Analysis stage	Final
Date of interim/final analysis	12 January 2018
Is this the analysis of the primary completion data?	Yes
Primary completion date	12 January 2018
Global end of trial reached?	Yes
Global end of trial date	12 January 2018
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary efficacy objective of this study is to demonstrate the efficacy of the A2a receptor antagonist tozadenant in the treatment of levodopa-treated PD patients experiencing end-of-dose "wearing-off", based on the change from Baseline to Week 24 in the number of hours per day spent in the OFF state.

Protection of trial subjects:

Conduct of the study must be approved by an appropriately constituted IRB or IEC. Approval is required for the study protocol, investigational drug brochure, protocol amendments, informed consent forms, patient information sheets, and advertising materials. For each study patient, written informed consent will be obtained prior to any protocol-related activities. As part of this procedure, the principal investigator or one of his/her associates must explain orally and in writing the nature, duration, and purpose of the study, and the action of the drug in such a manner that the patient is aware of the potential risks, inconveniences, or adverse effects that may occur. The patient should be informed that he/she may withdraw from the study at any time, and the patient will receive all information that is required by local regulations and ICH guidelines. The principal investigator will provide the Sponsor or its representative with a copy of the IRB/IEC-approved informed consent form prior to the start of the study.

Country: Number of subjects enrolled	Canada: 15
Country: Number of subjects enrolled	Italy: 59
Country: Number of subjects enrolled	United States: 207
Worldwide total number of subjects	449
EEA total number of subjects	227

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	200
From 65 to 84 years	249
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

This study was conducted at 80 sites in 7 countries (United States, Canada, Italy, Austria, Spain, Germany, Czech Republic). Planned patient enrollment numbers were achieved, but the study and the tozadenant development program were terminated prior to study completion by all patients, based on an unexpected emerging safety signal.

Pre-assignment

Screening details:

Of the 616 patients screened in the study, a total of 449 were randomized: 149 to receive placebo, 151 to receive 60 mg BID tozadenant, and 149 to receive 120 mg BID tozadenant.

Period 1

Period 1 title	24 Weeks (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description: -

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

The patients will take two tablets by mouth BID.

Arm title	60 mg BID Tozadenant
------------------	----------------------

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Tozadenant
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

The patients take 60 mg BID.

Arm title	120 mg BID Tozadenant
------------------	-----------------------

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Tozadenant
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

One or two doses of 60 mg or 120 mg BID.

Primary: Change from Baseline to Week 24 in the number of hours per day spent in OFF time

End point title	Change from Baseline to Week 24 in the number of hours per day spent in OFF time
End point description: The primary efficacy endpoint was the change from baseline to Week 24 in OFF time, where OFF time in the Hauser Parkinson's Disease Home Diary (PD) was averaged over 3 days prior to the study visit. During Screening and through Part A of the study, the Hauser Parkinson's Disease Home Diary (PD) was completed on specified days directly preceding the scheduled study visits/assessments. Motor activity was recorded as OFF, ON (mobility improved), or asleep time. Patients were asked to record ON time according to dyskinesia categories "without dyskinesia", "with non troublesome dyskinesia" or "with troublesome dyskinesia". Patients (and/or caregivers) were trained to complete the PD diary to record their status at half hourly intervals as OFF, ON without dyskinesia, ON with non troublesome dyskinesia, ON with troublesome dyskinesia, or asleep.

Secondary: Change in Unified Parkinson's Disease Rating Scale (UPDRS) Part II Activities of Daily Living (ADL) subscale + Part III Motor Function

End point title	Change in Unified Parkinson's Disease Rating Scale (UPDRS) Part II Activities of Daily Living (ADL) subscale + Part III Motor
-----------------	---

End point description:

The Unified Parkinson's Disease Rating Scale (UPDRS) is a scale to monitor Parkinson's Disease related disability and impairment. The scale itself has 4 components, (Part I, Mentation, Behavior and Mood; Part II, Activities of Daily Living; Part III, Motor Examination; Part IV, Complications of Therapy). Points are assigned to every item based on the person's response, as well as observation and physical examination. Each part has multiple points that are individually scored, using zero for normal or no problems, 1 for minimal problems, 2 for mild problems, 3 for moderate problems, and 4 for severe problems. These scores are tallied to indicate the severity of the disease, with 199 points being the worst and total disability and 0 meaning no disability. For patients with missing baseline or baseline was measured post-dose, screening was used as baseline in the calculation of change from baseline. Total scores are calculated only when all Part II & III questions.

