

Clinical trial results:

A Randomized, Observer-blind, Placebo-controlled, Phase 2 Study to Evaluate the Safety, Tolerability and Immunogenicity of Three Prime-boost Regimens of the Candidate Prophylactic Vaccines for Ebola Ad26. ZEBOV and MVA-BN-Filo in Healthy Adults in Europe

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	23 November 2018
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	19 January 2018
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

The primary objective of this study was to assess the safety and tolerability of 3 vaccination schedules of Ad26 vector expressing the glycoprotein of the Ebola virus Mayinga variant (Ad26.ZEBOV) and Modified Vaccinia Ankara - Bavarian Nordic vector expressing the glycoproteins of Ebola virus, Sudan virus and Marburg virus and the nucleoprotein of Tai Forest virus (MVA-BN-Filo) administered intramuscularly (IM) as heterologous 2-dose regimens on Days 1 and 29, Days 1 and 57, or Days 1 and 85 (Groups 1 to 3).

Protection of trial subjects:

This study was conducted in accordance with the ethical principles that have their origin in the Declaration of Helsinki and that are consistent with Good Clinical Practices and applicable regulatory requirements. Safety evaluations included measurement of vital signs, clinical laboratory tests (Hematology, serum chemistry and urinalysis), assessment of adverse events (AEs) including reactogenicity, physical examinations, and electrocardiograms (ECG).

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	15 June 2015
Long term follow-up planned	Yes
Long term follow-up rationale	Safety
Long term follow-up duration	12 Months
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	France: 197
Country: Number of subjects enrolled	United Kingdom: 224
Worldwide total number of subjects	421
EEA total number of subjects	421

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23	0

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	418
From 65 to 84 years	3
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

A total of 421 subjects were enrolled and treated. Of the 421 subjects, 406 subjects were enrolled in groups 1 to 3 (30 subjects in cohort I, 376 subjects in cohort II & III) and 15 subjects in group 4.

Period 1

Period 1 title	REGIMEN (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Subject

Arms

Are arms mutually exclusive?	Yes
Arm title	Group1: Cohort I: Ad26.ZEBOV then MVA-BN-Filo,28-Day Interval

Arm description:

Subjects received intramuscular (IM) injection of Ad26 vector expressing the glycoprotein of the Ebola virus Mayinga variant (Ad26.ZEBOV) at a dose of 5×10^{10} viral particles (vp) as Dose 1 on Day 1, followed by Modified Vaccinia Ankara - Bavarian Nordic vector expressing the glycoproteins of Ebola virus, Sudan virus and Marburg virus and the nucleoprotein of Tai Forest virus (MVA-BN-Filo) at a dose of 1×10^8 infectious units (Inf.U) (nominal titer) as Dose 2 on Day 29 in an open-label fashion.

Arm type	Experimental
Investigational medicinal product name	Ad26.ZEBOV
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intramuscular use

Dosage and administration details:

Subjects received IM injection of Ad26.ZEBOV at a dose of 5×10^{10} vp as Dose 1 on Day 1.

Investigational medicinal product name	MVA-BN-Filo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intramuscular use

Dosage and administration details:

Subjects received IM injection of MVA-BN-Filo at a dose of 1×10^8 Inf.U (nominal titer) as Dose 2 on Day 29.

Arm title	Group 2:Cohort I: Ad26.ZEBOV then MVA-BN-Filo, 56-Day Interval
------------------	--

Arm description:

Subjects received IM injection of Ad26.ZEBOV at a dose of 5×10^{10} vp as Dose 1 on Day 1, followed by MVA-BN-Filo at a dose of 1×10^8 Inf.U (nominal titer) as Dose 2 on Day 57 in an open-label fashion.

Arm type	Experimental
Investigational medicinal product name	MVA-BN-Filo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intramuscular use

Dosage and administration details:

Subjects received IM injection of MVA-BN-Filo at a dose of 1×10^8 Inf.U (nominal titer) as Dose 2 on Day 57.

