

## Clinical trial results:

### A Phase 3, Multicenter, Randomized, Double-blind, Placebo-controlled Trial of Oral RPC1063 as Induction and Maintenance Therapy for Moderate to Severe Ulcerative Colitis

#### Summary

EudraCT number	2015-000319-41
Trial protocol	DE SK HU CZ NL GB BE BG PL HR LV AT GR ES IT
Global end of trial date	17 June 2020

#### Results information

Result version number	v1 (current)
This version publication date	03 July 2021
First version publication date	03 July 2021

#### Trial information

##### Trial identification

Sponsor protocol code	RPC01-3101
-----------------------	------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Bristol-Myers Squibb
Sponsor organisation address	Chaussee de la Hulpe 185, Brussels, Belgium, 1170
Public contact	Bristol-Myers Squibb International Corporation, EU Study Start-up Unit, Clinical.Trials@bms.com
Scientific contact	Bristol-Myers Squibb Study Director, Bristol-Myers Squibb, Clinical.Trials@bms.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	04 August 2020
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	17 June 2020
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The objective of the RPC1063 clinical development program in UC is to demonstrate that RPC1063 administered orally is safe and effective in inducing and maintaining remission in patients with moderate to severe UC.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and in compliance with all International Conference on Harmonization Good Clinical Practice Guidelines. All the local regulatory requirements pertinent to safety of trial subjects were followed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	13 October 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Australia: 9
Country: Number of subjects enrolled	Israel: 25
Country: Number of subjects enrolled	Korea, Republic of: 48
Country: Number of subjects enrolled	Belarus: 18
Country: Number of subjects enrolled	Bulgaria: 22
Country: Number of subjects enrolled	Croatia: 6
Country: Number of subjects enrolled	Czechia: 33
Country: Number of subjects enrolled	Georgia: 30
Country: Number of subjects enrolled	Hungary: 26
Country: Number of subjects enrolled	Moldova, Republic of: 21
Country: Number of subjects enrolled	Poland: 76
Country: Number of subjects enrolled	Romania: 21
Country: Number of subjects enrolled	Russian Federation: 102
Country: Number of subjects enrolled	Serbia: 64
Country: Number of subjects enrolled	Slovakia: 4
Country: Number of subjects enrolled	Ukraine: 99
Country: Number of subjects enrolled	Canada: 33
Country: Number of subjects enrolled	United States: 214
Country: Number of subjects enrolled	South Africa: 9

Country: Number of subjects enrolled	Argentina: 3
Country: Number of subjects enrolled	Germany: 33
Country: Number of subjects enrolled	Italy: 60
Country: Number of subjects enrolled	Netherlands: 17
Country: Number of subjects enrolled	United Kingdom: 13
Country: Number of subjects enrolled	Belgium: 19
Country: Number of subjects enrolled	Greece: 1
Country: Number of subjects enrolled	Latvia: 4
Country: Number of subjects enrolled	New Zealand: 1
Country: Number of subjects enrolled	Austria: 1
Worldwide total number of subjects	1012
EEA total number of subjects	323

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	958
From 65 to 84 years	54
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

1012 randomized and treated

### Period 1

Period 1 title	Induction Period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

### Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

<b>Arm title</b>	RPC1063 Cohort 1 (Induction Period)
------------------	-------------------------------------

Arm description:

- Blinded

-On Days 1 to 4, RPC1063/ozanimod HCl 0.25 mg (equivalent to ozanimod 0.23 mg) or matching placebo once daily (one 0.25 mg capsule) -On Days 5 to 7, RPC1063/ozanimod HCl 0.5 mg (equivalent to ozanimod 0.46 mg) or matching placebo once daily (two 0.25 mg capsules) -On Day 8, patients will receive the final dose RPC1063/ozanimod HCl 1 mg (equivalent to ozanimod 0.92 mg) or matching placebo once daily for 9 weeks (one 1 mg capsule)

Arm type	Experimental
Investigational medicinal product name	Ozanimod HCL
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

0.25mg

Investigational medicinal product name	Ozanimod HCl
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

0.5mg (2 x 0.25mg)

Investigational medicinal product name	Ozanimod HCl
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

1mg

<b>Arm title</b>	Placebo (Induction Period)
------------------	----------------------------

Number of subjects in period 1	RPC1063 Cohort 1 (Induction Period)	Placebo (Induction Period)	RPC1063 Cohort 2 (Induction Period)
Started	429	216	367
Transition to Maintenance Period	233 <sup>[1]</sup>	69 <sup>[2]</sup>	224 <sup>[3]</sup>
Treated in Maintenance Period	0 <sup>[4]</sup>	69 <sup>[5]</sup>	0 <sup>[6]</sup>
Completed	401	192	324
Not completed	28	24	43
Consent withdrawn by subject	10	8	20
Physician decision	-	-	1
non compliance with protocol	2	-	1
Adverse event, non-fatal	11	6	12
Other Reason	1	-	-
Lack of efficacy	4	10	9

