	Systematic

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
24 April 2015	Updated the inclusion and exclusion criteria, Quality of Life measurements was corrected from 6 subcategories to 5, and removed hemoptysis, added clarity on protocol conduct, ensured consistent terminology used throughout document, added clarity on administration of premedications, and other editorial changes.
30 January 2017	Removed all the efficacy endpoints.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

The study was terminated due to business decision. No safety concerns involved in decision to terminate this study.

Notes:
