

Clinical trial results:

A Twelve-Week, Double-Blind, Placebo-Controlled, Randomized, Parallel-Group, Multicenter Study of the Safety and Efficacy of JZP 110 [(R)-2-amino-3-phenylpropylcarbamate hydrochloride] in the Treatment of Excessive Sleepiness in Subjects with Obstructive Sleep Apnea (OSA)

Summary

EudraCT number	2014-005514-31

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	03 March 2017
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	23 December 2016
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate the efficacy of JZP-110 administered once daily for up to 12 weeks in doses of 37.5, 75, 150, and 300 mg compared to placebo in the treatment of excessive sleepiness in adult subjects with OSA.

Protection of trial subjects:

Safety was assessed by the incidence of observed and reported adverse events (AEs), and changes in physical examination findings, electrocardiograms (ECGs), clinical laboratory tests, vital signs, 24-hour ABPM, and the Columbia-Suicide Severity Rating Scale (C-SSRS). Safety was assessed throughout the study.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 April 2015
Long term follow-up planned	Yes
Long term follow-up rationale	Efficacy, Safety
Long term follow-up duration	40 Months
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Netherlands: 1
Country: Number of subjects enrolled	Germany: 15
Country: Number of subjects enrolled	Canada: 10
Country: Number of subjects enrolled	United States: 448
Worldwide total number of subjects	474
EEA total number of subjects	16

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0

Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	391
From 65 to 84 years	83
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Note: 476 subjects were enrolled and randomized, however 2 subjects never received drug. This resulted in 474 subjects comprising the safety population.

Pre-assignment

Screening details:

During screening, subjects completed a medical exam. An overnight PSG assessment followed by MWT and 24-hour ABPM were conducted at baseline. After successful completion of the screening and baseline visits subjects were randomized in a 1:1:2:2:2 ratio to receive 37.5, 75, 150, or 300 mg JZP-110 or placebo.

Period 1

Period 1 title	Treatment Phase (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Subject

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Placebo condition.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Placebo administered orally, QD, for the 12 week treatment phase.

Arm title	37.5 mg JZP-110
------------------	-----------------

Arm description:

37.5 mg JZP-110

Arm type	Experimental
Investigational medicinal product name	JZP-110
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

37.5 mg JZP-110 administered orally, QD, for the 12-week treatment phase.

Arm title	75 mg JZP-110
------------------	---------------

Arm description:

75 mg JZP-110

Arm type	Experimental
----------	--------------

Investigational medicinal product name	JZP-110
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

75 mg JZP-110 administered orally, QD, for the 12-week treatment phase.

Arm title	150 mg JZP-110
------------------	----------------

Arm description:

150 mg JZP-110

Arm type	Experimental
Investigational medicinal product name	JZP-110
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects randomized to receive 150 mg JZP-110 initially received 75 mg JZP-110 from Day 1 through Day 3 of the treatment phase, and received 150 mg JZP-110 starting on Day 4, administered orally, QD.

Arm title	300 mg JZP-110
------------------	----------------

Arm description:

300 mg JZP-110

Arm type	Experimental
Investigational medicinal product name	JZP-110
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects randomized to receive 300 mg JZP-110 initially received 150 mg JZP-110 from Day 1 through Day 3 of the treatment phase and received 300 mg JZP-110 starting on Day 4, administered orally, QD.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
10 September 2015	This amendment made changes to the eligibility criteria.
08 February 2016	This amendment was made to further support enrollment of a representative patient sample, to clarify enrollment criteria, and to incorporate feedback from FDA about the proposed statistical analysis.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