Notes:

[1] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: Subjects from this arm were re randomized to the maintenance period

[2] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: Subjects from this arm either were re randomized to the maintenance period, or continued in this arm throughout the study

[3] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: Subjects from this arm were re randomized to the maintenance period

[4] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: Subjects from this arm were re randomized to the maintenance period

[5] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: Subjects from this arm were re randomized to the maintenance period

[6] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: Subjects from this arm were re randomized to the maintenance period

## Period 2

Period 2 title	Maintenance Period
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Blinding implementation details:

This population was re-randomized and blinded from subjects which were treated in the induction period.

<b>Non-serious adverse events</b>	RPC01063 Maintenance Period	Placebo (Maintenance Period): Placebo	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	2 / 230 (0.87%)	4 / 227 (1.76%)	
Blood and lymphatic system disorders			
Anaemia			
subjects affected / exposed	2 / 230 (0.87%)	4 / 227 (1.76%)	
occurrences (all)	2	5	

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
07 December 2017	<p>The number of investigators was updated to more accurately reflect the current number of investigators planned in this study.</p> <p>The estimated date of last patient completed was updated based on the current estimated enrollment rate.</p> <p>The proportion of patients in Cohort 1 and Cohort 2 have been adjusted to allow us to reinstate the original limit of <math>\leq 30\%</math> of patients who have received anti-TNF from RPC01-3101 protocol version 2.0, 2.1, 2.2, and 2.3. It is planned that the total sample size of the trial will remain unchanged.</p> <p>The original limit of <math>\leq 30\%</math> of patients who have received anti-TNF from RPC01-3101 protocol version 2.0, 2.1, 2.2, and 2.3 has been reinstated for Cohort 1. A limit of <math>\leq 50\%</math> has been established for Cohort 2. These limits have been established based on ongoing development programs in UC that have confirmed that patients with anti-TNF experience achieve limited clinical response.</p> <p>Study procedures have been clarified to allow for continuous enrollment of patients who have received anti-TNF therapy.</p>
07 December 2017	<p>A clarification was made to allow access to OCT images especially in case of suspicion of macular edema.</p> <p>Clarification was made to allow sites with qualified personnel to perform the pulmonary function test onsite under the supervision of a pulmonologist.</p> <p>A change was made to underscore that it is the choice of the patient to receive the VZV vaccination.</p> <p>A correction was made for patients who test positive for HBs antigen. While patients who test positive for HBs antigen will still be excluded, the presence of the HBs antibody alone is the result of vaccination so these patients will be eligible for the trial.</p> <p>A clarification was made in order to precisely define the timing of unblinding for Cohort 1 and the randomized component of the Maintenance Period.</p> <p>A statement was added to clarify that treatment group assignment during the Maintenance Period for patients who received placebo in Cohort 1 will be unblinded to the Sponsor during the Maintenance Period.</p> <p>Sections were added to clarify that analyses will be performed after the last patient has had their last visit in Cohort 1, Cohort 2 and the Maintenance Period, respectively.</p> <p>The abbreviation list has been updated based on changes in this amendment</p>
29 May 2018	<p>A clarification was made that Cohort 2 may need to be increased to ensure adequate powering of the Maintenance Period.</p> <p>The visit window for Visit Induction 3, Maintenance (M) 2, M 3, M 4, and M 5 was increased for operational efficiency.</p> <p>Added Safety Follow-Up section for consistency with other ongoing RPC1063 protocols.</p> <p>Revised instructions for elevated LFTs for consistency with other ongoing RPC1063 protocols.</p> <p>Added guidance for further liver function evaluation if a patient discontinues investigational drug due to elevated alanine aminotransferase (ALT) or aspartate aminotransferase (AST) <math>&gt; 5\times</math> ULN, or ALT or AST <math>&gt; 3\times</math> ULN and bilirubin <math>&gt; 2\times</math> ULN for additional clarification for the investigator.</p> <p>Changed "titration" to "dose escalation" throughout the protocol for consistency with other ongoing RPC1063 protocols.</p> <p>Added nomenclature and dose equivalency between RPC1063/ozanimod HCl (0.25 mg, 0.5 mg, and 1 mg) and ozanimod (0.23 mg, 0.46 mg, and 0.92 mg) for consistency across RPC1063 protocols.</p> <p>A change to the analysis method was made from the LOCF method to the NRI method</p> <p>Removed hemoglobin A1c from the chemistry panel because it is not needed for routine evaluation of patient safety.</p> <p>Minor editorial changes and changes for clarification were made.</p>
