

## Clinical trial results:

### AN OPEN STUDY TO ASSESS THE ROBUSTNESS OF THE CRC749 DEVICE BY PHARMACEUTICAL PERFORMANCE FOLLOWING TWICE DAILY DOSING OF MGR001 ADMINISTERED VIA ORAL INHALATION IN SUBJECTS WITH ASTHMA OR CHRONIC OBSTRUCTIVE PULMONARY DISEASE (COPD)

#### Summary

EudraCT number	2015-000463-13
Trial protocol	GB
Global end of trial date	12 June 2015

#### Results information

Result version number	v1 (current)
This version publication date	28 June 2020
First version publication date	28 June 2020

#### Trial information

##### Trial identification

Sponsor protocol code	MGR001-1010
-----------------------	-------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02474017
WHO universal trial number (UTN)	-

Notes:

Scientific contact	Richard Allan, Mylan Pharma UK Ltd, +44 1304 626255, richard.allan@mylan.co.uk

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	23 October 2015
Is this the analysis of the primary completion data?	Yes
Primary completion date	12 June 2015
Global end of trial reached?	Yes
Global end of trial date	12 June 2015
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To confirm the robustness of the CRC749 inhaler following 21 ( $\pm 3$ ) days BID (twice a day) dosing of MGR001 (250/50  $\mu$ g).

- The MGR001 product will be considered robust if inhalers returned in a testable condition meet the proposed commercial specification upon in vitro testing of pharmaceutical performance

Protection of trial subjects:

Prior to the initiation of the study at each study center, the clinical study protocol, subject information sheet, informed consent form (ICF), and all other relevant study documentation were submitted to and approved by the responsible national Independent Ethics Committee (IEC) / Institutional Review Board (IRB).

The study was conducted in accordance with the guidelines set forth in 21 Code of Federal Regulations (CFR), parts 312, 50 and 56.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	09 May 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 111
Worldwide total number of subjects	111
EEA total number of subjects	111

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	11
Adults (18-64 years)	90

From 65 to 84 years	10
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

One hundred forty-three subjects were screened for the study; one hundred eleven subjects met inclusion criteria, received MGR001 250/50, and were included in Safety Analysis Set.

### Pre-assignment

Screening details:

Subject eligibility were reviewed and documented by an appropriately qualified member of the Investigator's study team before subjects were included in the study.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

### Arms

Arm title	MGR001 250/50
-----------	---------------

Arm description:

Each subject was given MGR001 250/50, which contained 250 mcg FP and 50 mcg salmeterol [as xinafoate salt] inhalation powder, pre-dispensed for oral inhalation in the CRC749 inhaler. The following treatment was administered during the study: MGR001 250/50 BID for 21.5 ( $\pm 3$ ) days with the final dose in the clinic at Visit 3 (Day 22 [ $\pm 3$ ]). Each inhaler contained 60 doses.

Arm type	Experimental
Investigational medicinal product name	MGR001 250/50
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation powder
Routes of administration	Inhalation use, Oral use

Dosage and administration details:

one 250/50 inhalation twice a day

<b>Number of subjects in period 1</b>	MGR001 250/50
Started	111
Completed	108
Not completed	3
Adverse event, non-fatal	1
Protocol deviation	2

## Baseline characteristics

### Reporting groups

Reporting group title	MGR001 250/50
-----------------------	---------------

Reporting group description:

Each subject was given MGR001 250/50, which contained 250 mcg FP and 50 mcg salmeterol [as xinafoate salt] inhalation powder, pre-dispensed for oral inhalation in the CRC749 inhaler. The following treatment was administered during the study: MGR001 250/50 BID for 21.5 ( $\pm 3$ ) days with the final dose in the clinic at Visit 3 (Day 22 [ $\pm 3$ ]). Each inhaler contained 60 doses.

Reporting group values	MGR001 250/50	Total	
Number of subjects	111	111	
Age categorical			
Units: Subjects			
Children (2-11 years)	0	0	
Adolescents (12-17 years)	11	11	
Adults (18-64 years)	90	90	
From 65-84 years	10	10	
85 years and over	0	0	
Age continuous			
Units: years			
arithmetic mean	41.4		
standard deviation	$\pm 16.33$	-	
Gender categorical			
Units: Subjects

## End points

### End points reporting groups

Reporting group title	MGR001 250/50
Reporting group description: Each subject was given MGR001 250/50, which contained 250 mcg FP and 50 mcg salmeterol [as xinafoate salt] inhalation powder, pre-dispensed for oral inhalation in the CRC749 inhaler. The following treatment was administered during the study: MGR001 250/50 BID for 21.5 ( $\pm 3$ ) days with the final dose in the clinic at Visit 3 (Day 22 [ $\pm 3$ ]). Each inhaler contained 60 doses.	
Subject analysis set title	Subjects with COPD
Subject analysis set type	Per protocol
Subject analysis set description: Number of subjects with COPD in safety analysis set	
Subject analysis set title	Subjects with Asthma
Subject analysis set type	Per protocol
Subject analysis set description: Number of subjects with asthma in safety analysis set	

### Primary: In Vitro Testing of FP and salmeterol pharmaceutical performance

End point title	In Vitro Testing of FP and salmeterol pharmaceutical performance <sup>[1]</sup>
End point description: All results obtained during analytical testing (i.e., microbiology, water content, emitted dose content uniformity, aerodynamic particle size distribution (APSD), assay, and degradations products) demonstrate that the fluticasone propionate (FP) and salmeterol pharmaceutical performance was preserved.  The data were not analysed in a standard way, hence only the conclusions from in vitro testing have been disclosed.	
End point type	Primary
End point timeframe: At Visit 3 Day 22	
Notes: [1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point. Justification: A statistical analysis of the in vitro data was not required per the protocol, therefore no statistical analysis was performed.	

End point values	MGR001 250/50			
Subject group type	Reporting group			
Number of subjects analysed	111 <sup>[2]</sup>			
Units: Number	0			

Notes:

[2] - The data were not analysed in a standard way.

### Statistical analyses

No statistical analyses for this end point

### Secondary: Disposition of Inhalers Dispensed and Suitability for Testing

End point title	Disposition of Inhalers Dispensed and Suitability for Testing
End point description:	

End point type	Secondary
End point timeframe:	
From Screening to Day 22, Visit 3	

<b>End point values</b>	MGR001 250/50			
Subject group type	Reporting group			
Number of subjects analysed	111			
Units: Number				
Inhalers Issued	111			
Inhalers Returned	111			
Inhalers Unsuitable or Unavailable for Testing	4			
Inhalers Available for Testing	107			
Inhalers Utilized for Testing	84			
Spare Inhalers	23			

### Statistical analyses

No statistical analyses for this end point

### Secondary: Number of subjects with treatment-emergent adverse event (TEAE)

End point title	Number of subjects with treatment-emergent adverse event (TEAE)
End point description:	

End point type	Secondary
End point timeframe:	
From screening to Day 22, Visit 3	

<b>End point values</b>	MGR001 250/50			
Subject group type	Reporting group			
Number of subjects analysed	111			
Units: Number				
Number of Subjects With a TEAE	34			
Number of Subjects With a Serious TEAE	0			
Number of Subjects With a Treatment-Related TEAE	15			
Leading to Discontinuation of Study Medication	1			
Number of Subjects Who Had TEAE Leading to Death	0			

## **Statistical analyses**

---

No statistical analyses for this end point

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

From screening to Day 22, Visit 3 (End of Study)

Assessment type	Non-systematic
