

## Clinical trial results:

### A Randomized Open-Label Phase III Study of Single Agent Pembrolizumab versus Single Agent Chemotherapy per Physician's Choice for Metastatic Triple Negative Breast Cancer (mTNBC) – (KEYNOTE-119)

#### Summary

EudraCT number	2015-001020-27
Trial protocol	DE SE NL BE FR GB PL ES IT
Global end of trial date	10 November 2020

#### Results information

Result version number	v1 (current)
This version publication date	25 November 2021
First version publication date	25 November 2021

#### Trial information

##### Trial identification

Sponsor protocol code	3475-119
-----------------------	----------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02555657
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Merck Sharp & Dohme Corp.
Sponsor organisation address	2000 Galloping Hill Road, Kenilworth, NJ, United States, 07033

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	10 November 2020
Is this the analysis of the primary completion data?	Yes
Primary completion date	11 April 2019
Global end of trial reached?	Yes
Global end of trial date	10 November 2020
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

In this study, participants with metastatic triple negative breast cancer (mTNBC) were randomly assigned to receive either single agent pembrolizumab or single agent chemotherapy chosen by the treating physician (Treatment of Physician's Choice, TPC) in accordance with local regulations and guidelines, consisting of either capecitabine, eribulin, gemcitabine, or vinorelbine. The primary study hypothesis was that pembrolizumab extends overall survival compared to TPC.

Protection of trial subjects:

This study was conducted in conformance with Good Clinical Practice standards and applicable country and/or local statutes and regulations regarding ethical committee review, informed consent, and the protection of human subjects participating in biomedical research.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	13 October 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Argentina: 7
Country: Number of subjects enrolled	Australia: 21
Country: Number of subjects enrolled	Belgium: 4
Country: Number of subjects enrolled	Brazil: 27
Country: Number of subjects enrolled	Colombia: 3
Country: Number of subjects enrolled	France: 33
Country: Number of subjects enrolled	Germany: 33
Country: Number of subjects enrolled	Guatemala: 5
Country: Number of subjects enrolled	Hong Kong: 5
Country: Number of subjects enrolled	Ireland: 7
Country: Number of subjects enrolled	Italy: 28
Country: Number of subjects enrolled	Japan: 90
Country: Number of subjects enrolled	Korea, Republic of: 32
Country: Number of subjects enrolled	Malaysia: 14
Country: Number of subjects enrolled	Mexico: 22
Country: Number of subjects enrolled	Netherlands: 9
Country: Number of subjects enrolled	New Zealand: 2
Country: Number of subjects enrolled	Peru: 8

Country: Number of subjects enrolled	Philippines: 9
Country: Number of subjects enrolled	Poland: 25
Country: Number of subjects enrolled	Russian Federation: 45
Country: Number of subjects enrolled	Singapore: 13
Country: Number of subjects enrolled	South Africa: 4
Country: Number of subjects enrolled	Spain: 29
Country: Number of subjects enrolled	Sweden: 9
Country: Number of subjects enrolled	Switzerland: 4
Country: Number of subjects enrolled	Taiwan: 14
Country: Number of subjects enrolled	Thailand: 4
Country: Number of subjects enrolled	Turkey: 19
Country: Number of subjects enrolled	United Kingdom: 37
Country: Number of subjects enrolled	United States: 60
Worldwide total number of subjects	622
EEA total number of subjects	177

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	524
From 65 to 84 years	97
85 years and over	1

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

Per protocol, response/progression or adverse events during the second pembrolizumab course were not counted towards efficacy outcome measures or safety outcome measures respectively.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Pembrolizumab

Arm description:

Participants received pembrolizumab 200 mg intravenously (IV) every 3 weeks (Q3W) for up to 35 administrations (up to ~2 years). Qualified participants who received first course of pembrolizumab but continued to experience disease progression may have, at investigator's discretion, initiated a second course of pembrolizumab at 200 mg IV Q3W for up to 17 administrations (up to ~1 year).

Arm type	Experimental
Investigational medicinal product name	pembrolizumab
Investigational medicinal product code	
Other name	MK-3475, KEYTRUDA®
Pharmaceutical forms	Infusion
Routes of administration	Intravenous use

Dosage and administration details:

Participants receive pembrolizumab 200 mg intravenously (IV) every 3 weeks (Q3W) for up to 35 administrations (up to ~2 years). Qualified participants who received first course of pembrolizumab but continued to experience disease progression may have, at investigator's discretion, initiated a second course of pembrolizumab at 200 mg IV Q3W for up to 17 administrations (up to ~1 year).

