

## Clinical trial results: Treatment of hypoglycemia following gastric bypass surgery Summary

EudraCT number	2015-001086-50
Trial protocol	DK
Global end of trial date	08 April 2017

### Results information

Result version number	v1 (current)
This version publication date	06 April 2020
First version publication date	06 April 2020

### Trial information

#### Trial identification

Sponsor protocol code	HypoGB2015
-----------------------	------------

#### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

### Sponsors

Sponsor organisation name	Dorte Lindqvist Hansen
Sponsor organisation address	Iykkevej 1, Køge, Denmark, 4600
Public contact	Caroline Christfort Gormsen, Køge Sygehus, cacg@regionsjaelland.dk
Scientific contact	Caroline Christfort Gormsen, Køge Sygehus, cacg@regionsjaelland.dk

Notes:

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	01 September 2018
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	08 April 2017
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To study the effects of 5 different pharmacological treatments on glucose metabolism in patients with postprandial hypoglycemia following gastric bypass surgery.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 June 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Denmark: 11
Worldwide total number of subjects	11
EEA total number of subjects	11

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	11
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Recruitment was performed as planned, although it was not possible to recruit the planned number of 16 participants within the given time period for the study conduction, and thus, only 11 participants were included in the study.

### Pre-assignment

Screening details:

At screening, all participants underwent at 6-day continuous glucose monitoring (CGM) to verify postprandial hypoglycemia. Furthermore, participants were examined for fasting hypoglycemia, fasting hyperinsulinemia and anemia.

### Period 1

Period 1 title	Overall study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Blinding implementation details:

Blinding was not performed due to different formulations and dosage frequencies of the studied therapeutics

### Arms

Are arms mutually exclusive?	No
<b>Arm title</b>	Baseline

Arm description:

The baseline arm consisted of a 6-day CGM recording and a mixed meal tolerance test (MMT) without treatment intervention.

Arm type	No intervention
No investigational medicinal product assigned in this arm	
<b>Arm title</b>	Acarbose

Arm description:

Participants completed 1 week treatment with acarbose 50 mg at every meal together with CGM. After 1 week treatment, participants underwent a MMT.

Arm type	Experimental
Investigational medicinal product name	acarbose
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

50 mg administered at every meal for 7 days.

<b>Arm title</b>	Sitagliptin
------------------	-------------

Arm description:

Participants completed 1 week treatment with sitagliptin 100 mg once daily together with CGM. After 1 week treatment, participants underwent a MMT.

Arm type	Experimental
Investigational medicinal product name	sitagliptin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:  
100 mg taken once daily for 7 days.

<b>Arm title</b>	Verapamil
------------------	-----------

Arm description:

Participants completed 1 week treatment with verapamil 120 mg once daily together with CGM. After 1 week treatment, participants underwent a MMT.

Arm type	Experimental
Investigational medicinal product name	verapamil
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:  
120 mg taken once daily for 7 days.

<b>Arm title</b>	Liraglutide
------------------	-------------

Arm description:

Participants completed three weeks treatment with liraglutide, titrated from 0.6 to 1.2 mg once daily. During the last week of liraglutide treatment, participants also wore CGM. After the three weeks treatment period, participants underwent a MMT.

Arm type	Experimental
Investigational medicinal product name	liraglutide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:  
0.6 mg once daily for 7 days and then 1.2 mg once daily for 14 days.

<b>Arm title</b>	Pasireotide
------------------	-------------

Arm description:

Participants received a 300 ug pasireotide injection 30 minutes prior to a MMT.

Arm type	Experimental
Investigational medicinal product name	pasireotide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Subcutaneous use

Dosage and administration details:  
300 ug given as a single dose prior to a mixed meal tolerance test.

