

Clinical trial results:

A Phase 1-2 Ascending Dose Study to Assess the Pharmacodynamics, Pharmacokinetics, and Safety of HSP-130 in Subjects With Non-Metastatic Breast Cancer Following Single Dose and Multiple-Dose Administration By Subcutaneous Injection.

Summary

EudraCT number	2015-002057-35
Trial protocol	HU ES
Global end of trial date	05 October 2017

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	31 May 2018
Is this the analysis of the primary completion data?	Yes
Primary completion date	05 October 2017
Global end of trial reached?	Yes
Global end of trial date	05 October 2017
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The main objective of the study was to characterize the pharmacodynamic (PD) response of absolute neutrophil count (ANC) and CD34+ count to PF-06881894 at doses of 3 mg and 6 mg when administered as a single subcutaneous (SC) dose without chemotherapy to determine whether it would be appropriate to study multiple doses of 3 mg in the context of background chemotherapy and to characterize the PD response of duration of severe neutropenia (DSN) in Cycle 1 to PF-06881894 over a range of doses when administered as single and multiple SC doses.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and in compliance with all International Council for Harmonization (ICH) Good Clinical Practice (GCP) Guidelines. All the local regulatory requirements pertinent to safety of trials subjects were followed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	21 December 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Hungary: 19
Country: Number of subjects enrolled	Spain: 6
Worldwide total number of subjects	25
EEA total number of subjects	25

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	17

From 65 to 84 years	8
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

A total of twenty-five subjects were enrolled at 3 centers in Hungary and 4 centers in Spain. Study started on 21 Dec 2015 and completed on 05 Oct 2017.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Cycle 0: HSP-130 3mg

Arm description:

Subjects who had not received background chemotherapy treatment in the study were administered a single dose of 3 milligram (mg) of HSP-130 subcutaneously (SC) at Day 1 of Cycle 0. Subjects were followed approximately 30 days after last dose of study treatment.

Arm type	Experimental
Investigational medicinal product name	HSP-130
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects received a single dose of 3 mg of HSP-130 SC at Day 1 of Cycle 0.

Arm title	Cycle 0: HSP-130 6mg
------------------	----------------------

Arm description:

Subjects who had not received background chemotherapy treatment in the study were administered a single dose of 6 mg of HSP-130 SC at Day 1 of Cycle 0. Subjects were followed approximately 30 days after last dose of study treatment.

Arm type	Experimental
Investigational medicinal product name	HSP-130
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects received a single dose of 6 mg of HSP-130 SC at Day 1 of Cycle 0.

Arm title	Cycles 1-4: HSP-130 6mg
------------------	-------------------------

Arm description:

Subjects in Cycles 1-4 received background chemotherapy treatment at Day 1 and were administered a single dose of 6 mg of HSP-130 SC at Day 2 of Cycles 1-4 (each cycle was approximately 3 weeks if there were no chemotherapy treatment delays). Subjects were followed approximately 30 days after last dose of study treatment.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	HSP-130
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects received a single dose of 6 mg of HSP-130 SC at Day 2 of Cycles 1-4.

Number of subjects in period 1	Cycle 0: HSP-130 3mg	Cycle 0: HSP-130 6mg	Cycles 1-4: HSP-130 6mg
Started	6	6	13
Completed	6	6	13

Other pre-specified: Number of Subjects With Treatment-Emergent Adverse Events (AEs) and Serious Adverse Events (SAEs)

End point title	Number of Subjects With Treatment-Emergent Adverse Events (AEs) and Serious Adverse Events (SAEs)
-----------------	---

End point description:

An AE was any untoward medical occurrence in subjects who received study drug without regard to possibility of causal relationship. SAE was an AE resulting in any of the following outcomes or deemed significant for any other reason: death; initial or prolonged inpatient hospitalization; life-threatening experience (immediate risk of dying); persistent or significant disability/incapacity; congenital anomaly. Treatment Emergent Adverse Event (TEAE) was adverse event that started or worsened in severity after the HSP-130 administration up to and including 30 days post HSP-130 administration (up to Day 94). AEs included both serious and non-serious. Safety analysis set included all subjects who received at least 1 dose of study medication.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Baseline up to approximately Day 94

Adverse event reporting additional description:

Same event may appear as both an AE and SAE. However, what is presented are distinct events. An event may be categorized as serious in one subject and as non-serious in another, or a subject may have experienced both a serious and non-serious event.

Assessment type	Non-systematic

Reporting groups

Reporting group title	Cycle 0: HSP-130 3mg
-----------------------	----------------------

Reporting group description:

Subjects who had not received background chemotherapy treatment in the study were administered a single dose of 3 mg of HSP-130 SC at Day 1 of Cycle 0. Subjects were followed approximately 30 days after last dose of study treatment.

Reporting group title	Cycle 0: HSP-130 6mg
-----------------------	----------------------

Reporting group description:

Subjects who had not received background chemotherapy treatment in the study were administered a single dose of 6 mg of HSP-130 SC at Day 1 of Cycle 0. Subjects were followed approximately 30 days after last dose of study treatment.

Reporting group title	Cycles 1-4: HSP-130 6mg
-----------------------	-------------------------

Reporting group description:

Subjects in Cycles 1-4 received background chemotherapy treatment at Day 1 and were administered a single dose of 6 mg of HSP-130 SC at Day 2 of Cycles 1-4 (each cycle was approximately 3 weeks if there were no chemotherapy treatment delays). Subjects were followed approximately 30 days after last dose of study treatment.