<b>Arm title</b>	Chemotherapy
------------------	--------------

Arm description:

Participants received capecitabine, eribulin, gemcitabine, or vinorelbine as single agent chemotherapy chosen by the treating physician (Treatment of Physician's Choice, TPC) in accordance with local regulations and guidelines.

Arm type	Active comparator
Investigational medicinal product name	capecitabine
Investigational medicinal product code	
Other name	XELODA®
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Participants receive capecitabine as TPC in accordance with local regulations and guidelines.

Investigational medicinal product name	eribulin
Investigational medicinal product code	
Other name	HALAVEN®
Pharmaceutical forms	Infusion
Routes of administration	Intravenous use

Dosage and administration details:

Participants receive eribulin as TPC in accordance with local regulations and guidelines.

Investigational medicinal product name	gemcitabine
Investigational medicinal product code	
Other name	GEMZAR®
Pharmaceutical forms	Infusion
Routes of administration	Intravenous use

Dosage and administration details:

Participants receive gemcitabine as TPC in accordance with local regulations and guidelines.

Investigational medicinal product name	vinorelbine
Investigational medicinal product code	
Other name	NAVELBINE®
Pharmaceutical forms	Infusion
Routes of administration	Intravenous use

Dosage and administration details:

Participants receive vinorelbine as TPC in accordance with local regulations and guidelines.

<b>Number of subjects in period 1</b>	Pembrolizumab	Chemotherapy
Started	312	310
Treated	309	292
Completed	0	0
Not completed	312	310
Consent withdrawn by subject	11	32
Physician decision	-	1
Death	274	262
Sponsor Decision	27	15

## Baseline characteristics

### Reporting groups

Reporting group title	Pembrolizumab
Reporting group description:	
Participants received pembrolizumab 200 mg intravenously (IV) every 3 weeks (Q3W) for up to 35 administrations (up to ~2 years). Qualified participants who received first course of pembrolizumab but continued to experience disease progression may have, at investigator's discretion, initiated a second course of pembrolizumab at 200 mg IV Q3W for up to 17 administrations (up to ~1 year).	
Reporting group title	Chemotherapy
Reporting group description:	
Participants received capecitabine, eribulin, gemcitabine, or vinorelbine as single agent chemotherapy chosen by the treating physician (Treatment of Physician's Choice, TPC) in accordance with local regulations and guidelines.

## Secondary: Progression-Free Survival per RECIST 1.1 in Participants With PD-L1 CPS $\geq 10$

End point title	Progression-Free Survival per RECIST 1.1 in Participants With PD-L1 CPS $\geq 10$
-----------------	---

### End point description:

Progression-Free Survival (PFS), based on BICR assessment per RECIST 1.1, was defined as the time from randomization to the first documented progressive disease (PD) or death due to any cause, whichever occurred first. Per RECIST 1.1, PD was defined as  $\geq 20\%$  increase in the sum of diameters of target lesions. In addition to the relative increase of 20%, the sum must also demonstrate an absolute increase of  $\geq 5$  mm. The appearance of one or more new lesions was also considered PD. The analysis population for this endpoint consisted of all participants with PD-L1 CPS  $\geq 10$  who were included in a treatment group at randomization.

End point description:

Disease Control Rate (DCR), based on BICR assessment per RECIST 1.1, was defined as the percentage of participants who had a Complete Response (CR: Disappearance of all target lesions) or Partial Response (PR: At least a 30% decrease in the sum of diameters of target lesions) or Stable Disease for at least 24 weeks (SD: Neither sufficient shrinkage to qualify for PR nor sufficient increase to qualify for Progressive Disease [PD: At least a 20% increase in the sum of diameters of target lesions and an absolute increase of at least 5 mm. The appearance of one or more new lesions was also considered PD.]) The analysis population for this endpoint consisted of all participants with PD-L1 CPS  $\geq 10$  who were included in a treatment group at randomization.

End point type	Secondary

### Secondary: Number of Participants Who Experienced One or More Adverse Events

End point title	Number of Participants Who Experienced One or More Adverse Events
-----------------	---

End point description:

An adverse event (AE) is any untoward medical occurrence in a study participant administered a pharmaceutical product that does not necessarily have to have a causal relationship with this treatment. An AE can therefore be any unfavorable and unintended sign, symptom, or disease temporally associated with the use of a medicinal product, whether or not related to the medicinal product. The analysis population for this endpoint consisted of all randomized participants who received at least 1 dose of study treatment.

