

## Clinical trial results:

### 26-Week Open-Label Extension Study Evaluating The Safety And Tolerability Of Flexible Doses Of Oral Ziprasidone In Children And Adolescents With Bipolar I Disorder (Manic Or Mixed)

#### Summary

EudraCT number	2015-000607-15
Trial protocol	Outside EU/EEA
Global end of trial date	24 January 2008

#### Results information

Result version number	v1
This version publication date	16 March 2016
First version publication date	20 June 2015

#### Trial information

##### Trial identification

Sponsor protocol code	A1281133
-----------------------	----------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT00265330
WHO universal trial number (UTN)	-

Notes:

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	10 July 2008
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	24 January 2008
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To assess the safety and tolerability of oral ziprasidone (40-80 milligram [mg] twice a day [BID]) during long-term, open-label administration in children and adolescents with Bipolar I Disorder - Single Manic Episode; Bipolar I Disorder - Most Recent Episode Manic, or Bipolar I Disorder - Most Recent Episode Mixed.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and in compliance with all International Conference on Harmonization (ICH) Good Clinical Practice (GCP) Guidelines. All the local regulatory requirements pertinent to safety of trial subjects were followed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	17 March 2006
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	United States: 162
Worldwide total number of subjects	162
EEA total number of subjects	0

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	41
Adolescents (12-17 years)	120
Adults (18-64 years)	1
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

The number of subjects entering this trial was determined by the number of subjects electing to continue treatment after completing or withdrawing from the preceding double-blind study (A1281132: NCT00257166; 2015-000606-20).

### Pre-assignment

Screening details:

A total of 169 subjects from the parent study were assigned to the extension study and 162 continued on and received study treatment in the extension study.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

### Arms

Arm title	Ziprasidone
-----------	-------------

Arm description:

Dosing was flexible, with dosing adjustments made at the discretion of the investigator to maintain optimal efficacy and tolerability.

Arm type	Experimental
Investigational medicinal product name	Ziprasidone
Investigational medicinal product code	
Other name	Geodon
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

For subjects having a body weight of 45 kilograms (kg) or greater, the target dosage range was 40-80 milligrams (mg) twice per day (BID) (80-160 mg/day). For subjects having a body weight under 45 kg, the maximum permitted dose was 80 mg/day (40 mg BID).

Number of subjects in period 1	Ziprasidone
Started	162
Completed	67
Not completed	95
Consent withdrawn by subject	34
Withdrew Consent	1
Site Closed by Sponsor	1
Subject Wanted to Start Psychotherapy	1
'Adverse Event '	41
Discharged from Unit for Long Term Care	1
Began Taking Formulary Geodon	1

Protocol Violation	1
Lost to follow-up	8
Principal Investigators Request	1
Lack of efficacy	4
Family Scheduling Conflicts	1

## Baseline characteristics

---

### Reporting groups

Reporting group title	Ziprasidone
-----------------------	-------------

Reporting group description:

Dosing was flexible, with dosing adjustments made at the discretion of the investigator to maintain optimal efficacy and tolerability.

---

<b>Reporting group values</b>	Ziprasidone	Total	
Number of subjects	162	162	
Age categorical Units: Subjects			
Age Continuous Units: years arithmetic mean standard deviation	13.3 ± 2.1	-	
Gender, Male/Female Units: subjects			
Female	72	72	
Male	90	90	

## End points

### End points reporting groups

Reporting group title	Ziprasidone
Reporting group description: Dosing was flexible, with dosing adjustments made at the discretion of the investigator to maintain optimal efficacy and tolerability.	

### Primary: Young Mania Rating Scale (YMRS) Total Score Change from Baseline

End point title	Young Mania Rating Scale (YMRS) Total Score Change from Baseline <sup>[1]</sup>
End point description: YMRS: 11-item instrument with scales 0 (normal) to 4 (highest abnormal) for 7 items and 0 (normal) to 8 (highest abnormal) for 4 items. Total possible 0 - 60. Baseline is from parent study A1281132. The Safety Analysis Set includes all subjects who took at least one dose of study medication in this open-label extension study. (Row: n=number subjects with observation).	
End point type	Primary
End point timeframe: Baseline and 26 Weeks; 26 Weeks Last Observation Carried Forward (LOCF)	

#### Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive data was planned to be reported for this endpoint.