Secondary: Change From Baseline to Week 24 in the ON state in Unified Parkinson's Disease Rating Scale (UPDRS) Part III

End point title	Change From Baseline to Week 24 in the ON state in Unified Parkinson's Disease Rating Scale (UPDRS) Part III
-----------------	--

End point description:

Change from Baseline to Week 24 in the Unified Parkinson's Disease Rating Scale (UPDRS) Parts III Motor Function (motor subscale) total scores. Score Range of 0 - 108. Higher scores indicate greater impact of PD symptoms. Unified Parkinson's Disease Rating Scale (UPDRS) in the ON state was measured at a time representative of the ON state in that patient, not in "best" ON. Unified Parkinson's Disease Rating Scale Part III in OFF was not evaluated. For Patients with missing baseline or baseline was measured post-dose, screening was used as baseline in the calculation of change from baseline. Total scores are calculated only when all Part III questions are answered.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
19 May 2015	<p>Amendment 1 Revisions:</p> <ol style="list-style-type: none">1. Updated List of Abbreviations (p. 8-9).2. Corrected typographical errors in Table 1: Part A - Schedule of Events/Evaluations (p. 30).3. Revised Section 11.6, Unblinding Upon Completion of Part A (p. 131) to clarify that primary and secondary efficacy analyses will be conducted after the Part A data base is locked and will not be modified; and to clarify that exploratory analyses that do not involve the primary or secondary efficacy analyses are subject to modification.4. Added the following exploratory endpoints to Parts A and B: Part A<ol style="list-style-type: none">15. EuroQoL 5D-5L Health Questionnaire (EQ-5D-5L).16. Treatment Satisfaction Questionnaire for Medication (TSQM 9) (evaluated at Weeks 6 and 24). Part B<ol style="list-style-type: none">11. EQ-5D-5L.12. TSQM 9 (evaluated at Week 76).
10 June 2015	<p>Amendment 2 Revisions:</p> <ol style="list-style-type: none">1. Revised Exclusion Criteria (EC) #24 to delete "including any history of hepatic or renal failure" (p. 22; p. 55).2. Added EC #27: "Patients with moderate to severe hepatic or renal impairment." (p. 22; p. 55).3. Added EC #28: "Patients who have taken strong CYP3A4 inhibitors or inducers within 4 weeks prior to Baseline (Visit 2) or who anticipate requiring the use of strong CYP3A4 inhibitors or inducers during the duration of the trial (see Section 5.9.2 and Appendix 15.15)" (p. 22; p. 55).4. Added EC #29: "Patients with pacemakers or implantable cardioverter defibrillators" (p. 22; p. 55).5. Added to Section 4.3.2, Definite Criteria for Withdrawal from Study: "9. Patients noted to have an elevated BP post-baseline, with a systolic BP \geq 160 mmHg and/or a diastolic BP \geq 100 mmHg that is present at 2 consecutive post-baseline study visits" (p. 57).6. Added to Section 5.9.2, Prohibited Concomitant Medications/ Treatments, regarding medications prohibited throughout the study (Parts A and B): "Strong CYP3A4 inhibitors or inducers. Refer to Appendix 15.15" (p. 61).7. Added paragraph at end of Section 9.5.1, Blood Pressure and Pulse Measurements: "Patients noted to have an elevated BP post-baseline, with a systolic BP \geq 160 mmHg and/or a diastolic BP \geq 100 mmHg that is present at 2 consecutive post-baseline study visits, will be discontinued from study (see Section 4.3.2)" (p. 118).8. Added Appendix 15.15, Prohibited CYP3A4 Inhibitors and Inducers (p. 183).

13 October 2017	<p>Amendment 3 Revisions</p> <ol style="list-style-type: none"> 1. Updated company name, email addresses and telephone numbers of Study Director, and Chief Medical Officer in multiple places. 2. Updated Study Contact Information 3. Updated safety reporting fax number 4. Added to Abbreviations ANC (absolute neutrophil count), WBC (white blood cells) 5. Inserted into Parts A and B procedures additional blood draws for hematology. 6. Added Tables 1.1 (Part A – Schedule of Events/ Evaluations for Hematology Monitoring) and 2.1 Part B – Schedule of Events/ Evaluations for Hematology Monitoring. 7. Inserted into Criteria for Patient Discontinuation a lower limit for absolute neutrophils. 8. Added the following as section 6.2.6 a Visit 3.5 (Week 4). 9. Inserted section 6.2.9 a Visit 4.3 (Week 8). 10. Inserted section 6.2.10 a Visit 4.8 (Week 10) 11. Section 6.2.12: Clarified the next visit by number and differentiates next blood draw (visit 16) and telephone call (visit 18). 12. Insert section 6.2.13 a Visit 5.5 (Week 16) 13. Insert section 6.2.16 a Visit 6.5 (Week 22)
-----------------	---

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
