## General information about the trial

Main objective of the trial:

To determine a safe and tolerable dose of palifermin in pediatric subjects of different age groups when administered once daily for 3 consecutive days before and 3 consecutive days after a myeloablative chemo-radiotherapy conditioning regimen with allogeneic HSCT.

Protection of trial subjects:

The study was carried out in compliance with the protocol, the principles laid down in the Declaration of Helsinki (1996 Version), in accordance with the International Conference on Harmonization (ICH) Harmonised Tripartite Guideline for Good Clinical Practice (GCP) and in accordance with applicable regulatory requirements. Essential documents will be retained in accordance with ICH GCP.