End point values	Ziprasidone			
Subject group type	Reporting group			
Number of subjects analysed	162			
Units: score on scale				
arithmetic mean (standard deviation)				
Week 2 (n=153)	-3.8 (± 9)			
Week 6 (n=122)	-4 (± 9.1)			
Week 18 (n=76)	-6.3 (± 12.7)			
Week 26 (n=69)	-6.1 (± 11.6)			
Early Termination (n=59)	1.5 (± 11.3)			
Week 26-LOCF (n=153)	-3.3 (± 10.7)			

### Statistical analyses

No statistical analyses for this end point

### Primary: Clinical Global Impression of Severity (CGI-S) Change from Baseline

End point title	Clinical Global Impression of Severity (CGI-S) Change from Baseline <sup>[2]</sup>
-----------------	--

#### End point description:

CGI-S Scale: standardized assessment tool to rate severity of subject's illness; assesses investigator's impression of subject's current illness state. Change: score at observation minus score at baseline. Score: 1 (not ill at all) to 7 (among most extremely ill). Baseline = last available observation from parent double-blind study (A1281132). The Safety Analysis Set includes all subjects who took at least one dose of study medication in this open-label extension study. (Row: n=number subjects with

observation).

End point type	Primary
----------------	---------

End point timeframe:

Baseline and 26 Weeks; 26 Weeks LOCF

Notes:

[2] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive data was planned to be reported for this endpoint.

End point values	Ziprasidone			
Subject group type	Reporting group			
Number of subjects analysed	162			
Units: score on scale				
arithmetic mean (standard deviation)				
Week 1 (n=159)	-0.2 (± 0.9)			
Week 2 (n=150)	-0.5 (± 1.2)			
Week 6 (n=122)	-0.4 (± 1.1)			
Week 10 (n=99)	-0.7 (± 1.3)			
Week 14 (n=85)	-0.7 (± 1.2)			
Week 18 (n=76)	-0.7 (± 1.5)			
Week 22 (n=70)	-0.8 (± 1.3)			
Week 26 (n=69)	-1.1 (± 1.4)			
Early Termination (n=48)	0.4 (± 1.1)			
Week 26-LOCF (n=160)	-0.4 (± 1.3)			

## Statistical analyses

No statistical analyses for this end point

## Primary: Incidence of Lab Abnormalities

End point title	Incidence of Lab Abnormalities <sup>[3]</sup>
-----------------	---

End point description:

Number of subjects with an abnormal lab value for those parameters with 5 percent (%) or greater incidence of abnormality. Total number of subjects with given laboratory test at given visit. Range: N=136-134, with the exception of Insulin (N=115).

End point type	Primary
----------------	---------

End point timeframe:

Week 26

Notes:

[3] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive data was planned to be reported for this endpoint.

End point values	Ziprasidone			
Subject group type	Reporting group			
Number of subjects analysed	136			
Units: subjects				
number (not applicable)				
Bicarbonate (N=136)	44			
Urine blood/Hemoglobin (N=136)	34			

Urine ketones (N=136)	32			
Testosterone (N=134)	22			
Urine specific gravity (N=136)	13			
Urine red blood cells (N=136)	13			
Monocytes (N=134)	9			
Triglycerides (N=136)	10			
Urine white blood cells (N=136)	10			
Insulin (N=115)	8			

## Statistical analyses

No statistical analyses for this end point

### Primary: Change in Low-Density Lipoprotein (LDL) Cholesterol and Fasting Cholesterol

End point title	Change in Low-Density Lipoprotein (LDL) Cholesterol and Fasting Cholesterol <sup>[4]</sup>
-----------------	--

End point description:

Mean Change: lab value at observation minus lab value at baseline. The Safety Analysis Set includes all subjects who took at least one dose of study medication in this open-label extension study. (Row: n= total number of subjects with at least 1 observation of the given laboratory test).

End point type	Primary
----------------	---------

End point timeframe:

Week 6, Week 26

Notes:

[4] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive data was planned to be reported for this endpoint.