<b>Number of subjects in period 1</b>	Baseline	Acarbose	Sitagliptin
Started	11	11	11
Completed	11	10	11
Not completed	0	1	0
Adverse event, non-fatal	-	1	-

<b>Number of subjects in period 1</b>	Verapamil	Liraglutide	Pasireotide
Started	11	11	11
Completed	11	11	11
Not completed	0	0	0
Adverse event, non-fatal	-	-	-

## Baseline characteristics

### Reporting groups

Reporting group title	Overall study
-----------------------	---------------

Reporting group description: -

## End points

### End points reporting groups

Reporting group title	Baseline
Reporting group description: The baseline arm consisted of a 6-day CGM recording and a mixed meal tolerance test (MMT) without treatment intervention.	
Reporting group title	Acarbose
Reporting group description: Participants completed 1 week treatment with acarbose 50 mg at every meal together with CGM. After 1 week treatment, participants underwent a MMT.	
Reporting group title	Sitagliptin
Reporting group description: Participants completed 1 week treatment with sitagliptin 100 mg once daily together with CGM. After 1 week treatment, participants underwent a MMT.	
Reporting group title	Verapamil
Reporting group description: Participants completed 1 week treatment with verapamil 120 mg once daily together with CGM. After 1 week treatment, participants underwent a MMT.	
Reporting group title	Liraglutide
Reporting group description: Participants completed three weeks treatment with liraglutide, titrated from 0.6 to 1.2 mg once daily. During the last week of liraglutide treatment, participants also wore CGM. After the three weeks treatment period, participants underwent a MMT.	
Reporting group title	Pasireotide
Reporting group description: Participants received a 300 ug pasireotide injection 30 minutes prior to a MMT.	

### Primary: Nadir blood glucose

End point title	Nadir blood glucose
End point description: Nadir blood glucose concentration during a mixed meal tolerance test with and without prior treatment intervention	
End point type	Primary
End point timeframe: End point was assessed during each study arm	

End point values	Baseline	Acarbose	Sitagliptin	Verapamil
Subject group type	Reporting group	Reporting group	Reporting group	Reporting group
Number of subjects analysed	11	10	11	11
Units: mmol/l				
arithmetic mean (standard error)	3.4 (± 0.2)	3.9 (± 0.2)	3.0 (± 0.2)	3.3 (± 0.2)

End point values	Liraglutide	Pasireotide		
------------------	-------------	-------------	--	--

Subject group type	Reporting group	Reporting group		
Number of subjects analysed	11	11		
Units: mmol/l				
arithmetic mean (standard error)	3.3 (± 0.2)	7.9 (± 0.4)		

## Statistical analyses

<b>Statistical analysis title</b>	linear mixed models
Statistical analysis description: The effects of treatment intervention was analysed using a linear mixed model analysis comparing treatment effect to baseline.	
Comparison groups	Baseline v Acarbose v Sitagliptin v Verapamil v Liraglutide v Pasireotide
Number of subjects included in analysis	65
Analysis specification	Pre-specified
Analysis type	equivalence
P-value	< 0.05
Method	Mixed models analysis

## Secondary: Time in hypoglycemia

End point title	Time in hypoglycemia
End point description: Time in hypoglycemia was assessed as minutes spend with blood glucose values <3.9 mmol/L during a mixed meal tolerance test with and without treatment intervention.	
End point type	Secondary
End point timeframe: during each study arm	

<b>End point values</b>	Baseline	Acarbose	Sitagliptin	Verapamil
Subject group type	Reporting group	Reporting group	Reporting group	Reporting group
Number of subjects analysed	11	10	11	11
Units: minutes				
arithmetic mean (standard error)	48 (± 12)	5 (± 3)	67 (± 10)	46 (± 11)

<b>End point values</b>	Liraglutide	Pasireotide		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	11	11		
Units: minutes				
arithmetic mean (standard error)	55 (± 9)	0 (± 0)		

## Statistical analyses

<b>Statistical analysis title</b>	mixed models analysis
Comparison groups	Baseline v Acarbose v Sitagliptin v Verapamil v Liraglutide v Pasireotide
Number of subjects included in analysis	65
Analysis specification	Pre-specified
Analysis type	equivalence
P-value	< 0.05
Method	Mixed models analysis