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

All-Cause Mortality and Adverse Events (including first and second courses): Up to approximately 60 months

Adverse event reporting additional description:

All-cause mortality includes all randomized participants. Serious and other AEs include participants who received at least 1 dose of study treatment. MedDRA preferred terms "Neoplasm progression", "Malignant neoplasm progression" and "Disease progression" unrelated to drug were excluded as AEs.

Assessment type	Systematic

### Reporting groups

Reporting group title	Pembrolizumab First Course
-----------------------	----------------------------

Reporting group description:

Participants received pembrolizumab 200 mg IV Q3W for up to 35 administrations (up to ~2 years).

Reporting group title	Chemotherapy
-----------------------	--------------

Reporting group description:

Participants received capecitabine, eribulin, gemcitabine, or vinorelbine as TPC in accordance with local regulations and guidelines.

Reporting group title	Pembrolizumab Second Course
-----------------------	-----------------------------

Reporting group description:

Qualified participants who received the first course of pembrolizumab 200 mg IV Q3W for up to 35 administrations (up to ~2 years), but experienced disease progression, initiated a second course of pembrolizumab at the investigator's discretion, at 200 mg IV Q3W for up to 17 administrations (up to ~1 year).

Pruritus subjects affected / exposed occurrences (all)	35 / 309 (11.33%) 44	12 / 292 (4.11%) 12	0 / 8 (0.00%) 0
Rash subjects affected / exposed occurrences (all)	23 / 309 (7.44%) 25	13 / 292 (4.45%) 14	0 / 8 (0.00%) 0
Renal and urinary disorders			
Leukocyturia subjects affected / exposed occurrences (all)	0 / 309 (0.00%) 0	0 / 292 (0.00%) 0	1 / 8 (12.50%) 1
Endocrine disorders			
Hypothyroidism subjects affected / exposed occurrences (all)	25 / 309 (8.09%) 26	4 / 292 (1.37%) 4	0 / 8 (0.00%) 0
Musculoskeletal and connective tissue disorders			

Arthralgia			
subjects affected / exposed	37 / 309 (11.97%)	24 / 292 (8.22%)	1 / 8 (12.50%)
occurrences (all)	46	28	1
Back pain			
subjects affected / exposed	22 / 309 (7.12%)	30 / 292 (10.27%)	0 / 8 (0.00%)
occurrences (all)	24	33	0
Pain in extremity			
subjects affected / exposed	19 / 309 (6.15%)	24 / 292 (8.22%)	1 / 8 (12.50%)
occurrences (all)	20	28	1
Muscular weakness			
subjects affected / exposed	4 / 309 (1.29%)	4 / 292 (1.37%)	1 / 8 (12.50%)
occurrences (all)	4	4	1
Musculoskeletal chest pain			
subjects affected / exposed	11 / 309 (3.56%)	4 / 292 (1.37%)	1 / 8 (12.50%)
occurrences (all)	11	4	1
Infections and infestations			
Nasopharyngitis			
subjects affected / exposed	18 / 309 (5.83%)	14 / 292 (4.79%)	0 / 8 (0.00%)
occurrences (all)	22	20	0
Urinary tract infection			
subjects affected / exposed	16 / 309 (5.18%)	20 / 292 (6.85%)	0 / 8 (0.00%)
occurrences (all)	18	24	0
Metabolism and nutrition disorders			
Decreased appetite			
subjects affected / exposed	30 / 309 (9.71%)	38 / 292 (13.01%)	0 / 8 (0.00%)
occurrences (all)	31	43	0
Hyperglycaemia			
subjects affected / exposed	12 / 309 (3.88%)	17 / 292 (5.82%)	0 / 8 (0.00%)
occurrences (all)	14	21	0

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
28 January 2016	Amendment 1: The primary reason for this amendment was to update the description and proper formulation of eribulin in the Investigational Products section.
08 September 2017	Amendment 2: The primary reasons for this amendment were to revise the primary and secondary objectives, statistical analysis plan, and trial design of this study.
25 October 2017	Amendment 3: The primary reason for this amendment was to update the timing of the interim/final analysis and the target events for final analysis and sample size and power calculation in the Statistical Analysis Plan Summary section.
22 December 2017	Amendment 4: The primary reasons for this amendment were to update the Trial Summary, Trial Design, and several other sections of the protocol.
03 April 2018	Amendment 5: The primary reasons for this amendment were to revise the study objectives, hypotheses, and statistical analysis plan to include participants with PD-L1 positive tumors with a higher combined positive score (CPS) cutoff of $\geq 10$ (CPS $\geq 10$ ).

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