Investigational medicinal product name	Ad26.ZEBOV
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intramuscular use

Dosage and administration details:

Subjects received IM injection of Ad26.ZEBOV at a dose of 5×10^{10} vp as Dose 1 on Day 1.

Arm title	Group 3:Cohort I: Ad26.ZEBOV then MVA-BN-Filo, 84-Day Interval
------------------	--

Arm description:

Subjects received IM injection of Ad26.ZEBOV at a dose of 5×10^{10} vp as Dose 1 on Day 1, followed by MVA-BN-Filo at dose of 1×10^8 Inf.U (nominal titer) as Dose 2 on Day 85 in an open-label fashion.

Arm type	Experimental
Investigational medicinal product name	Ad26.ZEBOV
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intramuscular use

Dosage and administration details:

Subjects received IM injection of Ad26.ZEBOV at a dose of 5×10^{10} vp as Dose 1 on Day 1.

Investigational medicinal product name	MVA-BN-Filo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intramuscular use

Dosage and administration details:

Subjects received IM injection of MVA-BN-Filo at a dose of 1×10^8 Inf.U (nominal titer) as Dose 2 on Day 85.

Arm title	Group1:Cohorts II & III:Ad26.ZEBOV/MVA-BN-Filo,28-Day Interval
------------------	--

Arm description:

Subjects received IM injection of Ad26.ZEBOV at a dose of 5×10^{10} vp as Dose 1 on Day 1, followed by MVA-BN-Filo at a dose of 1×10^8 Inf.U (nominal titer) as Dose 2 on Day 29 in a blinded fashion.

Arm type	Experimental
Investigational medicinal product name	Ad26.ZEBOV
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intramuscular use

Dosage and administration details:

Subjects received IM injection of Ad26.ZEBOV at a dose of 5×10^{10} vp as Dose 1 on Day 1.

Investigational medicinal product name	MVA-BN-Filo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intramuscular use

Dosage and administration details:

Subjects received IM injection of MVA-BN-Filo at a dose of 1×10^8 Inf.U (nominal titer) as Dose 2 on Day 29.

Arm title	Group 1: Cohorts II & III: Placebo, Placebo, 28-Day Interval
------------------	--

Arm description:

Subjects received Placebo (0.9% saline) as Dose 1 on Day 1, followed by placebo (0.9% saline) as Dose 2 on Day 29 in a blinded fashion.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intramuscular use

Dosage and administration details:

Subjects received Placebo (0.9% saline) as Dose 1 on Day 1, followed by placebo (0.9% saline) as Dose 2 on Day 29.

Arm title	Group2:Cohorts II & III:Ad26.ZEBOV/MVA-BN-Filo,56-Day Interval
------------------	--

Arm description:

Subjects received IM injection of Ad26.ZEBOV at a dose of 5×10^{10} vp as Dose 1 on Day 1, followed by MVA-BN-Filo at a dose of 1×10^8 Inf.U (nominal titer) as Dose 2 on Day 57 in a blinded fashion.

Arm type	Experimental
Investigational medicinal product name	Ad26.ZEBOV
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intramuscular use

Dosage and administration details:

Subjects received IM injection of Ad26.ZEBOV at a dose of 5×10^{10} vp as Dose 1 on Day 1.

Investigational medicinal product name	MVA-BN-Filo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intramuscular use

Dosage and administration details:

Subjects received IM injection of MVA-BN-Filo at a dose of 1×10^8 Inf.U (nominal titer) as Dose 2 on Day 57.

Arm title	Group 2: Cohorts II & III: Placebo, Placebo, 56-Day Interval
------------------	--

Arm description:

Subjects received Placebo (0.9% saline) as Dose 1 on Day 1, followed by placebo (0.9% saline) as Dose 2 on Day 57 in a blinded fashion.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intramuscular use

Dosage and administration details:

Subjects received Placebo (0.9% saline) as Dose 1 on Day 1, followed by placebo (0.9% saline) as Dose 2 on Day 57.