End point values	Ziprasidone			
Subject group type	Reporting group			
Number of subjects analysed	134			
Units: milligram /deciliter (mg/dL)				
arithmetic mean (standard deviation)				
LDL cholesterol Week 6 (n=113)	-7.5 (± 19.7)			
LDL cholesterol Week 26 (n=59)	-8.9 (± 19.5)			
LDL cholesterol Early Termination (n=44)	-7.6 (± 20.1)			
Fasting cholesterol Week 6 (n=113)	-7.7 (± 21.8)			
Fasting cholesterol Week 26 (n=59)	-10.3 (± 22.7)			
Fasting cholesterol Early Termination (n=44)	-8.6 (± 24.9)			

## Statistical analyses

No statistical analyses for this end point

### Primary: Change in Hormones

End point title	Change in Hormones <sup>[5]</sup>
End point description: Mean Change: lab value at observation minus lab value at baseline. The Safety Analysis Set includes all subjects who took at least one dose of study medication in this open-label extension study. (Row: n= total number of subjects with at least 1 observation of the given laboratory test).	
End point type	Primary
End point timeframe: Week 6, Week 26	

Notes:

[5] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive data was planned to be reported for this endpoint.

End point values	Ziprasidone			
Subject group type	Reporting group			
Number of subjects analysed	131			
Units: nanogram/deciliter (ng/dL)				
arithmetic mean (standard deviation)				
Testosterone Week 6 (n=80)	0.9 (± 84.3)			
Testosterone Week 26 (n=38)	-23.4 (± 112.9)			
Testosterone Early Termination (n=32)	-0.4 (± 61.8)			
Prolactin Week 6 (n=110)	2.7 (± 13.2)			
Prolactin Week 26 (n=59)	1.9 (± 8.5)			
Prolactin Early Termination (n=40)	1 (± 11.6)			
Insulin-like growth factor Week 6 (n=95)	-19.9 (± 63.4)			
Insulin-like growth factor Week 26 (n=47)	-9.2 (± 68.1)			
Insulin-like growth factor Early Term (n=34)	-8.4 (± 66.5)			

## Statistical analyses

No statistical analyses for this end point

### Primary: Mean Change from Baseline in Supine Systolic Blood Pressure

End point title	Mean Change from Baseline in Supine Systolic Blood Pressure <sup>[6]</sup>
End point description: Mean Change: vital sign value at observation minus vital sign value at baseline.	
End point type	Primary
End point timeframe: Week 1 through Week 26	

Notes:

[6] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive data was planned to be reported for this endpoint.

<b>End point values</b>	Ziprasidone			
Subject group type	Reporting group			
Number of subjects analysed	162			
Units: millimeters of mercury (mm Hg)				
arithmetic mean (standard deviation)				
Week 1 (n=155)	0.4 (± 11.4)			
Week 2 (n=142)	1.1 (± 10.4)			
Week 6/pre-dose (n=115)	1.2 (± 9.5)			
Week 6/5-7 hours post dose (n=108)	1.2 (± 9.9)			
Week 10 (n=93)	1.4 (± 10.1)			
Week 14 (n=82)	-0.7 (± 10.1)			
Week 18 (n=74)	0.4 (± 11.7)			
Week 22 (n=69)	1.7 (± 10.5)			
Week 26 (n=68)	2.9 (± 11.4)			
Early Termination (n=75)	1.3 (± 11.8)			

## Statistical analyses

No statistical analyses for this end point

### Primary: Mean Change from Baseline in Supine Diastolic Blood Pressure

End point title	Mean Change from Baseline in Supine Diastolic Blood
End point description: Mean Change: vital sign value at observation minus vital sign value at baseline.	
End point type	Primary
End point timeframe: Week 1 through Week 26	

Notes:

[7] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive data was planned to be reported for this endpoint.

<b>End point values</b>	Ziprasidone			
Subject group type	Reporting group			
Number of subjects analysed	162			
Units: millimeters mercury (mm Hg)				
arithmetic mean (standard deviation)				
Week 1 (n=155)	-0.5 (± 8.8)			
Week 2 (n=142)	0.5 (± 8.7)			
Week 6/pre-dose (n=115)	0.6 (± 9.7)			
Week 6/5-7 hours post dose (n=108)	0.5 (± 8.8)			
Week 10 (n=93)	-0.4 (± 10.1)			
Week 14 (n=82)	-2.4 (± 8.3)			
Week 18 (n=74)	-0.6 (± 9.8)			
Week 22 (n=69)	-0.7 (± 9.4)			
Week 26 (n=68)	1.5 (± 10.4)			
Early Termination (n=75)	1.3 (± 8.1)			

