

**Endpoint 30: Nasopharyngeal Swabs Positive for Penicillin Resistant Streptococcus Pneumoniae**

<b>Statistical analysis title</b>	Nasopharyngeal Swabs Positive for Penicillin Resistant Streptococcus Pneumoniae
Statistical analysis description	Statistical analysis for Visit 6 presented below.
Comparison groups	All groups
Number of subjects included in analysis	2890
Analysis specification	Pre-specified
Analysis type	superiority
P-value	1.0000
Method	Fisher Exact
Parameter type	Mean Difference (Final Values)
Point estimate	0
Confidence interval	
Variability estimate	
Dispersion value