Arm title	Group3:Cohorts II & III:Ad26.ZEBOV/MVA-BN-Filo,84-Day Interval
------------------	--

Arm description:

Subjects received IM injection of Ad26.ZEBOV at a dose of 5×10^{10} vp as Dose 1 on Day 1, followed by of MVA-BN-Filo at a dose of 1×10^8 Inf.U (nominal titer) as Dose 2 on Day 85 in a blinded fashion.

Primary: Group 1, 2 and 3: Percentage of Subjects with Adverse Events (Unsolicited Adverse Events)

End point title	Group 1, 2 and 3: Percentage of Subjects with Adverse Events (Unsolicited Adverse Events) ^{[1][2]}
-----------------	---

End point description:

An adverse event (AE) is any untoward medical occurrence in a clinical study subject administered a medicinal product, it does not necessarily have a causal relationship with the treatment. An AE can therefore be any unfavorable and unintended sign (including an abnormal finding), symptom, or disease temporally associated with the use of a medicinal (investigational or non-investigational) product, whether or not related to that medicinal product. Full Analysis set included all subjects who were randomized and received at least one dose of study vaccine, regardless of the occurrence of protocol deviations.

End point type	Primary
----------------	---------

End point timeframe:

From signing of ICF (Inform Consent Form) Up to 42-day post-boost visit (Day 71 for Group 1; Day 99 for Group 2; and Day 127 for Group 3)

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Descriptive statistics were done, no inferential statistical analyses were performed.

[2] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Endpoint was planned to be reported for the specified arms only.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
07 May 2015	This amendment was created upon request of the Medicines and Healthcare Products Regulatory Agency (MHRA). Further modifications were made to implement a site-specific request, to update the list of references and to correct minor inconsistencies.
18 August 2015	This amendment was created to implement site-specific requests and only subjects who received active vaccine will enter a long-term follow-up phase.
26 January 2016	This amendment includes the request of the Center for Biologics Evaluation and Research (CBER, a division of US Food and Drug Administration [FDA]) to extend the safety follow-up to 6 months post-boost.
01 September 2016	The sponsor halted vaccinations following a case of Miller Fisher syndrome after receipt of MVA-BN-Filo or placebo in this clinical study, until a revised informed consent form (ICF) containing updated safety language for the current study VAC52150EBL2001 was prepared and approval to restart the study was granted by the relevant competent authority. As a result of the pause, some subjects were outside the protocol-defined boost vaccination window. Information was added to clarify the procedures that need to be followed for these subjects. As requested by the Agence Nationale de Sécurité du Médicament et des produits de santé (ANSM), wording on the collection of Immediate Reportable Events was added after observation of the case of Miller Fisher syndrome. Randomization to Group 3 will be stopped to focus on the schedules for which an indication will be sought.
20 April 2017	This amendment was created due to significant delays in scheduled boost vaccinations caused by study pauses required for safety evaluations. Since many subjects in France have had no boost vaccination and many subjects in the United Kingdom (UK) have had a late boost vaccination, it will be very difficult to evaluate the planned dosing regimens. Therefore, no further subjects will be recruited in the entire study (ie, UK and France). Vaccinated subjects in both countries will still be followed per protocol for safety.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
27 April 2016	Study vaccinations were halted due to the occurrence of a serious adverse event (Miller Fisher syndrome). The event was considered to be possibly related to study vaccination by the investigator and therefore met the pre-specified pausing rules installed for this study. Per IDMC recommendation, further investigations and analyses were performed, and all study vaccinations were halted until the safety language of the ICF was updated.	27 May 2016

20 May 2016	A second serious adverse event was reported (initially reported as 'possible cervical myelitis', ultimately diagnosed as small fiber neuropathy), which also was assessed as possibly related to study vaccination by the investigator and investigated and analyzed further. This event resulted in halt of screening and all study vaccinations.	27 September 2016