## Statistical analyses

Week 2 (n=137)	3.5 (± 17.7)			
Week 6/pre-dose (n=111)	7.6 (± 17.7)			
Week 6/5-7 hours post dose (n=107)	7 (± 18.4)			
Week 10 (n=91)	4.3 (± 18.8)			
Week 14 (n=81)	6.2 (± 17.4)			
Week 18 (n=73)	7.4 (± 15.4)			
Week 22 (n=68)	8.1 (± 16.1)			
Week 26 (n=64)	7.1 (± 15.2)			
Early Termination (n=45)	2.7 (± 17)			

## Statistical analyses

No statistical analyses for this end point

### Primary: Frequency of largest categorical increases in QTcF for males

End point title | Frequency of largest categorical increases in QTcF for males<sup>[17]</sup>

End point description:

QT intervals (observed in an electrocardiogram) corrected with Fridericia's Formula (QTcF). Number of subjects with corresponding categorical increase in QTcF.

End point type | Primary

End point timeframe:

Week 26 (end of study)

Notes:

[17] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive data was planned to be reported for this endpoint.

End point values	Ziprasidone			
Subject group type	Reporting group			
Number of subjects analysed	89			
Units: subjects				
≥450 msec (millisecond)	0			
≥460 msec	0			
≥480 msec	0			
≥30 msec increase	28			
≥60 msec increase	0			

## Statistical analyses

No statistical analyses for this end point

### Primary: Frequency of largest categorical increases in QTcF for females

End point title | Frequency of largest categorical increases in QTcF for

End point description:

QT interval (observed in an electrocardiogram) corrected using Fridericia Formula (QTcF). Number of subjects with corresponding categorical increase in QTcF.

End point type | Primary

End point timeframe:

Week 26 (end of study)

Notes:

[18] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive data was planned to be reported for this endpoint.

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Treatment emergent adverse events are reported from time of first dose of study treatment up to 6 days after last dose of study treatment.

Adverse event reporting additional description:

Safety population = all randomized subjects with at least 1 dose of study treatment. An Adverse Event (AE) term may be reported as both a serious and non-serious AE, but are distinct events. AE may = serious for 1 subject and = non-serious for another subject or subject may have experienced both a serious and non-serious episode of the same event.

Assessment type	Systematic

### Reporting groups

Reporting group title	Ziprasidone
-----------------------	-------------

Reporting group description:

Dosing was flexible, with dosing adjustments made at the discretion of the investigator to maintain optimal efficacy and tolerability. For subjects having a body weight of 45 kg or greater, the target dosage range was 40-80 mg BID (80-160 mg/day). For subjects having a body weight under 45 kg, the maximum permitted dose was 80 mg/day (40 mg BID).

<b>Serious adverse events</b>	Ziprasidone		
Total subjects affected by serious adverse events			
subjects affected / exposed	17 / 162 (10.49%)		
number of deaths (all causes)	0		
number of deaths resulting from adverse events	0		
Injury, poisoning and procedural complications			
Overdose			
subjects affected / exposed	1 / 162 (0.62%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0

Insomnia			
subjects affected / exposed	22 / 162 (13.58%)		
occurrences (all)	26		

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
06 December 2006	1- In assessments, fasting glucose and glycosylated hemoglobin (HbA1c) were added to clinical laboratory testing. 2- Daily dose of study medication for subjects with a body weight of $\geq 45$ kg changed to 40-80 mg/day from 60-80 mg/day. 3- In trial design, minimum dose of the preceding double-blind study was decided for the dose reduction in subjects $\geq 45$ kg, who cannot tolerate a dose of 80 mg/day. 4- In Trial Treatment, inhaled steroids were also added along with the topical steroids in the category of medicines for which use is allowed only if taken during preceding double-blind study with stable dose and clinical condition; and benzhexol and other anticholinergics were added in the category of medicines which are allowed without condition. 5- An additional category ( $\geq 460$ msec) was used in QTcF reporting. 6- A change was made in the reporting priorities of AEs. A decision was made to report the treatment-emergent AEs as the main safety output, and "All AEs" were reported as additional tables. Combined data are the main analyses and consist of all subjects, regardless of the treatment assignment in the preceding double-blind study (A1281132).

Notes:

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

The AE tables were amended to incorporate previously unreported AEs that were found during an independent audit and verified by the investigators.

Notes:
