Clinical trial results:
Treatment of chronic subdural hematoma by corticosteroids : a prospective randomized study

Summary

EudraCT number	2015-000927-96
Trial protocol	FR
Global end of trial date	20 March 2019

Results information

Result version number	v1 (current)
This version publication date	12 January 2024
First version publication date	12 January 2024

Trial information

Trial identification

Sponsor protocol code	SUCRE

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02650609
WHO universal trial number (UTN)	-
Other trial identifiers	SUCRE: Morandi SUCRE

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	05 March 2020
Is this the analysis of the primary completion data?	Yes
Primary completion date	20 March 2019
Global end of trial reached?	Yes
Global end of trial date	20 March 2019
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To show that a treatment with methylprednisolone can decrease the need for surgical treatment in patients with chronic subdural hematoma without clinical or radiological signs of severity

Protection of trial subjects:

An independent Data and Safety Monitoring Board will be constituted at the beginning of the study with 5
members who are not involved in the study, including a neurosurgeon, a neurologist, a pharmacologist, a
methodologist, and a statistician.
In order to prematurely stop the study in case of efficacy, two interim analyses are planned. These analyses
will be performed on the primary endpoint but will also evaluate safety data in order to rapidly detect any
unexpected serious adverse events due to the absence of systematic surgical treatment or to corticosteroids.
The Data and Safety Monitoring Board will meet after each interim analysis and at the end of the study. It
can also meet on request of the coordinating investigator or the methodologist if serious adverse events or
results which can jeopardize the existence of the protocol occur.
The Data and Safety Monitoring Board will propose to stop the study if the interim statistical analyses reache significance or if it appears that study continuation would be contrary to ethics rules (occurrence of
serious adverse events, publication of trial results providing the answer to the question...).

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 October 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	France: 198
Worldwide total number of subjects	198
EEA total number of subjects	198

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	38
From 65 to 84 years	123
85 years and over	37

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

The screening phase will take place during the hospitalisation or the consultation during which the diagnosis
of CSDH will be confirmed

Period 1

Period 1 title	Baseline V1 (D0)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Blinding implementation details:

This study is double-blind. Active treatment and placebo will be identical and prepared in capsules by the PPRIGO platform at Brest University Hospital

Arms

Are arms mutually exclusive?	Yes
Arm title	Methylprednisolone

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Methylprednisolone
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Pillules
Routes of administration	Oral use

Dosage and administration details:

Capsules will be administered orally in the morning, during breakfast with a glass of water.
Dose is adapted according to the weight of the patient (1mg/kg):
- <60 kg: 3 pills of 16 mg/day
- 60-80kg: 4 pills of 16 mg/day
- >80kg: 5 pills of 16 mg/day
The duration of the treatment is 21 days. No progressive decrease of treatment dose is necessary because
treatment duration is less than one month.
The duration of treatment was choosen to avoid the necessity of progressive decrease of treatment dose and
is supported by the pathophysiology of the CSDH formation (inflammatory process supposed to be maximal
at 2 to 3 weeks).

Arm title	Placebo

Arm description: -

Arm type	Placebo
Investigational medicinal product name	Placebo

Adverse events

Adverse events information	
Timeframe for reporting adverse events: From 24/06/2016 to 20/03/2019	
Assessment type	Systematic

Dictionary used	
Dictionary name	MedDRA
Dictionary version	22.0

Reporting groups	
Reporting group title	Methylprednisolone at M6

Reporting group description:

Methylprednisolone is administered orally with one administration in the morning during breakfast with water. Dose is adapted according to the weight of the patient (1mg/kg):
<60 kg : 3 pills of 16 mg/day
60-80kg : 4 pills of 16 mg/day
>80kg : 5 pills of 16 mg/day
Treatment is prescribed for 3 weeks with a sudden stop without decrease.

Reporting group title	Placebo at M6

Hypercalcaemia subjects affected / exposed occurrences (all)	0 / 94 (0.00%) 0		
Hyperkalaemia subjects affected / exposed occurrences (all)	8 / 94 (8.51%) 8		
Hyponatraemia subjects affected / exposed occurrences (all)	2 / 94 (2.13%) 2		
Hypoglycaemia subjects affected / exposed occurrences (all)	1 / 94 (1.06%) 3		
Vitamin D deficiency subjects affected / exposed occurrences (all)	1 / 94 (1.06%) 1		

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
18 January 2016	- Addition of a non-inclusion criteria: diabetic patient - Correction of the inclusion criteria: no clinical sign of severity (Glasgow scale > 12, motor deficit ≥ 4/5) - Update of the list of investigators (modification of an investigator and a location) - Change of research director
25 August 2017	- Update of the Investigational Drug File (addition of an appeal procedure for manufacture of the experimental treatment and modification of the size of the capsules) - Update of the list of investigators (modification of principal investigators and closure of centers)
27 April 2018	Changes: - Increase in the inclusion period and the duration of the study. - Update of the list of investigators (modification of principal investigators and closure of centers) Rationale: - 174/202 patients are included today (27/04/2018). The end date of inclusions is scheduled for 24/06/2018. In order to reach the necessary number of subjects, we want to increase the inclusion period by 4 months. i.e. until 24/10/2018. The end of the study will also be extended to 24/10/2019. - The principal investigators are modified for 2 centers and one center is closed for lack of inclusions.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
