Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	18 April 2017
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	18 April 2017
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To demonstrate the superiority of sotagliflozin 400 mg versus placebo in the proportion of patients with glycosylated A1C <7.0% at Week 24 and no episode of severe hypoglycemia and no episode of diabetic ketoacidosis (DKA) after randomization.

Protection of trial subjects:

All subjects were required to read and sign an informed consent.

Background therapy:

All subjects received insulin therapy adjusted consistent with standard of care.

Evidence for comparator: -

Actual start date of recruitment	18 September 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Poland: 88
Country: Number of subjects enrolled	Slovakia: 26
Country: Number of subjects enrolled	Spain: 46
Country: Number of subjects enrolled	United Kingdom: 29
Country: Number of subjects enrolled	Belgium: 24
Country: Number of subjects enrolled	Bulgaria: 61
Country: Number of subjects enrolled	Czech Republic: 70
Country: Number of subjects enrolled	France: 29
Country: Number of subjects enrolled	Germany: 33
Country: Number of subjects enrolled	Hungary: 62
Country: Number of subjects enrolled	Italy: 31
Country: Number of subjects enrolled	Argentina: 23
Country: Number of subjects enrolled	Australia: 79
Country: Number of subjects enrolled	Canada: 172
Country: Number of subjects enrolled	Colombia: 33
Country: Number of subjects enrolled	Israel: 39
Country: Number of subjects enrolled	New Zealand: 53
Country: Number of subjects enrolled	South Africa: 98
Country: Number of subjects enrolled	United States: 409

Worldwide total number of subjects	1405
EEA total number of subjects	499

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	1304
From 65 to 84 years	101
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Subjects took part in the study at 133 investigative sites in Poland, Slovakia, Spain, United Kingdom, Belgium, Bulgaria, Czech Republic, France, Germany, Hungary, Italy, Argentina, Australia, Canada, Colombia, Israel, New Zealand, South Africa and United States from 18 September 2015 to 18 April 2017.

Pre-assignment

Screening details:

1755 subjects were screened and 1490 entered the Single-blind Placebo run-in Period. 1405 subjects with a diagnosis of Type 1 Diabetes were enrolled equally in 1 of 2 treatment groups: placebo or sotagliflozin 400 mg.

Pre-assignment period milestones

Number of subjects started	1405
Number of subjects completed	1402

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Lost to follow up: 1
Reason: Number of subjects	Withdrawal by subject: 2

Period 1

Period 1 title	Overall Trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Two placebo-matching sotagliflozin tablets daily, orally, before the first meal of the day for 24 weeks.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Coated tablet
Routes of administration	Oral use

Dosage and administration details:

Two tablets daily, by mouth, before the first meal of the day for 24 weeks.

Arm title	Sotagliflozin 400 mg
------------------	----------------------

Arm description:

Sotagliflozin 400 mg (two 200 mg tablets) once daily, orally, before the first meal of the day for 24 weeks.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Sotagliflozin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Coated tablet
Routes of administration	Oral use

Dosage and administration details:

Two 200 mg tablets once daily, by mouth, before the first meal of the day for 24 weeks

Number of subjects in period 1^[1]	Placebo	Sotagliflozin 400 mg
Started	703	699
Completed	624	605
Not completed	79	94
Physician decision	1	-
Adverse event, non-fatal	16	45
Other, unspecified	3	2
Death	-	1
Noncompliance with study drug	8	3
Lost to follow-up	8	10
Protocol deviation	1	1
Withdrawal by subject	42	32

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Three participants did not receive study drug and are not included in the modified Intent-to-treat (mITT) population that is used for the Baseline Period.

Baseline characteristics

Reporting groups

Reporting group title	Placebo
Reporting group description: Two placebo-matching sotagliflozin tablets daily, orally, before the first meal of the day for 24 weeks.	
Reporting group title	Sotagliflozin 400 mg
Reporting group description: Sotagliflozin 400 mg (two 200 mg tablets) once daily, orally, before the first meal of the day for 24 weeks.	

Reporting group values	Placebo	Sotagliflozin 400 mg	Total
Number of subjects	703	699	1402
Age categorical Units: Subjects			

Age continuous Units: years arithmetic mean standard deviation	42.4 ± 14.04	43.3 ± 14.17	-
Gender categorical Units: Subjects

Reporting group title	Sotagliflozin 400 mg
Reporting group description: Sotagliflozin 400 mg (two 200 mg tablets) once daily, orally, before the first meal of the day for 24 weeks.	
Subject analysis set title	Placebo (Baseline SBP \geq 130 mm Hg)
Subject analysis set type	Sub-group analysis
Subject analysis set description: Two placebo-matching sotagliflozin tablets daily, orally, before the first meal of the day for 24 weeks. Includes participants with Baseline Systolic Blood Pressure (SBP) \geq 130 mm Hg.	
Subject analysis set title	Sotagliflozin 400 mg (Baseline SBP \geq 130 mm Hg)
Subject analysis set type	Sub-group analysis
Subject analysis set description: Sotagliflozin 400 mg (two 200 mg tablets) once daily, orally, before the first meal of the day for 24 weeks. Includes participants with SBP \geq 130 mm Hg.	

Primary: Percentage of Participants with A1C <7.0% at Week 24 and No Episode of Severe Hypoglycemia and No Episode of DKA after Randomization

End point title	Percentage of Participants with A1C <7.0% at Week 24 and No Episode of Severe Hypoglycemia and No Episode of DKA after Randomization
-----------------	--

End point description:

The Primary composite endpoint included fasting blood samples for the assessment of Hemoglobin A1C to determine the participants with a value <7.0%. A central blinded adjudication process determined whether participants experienced either DKA or Severe Hypoglycemia. The primary efficacy analyses were based on the modified Intent-to-Treat (mITT) population, defined as all randomly assigned patients who had taken at least 1 dose of study drug.

End point type	Primary
End point timeframe: Baseline to end of treatment (Week 24)

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
16 October 2015	Amendment 1: -Instruction that patients taking concomitant digoxin (or other P-gp substrates) should be evaluated for dose adjustments as necessary (based on data from LX4211.1- 114-NRM) -Inclusion of Beta-Hydroxybutyrate (BHB) meter to be distributed to patients -Text clarification for temporary study drug interruption in case of AEs -Inclusion of all cases of metabolic acidosis as events of special interest (EOSI) (as per FDA recommendation)

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