## Secondary: Peak blood glucose

End point title	Peak blood glucose
End point description:	Peak blood glucose level during a mixed meal tolerance test with and without treatment intervention
End point type	Secondary
End point timeframe:	
During each study arm	

<b>End point values</b>	Baseline	Acarbose	Sitagliptin	Verapamil
Subject group type	Reporting group	Reporting group	Reporting group	Reporting group
Number of subjects analysed	11	10	11	11
Units: mmol/l				
arithmetic mean (standard error)	10 (± 0.4)	6.6 (± 0.6)	9.6 (± 0.5)	9.3 (± 0.4)

<b>End point values</b>	Liraglutide	Pasireotide		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	11	11		
Units: mmol/l				
arithmetic mean (standard error)	9.4 (± 0.4)	14.5 (± 0.5)		

## Statistical analyses

Subject group type	Reporting group	Reporting group		
Number of subjects analysed	11	11		
Units: minutes				
arithmetic mean (standard error)	29 (± 5)	159 (± 6)		

## Statistical analyses

<b>Statistical analysis title</b>	linear mixed models
Comparison groups	Baseline v Acarbose v Sitagliptin v Verapamil v Liraglutide v Pasireotide

Number of subjects included in analysis	65
Analysis specification	Pre-specified
Analysis type	equivalence
P-value	< 0.05
Method	Mixed models analysis

### Other pre-specified: Time in hypoglycemia (CGM)

End point title	Time in hypoglycemia (CGM) <sup>[1]</sup>
End point description: Percentage of total recording time spend with glucose levels < 3.9 mmol/l during a 6-day continuous glucose monitorin with an without treatment intervention.	
End point type	Other pre-specified
End point timeframe: during each study arm except f (treatment with pasireotide)	

Notes:

[1] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.  
Justification: Continuous glucose monitoring (CGM) was not performed for the pasireotide arm, and thus this arm was not included in the statistics for all CGM outcomes.

End point values	Baseline	Acarbose	Sitagliptin	Verapamil
Subject group type	Reporting group	Reporting group	Reporting group	Reporting group
Number of subjects analysed	11	11	11	11
Units: percent				
arithmetic mean (standard error)	6.2 (± 1.3)	4.9 (± 1.1)	9.4 (± 2.5)	7.5 (± 3.1)

End point values	Liraglutide			
Subject group type	Reporting group			
Number of subjects analysed	11			
Units: percent				
arithmetic mean (standard error)	9.4 (± 2.6)

Dictionary version	10.0
--------------------	------

### Reporting groups

Reporting group title	Acarbose
-----------------------	----------

Reporting group description:

Participants completed 1 week treatment with acarbose 50 mg at every meal together with CGM. After 1 week treatment, participants underwent a MMT.

Reporting group title	Sitagliptin
-----------------------	-------------

Reporting group description:

Participants completed 1 week treatment with sitagliptin 100 mg once daily together with CGM. After 1 week treatment, participants underwent a MMT.

Reporting group title	Verapamil
-----------------------	-----------

Reporting group description:

Participants completed 1 week treatment with verapamil 120 mg once daily together with CGM. After 1 week treatment, participants underwent a MMT.

Reporting group title	Liraglutide
-----------------------	-------------

Reporting group description:

Participants completed three weeks treatment with liraglutide, titrated from 0.6 to 1.2 mg once daily. During the last week of liraglutide treatment, participants also wore CGM. After the three weeks treatment period, participants underwent a MMT.

Reporting group title	Pasireotide
-----------------------	-------------

Reporting group description:

Participants received a 300 ug pasireotide injection 30 minutes prior to a MMT.

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
23 October 2015	Change of inclusion and exclusion criteria.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

It was not possible to recruit 16 participants (as decided by protocol) and thus only 11 participants were included in the study. One participant did not complete the full study arm with acarbose treatment.
--

Notes:

---
